The End.

VARIA

TREASURE TROVE.

In a plot of ground in a suburb near Vincennes has been found a quantity of gold, which will probably give rise to some litigation as to ownership. A workman employed by a contractor was digging up the ground and came upon an earthen pot with a cover. When he opened it he discovered that it was filled with small five and ten franc gold pieces. He told the contractor, who removed the pot with its contents to his house. A few days later the same workman unearthed two more pots like the first, containing ten and twenty franc gold coins. The employer again took charge of the treasure and removed it to his house. The total amount of gold in the three pots is said to be about £ 8,000. According to French law, part of a treasure-trove belongs to the actual finder, and another part to the owner of the ground. The workman naturally expected to get his share of the treasure, but his employer, it is alleged, has refused to look at the matter in that light. The result is that the actual finder, who is too poor to retain a lawyer, has applied for leave to sue in formâ pauperis. As to the original owner of the gold, he or she is supposed to have been some person who hid it in the ground during the war of 1870 and probably perished in those troubled times. At any rate, the rightful heirs to the pots of gold would not easily be traced.

THE NEW COINAGE.

It has been suggested that Wales should be represented in the design for the new coinage. Taffy's desire is reasonable enough, but we fear its gratification would prove a troublesome problem for the designer. England, Ireland and Scotland, possessing national emblems of an artistic floral character — the rose, shamrock and thistle — present no difficulty. But how are we to satisfy the aspirations of the Welsh? The leek, although an eminently useful and pleasantly succulent vegetable, cannot be called, by any stretch or imagination, a thing of beauty. Nor can we conceive in what manner it could be combined effectively with the English rose. If Wales is determined to have its way, why not adopt the "marrow bone"? — inseparably connected with the name of Taffy — as its national emblem? A marrow bone garnished with sprigs of shamrock, rosebuds, and thistle heads, in low relief, might meet the case to the satisfaction of all parties. But if Wales is to be gratified in this respect, why not the Isle of Man also? The three Legs of Man, stamped on the reverse side of our elusive coins, would not only be quaint and interesting, but would serve as a constant reminder of their fleeting nature.

AMTLICHE RECHTSCHREIBUNG.

Die neue Rechtschreibung scheint in den höchsten Amtsstellen immer noch Gegner zu haben. Der König von Preussen verleiht, nach der Schreibweise des Patents, noch heute den Titel: "Justizrath", und nur der das Patent begleitende Erlass des Ministers schreibt "Justizrat". Nach der amtlichen Rechtschreibung ist der Laut sz mit grossen lateinischen Buchstaben sz zu schreiben: trotzdem sieht man noch heute die Ländernamen im Herrschertitel auf den Münzen preussischen und reussischen Gepräges mit ss geschrieben, dasselbe steht auf den preussischen Stempelmarken, während die neuen Gerichtskostenmarken, sowie die Eisenbahnfrachtbriefmarken sz aufweisen. Der GROSHERZOG ist unter den jetzigen Herrschern Badens und Hessens glücklich beseitigt, das Wort wird auf ihren Münzen wie auf denen Mecklenburgs und Oldenburgs aber mit ss geschrieben, nur die Hochzeitsmünzen Sachsen-Weimars haben das richtige sz. Bayern und Württemberg schreiben KOENIG, Bayern

teilweise KŒNIG, nur Preussen und Sachsen schreiben richtig KÖNIG ; Reuss ä. L. hat sogar FÜRST REUSS AELTERER LINIE, schreibt also den ü=Umlaut richtig, den ä =Umlaut unrichtig auf seinen Münzen. All diese Schönheitsfehler bedürfen der Beseitigung. Ebenso unschön ist, wenn nicht nur bei Denkmünzen, sondern auch bei andern Reichsmünzen — Hessen, Sachsen-Koburg-Gotha, Reuss ä. L. — die Buchstabentypen der Bildseite von denen der Adlerseite abweichen; jene sind viel schöner gestaltet und sollten die veralteten langweiligen Formen der Adlerseite, die noch auf den deutschen Münzen durchweg üblich find, überhaupt ersetzen. Auch dürtte das jetzt 22 Jahre alte Bildnis des Kaisers der Gegenwart nicht mehr entsprechen und durch ein neues zu ersetzen sein. In andern Staaten, z. B. Baden, Hessen, Sachsen-Miningen, Anhalt ist das Münzbild des Fürsten teilweise mehrfach geändert worden.

His Majesty the King has been graciously pleased to become patron of the Royal Numismatic Society in succession to the late King Edward VII.

***

BRITANNIA ON THE FLORIN

Since the year 1901 all the British Imperial silver florins bear on the reverse the figure of Britannia standing on the prow of a vessel on which is the date. There is one very interesting fact about this representation of Britannia. The lady who stood for the model of the figure was the Honourable Susan Hicks-Beach, a daughter of Viscount Saint Aldwyn, formerly Chancellor of the Exchequer and ex-officio Master of the Royal Mint, London.

Of course, the original design for the coinage is worked out on a much larger scale than the size of the actual coin to which it is afterwards reduced, and the original design of the Britannia figure is now a cherished possession of Lord Saint Aldwyn and his family.

Henry GARSIDE.

***

SHILLINGS DATED 1889.

In the year 1889 two varieties of the British Imperial silver shilling were coined in the Royal Mint, London. One had on the obverse a small bust of Queen Victoria similar to that impressed upon shillings of the Jubilee design, dated 1887 and 1888. This variety is very rare. In May, 1889, the bust of the Queen on the obverse of the shillings was enlarged, but this variety is not rare.

Henry GARSIDE.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS

THE ANCIENT COINS OF SICILY.

(*Continued from col. 12318.*)

HIMERA.

Himera was situated on the north coast of Sicily about twenty-seven miles to the east of Palermo, and about eighty west of Mylae, from which the first settlers are said to have come. Himera was for a long time the most westerly of all the Greek cities. It was almost due north of Acragas, from which it was about fifty miles distant. Thucydides speaks twice of Himera as the only Greek city on the north shore (VI, 62, VII, 58). The name is so associated with the great battle which took place at the close of this first period of the Greek coinage of Sicily that the name suggests to one's mind the battle rather than the town, just as do the names of Waterloo and Sedan, and in Magna Graecia, of Sagras. The city of Himera is not associated with the names of any great men, for Gelo, the victor of the great fight, belonged to Syracuse, and Theron to Acragas.

Thucydides (VI, 5) :

"Himera was founded (ᾠκίσθη) from Zancle by Euclides, Simus, and Saco, and most of those who went to the Colony (ἀποικίαν) were Chalcidians, though there were also united with them some exiles from Syracuse, who had been defeated in a strife of factions — the Mylætidæ, as they were called."

The language was a mixture of the Chalcidian and Dorian; but the Chalcidian were the prevailing institutions (νόμισμα).

Strabo (VI, 272) merely states "The Zanclæi of Mylæ founded Himera"

Diodorus Siculus (XIII, 62) in his account of the destruction of the city in 409 B.C. says :

"The city was completely destroyed two hundred and forty years after its foundation." Thus we learn that it was settled about 648 B.C. Aristotle records (Rhetoric "II, c. xx)". But there is a fable such as that of Stesichorus against Phalaris, and of Æsop's against a certain demagogue. For when the Himerians had chosen Phalaris for their general with absolute authority, and were about to give him a guard for his body, Stesichorus after other things which he had said addressed this fable to them — that a horse once had sole possession of a meadow, but that a stag coming into it, and destroying the pasture, the horse wishing to be revenged of the stag asked a man if he should be able with his help to punish the stag. But the man answered that he should be able if he would suffer himself to be bridled and let him get on his back armed with darts. The horse therefore having consented, the man having got on his back, instead of taking vengeance on the stag made the horse his slave. In like manner said he do you Himarians take care lest wishing to be revenged of your enemies you suffer the same things as the horse. For now you have received a bridle in having chosen a general with absolute authority, but if you allow him a guard and suffer him to get on your backs, you will immediately be esclaved by Phalaris." This well known fable is beautifully told by Horace Epis. I, 10, 34.

Suidas represents Phalaris as reigning in the 52nd Olymp. about 570 B.C. We have no other authority than Aristotle for Phalaris having ruled in Himera.

The only other incident known to us in the early history of Himera is the fact that Scythes, the king of Zancle, fled to Himera on his expulsion from Zancle (Herodotus, VI, 24).

"Scythus, king of the Zanclaeans, made his escape from Inycum to Himera, and from thence passed over to Asia."

TERILUS.

All that we know of Terilus, the tyrant of Himera, who brought about the great war in the year 480 B.C. is told by Herodotus (VII, 165).

He says that Gelon would have assisted the Greeks against the Persians "had not Terilus, son of Crinippus, who was tyrant of Himera, being expelled from Himera by Theron, son of Œnesidemus, king of the Agrigentines, at that time brought in an army of 300,000 men, consisting of Phoenicians, Libyans, Iberians, Ligyans, Elisyeians, Sardinians, and Cyrnians, under the conduct of Amilcar, son of Hanno, king of the Carthaginians. Terilus persuaded him by the hospitality which existed between them, and specially by the zeal of Anaxilaus, son of Critines, who, being tyrant of Rhegium, and having given his children as hostages into the hands of Amilcar, induced him to enter Sicily in order to revenge the injury done to his father-in-law, for Anaxilaus had married a daughter of Terilus, whose name was Cydippe. In addition to this, they say that it happened on the same day that Gelon and Theron conquered Amilcar the Carthaginian in Sicily and the Greeks conquered the Persians at Salamis. I am informed that Amilcar, who was a Carthaginian by his father, and a Syracusan by his mother, and chosen king of Carthage for his virtue, when the engagement took place and he was defeated in battle, vanished out of sight, for he was seen nowhere on the earth either alive or dead. though Gelon had search made for him everywhere. The following story is also related by the Carthaginians themselves, who endeavour to give a probable account that the barbarians fought with the Grecians in Sicily from the morning till late in the evening, for it is said that the conflict lasted so long, and during this time, Amilcar, continuing in the camp, offered sacrifices and observed the omens, burning whole victims on a large pile; and when he saw the defeat of his own army as he happened to be pouring libations on the victims he threw himself into the flames, and thus, being burnt to ashes, disappeared".

Of the fate of Terilus himself, after the defeat of his allies, we know nothing. Telemachus the great-grandfather of Theron, had distinguished himself as a leader of the revolution which overthrew the power of Phalaris.

Himera, after the defeat of the Carthaginians, was subject to Theron, who thus ruled over two of the most powerful cities in Sicily. He was in close alliance with Gelon, who ruled over Syracuse and Gela, to whom he had given his daughter Demarete in marriage. Gelon appears to have borne the greatest part in the fight under the walls of Himera.

This epoch-making victory was to Sicily what Salamis was to Greece. Damarete, the wife of Gelo, is reported by Diodorus to have received a present from the defeated Carthaginians, for whom she had obtained somewhat easier terms than they could have expected. Others, as Pollux, say that she and the Syracusan women provided treasure with which the Greeks might meet the barbarians. Either from this present, or from the women's treasure the celebrated coins called Demareteia were issued.

When Theron drove out Terilus he was probably acting by the invitation of a party in Himera opposed to that tyrant. By Theron's victory the power of the Greeks extended from Acragas in the south to Himera in the north, thus forming a barrier to the Carthaginians who desired to advance to the east. Terilus and Anaxilas were traitors to the cause of Hellas.

We have two accounts of the battle, the Carthaginian story as told by Herodotus, and the Sicilian story as told by Diodorus.

Diodorus (XI, 20) : "At this time the Carthaginians, who in a treaty concluded with the Persians had engaged themselves to attack the Greeks in Sicily, made great preparations for the war.

"When these were done they appointed Hamilcar to the command, the most celebrated of their generals. He departed from the port of Carthage with all his host. He had a land army of at least three hundred thousand men, and a fleet composed of more than two thousand long ships, without counting more than three thousand transports, loaded with provisions. In crossing the Libyan Sea he met with a tempest which caused him to lose the transports bearing horses and war-chariots. Arrived in the port of Panormus, he said that he regarded the war as good as ended, and that he had feared lest the sea should preserve the Sicilians from the dangers which were about to overwhelm them.

"After having given his troops three days rest and repaired the damages to his fleet, he went at the head of his army to Himera followed by the fleet. On his arrival in the neighbourhood of the city he established two camps, one for his land troops, and the other for his sailors. He caused all the long ships to be drawn up

on land, and surrounded them with a deep trench and a wooden wall. He fortified the camp of the land army opposite the city, and extended it from the neighbourhood of the fleet up to the hills around the city. At length, having occupied all the western side, he caused all the provisions to be disembarked, and sent away the transport vessels, ordering them to go to Sardinia to fetch more food and munitions. He then marched with the best of his soldiers upon Himera, and defeated the inhabitants who made a sortie to meet him, killing a great number, and spreading consternation among the citizens. Theron, ruler of Agrigentum, who defended Himera with a considerable force, immediately sent messengers to Syracuse to bring Gelon as soon as possible to the aid of the Himerians. At the news of their discouragement, Gelon, who was ready with his army, started in haste from Syracuse with at least fifty thousand foot-men, and more than five thousand horse. After a rapid march he drew near to the city of Himera and restored courage to the inhabitants who were frightened by the power of the Carthaginians.

"He chose a site near the city convenient for his camp and fortified it with a deep ditch and strong palisade. He sent out his cavalry to attack the enemy dispersed in the country around in search of food, and suddenly attacking the men in disorder, he took as many prisoners as each horseman could bring in, more than ten thousand of these were brought to Himera.

"Gelon was received with gratitude and honour, and the citizens commenced to despise their enemies; Gelon, out of bravado, caused all the gates to be opened which Theron had walled up through fear, and he caused others to be constructed, to facilitate the entrance of convoys bearing food. Gelon, being a man remarkable for his intelligence and military talents, immediately thought of a plan for destroying the barbarians without incurring much danger to themselves. Chance favoured his design. Seeing the state of affairs, he resolved to burn the enemy's fleet. Hamilcar was then in the camp of his naval army arranging to offer a solemn sacrifice to Neptune, when a troop of horsemen brought to Gelon a messenger carrying letters from the Selinontines. The letters stated that they were sending to Hamilcar the horsemen he had demanded of them and that they would arrive on the very day he had himself appointed, that day being the same one on which Hamilcar was about to offer sacrifice. Gelon detached his own cavalry with the order to make a detour and to advance at dawn and to present themselves as if they were the Selinontines before the naval camp of the Carthaginians, and as soon as they had been admitted within the wooden wall, to kill Hamilcar and burn his ships. At the same time he posted on the hills round the city sentinels charged to give the signal agreed upon when they saw the horsemen within the walls. Gelon, as soon as day dawned arranged his troops and awaited the signal. When the sun rose, the horsemen directed their way to the naval camp of the Carthaginians, and having been received as allies, fell upon Hamilcar occupied with the sacrifice, killed him, and set fire to the fleet. Warned by the signal, Gelon put himself at the head of his army arranged in his line of battle, and began to attack in good order the camp of the enemy. The Phoenician chiefs soon ordered their troops out to meet the Sicilians, and fought valiantly. The trumpets sounded the signal of battle in the opposing camps, and the two armies contended as to who could raise the loudest war cries. The carnage was terrible, and victory swayed uncertainly sometimes on one side, sometimes on the other, when all at once the flames arose from the burning ships, and at the same time the report was spread of the death of Hamilcar. The Greeks, animated by hopes of victory, rushed on the barbarians, who, seized with panic sought only their safety in flight.

"As Gelon had ordered no quarter to be given, a great number of the fugitives were killed with the sword. The loss of the enemy amounted to more than one hundred and fifty thousand men.

"Those who escaped this carnage fled into a place naturally fortified where they resisted the attack of their assailants, but as the place was waterless they suffered from thirst and were obliged to give themselves up to the conqueror.

"Gelon acquired by this glorious victory, won by his strategy, an immense renown, not only among the Sicilians, but among all nations. In the memory of man no general had ever employed such a stratagem, nor had in one single combat defeated so many barbarians, nor made so many prisoners."

THE TYPES.

The cock has been explained as a pun on the name of the city, — the bird which ushers in the day (ἡμέρα).

Plato in the "Cratylus" (§ 74, p. 418) makes Socrates say "in very ancient times they called the day either ἱμέρα or ἐμέρα, which is called by us ἡμέρα. Observe that only the ancient form shows the intention of the giver of the name; the reason of the name is that men long for and love the light coming after the darkness, which is thence called ἱμέρα (καὶ ἱμείρουσιν ἐκ τοῦ σκότους).

The cock appearing on coins of Carystus in Euboea has been regarded as a pun upon the name of that city. The cock was sometime called the herald κᾶρυξ or κᾶρυξ, a play on καρυστος was thus made. These Euboean coins were issued a little later than those of Himera. A good example of this use of κᾶρυξ is found in Aristophanes's play *Ecclesiazusa* where he represents a woman saying "It is time to go, for the herald just now crowed the second time, as we were setting out."

Some Cretan coins may also be noted as bearing the cock as a symbol of the bird of day.

The Cretan deity Velchanos was the Zeus of the Cretans, and regarded as the god of daylight, Hesychius explains the name as Γελάνος ὁ Ζεὺς παρὰ κρησίν. These Cretan coins are of later date than those of Himera being dated about 300-250 B.C. by Dr Head.

In Plutarch's work "de Pythiæ oraculis (p. 400, c.)": He who painted a cock on the hand of the son of Apollo wished to signify the morning hour, and the wished-for rising of the sun (καὶ καιρὸν ἐπιούσης ἀνατολῆς).

The more common significance of the cock among the ancients was as a symbol of the healer Asklepios, the son of Apollo, for cocks were usually offered to him in sacrifice.

Near Himera were hot springs celebrated for their healing properties, and it is therefore probable that the more usual significance of the symbol was meant by the mint-masters rather than a pun on the name of the city.

In the period of finest art a jet of water issuing from a lion's head fountain probably represented the healing stream thus commemorated.

When the old city of Himera was destroyed a new town called the Baths of Himera Θερμαὶ Ἱμέραι was obviously so named from the healing stream.

Diodorus (IV, xxiii) tells us the legend connected with their discovery. He says that the Nymphs provided them for the refreshment of the weary hero Heracles.

On the coins of Selinus the cock most certainly signifies the bird of Asklepios, for it stands before his altar. These coins of Selinus are much later in date, but they afford interesting evidence that the cock was used in Sicily as the symbol of the healer.

REVERSE TYPE.

The early mints of Zancle, Syracuse, and Himera all adopted a square pattern for the reverse type, but at Zancle and Syracuse a small centre piece with a device was added, while at Himera the simple mill-sail pattern alone appeared.

The small centre piece was perhaps copied from the early coins of Thebes, which must have been well-known to Chalcidian Greeks. For notes on the mill-sail types and the possible connection with solar symbols confer p. 41, 42 "Common Greek coins."

FABRIC.

In the *Numismatic Chronicle*, 1876, new series, vol. XVI, p. 18, in an article by Prof. Percy Gardner "Sicilian Studies" we read "If any Sicilian coin be taken up, there will be noticed a small projecting piece on the edge at each side. This proves that the workmen of the mints cast at once in a series of small round chambers connected by narrow channels a number of lumps of metal of the same size and fineness.

*

"These lumps were afterwards when the metal was nearly or quite cold impressed with stamps on the obverse and reverse, and the narrow bands severed which connected lump with lump.

"This process of first casting and then striking went on at the Sicilian mints until quite a late period."

COINS OF THE FIRST PERIOD.

I. Drachms of the Aeginetan Standard [1].

Weight ideal 90 grains, specimens from 89.5-81.5. Size .85, on specimen .9.

Obv. A cock advancing to left : border of dots larger than usual.

The following inscriptions appear on specimens in the Brit. Mus. IN, HI, V·Y M ΛEA

Rev. Square device, consisting of four incuse triangles, and four in relief, the whole arranged like the sails of a mill, all within a radiate border around the square device.

II. Litra. Weight 13.6. Size .45.

Obv. Similar to No 1.

Rev. Similar to No 1.

III. Drachm. Obv. Similar to No 1.

Rev. A hen to right enclosed by linear square within incuse square.

One some specimens are unexplained inscriptions on the Obv. as V / V, IV as on Rev. ƎMIH, HIME IATON. V / V

IV. Litra. Weight 13.6. Size .45.

Obv. Hen to left.

Rev. Similar to that of No 1.

V. Very small coin. Weight 2.9. Size .25.

Obv. Cock advancing to right.

Rev. Incuse square divided into eight triangles by bars crossing at the centre.

(To be continued.)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C.500 — A.D.1900.

(Including the names of several hitherto unpublished artists.)

One-hundred-and-forty-sixth article.

(Continued from col. 12334.)

SCHARFF, FERDINAND LEOPOLD (*Austr.*). Provisional Administrator of the Prague mint in 1713; Mint-master from 1714 to 1746. His issues are signed **F. S.** or *F.S.* in monogram. Thus signed are: Prague currency in gold, silver and billon of Charles VI. (1714-1740) and Maria Theresia (1740-1746); also Ducats and Thalers of Francis Joseph, count of Schlick, 1716.

BIBLIOGRAPHY. — E. Fiala, *op. cit.* — *Mittheil. des Klubs*, &c., 1891, p. 173.

SCHARFF, JOHANN MICHAEL (*Austr.*). Mint-engraver at Vienna, Medallist and Gem-engraver of merit; pupil of Luigi Pichler; and father of Anton Scharff. He was born at Hütteldorf near Vienna on 11. November 1809, and died in Vienna on 22. May 1855. His family came originally from Germany, but his wife, *née* Sedlak, was a Viennese, although the daughter of a Bohemian.

Joh. M. Scharff was apprenticed at the Vienna Mint Engraving Academy, and as early as 28. June 1832, became a salaried assistant; 8. April 1834 he obtained a special grant of 300 florins; 13. February 1836, a Prize of 225 florins; 30. October 1840, another Prize of 100 Florins for a medal with bust of Archduke Franz Carl; 14. December 1840, a rise of 10 florins monthly. In 1842 the government sent him to Rome for two years to perfect himself in

Francis, Count Kinsky, 1840.

the art. On 31. January he was appointed provisionally Assistant-engraver at the Vienna mint, and on 7. March 1855, this appointment was made permanent.

Most of Scharff's productions concern Viennese events or notabilities: Field Marshal Alfred Prince Windischgrätz, 1854; — Inauguration of the Raab Railway, 1841; — Franz Count Kinsky, 1846 (*illustrated*); — Battle of Temesvar, 1849; — Joseph Count Radetzky, 1850 (2 var.); — Julius Freiherr von Haynau; — Johann Würth, Chief-engraver at the Vienna mint, 1845 (unique); — Inauguration of the Francis I. Monument at Gratz, 1841; — Foundation of the Institute for the Blind at Vienna, with bust on obv. of Archduke Franz Karl; — Foundation of the Carmelite Hospital, Leopoldstadt, Vienna; — Empress Maria Anna of Austria, Foundation of a Childrens' Hospital 1847 (Rℒ. *illustrated*); — Martin Luther, facing portrait (only known by a lead impression); — Frau Sedlack, wax Portrait; — Zeichner, Mint-engraver at Vienna, wax Portrait.

Childrens' Hospital at Vienna, 1847.

J. M. Scharff exhibited regularly at the Vienna annual Art Exhibitions, from 1830-1841. In 1830. Wax Portrait; — Theseus, engraved in steel; — 1832. Antique head, in wax; — 1834. Ajax abducting Kassandra, steel matrix; — 1536. Orpheus and Eurydice; — Hagar in the Wilderness; — 1837. Rebecca at the well — 1841. Memorial medal of Ferdinand I.; — Opening of the Institution for the Blind, &c.

The last official work by this engraver was the Wedding Double Gulden of Francis Joseph II., 1854, the dies for which he did not complete.

Scharff was also a clever Gem-engraver. There is a fine Portrait-intaglio of Francis Joseph I. by him, which is preserved in the Vienna Imperial Museum, and Portrait-cameos of Ferdinand I.; — Frau Sedlak; — Count Radetzky, &c.

There is a Portrait-medal of J. M. Scharff by his son Anton, executed in commission for the "Club der Münz und Medaillenfreunde in Wien".

SCHATTAUER, GEORG (*Germ.*). Mint-master at Oettingen, Neuburg, 1674-1688.

SCHATTAUER, JOHANN FRIEDRICH (*Germ.*). Mint-master at Babenhausen, 1676-1677.

SCHAUBACH, KONRAD (*Germ.*). Mint-master at Frankfort, Nördlingen, 1423.

SCHAUBEN. *Vide* **NICOLAUS SCHWABE.** Medallist of the latter end of the sixteenth century and beginning of the seventeenth, at Dresden, *circ.* 1586-1602, and Copenhagen, 1590-1599; Mint-master there, 1602-1628, in which year he was pensioned off. In 1586 he was a pupil of Valentin Maler at Nuremberg. He signed: **N. S.**; — **NIC. SC. F.**; — **NICOLA-SCVAP. FEC.**

SCHAUMBERGER, GOTTLIEB (*Bohem.*). Mint-master at Prague, 1747-1755. He issued currency under Maria Theresia.

SCHAUPP (*Germ.*). Mint-engraver at Biberach, 1730-1757.

SCHAUSS-KEMPFENHAUSEN, Dr EMIL VON (*Germ.*). Born at Munich on 8. February 1833, became Assayer to the Mint there in 1858; appointed second Warden of the Mint in 1867, Mint-master in 1871, Mint-master-general 1879, and in March 1883 Royal Mint-director; died on 29. November 1900 at Munich.

SCHEBORN. *Vide* **SCHEEBORN** *infra.*

SCHEDEL, ERHARD (*Germ.*). Mint-master at Nuremberg, 1586-1588.

SCHEDEL VON GREIFENSTEIN, ZACHARIAS (*Austr.*). Mint-master-general to the Counts of Schlick, 1631.

SCHEDLICH, ANDREAS (*Austr.*). Mint-engraver at Joachimsthal, *circ.* 1613. He was a member of a well-to-do family of Joachimsthal, and probably a son of Bartel Schedlich, who died in 1570. In 1593 the Engraver was appointed a city-counsellor, and became Burgomaster at the beginning of the seventeenth century. His name occurs in the Joachimsthal Mint records in 1613 as Die-cutter of a new issue of Thalers and Raitpfennigs.

Bibliography. — *Katalog der Münzen- und Medaillen-Stempel-Sammlung des K. K. Hauptmünzamtes in Wien*, IV, 1332.

SCHEEBORN, HANS (*Germ.*). Die-cutter at Breslau, 1656.

SCHEELE, also **SCHELE, ANDREAS** (*Germ.*). Goldsmith, later Mint-master at Hanover, 1666-1674; then conjointly at Hanover and Eimbeck, 1668-1672; and from 1676 Warden to the Ducal mint of Hanover.

SCHEERER, JAKOB (*Germ.*). Issuer of Gulden (Guldenmünzer) at Breslau, 1577. (*Vide* Friedensburg, *Neuere Münzgeschichte Schlesiens.*)

SCHEFFEL, PETER (*Germ.*). Mint-master at Vörde, 1618-1620.

SCHEFFER, ADAM (*Austr.*). Mint-contractor at Brünn, XVIIth century.

SCHEGA, BARTHOLOMAEUS (*Germ.*). A younger brother of F. A. Schega, was living at Vienna in 1749; the celebrated medallist Anton Wideman was taught under him.

SCHEGA, FRANZ ANDREAS (*Germ.*). Engraver and Medallist, born 16. January 1711 at Rudolphwerth (Neustädtel) in Krain, died blind at Munich in 1787. He filled the post of Mint-engraver and Medallist at Munich from 1738, and was appointed Medallist to the Court in 1751, which office he held until 1774.

Schega was self-taught and rose to uncommon ability in his profession. He was apprenticed to an armourer. Hedlinger called him "the first Die-engraver in Europe".

He is the author of a series of Portrait-medals of Bavarian rulers: 1. Otto III.; — 2. Ludwig V.; — 3. Otto IV.; — 4. Ludwig VI.; — 5. Ludwig IV.; — 6. Stephan II.; — 7. Johann II.; — 8. Ernst I.; — 9. Albert III.; — 10. Albert IV.; — 11. Wilhelm IV.; — 12. Albert V.; — 13. Wilhelm V.; — 14. Maximilian I.; — 15. Ferdinand Maria; — 16. Maximilian II.; — 17. Charles VII.

His other best known medals are: Charles Albert, Elector, 1739; — His Election as Emperor at Frankfort-on-Main 1742 (9 var.); — Portrait-medallion of Charles VII. and Empress Maria Amelia, 1742; — Charles VII. and consort, 1742 (Bl. by I. M. Bückle); — Maria Anna Karolina, consort of Prince Ferdinand Maria, 1750 (2 var.; signed: **SCHEGA F.** and **F. A. S.**); — Clemenz Franz de Paula, and consort, undated (*illustrated*); — Clemenz Franz

Self Portrait of F. A. Schega.

received a member of the Arcadian Society, 1755; — His appointment as Grand Master of the Order of St. Michael, 1764; — Clemens August elected Grand Master of the Teutonic Order, 1750; — Prince Johann Theodor, bishop of Freising, made a cardinal, 1746; — Marriage medal of Prince Frederick Christian of Poland with Princess Maria Antonia of Bavaria, undated; — Marriage medal of Maximilian Joseph III., 1747 (3 var.); — Portrait-medallion of Maximilian Joseph III., Elector of Bavaria, and con-

Clemenz Franz de Paula and consort.

sort Maria Anna, undated (1759); — Portrait-medals of the same (*Witt.* 2236-42; 7 var.); — Marriage medal of Maria Josepha, daughter of Charles VII. with the Markgrave Ludwig Georg of Baden-Baden, 1755; — Marriage-medal (by proxy) of Josepha, daughter of Charles Albert, with the Roman King Joseph (later Emperor Joseph II.), 1765 (2 var.); — Self-portrait of the artist (obv. *illustrated*); — Æ. Prize-medal, for horse-breeding, 1771 (with bust of Maximilian Joseph III.); — Georg Friedrich Dittmer, 1774; — Maximilian Emmanuel, Count Terring, seigneur of Gronsveld, 1768; — Sigmund, count Haimhausen, 1760; — Prize medal 1773, for Agriculture; — Medal on the Building of the Military Hospital at Munich, 1775; — Francisca Christina, Countess Palatine of the Rhine, on her Jubilee as Abbess of Thorn, 1767; — Memorial medal of Charles VII., 1745; — Maximilian Emanuel, Count von Törring-Jettenbach, Lord of Gronsveld, 1768; — Military Hospital, Munich (1775); — Marriage medal of Ferdinand Maria with the Duchess Palatine Maria Anna Karolina, 1750, etc.

Among Schega's coin-dies I may mention: Charles Albert, Æ. Ducat, 1737; — Æ. Thaler, 1738, 1739; — 1½ Schauthaler, 1739; — Vicariatsthaler, 1740 (signed: **F. S. A.**); — Another, of Charles Albert and Charles Philip, Count Palatine, 1740 (varieties); — Half Vicariatsthaler, 1740, and possibly also the Vicariats Sechser and Groschen of same date; — Schauthaler, and Half on the Marriage of Maximilian Joseph III. with Maria Anna of Saxe-Poland, 1747, etc.

Schega's signature occurs under the following forms: **F. A. SCHEGA F.**; — **SCHEGA F.**; — **F. A. S.**; — **FR. AND. SCHEGA**; — **F. A. SCHEGA.**

SCHEIBELHOFER, VEIT (*Bohem.*). Mint-master at Krummau (Bohemia), 1651-1658. He signed **VFS, VS.** He coined money for Johann Christian and Johann Seifried, Princes of Eggenberg : Klippe Thalers, Thalers, Half, and Quarter Thalers.

SCHEID, G. A. (*Austr.*). Die-sinker of Vienna. The initials **G. A. S.** occur on a Jubilee medal of Meran in Tyrol as health-resort, 1886; also on a medal of the Swiss National Exhibition at Zurich, 1883.

SCHEID, PHILIPP (*Germ.*). Mint-warden at Frankfort-on-M., 1636.

SCHEL, D. I. (*Brit.*). According to Zani, an English Medallist, who worked at the end of the seventeenth century, 1692-1694. His only signed medals are one of William III., commemorating the Battle of La Hogue; obv. Bust of William III.; R. Naval action (*Med. Illus.*, II, $\frac{60}{260}$; *Van Loon*, IV, 102) and two others of Joseph Clemens, duke of Bavaria, as bishop of Liège, undated. These medals are variously signed: **D. I. SCHEL**; — **D. I. S. F.**; — **D. I. SCHEL FECIT**; — **SCHEL F.**

BIBLIOGRAPHY. — *Medallic Illustrations*, etc. — *Catalogus der Nederlandsche, etc. Gedenkpenningen.* — Dr Habich, *Münzen und Medaillen des Gesammthauses Wittelsbach.*

SCHEMMEL, PAUL (*Germ.*). A native of Würzburg, Mint-engraver at Augsburg, 1570. Although he was a clever Modeller in wax and Sculptor, his coin-dies do not show him to have been more than an ordinary mechanical workman in the medallic art. *Vide* Bolzenthal, p. 178.

SCHENEBERC, LEONHARD (*Swiss*). Mint-engraver at Basle, 1565. He was entrusted with work for the mint at Mühlau near Hall in Tyrol.

SCHENK, A. (*Swiss*). Medallist of the first quarter of the nineteenth century, by whom are several medals: Prize medal of the Society of Agriculture and Viticulture of Vevey (signed: **SCHENK**); 47 mill.; — Prize medal of the Society of Public Utility of canton Vaud; — Prize medal of the Academy of Berne (granted to Carl Fueter); — Scholastic medals of Vevey, Lucerne, Aarau, canton Aargau (3 var.; signed: **A. SCHENK F.**) and Basle (after Samson's design); — Prize medal of Berne, undated (dedicated to I. F. Boehmer); — Prize Medal of the Bernese Society of Agriculture and Fine Arts.

H. Bovy's commemorative medal of the "Fête des Vignerons" at Vevey, 1890, was executed after Schenk's model.

BIBLIOGRAPHY. — Ch. F. Trachsel, *A. Schenk*, Revue belge de numismatique, 1894. — *Revue suisse de numismatique*, 1892, p. 186. — Tobler-Meyer, *op. cit.*

SCHENKEISEN, MARTIN (*Germ.*). Mint-master at Friedberg i. d. Wetterau, 1617.

SCHEPP, GEORG LUDWIG (*Germ.*). Mint-engraver at Cassel, 1751-1764. Ammon states that his signature **S** occurs on Thalers of Hesse-Cassel of 1754, 1763, etc. *Vide* Madai Thaler Cabinet, nos 3744, 3747, 5293.

SCHEPP, IOHANN CHRISTOPH (*Germ.*). Mint-engraver at Diez, Cassel, and Hanau, 1749-1770.

SCHEPP, JOHANN HEINRICH (*Germ.*). A native of Nassau-Diez; Court-and Mint-engraver at Cassel, 1750-1760, then Medallist at Frankfort-on-M., where he died in 1773.

He is the author of the following medals: Second Jubilee of the Relief of Flushing, 1772; — Prize medal of the Amsterdam Agricultural Society, 1776 (signed: **I. H. SCHEPP F.**); — Medal of the "Oeconomischen Tak"; — Prize Medal of the Society *Studium Scientiarum Genitrix*, 1780 (signed: **I: HEND. SCHEPP F.**); — Military Reward for the action off the Doggerbank, 1781; — Loyalty of the towns of Harlingen, Stavoren and Workum to the Prince of Orange, 1783; — Memorial medal of the Court-minister J. Royer of the Hague, 1783; — Presentation medal of the Dutch East India Co. to the French Vice-Admiral P. A. de Suffren, 1784; — Prize-medal of William V., 1785; — Prince William V. and his two sons, 1786; — Princess Wilhelmina of Orange and her daughter, 1786 (signed: **S**); — Prince William V.'s installation as Stadholder, 1787; — The Duke of Brunswick as Commander of the Prussian army, 1787; — The Duke of Brunswick and his chief officers, 1787; — The Stadholder's family, with busts of the Prince, Princess and their children, 1787; — Portrait-badge of William V. (sev. var., signed: **S**); — Prince William V. and consort (several varieties); — Restoration of Peace in the Netherlands on the conclusion of the Act of Guarantee between the various provinces, 1788; — Preservation of the unity and common weal in Guelders, 1788; — Memorial medal of Petrus Camper, professor of anatomy and surgery, at Leyden, 1789; — Prize medal of the Agricultural Society of Amsterdam, founded in 1776, and extended in 1789; — Prize medal of the Society for the promotion of Surgery at Amsterdam, 1790; — Prize medal of the Society for the reclaiming of Drunkards, 1790; — Foiled Attempt by the Patriots against Soestdjik, 1787; medal presented to the officers Erpel and Seyffardt of the Hesse-Darmstadt regiment; oval, 43 × 51 mill. (a specimen in the Bruce-Cartwright Sale, London, 1907, lot 962, realized £ 3).

Schepp was a noted Gem-engraver. His Portrait-intagli of Prince William V. of Orange-Nassau, of Princess Sophia Wilhelmina, etc., preserved at The Hague Museum, show very commendable work.

SCHERER, JAKOB (*Austr.*). Mint-engraver at Vienna, *circ.* 1578-1588. He was a pupil of Abondio. Amongst his works is the reverse of a medal of Hugo Blotius, 1593 (signed: **SF**), and he also cut dies for the Thaler of Bartholomäus Albrecht.

BIBLIOGRAPHY. — Oesterreicher, *loc. cit.*

SCHERFF VON "REYSS", STEPHAN (*Germ.*). Mint-master at Frankfort-on-Main, Basle, Nördlingen, 1427-1438.

SCHERL, ERHARD (*Germ.*). Mint-master at Ratisbon 1579, Nuremberg 1585; Bavarian district Warden, 1586-1598 (*Vide* Gebert, *Geschichte der Münzstätte Nürnberg*, pp. 62, 63).

SCHEU (SCHEUBE), GEORG (*Germ.*). Mint-master at Kulmbach, 1621-1623.

SCHEUFEL. *Vide* **SCHAEUFEL, SCHEIFFEL, SCHEIFEL.**

SCHEURER, HEINRICH (*Germ.*). Goldsmith and Medallist of Bamberg, 1610. His name is mentioned by Erman in conjunction with those of Heinrich Knopf (*q. v.*) and Barthol. Holstein (*q. v.*) as the makers of a Portrait-medal of Johann Gottfried von Aschhausen, bishop of Bamberg.

SCHEYBRL, HANS (*Germ.*). Die-cutter at the Mint of Landshut, 1458.

SCHIELLE (or **SCHILLE**), **TOBIAS** (*Bohem.*). Die-cutter at the Mint of Prague, *circ.* 1670-1672. He was also a gem-engraver, and cut armorial bearings. His name occurs in Prague mint documents, as having engraved dies for Groschen, Portugalöser, etc. He also worked for the Kuttenberg mint.

SCHIEMANN, JOHANN HEINRICH (*Germ.*). Mint-master assistant at Königsberg, 1780. Comptroller, 1785; cashier, 1790; then Mint-master, 1795, as successor of Gösche, until 1802, when the mint was closed. In 1812 he was appointed Mint-master at Breslau, and entered in office, April 1813. On the second transfer of the Breslau mint to Glatz, he acted at the latter mint in the same capacity, but he was dismissed from his post at the end of the same year for negligence. In 1815 he was chief book-keeper at the Berlin mint, and in 1823 was promoted Mint-master there. He died on 29. February 1827.

SCHIEP, WILHELM FRIEDRICH (*Austr.*). Assistant Mint-engraver at Vienna, 1893-1896.

SCHIEPPATI, LUIGI (*Ital.*). Mint-engraver and Medallist at Milan, after the Restoration of the Austrian rule in Lombardy, 1815. In conjunction with L. Cossa, Francesco Broggi, D. Canzani and others, he is responsible for the currency of that period. (Gnecchi, *Le Monete di Milano*, Int. LXIV.)

A medal, signed **SCHIEPPATI** occurs in the Stroehlin Catalogue (Part III, lot 5667). It commemorates the Internment of the Army of Bourbaki in Switzerland 1871, and was dedicated to the Swiss Republic by the two departments of Savoy.

SCHILD, CHARLOTTE REBECCA. *Vide* **DAMISET**. Daughter and pupil of C. L. Schild, born in 1734 at Frankfort-on-M., settled at Hanau in 1756, and died in Paris.

SCHILD, CHRISTIAN LEBRECHT (*Germ.*). Medallist, Gem- and Coin-engraver, born in 1711 at Harburg, S.-N.; was employed at the Mint of Frankfort-on-M. *circ.* 1742, and died at Sachsenhausen, 3. October 1751. He was a Jew by birth, but adopted the Protestant faith in 1731, and settled at Frankfort in 1733.

Among his works I have noted: Allegorical medal, undated, of Frankfort-on-M. (*Münzen von F.*, 706); — Election of Charles VII., 1742; Quadruple and Double Ducat (*M. v. F.*, 736-740); — Medal on the Election of the Emperor, 1741 (*M. v. F.*, 1812); — Frankfort-on-M., Ducat, 1749, etc. The Proclamation coins of Charles VII., 1742, of which many varieties exist, appear to be the most common of Schild's productions. He also cut seals for the Elector of Bavaria, and the Emperors Charles VII. and Francis I.

This Engraver's medals are indifferently signed: **S.**; — **C. S.**; — **C. L. S.**

Bibliography. — Joseph u. Fellner, *Die Münzen von Frankfurt-am-Main*, 1896. — Habich, *Die Medaillen und Münzen des Gesamthauses Wittelsbach*, 1901. — Singer, *Allgemeines Künstler-Lexikon*, Frankfurt-a-M, 1901.

SCHILD, JOHANN ERICH (*Germ.*). Mint-master at Hanover, 1678-1695 and after. His initials **I. E. S.** occur on Gulden of Ernest Augustus of 1680 and 1683, and he also issued a copper-jeton of himself, which has now become very rare.

Bibliography. — Wolff, *Die Münze zu Hanover*, Bl. für Münzfreunde, 1879, p. 653.

SCHILDKNECHT, ADOLPHE (*Germ.*). Contemporary Sculptor, and Gem-engraver, residing at Paris, pupil of Barbet, Roty, and Hiolin. At the Paris Salon of 1902 he exhibited a cameo portrait of M^me^ X***, and in 1903 another, child's portrait, in onyx.

SCHILDTPERGER, CHRISTOPH (*Austr.*). Mint-master at Salzburg, 1585-1586.

SCHILLER, ADAM (*Germ.*). Master Locksmith at the Mint of Rostock, 1825-1842, whose initials **A. S.** occur on the coinage.

SCHILLING, GEORG (*Germ.*). Contractor of the Mint of Breslau, 1629.

SCHILLING, ERDMANN FRIEDRICH (*Germ.*). Administrator of the Mint at Bayreuth, 1764, in conjunction with **CASPAR HEINRICH SCHROEDER**, Mint-director. Their joint initials **S. S.** occur on currency of 1764.

SCHILLING, EMIL (*Germ.*). Medallist at Berlin, *circ.* 1844-1865. I have seen a medal of Bismarck by him, and noticed also: German Industrial Exhibition at Berlin, 1844; — Michael Skjelderup, M. D., 1849; — Industrial Exhibition at Christiania; — Semi-centennial of the Freemasons of the Lodge of the Three Gavels, Halberstadt, 1846 (issued by Loos); — Baron von Nettelbladt, Memorial medal, 1843 (masonic); — Hermann Leopold Ludwig v. Boyen, Prussian minister of war, 1844; — Christening of Princess Amalie Victoria von Ratibor, 1846, &c.

SCHILLING, LORENZ (*Germ.*). Medallist and Coin-engraver, born *circ.* 1575 at Nieder-Wesel, died at Frankfort-on-Main, 19. November 1637. He married on 7. June 1601 Juliane Baumann at Bornheim, and on 11. February 1602 obtained the citizenship of Frankfort, for which he had to pay 3 Gulden. He had six children, two sons and four daughters. As early as 1610 and possibly before that date his services as an Engraver of coin- and seal-dies had been secured by the Frankfort Mint. His name first occurs in *Joseph u. Fellner* as the Engraver of the dies for the Frankfort Double and Single Thalers and Half Thalers of 1610, as well as of medals of that date. M. Lejeune suggests that all the dies for the larger coinage of that city, from 1610 to 1626, were engraved by Schilling, and especially those issued under the Mint-master Kaspar Ayrer, who was installed in 1618. He did not work only for Frankfort, but also for Erbach, Hanau, Isenburg (1617-18), Friedberg, Stolberg, Mayence, as well as Hesse-Darmstadt, 1623, and Löwenstein-Wertheim. He is even supposed to be the author of the Bremen Thalers of 1624, and Solms Half Thaler, 1623. Among his most interesting coin-dies are the Ducats, Thalers and Half Thalers commemorating the Foundation of the Castle of Aschaffenburg, and the later Thalers, etc. of Mayence, 1627-30.

Schilling's medals, although they do not display very great skill, are nevertheless praiseworthy productions, considering the time of decadence when they were executed. The best known are: Large medal of 1611 struck in honour of the city of the Frankfort Schultheiss Johann von Martorff, the 12 Sheriffs and 3 Syndics (2 or 3 varieties); — Plaquette with view of Frankfort, 1612; — Giessen University medal; — Portrait-medal of Ferdinand II., 1619; — Medallic Thaler, 1625; — Medallic Thaler, 1626, with view of Frankfort; — The so-called "Glückhennen" Medals; — Gustavus Adolphus, Memorial medal (*circ.* 1631); — Undated Medallic Thaler (female figure standing on a rock in the sea; two sizes); — 'Christmas' Medals (undated, *circ.* 1618); — The so-called 'Comet' medals, 1618, &c.

Herr Lejeune surmises that the medals commemorating Frankfort's fortitude in the Thirty years' War, and those of the Plague of 1635 and 1636 are most likely by Schilling. He usually signed: **L. S.**; — **LORENTZ SCHILLING F.**; — **L. S.**

The Frankfort Double Thaler of 1610 appears to be one of the earliest productions of the Engraver, and well-known are also his Coronation medals of Matthias II., 1612.

Bibliography. — Ernst Lejeune, *Lorenz Schilling (Stempelschneider in Frankfurt a. M. 1601-1637) und seine Arbeiten*, 1907. — Nagler, *op. cit.* — Ibid., *Monogrammisten*, V, 152. — Bolzenthal, *op. cit.* — Domanig, *Die Deutsche Medaille*, 1907. — Joseph und Fellner, *op. cit.* — Hildebrand, *op. cit.*

SCHILLINGER, HANS (*Germ.*). Mint-master at Pfreimdt, Nabburg, 1534.

SCHILOW, I. (*Russ.*). Medallist at St. Petersburg, in the first quarter of the nineteenth century.

By him are: Portrait-medallion of Count Alexander Serge Stroganoff (1734-1811), 1808; signed: **I. SCHILOW.**; — Medal of Civil Merit, 1814, &c.

SCHIMMIOS. Two Poniatowski gems are thus signed: Sardonyx, The death of Patroclus; — Cornelian, Idomeneus slaying Othryoneus.

SCHINDEL, ROSINA ELIZABETH (*Germ.*). Medallist of the first half of the eighteenth century, by whom is a Memorial medal of Queen Sophie Charlotte of Prussia, of inferior merit. *Vide* Bolzenthal, p. 254. Ammon gives her signature as **ROSINE ELISAB. SCHINDELIN** *fec.*

SCHINDERL VON IMENDORF, VEIT (*Austr.*). Styrian Mint-master general, 1629.

SCHINDLER, AL (*Austr.*). Die-sinker and Medallist at Lemberg, by whom are the following medals: Prize medal of the Lemberg Skating Club; — Visit of the Austrian Crown Prince Rudolf to Galicia, 1887; — Jubilee of Printing, 1890, etc.

SCHINKEL, KARL FRIEDRICH (*Germ.*). Architect and Painter, born at Neuruppin, 13. March 1781, died at Berlin, 9. October 1841, one of the foremost German artists of the first half of the nineteenth century, whose works are distributed all over Germany. Bolzenthal draws attention to the influence he exercised on the medallic art, and it is known that he designed the reverse of A. F. König's fine medal of Blücher (*illustrated*, Vol. III, p. 195; also note on p. 196).

SCHIRMER, CHRISTIAN I (*Germ.*). Mint-engraver at Danzig, *circ.* 1623; then Mint-warden there, *circ.* 1642-1660, and possibly 1662-1664. (Kirmis, *Handbuch der polnischen Münzkunde*, p. 182, 210). He had two sons: Christian and David.

SCHIRMER, CHRISTIAN II (*Germ.*). Son of the last; Mint-warden at Danzig from 1660 until his death, beginning of 1691.

SCHIRMER, CHRISTIAN III (*Germ.*). Possibly a son of the last; born in 1679; Cashier at the Königsberg (Prussia) mint, 1699-1715; Assistant-warden, 1715-1718; Warden, 1718-1728; Royal silver buyer, 1728-1733; Mint-master, 1733-1743; Mint-master in reserve, 1743-1749; died at Königsberg in 1751.

His initials occur on coins and medals. Among the latter, there is a commemorative piece of the Battle of Dettingen, 1743 (*illustrated* in *Med. Illustr.*, II, p. 577).

SCHIRMER, CHRISTIAN IV (*Germ.*). Mint-master at Königsberg, 1732-1749. Initials on the coins.

SCHIRMER, DAVID (*Germ.*). Son of Christian Schirmer I, was first in Swedish service, then appointed Mint-warden at Königsberg, 1667-1691, and continued in that office after his brother's (Christian II) death.

Bibliography. — Dr Emil Bahrfeldt, *Die Münzen- und Medaillen-Sammlung in der Marienburg*, Danzig, 1904. — V. Schrötter, *Münzwesen Preussen*.

SCHIRMER, MELCHIOR (*Germ.*) Mint-master at Glatz, 1629.

SCHIRMER (*Germ.*). Mint-master at St. Gall, whose arms occur on coins of 1730, 1732 and 1738 (engraved by G. Reich).

SCHLANBUSCH (*Germ.*). Mint-warden at Zellerfeld, 1672-1676.

SCHLANDBUSCH (*Dan.*). Mining-master, who in 1686 acted as Mint-master at Kongsberg (Jorgensen, p. 23).

SCHLAUBUSCH, HERMANN (*Germ.*). Mint-master at Goslar, 1619-1625. His initials occur on his issues.

SCHLEE, C. (*Swiss*). Sculptor of Berne; died in 1843. His signature occurs on a Portrait-medal of Dr Paul Vital Ignaz Troxler, 1780-1866, professor at the University of Lucerne, and dedicated to him by his pupils in 1825. (Ad. Inwyler, *Zur Schweizerischen Medaillenkunde*, Revue suisse de numismatique, 1892, p. 317.)

SCHLEMM, IOHANN WILHELM (*Germ.*). Mint-master at Clausthal (Brunswick), 1753-1788, under George II. and III. His initials occur on the currency.

SCHLESSEWIGK, HANS (*Germ.*). A native of Goslar, Mint-warden at Stolberg in the early part of the seventeenth century, was appointed Mint-master at Göttingen, 1614-1617 and later at Münden, where he was still in office in 1619.

SCHLOSSER, PHILIPP (*Germ.*). Mint-master at Cramberg near Schaumburg-a. d. Lahn, 1626.

SCHLÖTH, LUKAS FERDINAND (*Swiss*). Sculptor, born at Basle, 25. January 1818; died, 2. August 1891 at Thal (St. Gallen). He is the author, amongst other works, of the Winkelried monument at Stanz, 1865, and St. James' Monument at Basle, 1872. His signature occurs on the obv. of the Rifle Meeting Thaler of Stanz, 1861, as the designer of the Winkelried group.

SCHLUND (*Germ.*). Contemporary Goldsmith of Frankfort-on-M., by whom are Plaquettes with view of the city, and other medallic souvenirs, brooches, buttons, pins, etc.

SCHLÜTER, CARL (*Germ.*). Mint-warden at Hanover 1832-1839; Mint-master 1839-1844.

SCHLÜTER, HANS (*Germ.*). Mint-master at Siedel (Solms), 1616.

SCHLÜTER, HANS (*Germ.*). Mint-master at Harzgerode, 1795-1821. His initials **H. S.** occur also on a Gulden of Alexius Friedrich Christiano, Prince of Anhalt, 1796.

SCHLÜTER, JOHANN HENNIG (*Germ.*). Mint-master to the Landgraviate of Hesse, 1750-1760; died at Frankfort-on-M., 1773. Schlickeysen states that he made use for his privy-mark of a monogram formed by the letters **J** and **H**, over which are two keys.

SCHLÜTER, HENNING (*Germ.*). Mint-master at Goslar and Zellerfeld, 1623-1672; worked also for the Harburg branch of the Brunswick-Lüneburg house after 1636, and for Hesse-Darmstadt.

Henning Schlüter is responsible for the fine series of Thalers,

Six Thaler piece (88th Birthday) of Augustus, Duke of Brunswick, 1666.

multiples and subdivisions, issued to commemorate the 88th Anniversary of Duke Augustus of Brunswick.

He also coined for Worms in 1654.

SCHLÜTTER, VASCO L. (*Swiss*). Die-sinker and Medallist residing at Geneva. His productions are all of local interest. I have made a note of the following: Lake of Geneva frozen, 1891; — Sports at Chêne-Bougeries, 1892; — Inauguration of the Albis Tunnel, 1894; — Jubilee of M. B. Reber, of Geneva, 1893; — Prize medal for Archery and Boating, Geneva, 1893; — Meeting of the Fédération musicale "Campagne" at Chêne-Bougeries, 1893; — Jeton of the Geneva Meeting of the Swiss Numismatic Society, 1893 (with portrait of J. C. Hedlinger); — Vogue du faubourg St. Gervais, Geneva, 1896, and 1899; — Congrégation des Saints-Anges du Collège St. Michel, Fribourg, 1893; — Prize medal of the Nautical Club of Geneva, 1896; — Medal of the Swiss National Exhibition at Geneva, 1896 (not official); — Meeting of the Swiss Numismatic Society at Geneva, 1896 (jeton with portrait of J. Dassier); — Charles Louis Empeyta, mayor of Chêne-Bougeries, 1901; — Geneva Automobile Club, 1892; — Cantonal Fête de gymnastique at Geneva, 1902, etc.

Bibliography. — *Revue suisse de numismatique*, 1891-1903.

SCHMACHTENBERGER, HIERONYMUS (*Germ.*). Mint-master at Glatz; was ennobled in 1562 under the name of Von Frankenfeld.

SCHMAJE. *Vide* **SCHMARJE.**

SCHMALEKER, JOHANN BAPTIST (*Austr.*). Apprentice-Engraver at the Vienna Mint, 1779-1781.

SCHMALEKER, JOSEPH (*Austr.*). Born in 1756; Apprentice-Engraver at the Vienna Mint, 1779-1781.

SCHMALLFELDT (also **SCHMAHLFELD**), **GEORG LUDWIG FRIEDRICH** (*Germ.*). Medallist of the nineteenth century, born in 1829. He settled at Copenhagen, and worked for the Mint there and the Die-sinking works of W. Christesen. Among his medals I have noticed only the following: Masonic memorial medal of Frederick VII., 1863; — Prize medal 1864 for Rifle Shooting; — Visit of King Charles XV. of Sweden to Denmark, 1862 (two varieties, signed: **F. S.** and **SCHMAHLFELD**); — Hans Christian Lumbye, Danish composer (1810-1874), etc.

SCHMALLVOGL, GOTTFRIED JACOB (*Austr.*). Chief-engraver at the Mint of Kremnitz, *circ.* 1636-† 11. June 1652.

SCHMALZ (or **SCHMELZ**), **G.** (*Germ.*). Mint-engraver and Medallist at Stuttgart, 1737, 1738. According to Ammon, he signed: **G. S.** or **G. SCHMELZ F.** One of his medals is reproduced in Köhler, *Münzbelustigungen*, Pl. xv, 297.

SCHMARJE, WALTHER (*Germ.*). Contemporary Sculptor and Medallist, residing at Berlin; Professor at the Royal School of Industrial Arts. I have seen the following medallic productions by him: Inauguration of the Polytechnicum at Dantzig, 1904 (exhibited at the Salon de la Médaille, Brussels, 1910); — Medal of Gudrun Lodge at Hamburg; — Portrait-medal of Perzynsky, writer; — Plaquette of the German Federation of Watchmakers, &c.

BIBLIOGRAPHY. — *W. Schmarje*, Zeits. für bildende Kunst, 1905.—*Grosse Berliner Kunst Ausstellung*, 1907.

SCHMELZ (or **SCHMÖLZ**), **CHRISTOPH** (*Austr.*). Mint-engraver at Hall in Tyrol (1753-1764) and later at Kremnitz in Hungary; born in 1700 at Bobrach in Suabia, died 1777. Interesting data concerning this Engraver are given in *Katalog der Münzen- und Medaillen-Stempel Sammlung des K. K. Hamptzmüntamtes in Wien*, IV, 1337.

SCHMELZER, HANNS (*Austr.*). Mint-warden at Hall, 1536-1551, then at Augsburg, 1551-1560.

SCHMELZING. *Vide* **SMELTZING** *infra.*

SCHMID, BERTHOLD (*Germ.*). Contractor of the Mint of Ratisbon, 1434.

SCHMID, CHRISTIAN (*Germ.*). Mint-warden at Dömitz, 1675-1676; he coined also for Wismar.

SCHMID, CLAUS (*Germ.*). Mint-warden at Würzburg, 1528.

SCHMID, LEONHARD (*Germ.*). Coiner at Brieg, and previously at Oels, 1621.

SCHMIDSHAUSEN, JOHANN (*Austr.*). Mint-engraver-assistant at Kremnitz, *circ.* 1754-† 25. April 1800.

SCHMIDT (*Germ.*). Mint-engraver at Brunswick, 1760-1776. He worked also for the Episcopal Mint of Hildesheim, 1761.

SCHMIDT, BALTHASAR (*Germ.*). Mint-master at Augsburg, 1623-1638.

SCHMIDT, BALTHASAR (*Germ.*). Professor of modelling and sculpture at Munich. By him are two medals published by Hitl of Schrobenhausen: Confirmation Medal; — Baptism of Our Lord.

SCHMIDT, C. (*Germ.*). Saxon Medallist of the first half of the seventeenth century, by whom is a Portrait-medal of the reformed minister M. C. Ludovick, 1638, of Zeitz. Erman calls it a vigorous work reminding one of Leygebés art.

SCHMIDT, ANDREAS GERHARD EDUARD (*Germ.*). Engraver at the Mint of Breslau, *circ.* 1864-1884; born 25. June 1838, died 16. November 1884. He is the author of several medals.

SCHMIDT, HANS (*Germ.*). Goldsmith and Mint-warden at Würzburg, 1506.

SCHMIDT, HANS *Vide.* **JOHANN SCHMIDT.** He is responsible for the currency issued for common circulation in Mayence, Hesse-Darmstadt, Nassau-Saarbrücken, and Frankfort-on-Main 1623-1636, and coined at Frankfort, where he held the post of Mint-master from 1624 to 1637.

SCHMIDT, HANS GEORG (*Germ.*). Goldsmith of Munich, 1681-1702.

SCHMIDT, HEINRICH (*Germ.*). Mint-master at Rostock, 1571-1594. He took the oath at Lüneburg in 1572.

SCHMIDT, HEINRICH (*Germ.*). Die-sinker, in the firm of **GOTTFRIED DRENTWETT** (*q. v.*) at Augsburg, after 1876.

SCHMIDT, JACOB (*Germ.*). Mint-administrator at Oels, then at Breslau, 1634; later Mint-director to the Evangelical States.

SCHMIDT, JAKOB (*Austr.*). Mint-master at Hamburg, 1572-1593.

SCHMIDT, JAKOB (*Austr.*). Mint-engraver-assistant at Vienna, 1799-1808; then at Kremnitz, 1808-1809; again at Vienna from November 1809 to 22. August 1818, when he was pensioned off for insanity. Among his productions are Counters on the Marriage of Archduchess Maria-Josepha with King Ferdinand IV. of the Two-Sicilies, 1767, and on her Death, in October of the same year.

SCHMIDT, JOHANN (*Germ.*). Mint-warden at Wertheim, 1694-1705, and Munich, 1705.

SCHMIDT, JOHANN (*Germ.*). Mint-master at Frankfort-on-Main, 1624-1637.

SCHMIDT, JOHANN HEINRICH (*Germ.*). Warden and Mint-master at Langenargen, 1623.

SCHMIDT, JOSEPH. *Vide* **SCHMITT.**

SCHMIDT, I. (*Germ.*). Medallist of the early part of the nineteenth century, whose signature occurs on two commemorative medals of Napoleon's marriage with Marie Louise, 1810, and others on the Birth of the King of Rome, 1811; — Austro-Russian Alliance, 1813 (with busts of Francis I. and Alexander I.); — Nicolas Louis de Lacaille, astronomer, 1824 (Durand Series), &c.

Nothing appears to be known about this Engraver, whom however Bolzenthal mentions as one of the contributors to the Napoleonic medallic gallery.

BIBLIOGRAPHY. — Bolzenthal, *op. cit.* — Bramsen, *op. cit.* — Edwards, *Napoleon Medals.*

SCHMIDT, LOUISA (*Germ.*). Contemporary Sculptor and Medallist, residing at Frankfort-on M. Her signature occurs amongst other works on a Portrait-plaquette of Dr Karl Weigert.

SCHMIDT, MARTIN (*Germ.*). Mint-warden at Bayreuth, 1621.

SCHMIDT, PAUL (*Germ.*). Ducal Mint-master (Bergmeister) at Saalfeld, 1513-1517.

SCHMIDT, S. (*Amer.*). Die-sinker of New-Orleans, whose signature occurs on the obv. of the medal of the Med.-chir. Society of Louisville, Ky. (A. J. N. 167. In Boston Coll[n]).

SCHMIDT, SAMUEL (*Germ.*). Mint-engraver at Saalfeld, 1597, in which year he suffered capital punishment for counterfeiting.

SCHMIDT, TERENZ (*Germ.*). Mint-master at Cassel, 1621-1634. His currency bears the monogram **TS.**

(*To be continued.*)

THE PHOENICIAN DRACHMA WITH THE JAHVE-INSCRIPTION

By Dr R. Weil.

(*Translated from "Zeitschrift für Numismatik."*)

The Revd A. W. Hands wrote an article published in the *Numismatic Chronicle* (Fourth Series, vol. IX) entitled "Notes on a Phoenician drachm bearing the name Jahve". Further information concerning the early influence of the Greeks in Palestine has been given by Dr. R. Weil in an article in the *Zeitschrift für Numismatik* which is of so much interest that the readers of the *Num. Circular* will be glad to have a translation by Mr. L. Forrer of the article.

Those who desire to trace further the influence of the Greeks in Palestine should read the notices of the finds of Greek pottery in the cities which are now being excavated in Palestine, published recently in the "Quartely Statement" of the Palestine Exploration Fund.

*
* *

This unique coin is an example of the great importance and interest of the study of numismatics so long neglected and regarded as "dry as dust".

Phoenician Drachma.

*
* *

The French Orientalist C. Clermont-Ganneau has noted in 1880, on the small silver coin reproduced above, which belongs to the old collection of the British Museum, and has already been described by Combe and the Duc de Luynes, the Aramaic inscription יהו interpreted as *Jahve i. e. Jehovah.* The coin has been referred to several times within recent years in the scientific literature of England and France, and quite lately again, in a very efficient manner by A. W. Hands in the *Numismatic Chronicle*, 1909, pp. 121-131 [1].

The fabric of the coin, which weighs, according to J. P. Six 3, 33 grammes, points, as Babelon has also recognized, to the southern part of Syria as its place of origin, probably to Gaza on the Philistine coast; at all events Askalon might also be taken into consideration.

The coin is thought to have been struck there during the first quarter of the fourth century B.C.

The bearded head in Corinthian helmet, which is seen on the obv. of the coin, is not shown in profile, but, as H. Dressel has pointed out to me, turned somewhat facing; it has great analogy with the head described as **ΑΔΡΑΝΟΥ** on the copper coins of the Mamertines [2]. But even if in this coinage, which dates from after 282 B.C. the influence of Semitic worship is brought before one's eyes, it is by no means necessary that the same Divinity should be depicted on our coin [3].

The representation on the reverse of the coin is of an altogether different interest. A virile figure is shown in oriental headdress with pointed beard, seated to right, within an incuse square defined by a linear square. The upper part of the body is nude, the chlamys is thrown over the right arm and covers the lower part of the body; on the extended left hand is perched a bird with spread wings, apparently an eagle. A winged chariot forms the throne. At the bottom right hand corner is a small ugly head [4]. This Zeus-resembling representation reminds one instinctively of the Baal-Tars of the Cilician coins, but instead of an inscription referring to Baal as one would expect here, we read in Aramaic : *Jahve* or perhaps *Jehovah*, for this name may be also spelt, instead of the four usual characters, in three letters.

This inscription is until now unique in ancient numismatics. It furnishes evidence that in post-exile times, the old harsh opposition between the polytheistic cult of the sea-coast and the monotheistic worship of the inland no longer existed, or did not still exist in the old rigour. It is true that the Jahve of our coin at once leads us to think of the worship on Mount Gerizim near Sichem. An old Cananaitic organisation was preserved in the Samaritan high place worship that claimed a line of approach to the cults of the coast lands. It should not remain unnoticed either, that under the reign of Artaxerxes I the Israelites lived in the Philistine Azdod (Azotus) in marriage intercourse with the native population and that the children of these unions partly came to understand only the dialect of Azdod [5] and gradually became Philistines themselves.

But the syncretism, which is proved by the coin, goes further still. Notwithstanding the Aramaic inscription the whole appearance of the coin shows that the artist, who had to prepare the coin-types, was much more influenced by Greek than Semitic ideas. It has already been noticed long ago that the representation of the god on the winged chariot reminds one of that of Triptolemos. But the copper coins of Eleusis, which are referred to here, are much later in date than our Drachm, and the conception of Triptolemos on them is a totally different one; the assumption therefore of a derivation of the type from the coins of Eleusis must be rejected. Hands, who noticed this, points out on p. 127, that in the designing of this coin-type representations of Triptolemos on red-figured Attic vases of the severe style more probably served as prototypes. They show the Hero in profile, with the wing of the chariot erect behind the seated figure, as reproduced here from the amphora of Volcentae in the British Museum [6].

1. Combe, *Veterum popul. nummi* (1814), pl. XIII, 12. Duc de Luynes, *Essai sur la numismatique des satrapies de la Phénicie* (1847), pl. IV, 4. Six, *Numism. Chronicle*, N. S. XVII, 1877, p. 229, N. S. XVIII, 1878, p. 124, pl. VI, 8. Babelon, *Catalogue des monnaies grecques*; *Les Perses Achéménides*, Introduction, p. XLVI. It may be sufficient for our present object to refer only casually to the numismatic literature on the subject. For curosity's sake it may be interesting to note that Günzburg in 1881 has suggested in the inscription the name of king Jehu, who reigned in the tenth century over the Kingdom of the ten tribes.

2. Head, *Hist. Num.*, p. 136. Hands, *Num. Chron.*, 1909, p. 131.

3. Six (*Num. Chron.*, 1878, p. 124) thought he had found an intermediary representation between the Hadranos of the Mamertine coins and the obv. of our Drachma in the bearded head with Corinthian helmet of the Syracusan copper coins of the time of Timoleon (Head, *Hist. of the Coinage of Syracuse*, pl. VII, n. 4), and Babelon, Introd. cit., p. LXVI has adopted this suggestion. But the Punic god of war cannot well be reconciled with the Ζεὺς Ἐλευθέριος, which we so often meet with on the coin-issues of the restored Syracusan democracy. Much more plausible is Head's admirable hypothesis, that Timoleon, the second Oekist of Syracuse placed on his coins the portrait of the first Oekist (Head, *op. cit.*, p. 32, and *Hist. Num.*, p. 157).

4. This is certainly not to be regarded as a mere symbol. Babelon has referred the head (*op. cit.*, p. LXV) to the well-known Phoenician god Bes; cf. also Hands, *loc. cit.*, p. 129. We have to recognize either a mythological or religious connection between the main type and the smaller representation.

The similarity is surely not accidental.

The connection of Triptolemos with the πάτριοι θεοὶ of the Syrians is evident from Strabo XVI, 2, 5 (p. 750 C) : συνῴκισε ὁ Νικατωρ ενταῦα (ἐν Ἀντιοχείᾳ) καὶ τους ἀπογόνους Τριπτολέμου—, ὑπερ Ἀντιοχεῖς ὡς ἥρωα τιμῶσι, καὶ ἄγουσιν ἑορτην ἐν τῷ Κασίῳ ὄρει τῷ περὶ Σελεύκειαν (sc. πρὸς Ὀρόντην). Triptolemos is associated here with Zeus Kasios; in this latter deity, the worship of which extended along the whole Syrian coast as far as Pelusium, we have before us the hellenistic form of the Baal, who was venerated as god of heaven, and in the older times without temples or sanctuaries, on summits of mountains, which on this account became themselves very sacred [7].

On coins of Seleucia a specimen of which is here reproduced from a coin in the Gotha Cabinet, we meet, from the time of

Hadrian, with a rock, on which is erected a baldaquin of four columns represented in perspective; the cult was connected with the rock, as evidenced by the inscription **ZEVC KACIOC** [8]. Also at Antioch we find a Κάσιον ὄρος close behind the much grottoed Acropolis, or as the name is also met with Ὀροκάσιον [9], and it may occur to one, that the Iopolitae, who were made resident in Antioch, the απόγονοι Τριπτολέμου, did not offer up their sacrifices there, but on the summit of the same name, distant of about 20 kilometers from Seleucia, the seaport of Antioch; but Strabo, who in this instance evidently draws from Erastothenes, gives the information with such certainty, that we may not throw doubt upon it. We have here before us an episode of the foundation myth of Antioch; on the search after Io strangers from Attica and Argolis are said to have come to Syria, and this is the reason for the celebration on the sea-coast, on the Κάσιον ὄρος, of the ἑορτὴ in honour of Triptolemos.

The organisation of this Baal worship in pre-hellenistic times is clearly brought before us in the narrative of the prophet Elijah (I, Kings, 18) on the summit of Mount Carmel, on which occasion the worshippers of Baal contest with those of Jahve for supremacy [9]. On the mountain gather the clouds which produce the rain and restore new life and fertility to the dried up soil. They are the same functions substantially which we find again with the Attic Hero.

Whereas it was formerly accepted that the hellenization of the Semitic cults in Syria began only in consequence of the campaigns of Alexander the Great, the proofs are now increasing to show that it was introduced at a much earlier period. When the Philistine Baal, who is designated as Jahwe on our coin, is endowed with attributes of Triptolemos, it must be recognized clearly that at that time, that is also after the breadkown of the Delian-Attic naval confederacy, Attic influence made itself felt on the Syrian coast. Or Nointel's stele (*C. I. Att.*, I, 433), which provides us with a list of the Athenians who fell in the battle-field Olymp. 81, 1 (456), from the Phyle Erechtheis, the praescript mentions, that besides those fallen in Cyprus and in Egypt there are also others who met with their death **EN ΦOINIKEI**. This is the only information we possess of an armed intervention of the Athenians in the administration of the Phoenician coast. The political plans which at this period Attic statesmen pursued in the south-eastern corner of the Mediterranean did not prove possible of being carried out, but active commercial relations with these countries continued notwithstanding, and also after the fall of the first naval alliance. The abundant imitations of the old Athenian currency in these regions are the best proof of this. But whereas these were slavish imitations of Athenian prototypes, the engraver of the Jahve-drachm worked independently; he was either a Greek or as an artist a pupil of the Greeks, and was capable of combining the religious views of Attica with those of the Semitic races.

8. Stark, *Gaza*, p. 571, who refers to this, that Zeus Kasios has preserved his signification of Rain god; in a time of drought Julian ascends the Κάσιον ὄρος in order to offer sacrifice there, *Ammian, Marcell.*, XVI. 13, 14. For the locality, cf. B. Förster, *Antiochia am Orontes; Jahrb. d. archäol. Instituts*, XII, p. 134-136. On the lower valley of the Orontes cfr. also in *Formae orbis antiqui* the recently prepared pl. VIII, by Rich. Kiepert.

9. Eckhel, *D. N.*, III, 326. Liebe, *Gotha nummaria*, 308. Head, *Historia Num.*, 661.

9. Cf. Stark, *Gaza*, 263. The site of the sacred spot is to be looked for on one of the precipitous heights, which shut the city on the east side from the hinterland and were enclosed in the city walls : cf. the plan on Baedecker's Palestine and Syria, 6th edit., p. 317. — Whether the **ZEVC KACIOC** on coins of Corcyra of Imperial times (Eckhel, *D. N.*, II, 179, *Catalogue of Greek coins* in the Brit. Mus., Thessaly. p. 153 sq.) and Cassiopeia in Epirus is connected with the Phoenician divinity more than by name, must remain open to research. As represented on the coins of Corcyra, the Zeus type does not differ from the other current representations of the region.

UNE NOUVELLE MÉDAILLE DANOISE.

Tandis que jusqu'au milieu du siècle passé on frappait en Danemark, à certaines époques, même un assez grand nombre de médailles ayant trait aux événements et aux personnes du temps, l'apparition d'une nouvelle médaille danoise est aujourd'hui un événement qui n'arrive qu'à des années d'intervalle, et non plus comme jadis provoqué par l'État, mais par l'initiative privée.

La Société numismatique de Copenhague a ainsi précédemment fait frapper des médailles consacrées à C. F. Tietgen et au Général Jorgensen, et l'année dernière ses membres s'unirent pour consacrer par une belle médaille (58 m/m.) la mémoire de C. J. Thomsen, un des grands hommes du Danemark, qui dès son enfance s'était senti attiré vers la numismatique et à laquelle il était resté intimement attaché. Cette médaille, gravée par le médailleur Lindahl et frappée par Dragsted, vient d'être achevée.

Thomsen, qui naquit en 1788 et mourut à l'âge de 77 ans, était fils du notable négociant et armateur, le Conseiller de justice, Chr. Thomsen. A la mort de celui-ci, le jeune Thomsen prit la direction des affaires qu'il dirigea jusqu'à la mort de sa mère, en 1840. Thomsen était en même temps un éminent archéologue, qui

de 1816 à 1819 entreprit la réorganisation du Musée des Antiquités du Nord, fondé en 1807. En 1832, il fut nommé inspecteur de la collection royale des Monnaies et Médailles. Après avoir abandonné, en 1840, la direction des affaires de son père, il se consacra uniquement aux Musées, et il réussit, en 1849, à fonder le Musée etnographique. Il avait alors, depuis longtemps, acquis une réputation universelle par sa grande œuvre scientifique, la découverte du système des trois grandes époques préhistoriques : l'âge de pierre, l'âge de bronze et l'âge de fer, système qu'il exposa en 1837 dans son manuel d'archéologie nordique, et qui est resté fondamental et incontesté jusqu'à nos jours. Il se voua corps et âme à ses travaux jusqu'à son dernier souffle, et les plus âgés d'entre nous gardent encore de leur jeunesse le souvenir de ce vieillard intéressant et intéressé, qui expliquait aux visiteurs les collections qu'il avait organisées, et parmi lesquelles le Musée des Antiquités du Nord est encore aujourd'hui le premier en son genre en Europe.

En 1860, les membres du Rigsdag firent exécuter, par le sculpteur Bissen, un buste en marbre de Thomsen. Ce buste devait déjà du vivant de Thomsen, être placé dans le Musée, mais il n'y fut installé qu'après sa mort, en 1865, car Thomsen avait demandé que l'on laissât à la postérité de décider « si » — comme il disait — « j'ai mérité l'honneur que mes bienveillants et cléments contemporains ont l'intention de me faire ». Thomsen légua sa fortune à une dotation pour la restauration des monuments de l'antiquité et pour récompenser les meilleurs ouvrages exécutés par les artisans.

C'est le buste de Bissen qui a servi à l'artiste graveur Lindahl pour reproduire, sur la face de la médaille, le profil caractéristique de Thomsen. Sur la tranche du cou se trouve le nom du graveur et le millésime 1910. En exergue, on lit : « Christian Jürgensen Thomsen F. 1788. D. 1865 », et au-dessous : « Numismatisk Forening ». Le revers montre la partie centrale du « Prinsens Palais », où sont installés les Musées nationaux. Au-dessous sont gravés les mots « Nationalmusæet i Kjobenhavn », et au-dessus, la devise que Thomsen fit mettre sur son écusson de dignitaire de la grand'croix de l'ordre du Dannebrog : « Forst Sagerne saa Skrifterne » (d'abord les faits, puis les écrits).

Cette médaille est un témoignage que l'on éprouve aussi en Danemark le désir d'honorer et de conserver la mémoire de ses grands hommes. Elle témoigne également que l'on trouve encore, dans notre pays, de bons artistes qui cultivent avec succès l'art exquis de la gravure en médaille.

L. Bramsen.

BLACKWOODS EDINBURGH MAGAZINE

"The world we live in."
Ars V, p. 337.

ODE ON CELLINI

Striker of medals and of men,
In that fierce age
When striking was the rage,
And Rome the lion's den;
And thou didst cut with chisel, sword, and pen,
What golden hours were thine,
What dreams divine?
Beneath the blue Italian skies
Stamping the die that never dies.

Hail to thee, carver bold,
Wrapt in the papal mantle's fold;
Now monk, now warrior, always knave,
Sage, madman, bandit, soldier, slave;
Now deep in all art's deepest mysteries,
Bidding the shapes of beauty round thee rise;
Apollos, shedding round their living beams,
Hebes, with cheeks like morning's rosy gleams.
Nymphs, soft and fresh as their own crystal springs,
Cupids, with bows of flame and purple wings,
All clustering round thy shrine,
Like spirits round the master of the mine.
Then would fit come on thee, and the steel,
Around thy rival's heart or head would wheel,
Leaving thy gold unchased, to chase the foe.
From bandits black and bare
Guarding St. Peter's chair,
Shooting Venetian Dons with holy shot,
Making for Gallic rogues the world too hot;
Then, fearless of the rope,
Robbing the Pope.

Then, touch'd by mighty love,
For some proud Donna's eyes
Turning the eagle to a dove;
All songs and sonnets, tears and sighs,
Pouring thy spirit to the midnight stars
On silver-stringed guitars.
Then tossing woman to the wind,
No longer love-sick, mad and blind;
Fixing thy soul upon some matchless form,
Some visioned beauty, wild and warm;
Or carving some immortal cup or shield,
Loaded with trophies of some Grecian field;
Or brightning with fine hand the living gem,
Imbedded in the chalice's rich stem;

Or studding thick with diamonds the proud sword
Of some imperial lord.
Thy works on Fame's high pedestal
Stand, ne'er to fall.
True son of Rome!
The lamp still burns within thy tomb.
Thy cups, thy coronets, thy rings,
Are treasures fit for Kings.
Thine ivory Dians we may still behold,
Bathing within their little lakes of gold,
Thy peeping Pans from mossy cave and wood,
Thy Tritons flashing through the silver flood,
Thy nymphs, and exquisite Seraglio,
With cameos of Aurelian,
Cornelias in Cornelian,
Heros and Alexanders
In Intaglio.

Yet thou art gone!
Thy brilliant spirit fled;
Thy day is done,
As if thou wert a Pope,
Or some such thing
As Cardinal or King;
Yet rest in hope,
A stone has on thee, as on them, been laid
For ages past;
Yet, old Cellini's is no passing shade,
No sculptor cuts thee out, nor has earth seen,
Since first she wore her bridal robes of green,
And twilight drew the curtain round her head,
And diamond Hesper flamed above the bed,
A founder of thy cast,
Clear, bold, magnificent, and vast.
Not Death himself, that sinker of renown,
Within the grave can cool thy metal down;
Though there earth's crowns are dust,
And dross the hero's bust;
Immortal still, still bright and bold,
Thou'rt laid in Fame's eternal mould.

THE NEW YORK NUMISMATIC CLUB PRESENTS A GOLD MEDAL TO PRESIDENT F. C. HIGGINS.

Mr. F. C. Higgins' name is familiar to the readers of the ' Numismatic Circular ', who well recollect his able articles on the Coins of Brunswick-Luneburg and Hanover and the Saxon Duchies, published in 1902-1904.

Since his return to America, after a stay of several years duration in Europe, Mr. Higgins has devoted his energy and vast knowledge in the field of numismatics to the service of the ' Numismatic Club of New York ', which he has had the honour to head for the last four years.

In recognition of Mr. Higgins' services the Club presented to him, on 1. September 1910 (23rd regular monthly meeting) a gold medal bearing his portrait, and modelled by Mr. V. D. Brenner.

Mr. Webster in presenting the medal said :

The Annual Convention of the American Numismatic Association, which is to be held in this City next week, is destined to mark a new era in the history of American numismatics and is already attracting worldwide attention. It is largely due to the untiring energy of our honoured president, Mr. F. C. Higgins, who has headed our club for the past four years, that this convention promises to be such a brilliant success. (Applause.)

Gentlemen, we are proud of Mr. Higgins and it is our heartfelt desire to show our appreciation of his worth while we have him safely in the midst of us. For my part, I do not believe in flowers and music after a man has passed away.

I am reminded of a good story that I heard, the other day, of a German who had treated his wife very cruelly during her life time, but after her death went into hysterics and had a very elaborate funeral. A German lady — one of the mourners — came up to him and said : " I vas so sorry to see you crying about your poor wife by der church, Mr. Hockenheimer. I lose my husband last week, now you lose your wife, so I can feel mit you ". " Vell, you seen me by der church " replied Hockenheimer, " but did you see me down by der grave ? Vy, I yoost raised Hell down der ".

Now, the New York Numismatic Club doesn't believe in postponing the bestowal of honour on our worthy president ; and with this idea in view the Club decided some months ago to strike a memorial medal to be presented to the various presidents who shall succeed Mr. Higgins in the years to come. It was intended to be a mark of our appreciation of his splendid management and tact in the leadership of this organisation. (Applause.) In pursuance of this sentiment, this medal, which is unusually beautiful in design, has been executed by Whitehead and Hoag of Newark, N. J. and I take pleasure in presenting it to our president as a slight token of our appreciation and sincere regard. (Applause.)

We thought it would not be fair to simply strike one medal for the president to put in his pocket and to hide from our admiration, so we decided to strike 110 duplicates, so that any member of our Club who wished to obtain a souvenir medal might be able to do so.

In presenting our medal to Mr. Higgins it is coupled with the hearty wish that he may live long to view it, and that it may serve to inspire him in his future efforts on behalf of the Numismatists of America. (Applause.)

Mr. Higgins in reply said :

Mr. Chairman and Gentlemen :

It is difficult for me to find words to fittingly thank you for the great honour you have conferred on me, and to express the deep appreciation which I naturally feel.

This beautiful medal which I hold in my hand serves to remind me more than anything else could do, that all things on this mundane sphere are moving towards an appointed end. And this, I may say, has been the case with my humble efforts in behalf of our Club and the National Association. The success that has attended my labors on your behalf has itself been a sufficient reward. It has also been one of the greatest happinesses of my life to aid in bringing together this notable gathering of collectors and learned men who have founded an organization which I believe is destined to last for many long years. (Applause.)

I had already made up my mind that the year 1910 was to witness the full completion of my work as an organizer, and I can assure you that I have given my whole heart and soul and a great deal of enthusiasm to it. The best hour of a man's life, under any circumstances, is that in which he is able to say that his earthly ambition has been fulfilled, and in receiving your medal to-night and listening to the eloquent words that accompanied it, I feel that I am more than repaid for what ever I have done on behalf of our Club and the cause that its represents.

Gentlemen, I know that you will be in full accord with me when I say that the organization and perpetuation of the New York Numismatic Club means the uplifting of numismatic science in all that the term stands for in this country. (Applause.) With such an aggregation of travellers, experts, savants and antiquarians, as well as writers whose views upon numismatic topics are eagerly read and preserved as the bibliography of our science, I do not hesitate to say that the future of numismatic science in America is destined to be most deeply and beneficially influenced by the work of the New York Numismatic Club.

I must also pay a well deserved tribute, as I have done before, to the efforts of kindred organizations that are co-operating with us in the cause of numismatics, for this cause has received assistance from many sources throughout the United States.

We in New York, however, are most fortunately situated, for as a friend of mine once remarked, as we stood on the dock at Liverpool. — " It is only across the street to Number One Broadway. " It may be rather a wide street but we are practically at the door of Europe which, of course, means a great deal to the collector of coins.

We have, further more, a number of wealthy men among us who are not only talented as numismatists, but who have from some providential source received such great inspiration of the weight and portent of the numismatic science in the making of history that they have spent great fortunes in gathering collections of coins.

With the progress of time these collections are being presented to our museums and, some day the great public to which they have been bequeathed will need the assistance of the New York Numismatic Club in order to properly appreciate and understand the points of interest in these wonderful exhibits.

I think that my friend, Mr. Frey, who is very active in this part of the world, would be able to testify that the interest of the public in general in numismatic science has for the past ten years been steadily increasing and becoming more intelligent.

In former days we were constantly bearing of people who rushed into a dealer's store with their flying eagle cents and finding that the coins turned out very differently from what they expected. But such people are daily becoming more scarce, owing to the light which has been spread abroad by the American Numismatic Association, the Chicago Society, the Ohio Society, the Detroit Society and other learned organizations.

We have, for many years, been giving great attention to the rare coins of our own country and while I do not in any way pretend to be a specialist in Americana, I will say this, that I think Americana is to-day being more intelligently connected with the numismatics of the rest of the world than ever before. In years gone by we were practically locked up in our own box and did not take any interest in anything outside ; but to-day we are discovering that as a people we are the descendants of the great Teutonic races, the Ancient Romans, the Goths, the Vandals, the Franks and others ; and it is only by accident that some of our members who are descendants of the Chinese and Japanese races are not with us to-night.

We are thus connecting Americana with the numismatics of the

outer world, and when we shall have sufficiently done this we shall be able to claim for the numismatic science of the United States a permanence and enthusiasm of which its founders little dreamed. We are in the midst of a very active era and I feel assured that the convention of the coming week is not only bound to attract attention the world over, but is destined to give a new impetus to the great science in which we are all so keenly interested.

In conclusion, gentlemen, let me once more express my thanks for the distinguished honour you have conferred upon me and to assure you that I shall ever regard it as an incentive to work with heart and soul for the interests of our organization, and to make its labours a success both locally and nationally. (Applause.)

SOME COINS OF THE BRITISH EMPIRE.

IMPERIAL.
QUEEN VICTORIA.
SILVER CROWNS.
TYPE III.

The following abbreviations are used in describing the coins : —
O — Obverse.
R — Reverse.
E — Edge.

CROWN, 1887.

O. — Legend : — VICTORIA D : G : BRITT : REG : F : D : Bust of the Queen, in profile looking to the left. On the truncation of the bust : — J.E.B. Her Majesty is represented wearing a widow's cap decorated with frilling and surmounted by the Imperial crown. Over the ermine bodice which is adorned with a tucker, the Ribbon of the Most Noble Order of the Garter. The Badge of the Imperial Order of the Crown of India and a portion of The Star of the Garter are shown on the left breast. The hair is parted on the forehead and carried behind the ear to the rear of the head. A necklace of beads, with a pendant in front, round the neck. An eardrop is suspended from the left ear. From the back of the head depends drapery ornamented with a lace border and arranged in folds, which fall over the shoulders. The whole within a linear circle, encircled by an ornamented rim.

R. — A representation of Saint George attacking the Dragon. The saintly knight is mounted on horseback, his left hand holding the bridle rein. He is shown wearing a crested helmet with a tail of hair floating behind. A chlamys flowing freely at the back of Saint George is fastened in front by a fibula. Over the right shoulder a balteus for suspending the gladius. The feet and lower portions of the legs are protected by armour, except that the toes are shown uncovered. The horse apparently half advances, half shrinks, from the fabulous animal at its feet. Saint George has broken his lance by wounding the winged monster, and a portion of it remains in its body, the other part is shown lying upon the ground. The dragon is represented preparing itself for a deadly spring, and Saint George is about to slay it with the gladius he holds in his right hand. In the exergue, the date, 1887, and the letters : — B.P. The whole within a linear circle, encircled by an ornamented rim.

E. — Milled with straight lines at right angles to the face of the coin.

CROWN, 1888.

O. — Similar to the obverse of Type 3.

R. — Similar to the reverse of Type 3, except that the date is 1888.

E. — Milled with straight lines at right angles to the face of the coin.

CROWN, 1889.

O. — Similar to the obverse of Type 3.

R. — Similar to the reverse of Type 3, except that the date is 1889.

E. — Milled with straight lines at right angles to the face of the coin.

CROWN, 1890.

O. — Similar to the obverse of Type 3.

R. — Similar to the reverse of Type 3. except that the date is 1890.

E. — Milled with straight lines at right angles to the face of the coin.

CROWN, 1891.

O. — Similar to the obverse of Type 3.

R. — Similar to the reverse of Type 3, except that the date is 1891.

E. — Milled with straight lines at right angles to the face of the coin.

CROWN, 1892.

O. — Similar to the obverse of Type 3.

R. — Similar to the reverse of Type 3, except that the date is 1892.

E. — Milled with straight lines at right angles to the face of the coin.

Henry GARSIDE.

RUPEES, YEN, AND COPPER CASH.

TO THE EDITOR OF THE TIMES.

Sir, — Thanks are due to Sir John Rolleston for his exposure of the statement of your correspondent "R" that "the Japanese currency is regulated by exactly the same principle as the Indian currency." The statement is, of course, absurd. Sir John exposes the fallacy by one illustration. May I put it in another way, which, perhaps, may be even clearer to the uninitiated? Taking the present price of standard silver at 24 $\frac{7}{16}$ d. per oz., the intrinsic "fine silver" values of the Indian rupee and the Japanese yen are about ae follows : —

Rupee, 9 $\frac{3}{8}$ d., as against an artificial value of 16 d., a difference of 70 $\frac{3}{8}$ per cent.

Yen, 1 s. 8 $\frac{3}{16}$ d., as against an artificial value of 24 $\frac{3}{8}$ d., a difference of 20 $\frac{3}{4}$ per cent.

That surely sufficiently disposes of the statement that the two currencies are on exactly the same principles"!

As regards the questions of wages in China, however, "R" is approximately correct in stating that "there is no silver-paid labour, but only copper paid." No doubt silver is, for purposes of convenience, used to a limited extent in certain centres (in the big factories in Shangai, for instance); but the copper cash is predominantly the coin of the people at large, and even in the country districts round Shanghai, silver was, in my earlier days there, unknown to, and refused by, the natives; in expeditions up country the only coin carried was, and I think still is, copper cash. I would submit that Sir John Rolleston's silver quarter dollar piece is merely a token coin in Chinese eyes—a coin which ten years ago represented about 210 cash, but to day, owing to the

Original from CORNELL UNIVERSITY

shameful and disastrous depreciation of the copper coinage in recent years, has a cash value of more than half as much again; that is to say, that whereas ten years ago a Chinese paid about 846 cash for a dollar's worth of foreign imported goods, he now has to pay nearly 1,300 cash. *Hinc illæ lachrymæ*, for it is undoubted that the depreciation of the copper coinage is one of the main factors in China's present financial chaos, on which question much has already been written in Consular and Chamber of Commerce Reports. A fact to be remembered, and one which is too little considered, is that the currency problem in China is not bi-metallic, but tri-metallic, viz., gold, silver, and copper, of which perhaps the last is the most important factor.

Your obedient servant.

C. J. DUDGEON.

NUMISMATIC SOCIETIES, MUSEUMS, &c.

SOCIÉTE FRANÇAISE DE NUMISMATIQUE.

Séance du 7 mai.

La Société est informée que l'Académie des Inscriptions lui a décerné le prix Duchalet, et que l'un de ses membres, le colonel Allotte de la Fuÿe a obtenu le prix Drouin.

M. Sudre présente une pièce d'essai, frappée à la Monnaie en 1879, et obtenue en unissant les métaux d'une pièce d'or de 5 francs et d'une d'argent de même valeur.

Le comte de Castellane communique un denier inédit du pape Boniface VIII pour le Comté Venaissin émis en 1300 dans l'atelier de Sorgues.

M. Bordeaux produit un document d'archives établissant que le rat qui figure sur les monnaies de l'atelier d'Arras est le «différent» du maître Edmond Artus. Il signale ensuite l'emploi, sous le règne de Louis XII, du b minuscule gothique comme lettre de l'atelier de Bourges. Il présente, en outre, la liste des différents des graveurs pour tous les ateliers de France en 1786.

Le Dr Baillache décrit trois pièces inédites de la collection de M. de Marchéville.

M. Blanchet lit un passage de Sauval intéressant pour l'histoire monétaire.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(*For further particulars see first page of this Circular.*)

The End.

VARIA

An audacious theft was committed in the museum of the Castello Sforzesco at Milan on the night of the 9th inst. About 150 gold coins were stolen, the earliest in date being a florin of Luchino and Giovanni Visconti (1339-49). A complete list of the missing coins has been published in the Italian papers in order to put keepers of museums and owners of private collections on their guard in the event of any of the stolen coins being offered for sale.

(*Athenaeum.*)

A FIND

An old writing desk recently bought for 1s. 6d. at a "rummage" sale at the village of Breamore, Hants, has been found to contain in a secret drawer thirty gold coins, guineas, and quarter-guineas of George the Third's reign. The box and its contents have since been returned to the original owner.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses " Numismatische Circular " betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

SYRACUSE.

Syracuse, the most important and powerful of all the Greek cities in Sicily, owed much of its progress to the natural advantages of its site. The great harbour five miles in circumference, the island Ortygia, and the tableland forming a prolongation of a ridge branching off from the inland heights, all combined to make the strongest and fairest site for a colony in all Sicily. At the same time it was famed for the mildness of its climate; Cicero said there was no day on which the sun was not visible at Syracuse.

Naxos was the only Greek city founded previously in Sicily, and that city only claimed to have been settled one year earlier, viz. in 735 B.C. The Syracusans prided themselves upon being the descendants of Corinthians: Theocritus makes a Syracusan lady say "Do you pretend to command ladies of Syracuse? If you must know, we are Corinthians by descent, like Bellerophon himself, and we speak Peloponnesian. Dorian women may lawfully speak Doric I presume?" (*Idyl.*, XV).

Thucydides after relating the foundation of Naxos says: "Syracuse was founded the next year by Archias of the family of Hercules at Corinth, after he had first expelled the Sicels from the island: on which, being no longer surrounded by water the inner city now stands; and at a later period the outer one also was enclosed in a wall and became populous" (VI, 2).

Strabo relates that "Archias sailing from Corinth, founded Syracuse about the same period that Naxos and Megara were built. They say that Myscellus and Archias having repaired to Delphi at the same time to consult the oracle, the god demanded whether they would choose wealth or health, when Archias preferred wealth and Myscellus health, upon which the oracle assigned Syracuse to the former to found, and Croton to the latter. And certainly in like manner as it fell out that the Crotonians should inhabit a state as notable for salubrity as we have described, so, such great riches have accrued to the Syracusans that their name has been embodied in the proverb applied to those who have too great wealth viz. that they have not yet attained to a tithe of the riches of the Syracusans.....

Archias pursuing his route, met with certain Dorians at Zephyrium who had come from Sicily, and had quitted the company of those who founded Megara: these he took with him, and in conjunction with them founded Syracuse" (VI, 289).

The origin of the name of the island is thus related by Diodorus Siculus (V, 3).

Artemis received from the gods the island of Syracuse which the oracles and men have named Ortygia from the name of this goddess. The nymphs also opened in this island, (to please Artemis), a very abundant spring called Arethusa.

From time immemorial this spring has nourished a number of large fishes which no one dares to meddle with, because they are sacred and inviolable. Those who during the troubles of the war have dared to eat thereof have been smitten by the goddess with great pains".

Diodorus goes on to say that the Sicanians had deserted the eastern part of the island on account of the frequent eruptions of Mount Etna, "and several generations after, a colony of Sicilians leaving Italy crossed the sea and came to occupy the lands abandoned by the Sicanians". This agrees with Strabo's account of "Dorians at Zephyrium come from Sicily" who joined the company of Archias.

The name Syracuse appears to have been taken from that of a marsh near the city. Syraco appears to be a native name as it is not Greek, perhaps the ak may be connected with the root from which "aqua" is formed, Celtic "ach". According to Epicharmus Συράκω was used for Συράκουσαι, but evidently by poetic licence. The progress and prosperity of these ancient cities is generally only known by the evidence of the daughter colonies they were able to establish.

So we find the Syracusans establishing Acræ in 664 B.C. Seventy years after their own foundation Acræ (Palazzuolo) was built on a height some twenty miles due west of Syracuse, at the sources of the River Anapus; no coins of this city are known until after 210 B.C.

Twenty years later than Acræ the Syracusans founded Casmene in 644 B.C. Even the site of this colony is uncertain. Thucydides says "Acræ and Casmenæ were founded by the Syracusans, Acræ seventy years after Syracuse, and Casmene twenty years after Acræ" (VI, 5). It was the city to which the landowners (Gœmori) fled when expelled from Syracuse, and from which Gelon led them back. According to Herodotus Casmene was probably destroyed soon after, and its citizens transported to Syracuse (VII, 155).

Another colony went forth from Syracuse to Camarina in 599 B.C. forty five years after Casmene was founded. This city like Casmene had but a brief existence of about 45 years. "Hippocrates, tyrant of Gela, received their territory as a ransom for some Syracusan prisoners" (Thucydides, VI, 8).

In 648 B.C. there was civil discord in Syracuse which is thus related by Thucydides (VI, 5).

"Himera was founded from Zancle by Euclides, Simus and Saco, and most of those who went to the colony were Chalcidians, though there were also united with them some exiles from Syracuse who had been defeated in a strife of factions, the Mylætidæ, as they were called".

Aristotle relates an incident in these early days of Syracuse, but gives no date. "Now trifling quarrels are attended with the greatest consequences, when they arise between persons of the first distinction in the state, as was the case with the Syracusans at a remote period, for a revolution in the government was brought about by a quarrel between two young men who were in office, upon a love affair; for one of them being absent, the other, who was a friend of his, seduced his mistress, he in his turn took offence at this and persuaded his friend's wife to come and live with him, and upon this they persuaded the whole city to take part either with the one or the other, and caused a complete rupture" (Pol., V, 4).

Herodotus relating that Gelon had possessed himself of the tyranny at Gela, about 490 B.C. says "after this success Gelon leading back those Syracusans who were called Gæmori (γημόρους) and had been expelled by the people, and by their own slaves called Cyllyrii (κυλλυρίους for κολλικυρίους) leading them back from the city of Casmene to Syracuse got possession of this also.

For the people of the Syracusans gave up the city and themselves to Gelon on his first approach. When he had made himself master of Syracuse he took less account of the government of Gela and entrusted it to his brother Hiero: but he strengthened Syracuse, and Syracuse was everything to him: and it grew up rapidly and flourished.

For first of all he removed all the Camarinæans to Syracuse and made them citizens, and destroyed the city of Camarina and in the

Original from CORNELL UNIVERSITY

next place he did with more than half the Geloans the same that he had done with the Camarinæans" (VII, 155).

This revolution at Syracuse appears to have taken place about 485 B.C.

Herodotus goes on to tell how the richer classes of the citizens of Megara and Euboea were taken by Gelon to Syracuse, and the poorer classes sold and exported because he considered them unpleasant neighbours "By such means Gelon became a powerful tyrant". Herodotus then relates the story of the embassy from Greece asking for Gelon's assistance against the Persians, but the speeches are generally recognized to be of a later date and not like those which were delivered by the envoys.

Gelon could not send help to Greece for he was bound to gather all the men he could to defend Sicily. The story of how Gelon advanced to Himera and met Hamilcar there and how he won by a ruse his great victory over the Carthaginians is told in the chapter on Himera. That year of the victories at Himera and Salamis, 480 B.C., is the last of the first period of the Greek Sicilian coinage, or, rather, that eventful year is a recognized time when events took place which changed the influences which affected the mints.

At the time when Gelon took possession, the city was divided into three ranks of society.

In the first were the Landowners (Γημοροι) composed of the families of the original settlers from Corinth, among whom the lands of the city had been divided in lots (κλῆροι or μοροι). These constituted the πολίτευμα strictly so called.

Secondly, the new comers who came from all parts and formed the Demus which was excluded from the πολίτευμα, or proper body politic, until it obtained admittance by force.

The demus constantly pressed for a new division of territory (ἀναδασμός).

The third rank was formed by the native inhabitants who were compelled to serve either as bondsmen or public slaves. The name of these at Syracuse was probably a native word κυλλύριοι or καλλικύριοι or κιλλικύριοι which cannot be explained by Greek.

The 1st rank corresponded to the Patricians at Rome.

The 2nd rank to the Plebeians.

The 3rd rank to the clients of the Patricians.

The earliest coins of Syracuse were issued by the Gœmori, or Landowners, some few years before 500 B.C.; before that time the money used by their merchants must have been that of the mother city Corinth, together with the coinage of Ægina and Athens, and perhaps some of the earliest of the coins of Magna Graecia, Metapontum, Siris, Poseidonia, Croton, Caulonia, and perhaps Rhegium.

The inscription on the first coins of Syracuse contains the Archaic form ϙ for K.

The types are probably the earliest having reference to the games, but it is not likely that they refer to any particular victories, because from the first the types are made to distinguish the denominations of the coins: thus the quadriga indicates the tetradrachm, while two horses appear on the didrachm, and a rider on a single horse is distinctive of the drachm.

Holm is inclined to think the introduction of a mint was due to the democracy after the expulsion of the oligarchs, but the agonistic types do not appear to be democratic, but rather what we might expect from the rich landowners.

The love of horse-racing for which the Syracusans were famed is referred to by Bacchylides in his Vth ode. From these coins we may gather that the rich men of Syracuse had already at that early date commenced to send racing cars to the great games in Greece. The Gœmori were descended from families of Corinth and would value highly the honours to be gained in the Greek games.

Games of which chariot races formed a very important part were early instituted in Sicily, and attained such celebrity that competitors came from the mother country to take part in them. Hieron of Syracuse founded Nemean games at his city Ætna at which, as we learn from Pindar, the Corinthian Xenophon gained a victory in 464 B.C. "But other victories there are which I have to speak of..... Eleusis and fertile Marathon, and the fair rich cities beneath Ætna's lofty peak, and Euboea." At Syracuse the games were founded in imitation of those of the Mother-city. In 446 B.C. games called Eleutheria were instituted in honour of Zeus Eleutherios to whom a statue was erected (Diodorus, XI, 72). The types of the early Sicilian tetradrachms may be regarded as evidence that the games were established and popular at least as early as 510 B.C. in Syracuse.

The earliest tetradrachm bears, on its reverse, merely the square mark of the die divided into four quarters. Only one specimen of this issue is known, and that is in a private Collection.

The next issue of coins presents us with the same Obverse, but the Reverse type is a square divided into four in the mill-sail

manner, and with a central circle in which is the head ot a goddess. The type of the quadriga was probably chosen because chariot racing was a favourite form of sport at Syracuse. If the main idea had been that of the religious games in Greece then we should have expected to find these types adopted in Greece, but they appear in those cities which Pindar celebrated in song as the most famous promoters of this sport. Out of fifteen surviving odes of Pindar no less than eleven celebrate the victories of Sicilian sportsmen. Chariot racing was a very expensive sport, and it probably became popular in Sicily during the time of the rich tyrants who could afford the expense, and as it gave employment to many and offered the most exciting and beautiful public shows, the sport became as popular with the people as with the Tyrants.

A beautiful illustration of an ancient Greek chariot may be seen on the frontispiece of the British Museum guide to the exhibits illustrating Greek and Roman life; valuable information is given on p. 200 of "the Guide".

The peculiar way in which the four horses are represented by adding as it were extra legs to the one body was also that adopted by the ancient Egyptians.

Compare the horses in the chariot of the Pharaoh Akhnaton on the plate opposite p. 130 in "the life and times of Akhnaton by AEP Weigall (W Blackwood and Sons, 1910). There we see a biga on which the second horse is only seen in regard to the legs and a faint line round the front of the head and neck, something like that produced on a double struck coin when the die has shifted.

Note the tails of the horses, long and thin, just like those on the early Greek coins.

The four-horsed chariot on the Obverse of the earliest coins was the city badge, and the inscription was in the field of the design. It has been suggested by Mr Macdonald that this city-badge was changed because the type became so popular that it was adopted by other cities as Gela and Leontini. When Gelon changed the type he placed the head of Artemis on the Obverse and the inscription around it.

The inscription was at first the explanation of the city-badge and generally in the genitive case. At Athens it was beside the owl, at Tenedos beside the double axe, at Syracuse first beside the quadriga, then beside the head of the goddess.

THE DOLPHINS.

Although the dolphins round the head of the goddess vary much in form on the various issues of the early tetradrachms we may feel sure that they are all meant to represent the Delphinus Delphis of the naturalists. The beak distinguishes them from the Phocaena Communis, or porpoise, which, moreover, is seldom seen in the Mediterranean sea.

The dolphins on the Syracusan coins are better formed than those on the vases of the same century. We can easily compare them with the dolphin on an oinochöe of the VI Cent. from Vulci, in the British Museum, which has the head exaggerated, and the dorsal fin placed almost on the neck.

The tails of the dolphins on the coins are commonly represented accurately from the side view, hence they appear thin, as the two

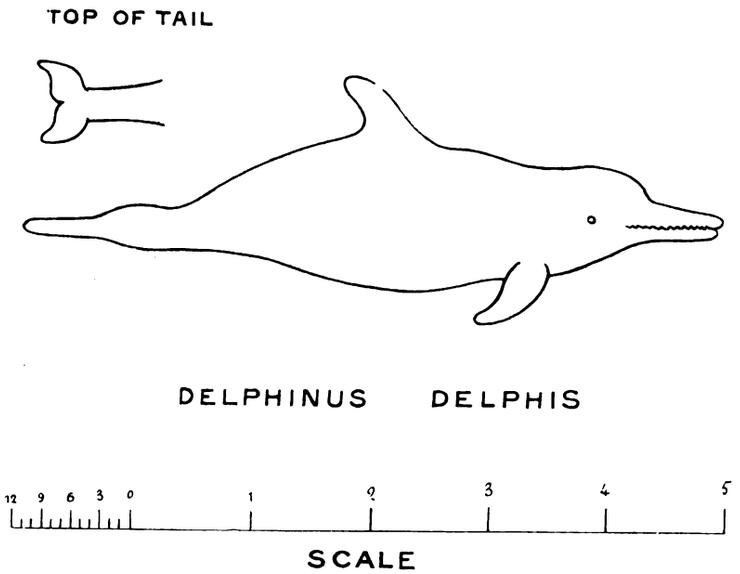
portions or wings of the tail can only be seen from above the creature. We generally find the dolphins on the coins represented as thinner than the living specimens.

The dolphin was the most appropriate symbol of the sea to be placed round the head of the Huntress Artemis, who was also especially a goddess connected with waters.

Homer (*Il.*, XXI, 22) describes the terror caused by Achilles as like that among the smaller fishes when pursued by a dolphin.



Lord Derby translates the passage thus "As fishes flying from a dolphin crowd the shoal recesses of some open bay in fear, for whom he catches he devours, so crouched the Trojans in the mighty stream"; whether this idea occurred to the ancient Greeks, who designed the type, we cannot say, but at any rate we can but see how the symbol harmonized with ancient ideas of the goddess.

The dolphins were regarded by the ancients as the swiftest of living creatures, and hence it is somewhat remarkable that the swift coursers of the deep were chosen as emblems for a coin on which the swift race horses of the circus appear on the Reverse. We cannot say that this thought influenced the designers of the dies, but it is difficult to believe that an idea which strikes a modern student so readily was absent from the minds of the ancient engravers. Moreover there was, at any rate in later times, a distinct connection of the dolphin symbol with the race circus. Juvenal says the wicked wife "enquires, in front of the obelisks and the dolphin columns, whether she shall jilt the tapster and marry the old clothes man (VI, 590).

In Dr Smith's, *Dict. Rom. Antiq.* (s. v. Circus) is an illustration of a bas-relief on which the seven dolphins are represented on a beam resting on two Columns.

This is of course a Roman circus; as to this Roman custom Tertullian wrote thus in his work "de spectaculis" (c. 8) "How many idolatries then dost thou observe in the fashion of the place itself? Each single ornament of this circus is in itself a temple. The eggs they assign to the honour of Castor and Pollux who blush not in believing that they were born of an egg from a swan which was Jupiter. The pillars vomit forth their dolphins in honour of Neptune". That the dolphins were also regarded as symbols of Neptune does not militate against the suggestion that they were chosen by the ancient Greeks as emblems of water and also symbols of speed. There is a passage in Pausanias which shows that, at any rate in his time, dolphins were used in the Greek circus at Olympia (Book VI, ch. xx, § 7).

"Passing out of the Stadium, at the point where the umpires sit, you come to the place set apart for the horse races, and the starting place of the horses. The starting place is shaped like the prow of a ship, the beak being turned towards the course ... at the very tip of the beak is a bronze dolphin on a rod ... On an altar is a bronze eagle with its wings spread to the full. The starter sets the machinery in the altar agoing, whereupon up jumps the eagle n the sight of the spectators, and down falls the dolphin to the ground." The Romans are well known to have copied the Greeks, and although we have no evidence of an earlier use of the dolphin symbol in the Greek circus it is probable that such a symbol was used by the Greeks long before it was copied by the Romans. Tertullian regarded the dolphin as a symbol of Neptune probably because that god was associated by the ancients with horses, and was represented as wearing the horseman's chlamys.

The dolphins on the coins are commonly regarded as merely emblems of water, but we should remember how intimately they were also connected with the symbolism of Poseidon the god of horses and with the idea of swiftness.

Pliny begins his curious and erroneous description of the dolphins with a reference to its swiftness (IX, c. 8).

"The dolphin is the swiftest of all living creatures, not only of those in the sea; it is more swift than a bird, swifter than an arrow." The chapter is full of interesting mythical stories.

The charm of these beautiful creatures, so strong and swift, has been felt by all artists and poets. Virgil wrote of the "Dolphins of silvery sheen lashing the white eddies with their tails in play cleaving the surges (*Aen.*, VIII, 673) and in another place compares their beak to those of ships.

"Their cables snapt, like dolphins in their glee they dip their beaks, and dive beneath the sea" (*Translations* by E. F. Taylor).

The Dolphins have generally been regarded as symbols of the water, and connected only with the female head round which they are placed. No connection with the Reverse type has been imagined. However on some of the earliest coins there is in the exergue a form which some numismatists have regarded as that of a dolphin, as in the *Revue numismatique*, above referred to. At any rate a little later in the period of the Dionysian dynasty between 405 and 345 B.C. we see clearly defined two dolphins meeting, perhaps suggestive of racing with each other, in the exergue of the Reverse.

These coins shew that the dolphins were regarded as symbols shewing a connection between the Obverse and Reverse types.

The pistrix on the coins of Hieron I. points to a similar connection as a symbol of water, perhaps of the harbour, and the later adoption of the dolphins in the exergue may be the natural development of the harmonious symbolism of the two types. Confer nos 148, 149, 150, 154, 155, 166, Cat. Brit. Mus., also Dr Head's, *Hist. coinage of Syracuse*, Plate V, fig. 7, also Comte Alberic du Chastel de la Howarderies, *Syracuse, ses monnaies*, Plate IV, nos 64, 65, 67, 69.

On a tetradrachm engraved by Eumenes the dolphin in the exergue is represented as hunting a fish which swims away in front. This design in the exergue is one of the many evidences of the keen interest taken by the Greeks in the study of nature (confer nos 142 and 146 Brit. Mus. Cat.).

No 152 introduces Skylla also with the fish and the Dolphin; the trident in this case still further illustrates Pliny's word about the dolphins joining in the fishing of the men (Book, IX, chapter VIII).

THE FEMALE HEAD

On the very early tetradrachms a female head appears in a small incuse circle on the reverse side and later about 485 B.C. Gelon introduced a new design for the Obverse on which a similar female head is represented surrounded by four dolphins. Four different names have been attributed to these heads but only two of these are worth consideration, namely Artemis and Arethusa, because the other names, Persephone and Nike, belong to a later period than 480 B.C.

The references to Artemis in ancient literature connecting her with the Sicilian island make it probable that the head of the female on the earliest coins was meant to represent that goddess rather than the nymph Arethusa, but in later times the nymph took the place of her mistress.

The story of Alpheius the river god is told in various ways by Pausanias and Ovid, each however relating that Alpheius was in love with a nymph named Arethusa, and that she fled from him to the island Ortygia (Paus., V, 7, 2; Ovid, *Met.*, V, 572).

But Pausanias also relates a different story (VI, 22, 5) according to which Alpheius was in love with Artemis, who fled from him to Latrini.

In the Scholiast to Pindar (Pyth. II, 12) Artemis is said to have fled to Ortygia. where a temple was built to her as Alphaea.

Pausanias tells us there was at Olympia an altar served to Artemis and Alpheius in common (V, 14, 5).

The belief of the ancients that the spring in the Sicilian isle was connected with a river in Greece is related by Strabo (VI, 270).

"Ortygia boasts of the fountain Arethusa, which springs in such abundance as to form a river at once, and flows into the sea. They say that it is the river Alpheius, which rises in the Peloponnesus and that it flows through the land beneath the sea to the place where Arethusa rises and flows into the sea. Some such proofs as these are given in support of the fact. A certain chalice having fallen into the river at Olympia, was cast up by the springs of Arethusa : the fountain too is troubled by the sacrifices of oxen at Olympia, and Pindar, following such reports, thus sings (Nem., *Ode*, I, 1). Hallowed resting place of Alpheus, pride of renowned Syracuse, Ortygia, whereon Artemis takes her repose, sister of Delos!

"Timaeus the historian advances these accounts in like manner with Pindar."

Strabo then goes on to say he does not think the story likely to be true, because the Alpheus flows into the sea, and no fissure is visible into which it might flow, and thus keep fresh.

The story of the pursuit of Arethusa and her defence by Artemis is told with poetic wealth of detail by Ovid.

Diodorus Sic. relates that Artemis received the isle of Syracuse from the gods which the oracles and men have called Ortygia from the name of this goddess, the nymphs moreover opened in this isle (to please Artemis) an abundant spring called Arethusa (V, 3).

The name Ortygia is given to Artemis by Sophocles in his play Trachiniæ (l. 212) "and at the same time celebrate, the virgins, Paean, Paean; and loudly celebrate his sister Artemis Ortygia, the huntress of the stag".

Artemis was the patroness of persecuted virgins, as we may see from the Suppliants of Aeschylus (l. 148) : "But again may the chaste daughter of Jove willingly regard me willing, keeping fixed upon me her dread countenance : and with all her might let her, a virgin defending virgins from persecutions, be our deliverer."

Pindar, in his second Pythian Ode, sings of the race "in which Hiero of the built car, proved himself the best, and decked Ortygia with crowns seen from afar, the residence of the river goddess Artemis; for by her kindly aid it was that he broke in those spangle reined colts, taking them gently in hand."

Enough evidence is here given, of the connection of the spring with the goddess Artemis, to make it quite probable that in the earliest times that goddess was certainly worshipped in Ortygia; the name means "quail island", the ancient name of Delos, and as the sister of Apollo she was called Artemis Ortygia (Soph. *Ir.*, 214). Hence in Pindar's Nemean Ode I the isle Ortygia is called "sister of Delos".

In favour of regarding the head in the incuse circle as that of Artemis is a passage in G. Macdonald's, *Coins types* (p. 69-70).

Writing on city arms in inscriptions he refers to a very fragmentary slab from Epidaurus :

"The letters that survive suffice to show merely that the inscription commenced in the ordinary form of a decree. The description of the nature of the honour conferred is gone. So, too, are the name and city of the individual honoured. It is, however, practically certain that he was a Syracusan, for at the head of the decree there is cut in relief a female head looking to the left and surrounded by a ring of dolphins. Perdrizet's interpretation will not be questioned by any one who has ever seen a Syracusan "medallion". It is true that there is little real resemblance to the Persephone of Evainetus or the Arethusa of Cimon.

"There is more affinity with the head of Artemis which appears unaccompanied by dolphins on the bronze money of the time of Agathocles.

"Nevertheless the suggestion is unmistakable and what lends it particular interest is the conclusion that here the παράσημον seems to be borrowed from the coin type."

ARETHUSA.

Arethusa, the huntress nymph, who attended in the train of Artemis, was connected with the legend concerning the origin of the fountain in the island; so, as the Greeks were intensely interested in their own cities and all that belonged especially to their own localities it was only natural that the local nymph should gradually become more popular than the ancient goddess who was connected with rivers and fountains.

The name Ἀρέθουσα is a participal form of Ἄρδουσα "the Waterer".

In Homer's Odyssey we find the same name given to a fountain in Ithaca (13, 408).

The story of Arethusa was popular with the Romans as the following passages in Virgil and Ovid show.

Virgil, *Ecl.*, IV, x : "Grant unto me, O Arethusa, this last essay a few verses such as Lycoris herself may read. I must sing to my Gallus. Who can deny a verse to Gallus? So when thou glidest beneath the Sicilian wave, may the salt Doris not intermingle her streams with thine."

Virgil, *Aen.*, III, 694 : "Before the Sicilian bay outstretched lies an island opposite to rough Plemmyrium; the ancients called its name Ortygia. It is said that Alpheus a river of Elis, hath hither worked a secret channel under the sea : which by thy mouth O Arethusa is now blended with the Sicilian waves."

Ovid (*Metam.*, V, 487, seq.): "Then the Alpheian nymph raised her head out of the Elean waters, and drew back her dripping hair from her forhead to her ears, and says, O thou mother of the virgin sought all the world over, and of corn, give over your immense toils, and be not so violently angry with a land so faithful to thee.

"The land has deserved nothing of it, and opened against its will to the carrying off your daughter. Nor am I a supplicant for my native country, I came a stranger hither. Pisa is my country, and I derive my birth from Elis. I inhabit Sicily as a foreigner : but this land is more agreeable to me than all other soils. I, Arethusa, have for my dwelling this habitation : which do thou most gentle goddess preserve. Why I am removed from the place of my birth and am come to Ortygia through the waters of so great a sea, a seasonable time will come for my telling you, when you shall be eased of your concern, and shall wear a more pleasing aspect.

"The pervious earth gives me a passage and moving within the low caverns thereof, I here lift up my head, and see the stars I have not for some time been used to. Wherefore while I run along the Stygian water under the earth, thy Proserpine was there seen by these eyes of mine."

Further on the whole story of Arethusa's flight is told with full poetic detail.

The story of the river Alpheus diving under the sea and rising in Sicily is beautifully sung by Moschus (idyl VII) : "Alpheus when he leaves Pisa and makes his way through beneath the deeps, travels on to Arethusa with his waters that the wild olives drank, bearing her bridal gifts, fair leaves and flowers and sacred soil. Deep in the waves he plunges, and runs beneath the sea, and the salt water mingles not with the sweet. Nought knows the sea as the river journeys through.

"Thus hath the knavish boy, the maker of mischief, the teacher of strange ways — thus hath Love by his spell taught even a river to dive."

Moschus was a native of Syracuse who flourished in the third century B.C.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(Including the names of several hitherto unpublished artists.)

One-hundred-and-forty-seventh article.

(Continued from col. 12384.)

SCHMIED, HANS (*Germ.*) Medallist and Mint-Engraver at Nuremberg, 1628-1634. (Gebert, *Geschichte der Münzstätte der Reichstadt Nürnberg*, 1891; p. 93, 110).

SCHMIEDHAMER, JOHANN HEINRICH (*Germ.*). Warden and Master of the Mint at Bayreuth, 1766. Schlickeysen gives **EBERHARD SCHMIEDHAMMER** as Mint-warden at Bayreuth, 1765-66, and states that his privy mark is **E. S.** or **E. & S.** and **E. (B.) S.** Ammon brings the two in conjunction, and says their signatures occur on Thalers and subsidiary currency of 1755-66, **E * S**, or with a rose; **E. S.**; **E. & S.** and also **I. C. E.**

SCHMILAUER VON SCHMILAU, AUGUSTIN (*Austr.*). Chief-assayer at the Mint of Prague, 1611; appointed Mint-master at Kuttenberg in 1614; died 17. November 1615. Privy-mark, cock to right, with sword in r. claws.

SCHMIRER. *Vide* **SCHNÜRER.**

SCHMITT, JOHANN FRANZ (*Germ.*) Mint-warden at Mayence, *circ.* 1751, 1763.

SCHMITT, JEAN LOUIS MICHEL (*Swiss*). Sculptor and Medallist, born at Geneva, 7. February 1807; pupil of the Fine Art School of Lyons and James Pradier; died at Lyons, 28 July 1890. For 22 years he was drawing-master at Lyons, and from 1870 onwards Professor and Librarian at the Fine Art School of Lyons.

Among his medals are: Baron de Polinière; — Société d'Orphéons; — Chambre syndicale des Entrepreneurs; — Mines de houille; — Marriage of the Holy Virgin; — Thiers; — Medal for Musical competitions, 1877; — Louis XIV.'s statue on the Place Bellecour, Lyons, partly submerged by the Saône, 1840; — Lyons under water, 1840; — French Scientific Congress at Lyons, 1841; — Virgin and Child, 1843 (two medals commemorating the Bicentenary of the 'Voeu des Echevins', of 1638); — Charles, Comte de Montalembert, 1844; — Pius IX.; — The Lyonnese disarm in 1848; — Universal Jubilee, 1851; — The Rhône and Saône united under a bridge, 1840; — Expedition to Rome, 1849 (signed: **L. SCHMITT. INV. ET F.**); — The Republic acclaiming France, 1871 (signed: **L. SCHMITT. FEC. LUG.**); — Universal Exhibition at Lyons, 1873; — Palais de Justice of Lyons, 1835; — Société d'encouragement founded by P. Jouve, 1843; — Building of a group of 13 houses at Lyons, 1858; — Disarming of the Garde Nationale, 1848; — Presentation Medal to Laforest, mayor of Lyons, 1848; — Token of Grosménil Collieries (Florange 98); — E. V. de Castellane, general, 1851; — J. C. Fulchéron, 1848; — Swiss Charitable Society at Lyons during the Franco-German War, 1870-71; — Hôpitaux civils, Lyons, 1845, etc.

SCHMITT, JOSEF (*Austr.*). Mint-engraver at Vienna; born 17. April 1781, died 10. August 1866. He was appointed at Vienna, 10. June 1799, and was first engaged on the copper coinage of Schmölnitz; 1800, he was transferred to Kremnitz, then returned to Schmölnitz; 1818, he became third assistant at the Vienna Mint, 1829, second, and 1832 first assistant, 1833-1835, he worked at Kremnitz; 1836, appointed Mint-engraver; 1841, third Engraver, and 1849, second Engraver; 1859, pensioned off.

Among the dies preserved at the Vienna Mint are the following by J. Schmitt: Ferdinand I, 4 Ducats, and Gulden, 1837 (in conjunction with J. D. Boehm); — Gulden for Kremnitz, 1837; — Souverain d'or for Lombardy and Venice, 1837, 1842; — 4 Ducats, 1844; — Double Gulden, 1845; — ¼ Kreutzer, 1851 (sev. var.); — 4 Ducats, and Double Gulden, 1852 (sev. var., engraved in conjunction with C. Lange); — Marriage Double Gulden of Francis Joseph I., 1854 (type not adopted); — 4 Ducats, 1856, 1858; — Medal on the Constitution, 1849; signed: **J. SCHMITT F.** (Montenuovo 2630), etc.

BIBLIOGRAPHY. — *Katalog der K. K. Münzen-und Medaillen-Stempel Sammlung.*

SCHMITZEN, JAKOB (*Germ.*). Mint-master at Koblenz, 1676.

SCHMITZ, AD. (*Germ.*). Designer of a Portrait-medal of Dr A. Mooren of Düsseldorf (In Boston Coll[n]).

SCHMÖLTZ. (*Vide* **SCHMELZ, CHRISTOPH** *supra*. 1700-1777). Mint-engraver at Hall and Kremnitz, 1753-77.

SCHUTTERMAYER (SCHMETTERMEYER), HANS (*Germ.*). Mint-master at Schwabach, 1503, and Bamberg, 1510-1515.

SCHMUTZER, FRANZ (*Austr.*). Mint-engraver at Kremnitz, 1801-1817. He was born in 1781, died 28. July 1823.

SCHMUTZER, JOSEF (*Austr.*). Assistant-engraver at Vienna, 1763-1796; born in 1736, died in November 1796.

SCHMUTZER Junior, **JOSEF** (*Austr.*). Assistant Mint-engraver at Günzburg, 1796-98.

SCHMUTZER PHILIPP (*Austr.*). Son of Josef Schmutzer, born in 1778, died 24. September 1845. He entered the Vienna Mint as Engraver in 1796 and was still in office in March 1836.

SCHNABEL, ANTON (*Austr.*). The initials **A. S.** occur on a Venetian Tallero of 10 Lire, 1797, issued at the time of the French Revolution, and are said to represent Anton Schnabel who was probably Engraver at the Mint of Venice.

SCHENESE, ALEXIS (*Russ.*). Mint-master at St. Petersburg, 1766-1772. His initials **A.Ш.** occur on the currency.

SCHNESE, IWAN (*Russ.*). Mint-master at Moscow, 1752-1754. His initials **I.Ш.** on the coins.

SCHNEGG, JACQUES LUCIEN (*French*). Contemporary Sculptor, born at Bordeaux; pupil of Falguière. At the Salon 1890 he exhibited a series of seven Portrait-medallions in terra-cotta.

SCHNEIDAU, HEINRICH BURKHARD VON (*Boh.*). Mint-master-general for Bohemia, 1686-1688.

SCHNEIDER, CHARLES (*French*). Contemporary Sculptor, and Coin-engraver, born at Château-Thierry; pupil of Larcher, Chaplain, and Lechevrel. At the Salon, 1906, he exhibited the following cameos: Y penser toujours, n'en parler jamais; — Portrait of M[me] Schneider; — 1907. Three Portrait-cameos; — Stars, cameos; — 1908. M[lle] T. S***; — M. T. S***; — Dawn, cameo; — 1909. Five Portrait-medals.

SCHNEIDER, CHRISTOFER (*Dan.*). Medallist at Copenhagen, third-quarter of the seventeenth century *circ.* 1678-1698. His initials **C. S.** occur on a medal commemorating the Peace of Lund, 26. September 1679, between Denmark and Sweden, and on another, on the Departure of Princess Ulrika Eleonora of Denmark, King Charles XI.'s betrothed, for Sweden, 1680 (*Hilebrand*, I, 422, 463).

Schneider, among other medals, cut the dies for a medallion, which is one of the largest in size ever struck. It commemorates the triple Victory of the Danes over the Swedish Fleet in 1677. The figures betray a want of taste and vigour in the invention and execution. On the reverse is a sea-fight, in which the artist has shown some knowledge of technicalities. As the medal was struck from a die, a certain strength was necessary on account of its size. It weights in silver 49 ozs: (*Bolzenthal*, p. 238).

SCHNEIDER, GOTTFRIED (*Germ.*). Gem-engraver at Breslau, 1638-39.

SCHNEIDER, HANS (*Austr.*). Mint-engraver at Prague, 1578 (?), 1586-87; later at Breslau.

SCHNEIDER, HEINRICH (*Germ.*). Die-sinker, Cutter of armorial bearings, &c., of Breslau, 1595, 1605.

SCHNEIDER, JOHANN, surnamed **WEISSMANTEL** (*Germ.*). Mint-master at Erfurt, 1624-1635.

SCHNEIDER, LORENZ CHRISTOPH (*Germ.*). Mint-master at Halberstadt, 1679-1682, and Berlin, 1682-1701; mint commissioner, 1701-1713. His initials **L. C. S.** occur on the coinage issued under his authority. I have noticed them on a Gulden of Frederick III., 1690. Some subsidiary currency of Crossen, 1687, also bear his initials.

SCHNEIDER, GEBRÜDER (*Austr.*). Die-sinkers of Vienna. Issued in 1903 a Memorial Portrait-plaquette of Pope Leo XIII., 1903; 60 × 40 mill. (described in *Mitth. des Clubs der Münz- und Medaillenfreunde in Wien*, 1903, p. 81).

The signature **H. SCHNEIDER** occurs on a Medal commemorating Prince Ernest zu Windisch-Graetz's 70th anniversary as a Collector, issued by the Atelier Jauner; — New Years' Plaquette 1909; — Plaquette of Viennese Warrant-holders.

SCHNELL, SIMON (*Germ.*). Mint-master at Arolsen, 1735, and later at Stuttgart, from 1744 to 1752. Initials on the coinage.

SCHNITZSPAHN, CHRISTIAN (*Germ.*). Medallist, and Coin-engraver, born at Damrstadt 6. December 1829, died 15. July 1877. He was the son of a court-jeweller Martin Schnitzspahn, with whom he learned engraving. Later he was apprenticed at Hanau, and at the Munich Polytechnic School and Academy he studied modelling under Prof. Windmann. In Berlin he worked for the Medallist Johann Karl Fischer, and made a year's stay in London (1856) as Engraver under Benjamin Wyon.

Returning to his native city, he was appointed Court- and Mint-engraver, 1858, but he also worked occasionally (1859-1861) for the private Mint of Friedrich Wilhelm Loos of Berlin.

Schnitzspahn was a nephew of Jakob Fuchs, Mint-engraver at Darmstadt.

This Engraver's signature occurs generally in full : **C. SCHNITZSPAHN** on the coins he cut the dies for, thus on the silver currency 1865-77 of Charles of Württemberg, comprising the 1865 Vereinsthaler, 1870-71 Victory Thaler, 1871 Double Thaler commemorating the Restoration of Ulm Cathedral, &c.; silver currency of Ferdinand, Sovereign Landgrave of Hesse, 1859-66, including the Vereinsthaler of 1859, 1861, 62, 63, &c.

Among his best known medals are : Portrait-medal of Friedr. Christoph Schlosser, historian 1861; — Completion of the Luther Monument at Worms; — Grand Duke of Hesse; — King William of Prussia; — Queen Augusta; — Czar Alexander II; — Marriage medal of Alfred Duke of Edinburgh and the Grand Duchess Marie of Russia, Æ (2·5 inch); — Horticultural Prize medal, with bust of King Charles of Württemberg, 1878; — Coronation of King Charles XV. of Sweden and Queen Louisa at Throndheim, 1860 (issued in commission for Christiania University); — Jacob Fuchs, uncle of Scknitzspahn, naturalized in Belgium, 1854 (signed on R **CHR. SCHNITZSPAHN IN DARMSTADT**); — 50 years' Medical Jubilee of Dr Gustav Adolph Spiess, 1873; — Second Centenary of the Banking firm Metzler, Seel, Son & C° of Frankfort-on-M., 1874 (signed : **CHR. SCHNITZSPAHN IN DARMSTADT FEC.**); — 50 years' Official Jubilee of Michael von Lukacsich (Heiligen Geist Hospital), 1874; — Hesse-Darmstadt, Æ Service Medal for Burgomasters, instituted by Louis III., 1853; — Württemberg, Æ Civil Merit medal of Charles, 1870; — Prize Medal for Arts and Sciences, with bust of King Charles of Württemberg, 1865 (several varieties); — International Exhibition at London, 1862 (R by J. Wiener); — Memorial medal of Prince Alexander of Hesse, 1888 (the artist's obv. die was used for his medal); — Portrait-medal of Schiller; — Dr W. F. von Ludwig, Stuttgart, 1861; — Dr G. A. Spiess, of Frankfort-on-M., 1873; — Geneva Cross medal, Vienna, 1873; — Geneva Cross medal, " Amerigain (*sic*) Benevolence.

Schnitzspahn was the recipient of many orders, and was honorary member of the Academies of Vienna and St. Petersburg.

SCHNÜRER (*Germ.*). Mint-master at Hechingen (Hohenzollern), 1603.

SCHNYDER, ANTON (*Swiss*). Sculptor, Designer and Medallist, residing at Lucerne. Among his medallic works I have come across : 1889. Cantonal Rifle Meeting at Lucerne; — 1890. Federal Rifle Meeting at Frauenfeld (unofficial medal); — 1891. Sixth Centenary of the Swiss Confederation (signed : **ANT. SCHNYDER INV.**); — 1892. Centenary of the Massacre of the Swiss Guard at Paris, 10. August 1792 (struck by Wilhelm Mayer at Stuttgart), &c.; — 1893. Inauguration of a Seminary at Sarnen (signed : **SCHNYDER LUZERN**); — Industrial Exhibition at Zofingen.

SCHNYDER, GEORG JOSEPH (*Swiss*). Goldsmith of Lucerne, born 1775 † 1857; Mint-master at Lucerne, 1814-15.

SCHÖBEL, TOBIAS JOHN (*Austr.*). Mint-master at Günzburg, 1762-1789. His initial **S** occurs in conjunction with **F** representing **JOSEF FABI**, Mint-warden, on the well-known Maria Theresia " Levant " Dollars, 1780, which are still issued for circulation in Abyssinia and the Sudan. The dies were eugraved by the Günzburg Engraver **BAPTIST WURSCHBAUER.**

Schöbl signed also, in conjunction with the Mint-warden **HUBERT CLOTZ** the Burgan Thalers of 1766.

SCHÖLLER, HANNS (*Austr.*). Seal-engraver, and Mint-master at Vienna, 1604.

SCHÖN, JOSEF (*Austr.*). Medallist and Coin-engraver, born at Vienna on 14. August 1809, died 5. March 1843. He was employed at the Vienna Mint from *circ.* 1831 to 1840. Amongst his medals are : Archduke Frederick of Austria, 1840; — 50th Anniversary of Franz Grillparzer, 1841; — Franz Josef Fürst von Dietrichstein, 1839; — 50 years' Priestly Jubilee of Ladislaus Pyrker, 1842 (sign : **J. SCHÖN**); — Enthronisation medal of Maximilian Joseph, baron von Somerau-Beeckh, as archbishop of Olmütz, 1837; — Anthon Friedrich Mittrowsky von Mittrowitz, Hungarian statesman, 1841.

A list of this artist's best works will be found in Wurzbach XXXI p. 115.

Bibliography. — *Katalog der K. K. Münzstempel Sammlung.*

SCHÖNAU, FRIEDRICH (*Germ.*). Goldsmith of Breslau, first half of the seventeenth century. He was appointed to cut dies for the Dukes of Liegnitz-Brieg; 1623 he was in Imperial service, and in 1625 we find him installed as Mint-warden at Ratibor.

SCHÖNENBERGER, HENRI (*Swiss*). Die-sinker, Seal-engraver, and Medallist, whe was residing at Versoix in the nineties, but entered into a partnership with John Lamennière of Geneva, *circ.* 1900, where they opened a Die-sinking establishment. There are several badges, tickets, plaquettes, prize-medals, &c. by him; amongst them : Badge of Swiss Federal officials, 1902; — Fencing Prize, Swiss National Exhibition at Geneva, 1896, &c.

SCHÖNEWERK, ALEXANDRE (*Germ.*). Nineteenth century sculptor, born at Paris 18. February 1820, died in the eighties. Pupil of David d'Angers, Jollivet and Triqueti. He is the author of several Portrait-medallions executed in his master's style.

SCHÖNFELD, FRIEDRICH (*Germ.*). Goldsmith and Seal-engraver at Augsburg, 1645.

SCHÖNFELD, NICOLAUS. Baron von (*Bohem.*). Mint-master general for Bohemia, 1650 — December 1663.

SCHOLTISHEYM, SALOMON SCULTET VON. Also **SALOMON SCKULTET** or **SCHKULTET** (*Bohem.*). Mint engraver at Prague, *circ.* 1638-1649.

SCHOLTZ, GOTTFRIED *Germ.*). Mint-engraver at Breslau, *circ.* 1655; born 1620; died 1666.

SCHOLTZ, MELCHIOR (*Germ.*). Die-cutter at Breslau, *circ.* 1619.

SCHOLZ (*Germ.*). Ammon states that a medal, dated 1692, described in *Vollständig Braunschw. Lüneburg. Münz und Medaillen Cabinet n. 981*, is thus signed.

SCHOLZ, GEORG (*Germ.*). Die- and Stone-cutter at Breslau, born 1676, died 1707.

SCHOLZ (Mint-warden) and **FÖRSTER** (Mint-master) at Nuremberg, *circ.* 1760-64. These joint initials occur on the currency, **NSF.**

*

SCHOLZ (Mint-warden) and **RIEDNER** (Mint-master) at Nuremberg, *circ.* 1764-74. Coins occurs with **NSR**; also **SS**; and **G. N. R.**

Marriage Thaler, 1762.

Scholz and Firster's initials occur on a Marriage medal or thaler of Prince Christian Ludwig von Wied and Charlotte Sophie Auguste von Sayn-Wittgenstein, 1762 (*illustrated*).

BILIOGRAPHY. — Domanig, *Die Deutsche Medaille.*

SCHOLZ, SIEGMUND (*Germ.*). Mint-warden ar Nuremberg, *circ.*, 1760-1774 (Nagler, 1741-60).

SCHONGAUER, HEINRICH and Consort (*Germ.*). Contractors of the Mint of Augsburg, 1270-1272.

SCHOMBURG, JOHANN GEORG (*Germ.*). Mint-warden general in Saxony, *circ*, 1737. I have noticed his initials **I. G. S.** on a Gulden of Frederick Augustus II. of Saxony, 1733, and Ammon dates that they occur on Saxon Thalers and Gulden of 1717, 19, 27 and 33, Kirmis mentions him as Mint-master at Dresden, 1716-1734.

SCHOONJANS (*Belg.*). Chief of the Mint-works at the Brussels mint, under the direction of J. Allard, 1903.

SCHOORL, JAN VAN (*Dutch*). Painter of the first half of the sixteenth century. Jean Second, the painter and medallist, was one of his pupils.

SCHOPF, HANS GEORG (*Germ.*). Mint-engraver at Schillingsfürst, 1684.

SCHOPPER, GEORG (*Swiss.*). Mint-master at Berne, 1581; also at Fribourg, 1581-1589, 1595 (?); and at Lucerne, 1589.

SCHORAS, SEBASTIAN (*Germ.*). Mint-master at Rostock, 1594-1606. *Vide* Ed. Grimon, *Münzen und Medaillen der Stadt Rostock*, Berliner Münzblätter, 1904, p. 548.

SCHOSSELER-JERDELET, Mme ROSETTE (*French*). Contemporary Sculptor, born at Paris; pupil of the Ecole des Arts Industriels of Geneva, and of her father. At the Paris Salon, 1892, I noticed a fine Portrait-medallion of Queen Victoria, 1892, by her.

SCHOTT, HANS (*Austr.*). Moneyer at Vienna, 1428.

SCHOTT, PROF. WALTHER (*Germ.*). Contemporary Sculptor of Berlin, whe modelled the German War medal for China, 1901, issued by W. Mayer and F. Wilhelm.

SCHOTTENMÜLLER (*Germ.*). Mint-master at Stockau, 1622.

SCHOUBERG, JOHANNES (*Dutch*). Chief-Engraver of Seals at the Mint of the Hague, for 45 years, at the end of the eighteenth and early part of the nineteenth centuries. He engraved armorial bearing of the Hereditary Grand Duke of Saxe-Weimar-Eisenach and Princess Sophia of the Netherlands (*Vide* Immerzeel, II, 77).

SCHOUBERG, JOHANNES PETRUS (*Dutch*). Medallist, and Coin-engraver of the first half of the nineteenth century, son of Johannes Schouberg, born at the Hague, 10. January 1798, died at Utrecht 6. January 1864.

He learned the art of engraving from his father, and was appointed Mint-engraver at Utrecht, in 1816, and under Willem I. and II. He visited Prussia and Belgium, and from 1812 to 1852 he was Engraver to the Mint; he cut most of the dies for the gold currency, whilst Van der Kellen was entrusted with the silver coinage. The Rijksdaalder of 1839 is however by this Engraver, who under Willem III. prepared dies for the silver coins, whilst Van der Kellen did those for the gold. The currency engraved by Schouberg is usually signed: **I. P. SCHOUBERG F.**, but also **I. P. S.** or **I. P. S. F.** He resigned office in 1852 after forty years' service at the Mint.

I have come across Schouberg's signature on the following coins: Rijksdaaler, 1840 and Florin; — 10 Florin, 1842; — 5 Florins, 1843; — Double, single and half Negotiapennings, 1848, etc.

Amongst his medals I have noticed: Accession of Willem I. as King of the Netherlands, at Brussels, 1815; — Opening of the Great North-Holland Canal, 1824; — Medal for Military Faithful service, 1824; — The Ten Days' Campaign under the leadership of the Crown Prince, 1831; — Erection of the bronze Cross, 1831; — Introduction of new Legislation in Holland, 1838; — Prize Medal with bust of King Willem II., 1840; — Prince Frederick of the Netherlands on the 25th Anniversary of his Grand Mastership of the Order of Freemasons, 1841; — Memorial medal of Willem I., 1843; — Inauguration of a Monument to Willem I. at The Hague, 1846; — Prize medal with bust of Prince Frederick, 1849; — Memorial medals of Willem II. (2 varieties of types); — Silver Wedding of Prince Frederick and Princess Luisa of Prussia, 1850; — Crown Prince Willem visits the Royal Mint at Utrecht, 1853; — Peter the Great's residence at Zandam visited by Nicholas I. of Russia, 1839 (*illustrated*); — Centennial of the

Visit of Nicholas I. to Zandam, 1835.

restoration of the Order of Dutch Freemasons, celebrated at the Lodge *La Bien Aimée* at Amsterdam, 1835; — Token of remembrance of a true Brother, 1836; — Dr G. Vrolik, Amsterdam; — Cholera Plague at Amsterdam (2 var.; both in Boston Coll[n]); — Prize Medal of the Exhibition at The Hague, 1839; — Medal for the Improvement of the social condition of the Jews, 1827; — Commemorative medal of Festival in connection with Leyden University, 1835; — Memorial medal of Willem II.. 1849; — Marriage of Princess Wilhelmina with the Crown Prince of Sweden.

Schouberg was created a Knight of the Oak Crown in 1848, and in 1851 he was granted the Order of Wasa by the King of Sweden.

BIBLIOGRAPHY. — *De Oranje-Nassau Penningen in de Koninklijke Bibliotheek*, 1898. — Marvin, *Masonic Medals*, 1880. — Immerzeel, *Leven*, &c., III, 77. — Kramm, *Leven* &c., 5, 1494.

SCHRABSACK (*Germ.*). Gem-engraver of the second half of the eighteenth century, under Louis XVI. He intended reviving gem-engraving, but disappeared a short time afterwards.

SCHRADER, PETER (*Germ.*). Mint-master at Königssee, 1621 (for Schwarzburg-Rudolstadt); Cöthen, 1622; Magdeburg and

Archiepiscopal Thaler of Magdeburg, 1640.

Halle, 1627-1645. Dr Bahrfeldt states that Stadler officiated already from 1623-1630 as Mint-master to the city of Magdeburg; 1635-38 as Mint-master to the Archiepiscopate, and from 1639 to 1661 again as Mint-master to the city. The Thaler of Augustus, 1640, reproduced above shows that Stadler, whose signature it bears, was in office at the archiepiscopal mint in 1640. Whether he cut coin dies himself, or was only responsible for the issue of the coinage, I cannot ascertain.

Bibliography. — Emil Bahrfeldt, *Abkürzungen auf Münzen*, Berliner Münzbl., 1896, 2019. — Fischer, *Die Münzen des Hauses Schwarzburg*, Heidelberg, 1904.

SCHRADER, ANTON (*Germ.*). Die-cutter and Engraver of Armorial bearings at Breslau, 1581.

SCHRATTAUER, FRIEDRICH (*Germ.*). Mint-master at Coblenz, 1693-1695.

SCHRAUDOLPH (*Germ.*). Contractor of the Montfort Mint at Langemargen, 1676.

SCHRAUF (also **SCHRAUFF**) **HANS** (*Germ.*). A native of Würzburg; Mint-master at Nüremberg, 1467, and Frankfort-on-M., 1468-?

SCHRECK, KONRAD or **KURT** (*Germ.*). Bolzenthal writes in the following terms of this North German artist of the second half of the sixteenth century: "A highly esteemed goldsmith who produced many works of art under the Electors of Brandenburg, Joachim I. and II. There is an important testimony in his favour in the diary of the Court preacher Cölestin, where it is stated that Joachim II. gave Schreck a commission to make a medal to be worn on a chain, in the following words: "Schreck, thou wilt make for Dr Georg Cölestino, our Court preacher, our gold coin and likeness at our expense and present it to him. He shall wear it for our sake. This is our will. Given at Copernik, 28tk July 1566. Joachim Elector." The Royal Collection at Berlin is especially rich in native medals of the kind; it possesses one of the reign of Joachim II. done by an able hand, and having the bust of the Margrave Frederick, who was a son of the Elector. We however find no work which can undoubtedly be traced to Schreck as the one ordered for Dr Cölestin."

According to Nicolai, K. Schreck was appointed Mint-master and Engraver at Berlin for one year, 1572, and died in 1580.

In the Berlin Collection is a Portrait-medalet of Conrad Schreck and his wife Anna, by the same hand as that of Mathias Spon, 1561 (Möhsen II, Pl. I, 2). Erman does not think that these two medals are by our artist. The Conrad Schreck medal is reproduced on Pl. VIII, 6 of Erman, *Deutsche Medailleure*, 1884.

SCHRECK, LUDWIG (*Germ.*). This signature occurs on a medal, dated 1838, as that of the issuer of a commemorative medal of the Battle of Leipzig, 1813 (**L. S. D.** *Ludwig Schreck Direxit*).

SCHRECKENFELS, LAZAR ERKER VON (*Bohem.*). Mint-master at Prague, 1583-1594.

SCHRECKENFELS, SUSANNA ERKER VON (*Bohem.*). Mint-master at Prague, 1594-September 1600.

SCHREIBER, CHUNTZEL DER (*Austr.*). Mint master at Gretz, *circ.* 1314-1316.

SCHREIBER, HENNING (**HEINLING**) (*Germ.*). Mint-master at Halberstadt, 1614-1626; Goslar, 1622; and Clausthal, 1630-1640. His issues are signed: **H. S.**

SCHREIBER, IGNAZ (*Austr.*). Mint-master at Carlsburg, 1848-1854.

SCHREIBER, MATTHAEUS (*Germ.*). Gem-engraver at Augsburg, 1584.

SCHREIBERSDORF, ALBERT VON (*Germ.*). Mint-master at Annaberg (Saxony), *circ.* 1507-† 4. June 1523. Privy-mark on the currency ✠ (*Vide* Erbstein, *Erorterungen auf den Gebiete der Sächsischen Münz- und Medaillen Geschichte*, 1888, p. 6).

SCHREITMÜLLER, AUGUST (*Germ.*). Contemporary Sculptor and Medallist, residing at Dresden. At the Berlin Art Exhibition, 1907, he exhibited, Portrait-plaquette of Robert Diez; — Dresden Archers' Club medals, etc.

SCHREMPF, VEIT (*Germ.*). Mint-engraver at Stuttgart, 1744; Mint-warden, 1746-48. The coins issued or engraved by him are usually signed: **V. S.** or **V. S. F.** I have seen a Thaler and Half-Thaler, 1744, of Carl Eugen of Würtemberg, bearings the initials **V. S.**

SCHRETTINGER, FRANZ HEINRICH (*Germ.*). Mint-engraver at Munich, 1724.

SCHRINER, or **SCHREIBER, GERDT** (*Germ.*). Mint-master at Riga, *circ.* 1547.

SCHRÖDER, KASPAR HEINRICH (*Germ.*). Director of the Mint at Bayreuth, 1764. His initial **S** occurs in conjunction with that of **SCHILLING**, Administrator of the Mint, on the coinage of that year.

SCHRÖDER, JUSTUS CARL (*Germ.*). Mint-master at Stralsund, 1761; Elbing, 1762-1763; Mittau, 1763-1764; and Warsaw, 1768-1774. His initials **J. S.** or **J. C. S.** occur on the coins.

SCHRÖDER, JOHANN ANTON (*Germ.*). Warden of the Mint at Zellerfeld, and later Mint-master at Hanover, and Neuhaus near Paderborn, 1751-1777. His initials **A. S.** or **I. A. S.** occur on his issues; also on Conv. Thalers and Gulden of Wilhelm Anton, baron von der Asseburg, bishop of Passau, 1765; Thaler 1761 of Friedrick Carl of Holstein (Wolff, *Die Münze zu Hannover*, Blätter für Münzfreunde, 653).

SCHRODER, JAKOB (*Germ.*). Warden of the Mint at Stade, 1660, and Mint-master, 1680-1687.

SCHRODER, HEYNE (*Germ.*). Goldsmith of Brunswick, third quarter of the sixteenth century, by whom are Konterfeits or Guadenpfennige of Duke Julius. He engraved the seal for the Inauguration of the Julius University at Helmstadt, 1576 (*Vide* P. J. Meier, *Medailleure im Dienst des Herzogs Julius von Braunschweig*, Bl. für Münzfreunde, 2071).

SCHRÖDER, H. (*Germ.*). Medallist of North Germany, third quarter of the eighteenth century. His signature occurs on masonic medals: Mecklenburg's first Masonic Lodge, St. Michael, founded in Schwerin, 1754; — A. O. von Vierrage, Lodge of Love of Fatherland, Wismar, 1844; —

Bibliography. — Marvin, *Masonic Medals*, 1880.

SCHUCHMANN, WILHELM (*Germ.*). Engraver, Goldsmith, and Medallist, born at Ravensburg (Würtemberg), settled at Neuchâtel with his wife (née Pauline Becker) and two children in 1840, and left that town again in 1852. By him is a medal (*illustrated*) commemorating the Independence of Neuchâtel, 1848 (a specimen of which in lead exists in M. Arnold Robert's Collection at La Chaux-de-Fonds). M. Michaud (in *Bull. de la Société suisse de numismatique*, 1886, p. 78,) states that some specimens were struck in silver, but none appear to be known.

Independence of Neuchatel, 1848.

SCHUEIDAU *Vide* **SCHNEIDAU.**

SCHUFFLER, FRANZ (*Swiss*). Moneyer at Fribourg, 1622-1628.

SCHUH, PETER (*Germ.*). Mint-administrator at Gundelfingen, 1622 (Pfalz-Neuburg).

SCHUHMACHER, CASPAR (*Swiss*). Mint-warden at Lucerne, 1737; died, 2. July 1748.

SCHUHMACHER, HANS (*Germ.*). Goldsmith and Medallist at Munich, *circ.* 1560-1573. In 1561 he received 110 Hungarian, 70 Salzburg and 82 Portuguese Ducats, also 23 Italian crowns, etc., with the order to make therefrom six large gold and twelve silver presentation medals (J. V. Kull, *Die Goldschmiede und Medaillenkünstler in den Hofzahlamtsrechnungen zu München*, 1551-1650, Mitth. der Bayer. Num. Gesellschaft, 1900, p. 26).

Schuhmacher appears to have been doing medallic work for the Mint-master Anton Hundertpfund. Some medals of Albert V. of Bavaria may be by him (*Wittelsb.* N° 393, 394, and possibly also N^os^ 401-403).

SCHULER, HANS (*Germ.*). Mint-warden at Nuremberg, 1395.

SCHULER, GEORG (*Hung.*). Medallist in Transsylvania, in the early part of the eighteenth century. He signed a gold medal (5 Ducats) and Æ Halt Thaler of Georg Banfi von Losontz, governor of Transsylvania, 1709; also a satirical medal of Franz Rakoczi II., existing in gold, silver, bronze and tin, 1710 (described in Resch, *Sicbenbürgische Münzen und Medaillen*, 1901, p. 230, n^os^ 109-112); — and a medal of General Steinville, commander general in Transsylvania, undated. These are signed either **G. S.** or **G. SCHVLER.**

SCHULER, JOHANN LEONHARD (*Germ.*). Mint-assistant at Glatz, 1813; later Mint-warden at Breslau in succession to Sigismund Wagner, died in 1825.

SCHULMAN, JAKOB (*Dutch*). Contemporary Dealer in coins and antiquities, formerly residing at Amersfoort, now since *circ.* 1900 at Amsterdam. He has edited several medals, amongst them: Visit of the German Emperor and Empress to Amsterdam, 1891 (by J. D. Posthumus); — Aemilio Castellar (by Arnau); — Accession of Queen Wilhelmina, 1898 (by Mayer); — Kruger, De Wet and de la Rey (by Scharff); — Inauguration of the New Stock Exchange (Beurs) at Amsterdam, 1903; — Bicentenary of Rembrandt (two types), etc.

SCHULMEISTER, HANS (*Germ.*). A native of Nabburg, Mint-master at Pfreindt, 1520-41 (*Frankfürter Münzbl.*, p. 206).

SCHULT, JAKOB (*Dan.*). Mint-master at Trondhjem (Denmark), *circ.* 1529.

SCHULTE, JOHANN (*Germ.*). Mint-master at Rostock, 1387.

SCHULTES, ERNST (*Germ.*). Mint-master at Gera, 1622, and Lobenstein, 1623.

SCHULTES, GEORG (*Germ.*). Counter Manufacturer at Nuremberg, *circ.* 1550. Neumann, *Beschreibung der bekanntesten Kupfermünzen*, Prag, 1868, V, p. 403, describes seven counters, some of which are dated 1551, 1552, 1553, and 1556, on which the Engraver's name occurs in the following forms: **IORG SCHVLTES SPENGLER ZU NORMBERGIGMA**; — **IORG SHVLTES SPNGLER**; — **IORG : SCHVL DDS : IORG**; — **IORG SCHVILTES** and **GEORG. SCHVLTES. IN NVRBERC**. Georg was possibly the father of Hans Schultes, and the founder of the Schultes Counter Manufactory.

SCHULTES, HANS (*Germ.*). Counter Manufacturer at Nuremberg, *circ.* 1550-1574. Neumann gives 45 varieties of counters by him (n^os^ 32136-81) on which the maker's name occurs in full or variously abbreviated. One has **IO. HANS. SCHVLTES** on obv. and **HNS SCHVLTES. TO** on ℞.; another exhibiting fine work is signed: **HANS + SCHVLTES + ZV + NVRENBERG +** Dr Freudenthal had a specimen, dated 1574, with the inscription: **HANS : SCHVLTES : GEMACH.** In *Blatter für Münzfreunde*, 1904, 3201, is a description of a counter by this engraver, bearing on obv. a bust variously identified as that of Duke Albrecht of Prussia (1525-69) or Duke Friedrich of Liegnitz (1495-1547). A counter described by Dr Erbstein (*Bl. für Münzfr.*, 1828) shows on one side the whole alphabet accompanied by the signature: **HANS SCHV** (wrongly interpreted by Dr Voigt as *Hans Schulmeister*). Hans Schultes also signed his counters **H. S.**; — **HANS. S.**; — and **HANS SCHV.**

Beside the Schultes the principal Nuremberg counter makers in the sixteenth and seventeenth centuries were: *Damian Krauwinckel* (1550-1570); and his successors *Egidius* (1571) and *Hans Krauwinckel* (1580-1610), *Kilian Koch* (1580-1600), *Hans Laufer* or *Lauffer* (1607, Mint-master 1620, † 1632), *Wolf Laufer*, *Mathaeus Laufer* (Mint-master 1622), *Conrad* and *Cornelius Laufer*, to whom succeeded towards the end of the seventeenth century, *Lazarus Gottlieb Läufer*. The manufacture of gaming counters etc. is still represented at Nuremberg in our day by the well-known die-sinking establishment of *C. Chr. Lauer.*

SCHULTHEISS (or **SCHULZE**), **HEINRICH** (*Germ.*). Mint-master at Thesa (Anhalt), 1623, and Dessau, 1624.

SCHULTHESS (*Germ.*). Moneyer at Ratisbon, 1391.

SCHULTZ, ANTON (Schlickeysen, **ADAM**) (*Germ*). Medallist at Copenhagen, 1716-1724, said to have settled at Moscow under the reign of Peter II. I have only come across the following medals by him: Marriage medal of Christian VI. of Denmark and Sophie Magdalene of Brandenburg, 1721 (signed: **A. SCHULTZ F.**); — Peter the Great as Chief of the four fleets gathered at Bornholm, 1716; — Peace of Nystädt, 1721 (signed on ℞. **A. SCHULTZ FEC. HAFN: D. A**); — Coronation of Catherine I. of Russia, 1724, etc. Some of his medals are signed also: **A: S.**, or **A.S.F.**

BIBLIOGRAPHY. — Bolzenthal, *op. cit.* — Iversen, *op. cit.*

SCHULTZ, B. *Vide* **I. B. SCHULTZ.**

SCHULTZ or **SCHULZ, CHRISTOPH** (*Germ.*). Mint-master at Elbing, 1671-1673.

SCHULTZ, HANS BERNHARD. *Vide* **IOHANN BERNHARD SCHULTZ.**

SCHULTZ, GEORG (*Germ.*). Die-cutter at Breslau, 1676-† 1701.

SCHULTZ, GOTTFRIED (*Germ.*). Painter of Breslau, 1620-† 1666; was appointed Mint-engraver there in 1665.

SCHULTZ (or SCHULZE), JOHANN BERNHARD (*Germ.*). Medallist and Copper-plate engraver in the service of the Elector Frederick William of Brandenburg at Berlin from about 1680 to 1695, the year of his death. He signed his productions variously: **S**: — **SCHULTZ**; — **SCHULZ F.**; — **I.B.S.**; — **B. SCHULTZ**; — **J.B. SCHULTZ. SC.**, **I. B. SCHULTZ F.**, etc. The initials **I.B.S.** occur also on coins (Thaler of 1693) of John George II., Prince of Anhalt-Dessau.

The following medals are by J. B. Schultz: Undated Portrait-medal of Prince Elector Frederick and Sophie Charlotte (signed **SCHVLTZ** on either side); — Marriage medal of Princess Maria Amelia of Brandenburg and Charles, hereditary prince of Mecklenburg-Güstrow (signed: **B. SCHULTZ**); — Another, with portraits of the Ducal pair (signed: **SCHULTZ F.**); — Foundation of the Colony of Grossfriedrichsberg in Guinea, and of the German African Mercantile Society, 1681 (signed: *J. B. Schultz F.*); — Memorial medal of Frederick William I., 1688 (two varieties); — Capture of Bonn, 1689; — Plan of Berlin in perspective, 1688; — Peace between France and Austria, 1679; — Capture of Kaisersworth by Frederick III., Elector of Brandenburg, 1689(2 var.); — Frederick III.'s victories on the Rhine, 1689, etc.

BIBLIOGRAPHY. — Bolzenthal, *op. cit.* — Ammon, *op. cit.* — Menadier, *Schaumünzen des Hauses Hohenzollern*, 1901. — Flad, *Berühmte Medailleurs*, p. 28. — Seyler, *Leben Friedrich Wilhelm des Grossen Churfürsten zu Brandenburg.* —

SCHULTZ, JOHANN CHRISTIAN (*Germ.*). Mint-inspector at Oels, seventeenth century, *circ.* 1671.

SCHULTZ, JOHANN GEORG (*Germ.*). Gem-engraver, born at Birkenfeld; pupil of Brainger. He made the following exhibits at the Paris Salon: 1883, Creation of Adam, after Michael Angelo, sardonyx cameo; — 1889. La Source, after Ingres, sardonyx of two strata; — Portrait, sardonyx of three strata; — God animating man, sardonyx.

SCHULTZ, OTTO (*Germ.*). Contemporary Mint-engraver and Medallist at Berlin; born 16. December 1848 at Berlin; pupil of the Medallist Wittig; appointed on 1. May 1889. He was employed for some time at the "Berliner Medaillen-Münze von L. Ostermann, sorm. G. Loos", and spent some years in London, in the employ of Wyon, under whom he collaborated in the cutting of the great State Seal of Queen Victoria.

Among his productions I have noted: Prize medal of the

Original from CORNELL UNIVERSITY

Wittstock Exhibition, 1885, with bust of Princess Marie Anna of Prussia (issued by G. Loos); — Academical Art Exhibition at Berlin, 1888; — International Art Exhibition at Berlin, 1891; — Completion of the Kaiser Wilhelm Canal, 1895; — International Art Exhibition at Berlin to commemorate the bicentenary of the Royal Academy of Arts, 1896; — Portrait-medallion of H. M. William II.; — Portrait-medallion of H. M. Kaiserin Augusta Victoria; — Marriage medal of the German Crown Prince, 1905; — Goethe; — Tercentenary of the foundation of the Dutch community at Berlin, 1885; — Carl Conrad, Mint-director at Berlin, 1899; —

Otto Schultz is responsible for the engraving of the dies of the German Imperial coinage since his appointment at the Berlin Mint, but he also prepared those for the following coins: Marriage Five and Two Mark pieces, 1903, of Grand Duke Wilhelm Ernst of Saxony and Grand Duchess Caroline of Reuss (24,000 Five and 40,000 Two Marks issued); — Lippe-Detmold, Two-mark pieces, 1906 (20,000 issued); — Pattern Thaler, with bust of William II., 1908; — Thaler, 1908, with same bust (issue of 5 million pieces).

In 1892 Schultz was entrusted with the cutting of dies for the Transvaal coinage of President Kruger, consisting of the Pond and $\frac{1}{2}$ Pond in gold, 5, 2 $\frac{1}{2}$, 2 and 1 Shillings, 6 and 3 Pences in silver, and Penny in copper. The first type of Pond, Half Pond, and

Pond of President Kruger, 1892
(by Otto Schultz).

Five Shillings were recalled on account a curious mistake of the die-sinker, who represented on the reverse instead of the "Disselboom" (or waggon with a single pole) a van with two poles or double shaft. President Kruger further took exception to the initials **O.S.** of the Engraver being placed on the truncation of his bust, those letters in Dutch signifying an "ox".

The first issue only of these coins were minted at Berlin.

SCHULTZ, P. (*Germ.*). Modeller and Sculptor, residing at Berlin. He modelled the medal of the Berlin Art Exhibition, 1896.

SCHULTZ, WALTER (*Dutch*). Engraver of Haarlem, second half of the seventeenth century. In 1676 he published a work on Travels in East India, for which he engraved some of the plates. "There is in the British Museum a one-sided piece with the portrait of Gustavus Adolphus of Sweden, which bears *W. S.* in monogram, the initials of the artist, probably Walter Schultz". A similar piece, with the portraits of James I. and Prince Charles, of same style and work, unsigned, also in the National Collection, may be also by Schultz. *Vide Medallic Illustrations*, I, $\frac{376}{273}$.

SCHULTZ & CO (*Amer.*). Private issues of Californian currency, middle years of the nineteenth century.

SCHULTZE, JOHANN (*Germ.*). Ducal Mint-master in Saxe-Lauenburg, 1656.

SCHULZE, FRIEDRICH (*Germ.*). Administrator of the Mint at Rostock, 1783.

SCHULZ, CHRISTOPH (*Germ.*). Mint-master at Elbing, 1671-1672.

SCHÜRMANN, ANTON (*Swiss*). Goldsmith of Lucerne, 1792; Mint-warden there, 1804-1816.

SCHUSTER VON GOLDBURG, TOBIAS (*Bohem.*). Mint-administrator at Prague, 1631-1636.

SCHUSTERIN, DOROTHEA (*Bohem.*). Widow of the last; carried on the business of the Prague Mint, 1636-1637.

SCHUTTER, W. (*Dutch*). Medallist of the early part of the nineteenth century, who resided at Groningen. Some of his productions are fairly successful; (*Nederlandsche Gedenkbenningen verklaard etc. door Jeronimo de Vries en Johannes Cornelis de Jonge*, Haag and Amsterdam, 1829.)

SCHÜTZ, VALENTIN (*Germ.*). Mint-master at Grünstadt, 1610, for Leiningen-Westerburg.

SCHUYRMANS, GERRIT (*Dutch*). Mint-master at Medemblik (Westfriesland), 1682-1692.

SCHWAB, ANDRÉ PIERRE (*French*). Contemporary Sculptor, born at Nancy; pupil of Mercié, Cheagland, and Paul Auban. At the Paris Salon, 1905, he exhibited a frame containing a Portrait-plaquette.

SCHWAB, HANS (*Swiss*). Mint-master at Berne, 1485.

SCHWAAB & CO, W. (*Austr.*). Die-sinking establishment at Vienna; makers of buttons, tickets, badges. They issued a brass plaquette with portrait of Field Marshal Radetsky.

SCHWAB, MARX (*Germ.*). Goldsmith of Augsburg, *circ.* 1550. He is supposed to have been the inventor of the coining-press, which France obtained in 1550 from Augsburg. In French documents of the period he is named *Chevalier du Saint-Sépulcre* (*q. v.*).

SCHWABE, HEINRICH (*Germ.*). Contemporary Sculptor of Nuremberg, born at Wiesbaden, 30. October 1847, who also modelled Portrait-medallions and Medals (*Wittelsb.*, 458). He worked for Lauer, and modelled for this firm the Portrait-medal of the emperor Frederick, commemorating his stay at San Remo (*illustrated* in Vol. III, p. 317), and another on the Accession of William II., 1888, signed: **H. SCHWABE SCVL.** | **W.LAUER FEC.**; also: Graf Moltke, 1890.

SCHWABE, NICOLAUS (*Germ.*). Pupil of Valentin Maler of Nuremberg, worked as an Engraver and Modeller in wax at Dresden towards the end of the eighties in the sixteenth century. Between 1590 and 1599 we find him following the profession of Medallist at Copenhagen, where in 1602 he was appointed Master of the Mint. In 1628 he was pensioned off on account of old age. He signed his medals: **NS**; — **NS**; — **NIC.SC.F.**, and also **NICOLA.SCVAP.FEC.** I have noted the Engraver's signature **NS** on a Thaler of Christian IV. of Denmark, 1527, and he produced a series of Portrait-medals of the six kings of Denmark of the house of Oldenberg. The medal illustrated here of Christian IV of Denmark is signed: **NICOLA. SCUAP.FEC.**, and is dated 1596. One of 1598 signed: **C.L. R.M. NIC.S.F.** (*Cum licentia regiae majestatis*) occured in the Gutekunst Collection (*Merzbacher Sale Catalogue*, München, 1900.

Christian IV. of Denmark.

Erman hesitates to attribute the cast medallions of later date of the same king to Schwabe.

Bibliography. — Erman, *op. cit.* — Chr. Lange, *op. cit.* — *Berliner Münzblätter.*

SCHWABEN, C. (*Germ.*). Medallist at Frankfort-on-M. about 1742; † 1752.

SCHWAIGER, CHRISTOPH (*Germ.*). Gem-engraver, born in 1532, died in 1600, and probably flourished at Augsburg. In the verses beneath his portrait by Lucas Kilian, he is compared to Pyrgoteles for his talent in engraving (*Vide* King, *Antique Gems*, p. 267; Mariette, *op. cit.*, p. 124). He is also called, no doubt erroneously **SCHWARGEN** (Babelon, *Pierres gravées*, p. 283).

NUMISMATICA GRAECA.

GREEK COIN TYPES CLASSIFIED FOR IMMEDIATE IDENTIFICATION WITH REFERENCE NOTES TO ALL LEADING NUMISMATIC WORKS.

I. *Section.*

Inanimate Objects, Plants, &c.

Published in Six Parts, each divided into two volumes, one containing summary and plates, and the other the descriptive text.

Price of each Part complete 21/.
or Plates with Summary alone 14/.

By L. Anson.

Few numismatic works have ever been compiled of wider interest and greater usefulness to the public in general than Mr. Anson's publication, the first six Parts of which have just been issued.

Every collector and student of Greek coins has experienced at times considerable difficulty in locating certain coins, which for want of a legend or definite special type leave but the slenderest clue for their proper attribution.

Not every one is able to refer to the standard works, especially those removed from the great centres, and even with these at hand, many valuable hours are often wasted in searching fruitlessly through the pages of Dr Head's *Historia Numorum*, the valuable British Museum Catalogues, Mionnet's *Monnaies grecques*, Imhoof-Blumer's various treatises, Babelon's *Traite des Monnaies* and other similar works.

Mr. Anson speaks from experience when he tells us that collecting Greek coins is laborious and unsatisfactory to all except the expert. He has often found it most difficult to identify certain pieces in his collection for want of a work, compiled in a methodical manner, enabling the most uninitiated to trace without much trouble the different types. I confess that he has more than once puzzled me by bringing to me for classification valueless copper coins, in bad state of preservation, which were hardly worth the trouble of looking up.

To remove the difficulties in the way of students, the author has undertaken the task of preparing a work which will make the study comparatively easy, and should prove a vigorous incentive to the collecting of Greek coins by the many.

Mr. Anson's prospectus, which accompanies the present fascicle of the *Numismatic Circular* gives a plan of the work. Section I deals only with inanimate objects, plants, &c.

Section II will comprise animate objects, such as the figures of deities, heroes, rulers, animals. Each section is divided into so many parts; thus Section I into six Parts : Industry, War, Agriculture, Religion, Architecture, Naval and Marine, Science and the Arts, and Various. Each Part is again subdivided into rubrics; thus Part I contains no less than 32 headings.

Every Greek and Graeco-Roman coin, known to the author, the type of which represents a certain object, has been classified under the heading of the type and also of the symbol or symbols represented upon it. Each coin reproduced bears a number of identification corresponding to the alphabetical General Guide-Index.

The volume of text gives a full description of each coin, its classification number in the Catalogue of the British Museum, the Hunter Collection, Mionnet, Babelon, Head, Imhoof-Blumer, &c., together with many references to leading standard works; it also includes a record of recent prices at the leading auction-sales, a General Index, and a polyglot dictionary in which all technical and descriptive terms used in the work are translated in five of the principal languages, a feature which extends the usefulness of the book to numismatists of every nationality. In the compilation Mr. Anson assures us, every authoritative book and important catalogue, British and foreign, and all other material available up to the year 1909 have been used.

The Plates are as good as it was possible to make them. Unfortunately many of the coins reproduced, especially the copper, — from the Plates in the Brit. Mus. Catalogues, and other works, — are not in fine state, and mar somewhat the general artistic effect. It is a pity too that Mr. Anson should not have been able to procure plaster casts, from the various European Museums, of the coins which he has copied from prints in Harwood and Dutens and other obsolete works of reference, which are not always accurate.

Critics, more competent than myself, will no doubt find here and there discrepancies, a few errors and omissions, but the work has been compiled, not for the expert, but for the student, and one feels sure it will supply a long felt need.

I shall be glad to recommend it as a most useful book, and trust Mr. Anson will have many subscribers to recoup him, in a little measure, for the very considerable outlay he has incurred in getting together the material, and for the expenses of publication.

L. F.

OBITUARY

MR. J. C. JONES.

Mr. James Cove Jones died on Tuesday, September 20th, 1910, at his residence Loxley Hall, Stratford-upon-Avon, Warwickshire. He was born in the year 1822 and was a barrister, but never practised. He was elected a Member of the Numismatic Society of London in 1843 and was also a Fellow of the Society of the Antiquaries of London.

MAJOR-GENERAL J. H. WHITE.

Major-General John Hubbard White, late of the Royal Engineers, and for some time Master of the Mint, Bombay, India, died on Friday, October 7th, 1910, as Kingsdown, Silverdale Road, Eastbourne. He was born in the year 1834 and appointed a second lieutenant in the Bombay Engineers in 1853, and arrived in India in 1855. After twenty-four years' service in the Bombay Public Works Department, he was in 1884 appointed Master of the Mint in Bombay, an office he filled until his retirement in 1890. He attained the rank of Major-General in 1887.

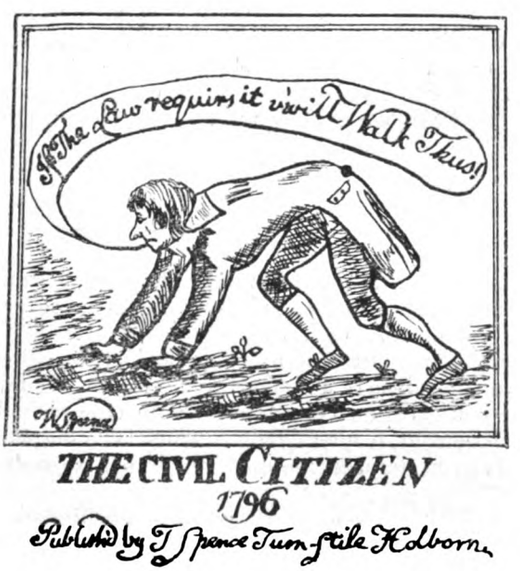
NOTES ON THE 18th CENTURY TOKENS.

Having just met with two rare caricatures published by Thomas Spence, having depicted upon them subjects connected with his Tokens, I venture to think you might like to reproduce them as being of interest to the present-day collectors of the Tokens of this period.

The plate with the ASS, has the following inscription, which the American Indian is represented as saying to his companion, « Behold the civilized Ass Two pairs of Panyers on his Back, The first with Rents a heavy Mass, With Taxes next his Bones do crack ».

To which remark the Ass replies, « I'm doomd to endless Toil and Care, I was an Ass to bear the first pair ».



This print illustrates the Ass as shown on Tokens as Atkins, page 125 Nos. 549 to 556, while the North American Indian as given on Nos. 518 etc.

The smaller plate illustrates the farthing token die as Atkins page 145 No. 791; the Citizen is shown walking on all fours, and is saying « If the Law requires it v'will Walk Thus » which is the legend used on the token itself. This is one of the most sarcastic designs issued by this remarkable Bookseller.

It will be noted that both the plates are signed W. Spence; it is just possible the plates were engraved by his Son, spoken of in one of the following letters. They are very roughly executed as the above copies of them indicate.

These two letters of T. Spence were published in the Morning Post and Morning Chronicle, both were reprinted in the 3rd. volume of Spence's Pig's Meat, and as they mention his imprisonment I thought they might be of interest. This 3rd, and last volume of Pig's Meat is very rare and I have only just met with a copy of it.

Morning Chronicle.
Jan. 3. 1795

To the Public.

Fellow Citizens,

I am again restored to my shop, after a tedious confinement of more than seven months, but change of circumstances renders my return productive of but small joy. But though the public enemy, has acquired the satisfaction of reducing me to the inability of carrying on my little business, with my wonted alacrity; yet, I trust I shall not be quite overlooked by the patrons of the Martyrs of Freedom in the dispensation of their favours. I beg leave therefore to observe to the Friends of Freedom and Political Truth, that by assisting me in the sale of my book called

Pig's Meat

they will not only essentially serve me, but will also contribute greatly towards the enlightenment of mankind.

That I have been a considerable sufferer in the Cause of Liberty, is evident from the following facts; since the prosecutions began in 1792, I have been four times dragged from my business by runners and messengers. Three times have I been indicted before Grand Juries, and twice have they found true bills, Thrice have I been lodged in prison for different periods of time, and once have I been put to the bar, but never once convicted. Neither did my son (a boy twelve years of age) escape prison, for selling in the street, The Rights of Man, in verse (Price only one halfpenny) the poems which he had were confiscated and I paid a fine, and thus the mighty affair ended.

And for what has all this been? Why, for the doing those things which my own rights, and the rights of mankind would not suffer me to dispense with, and which to decline, would have been to betray the liberties of my country.

I am &c.

T. SPENCE.

No. 8 Little Turnstile. Dec. 22 1794.

Morning Post.
Dec. 18. 1794.

To the Editor.

Sir,

My Second Volume of Pig's Meat was finished on that memorable day the 17th May 1794, the day on which the Commons passed the Suspension of the Habeas Corpus Act; and terror being the order of the day, you declined inserting my advertisement.

On the Tuesday following, May 20, I was dragged to the Secretary of State's office, under pretence of being charged with treasonable practices, and from thence in a few days committed to Newgate, where I yet (T. S. was discharged from Newgate Dec. 22) to the honour of the Government, remain untried. But finding, that on account of my long imprisonment, the business of my shop is much decayed, I have essayed once more to get my book advertized, hoping that now you will not be afraid.

I need not but to remind the public of a well known truth, namely that many thousands have read, and as many thousands have approved this incomparable political instructor; wherefore, being conscious that those who shall purchase this my publication, will receive no less than value in full for their money. I the more confidently hope, in this time of my distress, for the countenance

Newgate, High Treason Side Dec. 17. 1794.

Arthur W. Waters.

NUMISMATIC SOCIETIES, MUSEUMS, &c.

ROYAL NUMISMATIC.

October 30. — Sir Henry H. Howorth K. C. I. E., President in the chair. The President announced that His Majesty King George had graciously consented to become Patron of the Society in succession to the late King. Mr. E. J. Jekyll J. P. D. L. and the Rev. A Laughlin were proposed as Fellows of the Society. Mr. F. A. Walters F. S. A. exhibited a ryal of Edward IV of the type which he attributed to Calais with a fleur-de-lys over the mast of the ship, and a groat of the York mint of the annulet coinage of Henry VI from the Stamford hoard, believed to be the only specimen in a private collection : there was also shown the medal of the New York Numismatic Club presented to the Society by Mr. Frank C. Higgins. — Obv. Bust of Mr. Higgins, first President of the club. Rℒ. Hands holding coin and microscope, and name of the club.

Mr. H. Alexander Parsons read a paper on "The Coin-Types of Aethelred II" in which he proposed a final classification of the types and suggested the dates and meanings of their issues. Hildebrand had attributed seven distinct issues to Aethelred's reign and the authors of the B. M. Catalogue, eleven. Many of these could not be held to be distinct types, Mr. Parsons said : by the elimination of mules, he reduced the number to five, exclusive of the Agnus Dei type, which he would arrange chronologically as follows: I "Hand" type. II "Crux" type. III "Quadrilateral" type. IV "Long Cross" type. V "Short Cross" type. To these distinctions of reverse corresponded certain well-marked, graduated differences of obverse. In support of this order Mr. Parsons showed that it was consistent with the gradual transition from M·O to ON in the reverse legends. The evidence of finds was also in his favour though that was not so reliable as might be wished on account of the incomplete descriptions of the hoards. As regards the first and last types valuable corroboration was given by the fact that the "Hand" was the last type of Edward the Martyr and the "Short Cross" the first of Cnut. Though deprecating the tendency to exaggerate the importance of the evidence of moneyers as a clue to chronology, he showed that this evidence was on the whole in favour of his rather than Hildebrand's arrangement, as was the evidence of the mules.

The "Hand" type, he continued, must have been issued on the coronation of Aethelred II ; it was a type of Edward the Elder but in the addition of α and ω he saw the influence of Dunstan and a reference to the belief in the near approach of the millenium. The "Crux" type was to be placed about 991 A.D. and he would interpret "*crux*" as meaning trouble, misery, and took it to refer to the sufferings of the country at the hands of the Danes.

When the prophecies of the millenium were unfulfilled we have a reversion to the warlike bust and the date of the "Quadrilateral" type must be placed about 1000 A.D., possibly for the Danegelt of 1002 A.D. The next Danegelt was of 3600 in pounds of silver 1001 A.D. and this is, no doubt, the date of the "Long Cross" issue, while the fifth class must be placed about, 1012 A.D. probably for the tribute paid to Sven in 1013 A.D. The remarkable "Agnus Dei" pieces Mr. Parsons was convinced were not coins but medals. In support of this he urged the absence of the King's bust, the absence of MO and usually of ON on the reverse, their relative rarity, the character of the King and his fondness for innovation and the designs adopted. He thought it referred to the restoration of the King in 1014 A.D.

The paper was subjected to considerable criticism by various Fellows present. Mr. H. A. Grueber thought five too small a number of types for so long a reign and believed some of the so-called mules to be distinct issues. The Agnus Dei piece could not be a medal as medals were not made till some centuries later ; it might however be a commemorative coin. The transition M·O to ON was an important point in favour of Mr. Parson's arrangement. Mr. G. C. Brooke pointed out that many of Mr. Parson's arguments were not strictly logical as they were really based on the assumption that his order was correct. The transition from M·O to ON was certainly a point in favour of it. Mr. Parsons had confined his attention too exclusively to the Stockholm coins, which being, no doubt, largely tribute were unsuitable to generalise from as to the general character of Aethelred's coinage. The evidence of mules was quite valueless as we have mules of types 2, 3, 4 with type 5 of this arrangement. No reliance could be based on the evidence of finds unless we knew the exact details of the hoards. The evidence as to type 5 being the last issue from its use by Cnut could equally well be used to prove types 3 and 4 the last. The medal theory was an anachronism. Dr. L. A. Laurence said the existence of such mules as those of types 2 or 3 with 5 was quite inconsistent with Mr. Parsons's arrangement. If any proof were wanted to upset the theory that the Agnus Dei pieces were medals, Mr. Parsons had himself furnished it by illustrating a cut halfpenny of this type in his plate. Those pieces agreeing in weight and size with the other coins could be nothing but coins. Their being struck at several mints and their occurrence in hoards showed they were regularly current. Sir Henry H. Howorth pointed out that in dealing with the coinages of this reign we were really dealing with large masses of silver tribute as was shown by the occurrence of most of the finds of coins of this period in Scandinavia. He was inclined to see Norse influence in the so-called "dove" of the Agnus Dei type.

* *

Séance du 2 juillet.

M. Blanchet rend compte des travaux du Congrès international de numismatique de Bruxelles qui avait été organisé par MM. le vicomte de Jonghe et A. de Witte.

M. Boulanger présente une monnaie de Marie de Bretagne qui offre une variante dans la légende connue ; M. le docteur Bailhache, un sceau de bourgeois du XIVe siècle au nom de Robert le Febvre.

M. Bouclier établit, d'après des documents, l'origine de la médaille du retour d'Égypte frappée comme jeton de jeu par ordre de l'empereur en 1806.

M. Blanchet fait une communication sur l'altération des monnaies françaises en Suisse sous Louis XIV.

M. Bordeaux établit l'origine des quarts d'écu au double A entrelacé de 1645 à 1646.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(*For further particulars see first page of this Circular.*)

The End.

VARIA

THE COINAGE OF THE NEW REIGN FOR INDIA.

The design on the obverse of the new rupee is to be the work of Mr. Bertram Mackennal, but, according to the *Pioneer*, the design of the reverse will most probably be the production of Mr. Percy Brown, the Principal of the Government School of Art, Calcutta, this being the first occasion on which the design has been entrusted to an artist resident in India. The inscription, in English and the vernacular, will be contained in a circle in the centre. This will leave a wide border, around which will be carried a Saracenic scroll. In the spaces left by the scroll will be conventional representations of the Rose, the Shamrock, and the Thistle, while at top and bottom will be the Indian Lotus.

*
* *

THE COINAGE OF GUERNSEY.

We have received a copy of a petition to the King, signed by the chairman and secretary of the Currency Reform Committee on behalf of 1,000 signatories, with the address "Committee Room, Channel Islands Hotel, Guernsey," praying, on behalf of "loyal and dutiful subjects of the Island of Guernsey," that his Majesty may order that (1) all coinage other than British shall be suppressed and withdrawn; (2) all commercial contracts shall only be negotiable on the basis of the British sovereign, shillings, and pence respectively; (3) the island may, as consideration for the suppression of its said charters (so far as they empower the use of French coinage), thenceforth employing only British currency, participate in the seniorage to such an extent as shall mutually and equitably be arranged between the two Governments."

The signatories introduce their petition with a recital of the inconvenience of the present system of currency, which is governed by certain charters. They point out that the British currency, as well as the French, is legal tender in the island, that the existence of the dual system leads to monetary losses on exchange to inhabitants and visitors, and that the "general pricing of merchandise" is "in 20-21 sts, 21 sts, and 252 nds of a sovereign." They add that little direct trade is done with France, so that no useful purpose is served by the retention of the French silver coinage in a portion of the British Empire and that "any profit on the minting of local silver and copper should not be derivable by alien Governments, but mutually between the island authorities and the British Government."

Le médailleur Yencesse vient de terminer la médaille de grand module qui sera remise aux bienfaiteurs insignes des musées nationaux. L'avers montre la colonnade du Louvre et, à droite, vue de trois quarts, une figure de femme drapée serrant du bras gauche le canthare d'argent d'Alésia, aujourd'hui au musée de Saint-Germain, et étendant le bras droit, en un geste de protection et d'acceptation, vers un groupe d'objets d'art où l'on remarque le vase antique dit de Suger provenant de Saint-Denis, une hydrie grecque, deux châsses-reliquaires, etc.; autour, l'inscription: *République Française*, et au bas: *Musées nationaux*. Le revers montre, au centre, un cartouche oblong qui portera en relief le nom du donateur, et, en exergue: *La République reconnaissante aux généreux donateurs.*

*
* *

L'Académie française a reçu en don un précieux médaillon qui avait été donné par le duc d'Aumale à l'avocat Edmond Rousse. Il représente d'un côté le portrait du duc d'Aumale vu de profil, bas-relief en ivoire par Chaplain, de l'autre une vue du château de Chantilly.

HORRENDE PREISE FÜR ALTE MÜNZEN.

In einer Münz-auktion in Frankfurt a. M. wurden auch alte Churer und andere Bündnermünzen feilgeboten und zu hohen Preisen verkauft. Ein Siebendukatenstück aus den Jahren 1581 bis 1601 galt nicht weniger als 2925 Fr.; Taler von 1642 und 1763 stiegen auf 1587 Fr. und 1437 Fr., ein halber Taler von Chur auf 2659 Franken. Das sind exorbitante Liebhaberpreise. Von den überaus seltenen Gotteshausbundmünzen gelangte ein noch fehlendes Stück ins eidgen. Münzkabinett und eine Anzahl der übrigen in bernischen Privatbesitz.

A GEORGE III. HALF-CROWN.

A costermonger summoned at the City Summons Court for causing obstruction, said someone gave him a silver coin, and after the person had gone he found it was a coin the like of which he had not seen before. He was questioning the boy as to what it was, when the policeman came up and accused him of obstruction. The defendant produced the coin—a George III. half-crown. On fining him 2s. and costs the Magistrate advised him to get rid of the coin before it brought him further trouble. The defendant took the advice and offered the coin in payment of the fine. It was declined.

(*Globe.*)

*
* *

If the Halfcrown referred to above was genuine it is still legal tender and should not have been refused in payment of the fine.

ADVERTISEMENTS

JUST ISSUED.

Aspects of Death in Art. By F. PARKES WEBER, M. A., M. D., Fellow of the Society of Antiquaries and of the Royal Numismatic Society. With 58 Figures. 8vo, cloth.

The book is intended to be an essay, not on the iconography of death, but on the mental attitudes towards the idea of death, and the various ways in which the idea of death has, or may be supposed to have, affected the living individual — his mental and physical state, and especially the direction and force of his action, — as illustrated by minor works of art, especially medals, engraved gems, jewels, etc. The book is divided into four parts. The first is meant to serve as an introduction to the whole subject. The second is an arrangement and analysis of the various possible aspects of death and the mental attitudes towards the idea of death, intended to show the headings under which the illustrative works of art may be grouped. The third deals with the medals and coins, and in the fourth the engraved gems, finger-rings, jewels, etc., bearing on the subject, are described.

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses " Numismatische Circular " betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS

THE ANCIENT COINS OF SICILY.

(*Continued from col. 12432.*)

SILVER COINS OF SYRACUSE.

PERIOD I.

The coins of this Period were issued by the Geomori or Oligarchy of the city during the last quarter of the sixth century B. C. The chief distinguishing marks are the shape of the letter S which appears as ϟ instead of as on the later coins Σ, and on the obverse there is no figure of Nike over the chariot horses.

The denominations of the coins were distinguished by the types bearing different numbers of horses; thus the tetradrachm bore four, the didrachm two, and the drachm one horse.

Class I.

I. Tetradrachm. Ideal weight: 270 grains. Weight of specimen: 17.05 grammes or 262 grains.

Equal to Twenty litræ.

Obv. Legend ϟVPA. A quadriga to right, driven by a male charioteer, holding the reins in both hands; the horses walking: border of dots.

Rev. The square mark of the die, divided into four quarters (*Rev. num.*, 1894, III. series, tom. XII, p. 9).

This issue is, as yet, represented by a unique specimen in the private collection of Madame A. Hartmann.

Class II.

II. Tetradrachm. Ideal weight: 270 grains.

Obv. ϟVPA or ϟVRAϘO.
ϟION

Type similar to no. 1.

Rev. Granulated incuse square divided into quarters; in the centre an incuse circle, containing a female head to left, her hair indicated by dotted lines, and falling formally over the neck. The eye formed in the archaic manner, as on the head of Dionysus on coins of Naxos.

The horses are like cobs, with sturdy legs, thick necks, hogged manes, and thin long tails.

At first sight the type seems to represent a biga; when, however, you look closely at the coin you see the outline of the third and fourth horses, giving sometimes the appearance of the coin being double-struck.

The curled up end of the chariot pole appears above the horses' backs, and the strap from the chariot to the end of the pole is clearly marked. The wheels are small, and made with four spokes. In the exergue is a long thin fish-like form, which may be either a mere decoration or a fish, with reference to Arethusa's fountain. M. A. Blanchet considers it as a dolphin.

III. Didrachm. Ideal weight: 135 grains. Equal to Ten litræ.

Obv. ϟVRA. A naked horseman, riding to right, leading a second horse; the horses walking in step; border of dots.

Rev. Mill sail square with circle and head to left.

PERIOD II.

The coins of this period consist of those issued by Gelon, and it seems best to include among them those issued to commemorate the victory over the Carthaginians won in the year 480 B.C., although they were struck shortly after that year, which is generally regarded at the closing year of the Archaic Period.

The distinguishing marks of this series are the form of the letter S which now is written Σ instead of ϟ. The form Ϙ is retained on the first four classes of this series, and in the fifth Class the letter K takes its place.

The type of the obverse is changed and a Female head, surrounded by dolphins, now first appears.

The type which was on the obverse of the earlier coins now appears on the reverse, and a figure of Nike is first introduced, sometimes crowning the horses, sometimes the charioteer.

The figure of Nike was introduced to commemorate the victory in the Olympic games gained by Gelon in the year 488 B.C. (Donaldson's Pindar, p. xxiv).

Gelon became tyrant of Syracuse three years later in 485 and it is highly probable that these coins bearing the Nike were struck in the first year of his rule.

Some of the specimens shew that considerable carelessness was permitted in the mint-engravers' workshops, especially in the lettering of the legends. The smaller silver denominations begin to appear in this Period II. In addition to the tetradrachm and didrachm we now find the drachm, the obol, and the silver litra.

For sketches of the life of Gelon with remarks upon the passages quoted above, confer the 'History of Greece' by Grote, Part II, Chapter XLIII, Vol. V, p. 62, and also the 'History of Greece' by Thirlwall, Chapter XV, Vol. II, p. 270.

Class I of Period II.

The coins issued by Gelon about 485 to 478 B.C.

1. Tetradrachm.

Obv. ΣV RAϘ OΣI ON.

A linear circle, within which a female head to right: her hair indicated by straight dotted lines, and falling formally over the neck; she wears taenia and necklace, her eye is formed in the archaic manner: around her head are four thin dolphins.

Rev. Quadriga to right driven by male charioteer, holding reins in both hands, and a goad in left; above, Nike to right, wings spread, alighting upon the yoke, holding wreath in right, and placing her left hand upon the forelock of the third horse, horses walking: border of dots. Horses more like well bred steeds than cobs.

2. Didrachm, weight of no 5 B. M. Cat. 130.3.

Obv. ΣV RAϘ OΣI ON.

Linear circle, within which female head to right, hair indicated by dotted lines and falling in formal curls over neck, she wears diadem and necklace: around, four dolphins.

Rev. Naked horseman to right, leading a second horse; horses walking in step: border of dots.

Class II.

3. Tetradrachm (B. M. C., no. 7).

Obv. ΣVR AϘ OΣI OИ.

Female head to right wearing necklace: her hair enclosed in a net, and bound with narrow diadem: around the head four dolphins.

Rev. ΣVRA in exergue. A quadriga to left, driven by a male charioteer, holding reins in both hands, and a goad in his right, above, Nike flying to right, crowning him; horses walking: border of dots.

Class III.

1. Tetradrachm (B.M.C., no 9) [1].

Obv. Similar type of female head, to right, differing in that her hair is turned, up and the end falls over the tænia at back.

Original from CORNELL UNIVERSITY

Rev. Similar to last but the Nike has her wings spread.

Class IV.

1. Tetradrachm. Not in Catalogue of B. M.

Obv. Similar type differing in that the head is adorned with a stephanon, the hair behind is shorter and indicated by straight dotted lines.

Rev. Nike has wings spread. Quadriga to right.

The following classes differ from the former in that the letter ϙ is abandoned for the **K**.

In the British Museum arrangement of the coins these types are given before those of the Demareteion Class, and from their archaic appearance they seem to be rightly thus placed. There is no doubt that these Syracusan coins bearing **K** were issued before 478 B.C.

THE LETTERS ϙ AND **K**.

The two forms ϙ and **K** originally represented two distinct sounds which in Hebrew and Phoenician were called caph כ, and koph ק, but as this distinction was not observed by all the Greeks, the ϙ dropped out of use, and the **K** continued as the only representation of the two sounds.

The ϙ form was continued on coins of Corinth, as an affectation of archaism, long after the disuse of the letter in common script.

On p. 264 of Vol. I of Dr. W. Larfeld's work on the early Greek Alphabet the disuse of the ϙ form is said to have taken place about 525 B.C.

In the *Num. Chronicle* (New Series, Vol. XVI, p. 42), Mr. Percy Gardner said of ϙ " This letter is used at Syracuse until about 478 B.C., when **K** takes its place. Also in Boeckh, C.I., iii, 5435".

In the British Museum the earliest coins which bear the letter **K** appear to be considerably earlier than 476 B.C., and earlier than the Demareteion coinage.

Class V.

1. Tetradrachm[1].

Obv. **ΣVR AK OΣI ON**. Female head to left, wearing necklace; the hair indicated by dots, and bound by narrow diadem, falls in a long tress tied near the end, around four dolphins to left.

Rev. Normal type, the Nike with spread wings; one variety of this type has a Nike wearing peplos and her wings are thrown back. B.M.C., no 11.

Class VI.

1. Tetradrachm[1]. Normal type differing in that the hair of the female head is indicated in lines, not dots. The tress of hair is turned up behind by the tænia.

Rev. Similar to normal, the Nike with wings spread.

Class VII.

1. Tetradrachm[1]. Normal head, but hair indicated in lines, except over the forehead, where it is in dots: Nike flying to right.

One coin is placed in this class in the B. M. Cat., no 36 with the hair in lines, but on the Reverse the Nike is shewn with spread wings instead of, as in every other case of this class, with Nike flying to right. The Quadriga on this coin is proceeding to left.

Class VIII.

1. Tetradrachm[1]. Normal type but differing in that the head on obverse wears a tænia composed of large beads. The hair is indicated by lines. The eye is still formed in the archaic manner. On the Reverse the Nike is flying to right.

2. Didrachm with Obverse similar to the last.

Rev. Normal type of Didrachm.

In Ad Holm's 'Geschichte Siciliens' this type is placed in his " Zweite Periode, die Zeit der Tyrannen, *ca.* 500-461.

3. Drachm. Weight 65.2. Size .65.

Obv. **ΣVЯAKOΣ IO И.**

Female head to right wearing necklace and plain diadem; hair projecting over forehead, and turned up behind under diadem, over which the ends fall.

Rev. A naked horseman to right, bearded: border of dots.

4. Litra[2]. Weight 13.7. Size .5.

Obv. Similar head to last no inscription.

Rev. **ΣV ЯA**. A cuttle fish.

Litra[2]. Weight 12.7. Size .5.

Obv. **ΣVRA**. Similar head.

Rev. No inscription, a cuttle fish.

5. Obol[2]. Weight 11.4. Size .35.

Obv. Female head to right wearing necklace and diadem of beads, hair turned up behind, under diadem, over which the ends fall: border of dots.

Rev. Wheel of four spokes.

THE DEMARETEION.

The name ἐημάρατος is derived from ἐημος and ἀράομαι and means " prayed for by the people". The long η is sometime rendered by " α".

The celebrated passage in the work of Diodorus Siculus which recounts the origin of the coins called Demarateia is here given.

Gelon " in his prosperity conducted himself generously not only towards his allies, but also in regard to the Carthaginians, his mortal enemies. For he granted peace to the envoys from Carthage who had come to implore with tears his generosity.

He only exacted from them two thousand talents of silver with which to reimburse himself for the expenses of the war, but he commanded them to construct two temples in which the articles of peace might be kept. The Carthaginians, saved against all hope, accepted his conditions and promised a crown of gold to Demarete, the wife of Gelo, because at their request she had by her intercession contributed greatly to the conclusion of the peace. She received the crown, which weighed a hundred talents of gold, and caused coins to be struck from it which were called Demareteia, after her name.

These coins were each worth ten Attic drachms; the Sicilians called them pentecontalitra on account of their weight.

The weight of a drachm was 67.28 grains, and one hundred drachms were contained in a Mina.

1. Tetradrachms of these types are common, and may be obtained from 10/. upwards, according to condition.

2. These litrae and obols may be obtained from a few shillings each.

Original from CORNELL UNIVERSITY

The weight of a Mina was therefore 6728 grains. There were sixty Minæ in a talent of silver, the talent therefore weighed 403680 grains.

The number of decadrachms in a talent was 600. Now Diodorus says the crown weighed a hundred talents of gold, and as the ratio of gold to silver at that time was as one to thirteen the number of decadrachms equal in value to the crown would be 7800.

Other calculations by Hultsch and A. J. Evans are given on pp. 124, 125 of "Syracusan Medallions" by A. J. Evans 1892, but the above statement seems more simple.

Of all the large number of decadrachms which were struck by order of Gelo only nine existing specimens are known to modern numismatists.

1. In the Hunter Museum at Glasgow.
2. At Berlin in the Fox Collection.
3. At Paris in the Bibliothèque Nationale, Collection de Luynes.
4. At Paris, Dupré, Bompois, J. Hoffmann.
5. Formerly in de Luynes Coll., not now known.
6. Dupré, later Bunbury (Cat. 411).
7. At Vienna.
8. British Museum Catalogue, No 63.
9. Collection A. J. Evans, now Jameson.

Two other passages in ancient Greek authors must be noted. Hesychius in his texicon (sub voce Δημαρέτιον) says "Demareteion, a coin in Sicily, struck by Gelo, Demarete his wife giving him her ornament for the purpose". (τὸν κόσμον).

The ornament some regard as her jewelry, but it may surely also mean the crown of gold given her by the Carthaginians.

Pollux in his Onomasticon (lib. IX, 85) says "Demarete, the wife of Gelo, when he was in difficulties owing to the war with the Carthaginians, having begged the ornament (τὸν κόσμον) from the women melted it, and struck the Demareteion".

Again we have, not *their* ornaments, but *the* ornament, yet the women are mentioned as if more than the wife of Gelon were concerned.

The passage quoted above from Diodorus shows that he regarded the coins struck from this treasure as struck in silver not in gold. Pollux and Hesychius may only refer to the giving up of the treasure for the purpose of striking coins.

Was all the gold given by Demarete made into Dekadrachms? We are told by Diodorus (XI 26) that Gelon "caused a tripod of gold to be made of sixteen talents, which he devoted to the temple at Delphi as an offering to Apollo"; was this part of the hundred talents?

In the same place he says "Gelon employed the spoils of the enemy to build magnificent temples to Ceres and Proserpine", and then refers to the tripod. Now such temples were certainly not built out of the gift to Demarete, and it may be that the golden tripod was also made with other gold than that given to Demarete.

This offering to the wife of Gelo is not the only wreath given by the Carthaginians of which we have a record. In the year 341 B.C. they offered a crown to the Capitoline Jove weighing 25 lbs, or 1,875 Attic drachmæ. Another crown preserved in the temple of Jupiter at Tarraco weighed fifteen lbs.

The object in making the offering in the shape of a crown was merely to give a graceful form to the gift of a valuable sum of gold, and the custom was continued until late times. Polybius, for instance, records the gift of a golden crown to the Romans by Eumenes of Pergamos who reigned 197-159 B.C. (XXIV, 1.7).

It seems doubtful whether all the sum given to Demarete was used for this coinage, as we read that Gelo sent a golden tripod to the Delphian Apollo, and employed some of the spoil in building two temples to Ceres and Proserpine. And Theopompos mentions a golden image of Nike as well as a tripod among the anathemata of Gelo at Delphi (*Athenæus*, VI, p. 231).

We know that both the golden tripod and the commemorative coins were part of the spoils of the Carthaginians. The question has been raised as to whether both were dedicated to Apollo. On p. 128 of A. J. Evans' "Syracusan Medallions" we read "the coins themselves have preserved a symbol of dedication that makes it in the highest degree probable that they too, like the tripod, were in the first instance designed as offerings of thanksgiving — χαριστήρια — to the same god, in the one case to be devoted to his Delphian sanctuary, in the other, we may well believe, to the service of a local Syracusan festival in his honour.

Upon the reverse of the Demareteia, beneath the usual agonistic type of the quadriga, is seen a lion couchant, the symbolic animal of Apollo, precisely as it appears associated with his head on contemporary coins of Leontini. That the issue of these coins connected itself with the celebration of games in Apollo's honour must be regarded therefore as unquestionable".

The decadrachms may have been given as prizes in the games held in Syracuse, if so, they served the same purpose as the Metapontine silver staters bearing the inscription Ἀχελαιο ἀεθλον) confer *Coins of Magna Graecia*, p. 66).

But we have no proof offered here by Dr. Evans that the lion was ever regarded as a symbol of Apollo. It may have been, and probably was used merely as a punning device on the name Leontini when placed on the coins of that city.

L. F. Farnell in his "Cults of the Greek States" makes no mention whatever of the lion as a symbol of Apollo, neither can we find this symbol mentioned in Roscher's *Lexicon* (sub voce Apollo).

Unless more evidence is forthcoming of the lion symbol being used of Apollo it seems only reasonable to give up the theory that the lion in the exergue of the Demareteia has any reference to that deity.

It is not easy to find passages in ancient authors in which we read of the cult of Apollo at Syracuse". In Strabo (VIII, p. 380), we read "Tenea is a village of the Corinthian territory where there was a temple of Apollo Teneates. It is said that Archias, who equipped a colony for Syracuse, was accompanied by a great number of settlers from this place". This passage only shows that the Syracusans must have been well acquainted with the Apollo cult as one to which their forefathers were devoted.

Another passage in Suidas (sub voce Ἀρχίας) vol. I, p. 345, relates the story of this same Archias of Syracuse going to the oracle at Delphi, with Myscelus of Croton, and choosing riches rather than health. While Myscelus chose health, and hence it came to pass that Syracuse was famed for riches, and Croton for healthy citizens. Here the legends of the foundation of Syracuse are connected with the oracles of Apollo.

Another passage is in the fragments of Book VIII of Diodorus Siculus (Exerpt. *Vatican*, p. 11, 13).

"Antiphemos and Entimos, the founders of Gela, consulted the Pythian oracle, who gave them the following response, You who have both gone to dwell in the land of Sicily shall build a city, at once Cretan and Rhodian, near the mouth of the Gela, and give to the city the sacred name of that river". As Gelon came from Gela it is again interesting to note a recognition of the Apollo cult in his native city. Diodorus (Bk., XIII, CVIII) also mentions an immense statue of Apollo in bronze which stood before the city of Gela, and tells us that the Carthaginians took it away to Tyre. The Geloans had erected the statue by order of an oracle.

That Apollo was worshipped at Agrigentum we see from Cicero (Verr, 2, 4, § 93), and perhaps at Syracuse (Cicero Verr., 2, 4, 127).

A temple of Apollo at Akragas is mentioned in *CIG*. Sic If. 352, II, l, 63 and at Katana *CIG* l. 649 from the inscriptions found in Sicily we learn that there were also temples of Apollo at Gela, Hybla, Naxos, Pachynon, Selinus and Syracuse. We do not know for certain whether the local chariot races were held in honour of Apollo, but if they were such a dedication would be in harmony with two ideas especially connected with that god, viz. expiation and deliverance from evil. The great slaughter at Himera might well appear to need expiation, and the deliverance from the power of Carthage was a subject of natural gratitude. The god who was regarded as the brother of Artemis, the presiding goddess of the city at any rate in the earliest period of its history, was naturally an object of veneration to the Syracusans.

No symbol of Apollo however figures on the Demareteia for the lion symbol is almost certainly not to be thus received.

The victory in the games illustrated by the quadriga was more likely to have been won at Olympia than at Delphi. Pausanias (X, VII) evidently believed that chariot racing was introduced about 394 B.C. at Delphi, much later than 480 B.C. However Sophocles describes a chariot race in his play "Electra" as taking

Generated at Washington University in St. Louis on 2022-05-13 02:14 GMT / https://hdl.handle.net/2027/coo.31924069735599

Original from CORNELL UNIVERSITY

place in the Crisaean plain under Delphi. The date of the play is probably at least 50 years later than the battle of Himera but it is proof that we cannot trust Pausanias as to the date of the introduction of chariot racing at Delphi.

In the description of the Reverse of the Demareteia the figure of the charioteer discovered at Delphi is mentioned and at first sight it might be regarded as proof that chariot races were ran at Delphi in 480 B.C. but the dedication of a figure of the victorious chariot at Delphi does not imply necessarily that the victory was won at Delphi.

One might have expected the Isthmian games to have been more popular at Syracuse, among men descended from Corinthian families, but those games were of Ionian origin, and presided over by the Ionian god Poseidon, the god of horses, whereas the Corinthians and Syracusans were proud of being Dorians; moreover the Isthmian chariot races were of later origin than the time of Gelon.

Pindar celebrated Hiero's victory at Olympia in 472 B.C. as well as those of Thero of Agrigentum and Psaumis of Camarina. Agasias of Syracuse also won an Olympian victory in 468 B.C.

In conclusion, after considering all the references to Apollo it seems probable that local races may have been held in his honour, but the type of the Demareteia was copied from earlier tetradrachms which most probably commemorated victories won at Olympia where Zeus was the presiding deity and Nike was his messenger.

OBVERSE TYPE OF THE DEMARATEIA.

The Obverse is described in the Brit. Mus. Catalogue as follows: **ΣV RA KOΣ ION.** Outside linear circle, within which, female head, Nike? r., wearing olive-wreath, earring and necklace with pendants; hair waved in front, and turned up behind, leaving one loose lock, which falls behind the ear; the ends of the hair gathered up and tied with double cord; around the whole, four dolphins r.

Note that the crown or wreath is here said to be of olive, but the Catalogue was published in 1876, and since then most numismatists agree with Ad. Holm in regarding the wreath as of laurel leaves. Ad. Holm thus describes the head " Weiblicher Kopf mit Lorbeerkranz in feinem Linienkreis". Pausanias (X, c. VII ad fin) connects the laurel-wreath given to the victors in the Pythian games with Daphne, loved by Apollo. The head is now generally regarded as that of Nike the messenger of Zeus to the victor in the games.

The archaic stiffness of the older tetradrachms is softened somewhat by the artist who cut the dies for these Decadrachms, but we notice that some of the old faults remain, as for instance the eye is still formed in the archaic manner as if full faced, and the ear is rather too high on the head; moreover the expression on the face is still as unpleasant as in all the archaic attempts to express a smile.

The linear circle round the head is evidently a survival of the circle in which the small head was placed on the early tetradrachms, but it may have been preserved because it was a help in placing the letters of the inscription regularly round the head.

The type represents the transition from the archaic work of the earlier coinage to the less formal style of the next period.

At first sight the head on the Obverse is so like those on the coins issued up to that date that we wonder why it should be attributed to another goddess. The distinctive mark is the wreath of laurel leaves, but this alone would not enable us to decide that the head was meant for Nike.

In all probability the likeness of the head of Nike to that of Artemis is merely the artistic tradition of the archaic period, and not any attempt to identify the two mythical personages.

It was not until the age of Pindar and Bacchylides that Greek literature bears witness to Nike as the personification of victory in the athletic contests. Pindar only mentions Nike twice, once in regard to Pytheas of Aegina, and once in connection with a Sicilian, Xenocrates of Agrigentum, whose victory was gained in 476 B.C. The date of the poems of Bacchylides is placed between 518 and 438 B.C., but we have no poems of his as early as some of Pindar's, the earliest being probably written about 483 B.C., the latest 468 B.C. Bacchylides visited Syracuse during the reign of Hiero.

The head on the Demareteia is therefore contemporary with the work of these poets, and it is noticeable that about the same period Nike appeared on the Reverse of the coins of Camarina and Catana, the whole figure being represented.

As these figures have been regarded as the nymphs of the city in the character of Nike, and as even Athene assumed this character. it is possible the nymph of Syracuse may be rightly regarded in the same manner.

On page 318 of W. H. Roscher's, *Lexicon of Greek and Roman Mythology* (sub voce Nike) is an illustration of a winged figure flying, and bearing a wreath in each hand. It is on a circular piece of Kyrenian pottery, and is taken from the *Arch. Zeitung* (1881, Taf. 13.2). The date is of the sixth century.

The attitude, the position of the figure in the field above and behind the figure of a horseman resembles that on the Sicilian coins, but the style is much more archaic, especially in regard to the shape of the wings; another difference consists in the legs being draped on the coins and bare on the Cyrenian pottery. It is noticeable that the coins of Elis which bear the figure of Nike were issued about the same time as the Demareteia 480 B.C., and it is of some importance to note also that at Elis Nike was associated with Zeus.

Mr. E. E. Sikes in his article in the *Classical Review*, 1895, p. 280, notices that Nike is more properly connected with Zeus than with Athene, and asserts that the cult of Athene Nike was of later date.

An interesting account of Nike may be seen by Baudrillart, *Les divinités de la Victoire en Grèce et en Italie* (Paris, 1894). Miss Jane Harrison wrote a review of his work in the *Classical Review* (1895. p. 187).

If we regard this head on the Demareteia as that of Nike we must remember that if taken in connection with the reverse the Nike would be the giver of victory in the games or races, and not of victory in the war with the Carthaginians. Perhaps as the messenger from Zeus sent to crown the victor, rather than the giver of Victory in her own right. How far the Greeks of that day may have associated the two ideas of agonistic and bellicose victory it is hard to say.

The great victory just won must have been in their minds at that time, and yet we see by the reverse type that the old pride in the victories won with the racing-cars was still apparent.

THE REVERSE TYPE.

The Reverse type shows a quadriga to right driven by a male charioteer, holding a goad in his right, and the reins in both his hands; the horses are walking; in the field above, Nike is flying to right crowning them : in the exergue a lion running to right: border of dots.

In regard to style we find a considerable improvement especially in the proportions of the horses, but they are still too thin or fine. The long robe of the charioteer has led some to doubt as to the sex of the driver, but the discovery of the bronze charioteer at Delphi has proved that the coin artist was copying the same type as the worker in bronze. Moreover there is an interesting connection of this celebrated bronze figure with that of the charioteer on the Demareteia. The inscription on the base states that the quadriga was devoted to the god by Polyzelus. This was the brother of Gelon, who married Demarete on the death of her first husband.

For beautiful illustrations of this bronze charioteer, confer Fondation Eugène Piot. *Monuments et mémoires*, 1897, tome IV, planche xv, and the article *L'aurige de Delphes*, on p. 183.

The famous statue is also illustrated in *La sculpture grecque*, by André Joubin (chapter VI, p. 141).

The charioteer is wearing a long robe girt with a girdle high up under the breast, the arms are left bare and the folds of the garment reaching to the ankles fall in close regular pleats. The short hair of the youth is bound with a fillet on which is a kind of Greek fret.

As we have no record of any victory won by Polyzetes, and as the inscription is only a fragment we shall probably be right in thinking that on Gelon's death, in the year of his last victory, his brother caused the monument to be raised in commemoration thereof.

THE EXERGUE.

In the exergue of the Demareteia we see a lion running to right. Mr. G. F. Hill in his *Coins of Ancient Sicily*, p. 55 describes it as "'a wild lion racing' — emblem, as without undue fancifulness it is interpreted, of the subdued and fleeing forces of Africa".

The earliest lion on a coin, used as a symbol of Africa, appears on a coin of the Carthaginians issued about 410 B.C., that is seventy years after their defeat at Himera (Fig. 390, p. 738 of Dr Head's, *Hist. Num*). On p. 152 of that work Dr Head said — "It may be contended that if any allusion to the vanquished Carthaginians had been meant it would surely have been contained in the principal type, and not in a mere adjunct symbol. The head of Nike and the victorious quadriga both refer to agonistic victories, and not to victories in war."

If we would thoroughly understand what the mint-master meant by the lion symbol we must answer several difficult questions; would the lion be generally understood at that time by the common people as a symbol of Africa?

As the exergues of the later decadrachms contained symbols of the prizes in the agonistic contests, should we not look for the same idea in 480 B.C.?

Apparently it is only a hypothesis that the Lion and the Pistrix symbols refer to the wars with Carthaginians and Tyrrhenians, but it is an alluring hypothesis, and it is difficult to imagine that symbols so suitable to commemorate these victories were used without any such intention.

SMALLER PIECES OF DEMARETEIA.

Tetradrachms were issued bearing the same types, and obols; these bear the same olive-crowned head upon the Obverse with a border of dots and the usual wheel upon the Reverse with Σ V / R A between the spokes of the wheel (No 66 B. M. Catal.).

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C.500 — A.D.1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-forty-eighth article.

(*Continued from col. 12445.*)

SCHWAB, ANDRÉ PIERRE (*French*). Contemporary Sculptor and Medallist, born at Nancy (Meurthe-et-Moselle); pupil of Mercié, Chaplain, Vernon and Paul Auban. At the Paris Salon 1909 he exhibited a silvered Plaquette; in 1910: Three Plaquettes: Mam Cooz Pennec; Tad Cooz Pennec; — La veillée bretonne; — Souvenir medal; — Au bord de la mer, galvano.

SCHWARTZ, HANS (*Germ.*). Medallist of the first half of the sixteenth century, born at Augsburg *circ.* 1492 or 1493, date of death unknown. The period of his activity is comprised between 1516 and 1527.

Schwartz was one of the greatest artists of his day in his particular branch, and stands out conspicuously from amongst his contemporaries because of his marked individuality. He does not appear to have been influenced, as Dr Habich remarks, either by the Italian or German school; his style is always original though his productions vary in artistic merit.

Prof. Adolf Erman, who had only Neudörffer's notice of the artist to go by, was the first to draw attention to Hans Schwartz and to compile a tentative list of his medals (*Deutsche Medailleure*, 1884, pp. 20-27). He detected in the Felix collection the medal reproduced above, showing the Medallist's self portrait, and by comparing this piece with others presenting the same characteristics of style and treatment he was able to group them together as works of the Master. To the fifty medals ascribed to Hans Schwartz by Erman, Dr Habich has now added another fifty, and the list is probably by no means complete.

Self-Portrait of Hans Schwartz.

I give, after Dr Habich, the following forms of signatures which occur on the works of Hans Schwartz:

Monograms of Hans Schwartz.

Very little is known of the artist's life. Neudörffer calls him a son of Ulrich Schwartz, and states that he was apprenticed to Stephan Schwartz, and also that he was presented as an apprentice in 1506 to the guild of painters, goldsmiths, sculptors, etc. He served four years' apprenticeship, and another six as journeyman, so at least we may conclude, as the youth's first signed work is dated 1516. No mention exists of his obtaining the Mastership, but the free art of the Medallist (Konterfetter) did not probably require this legitimation.

The year of the imperial diet 1518 saw the artist in full activity at Augsburg. A year later we find him at Nuremberg, whither he had been invited by the Provost of St. Sebald, Melchior Pfinzing, whose portrait he had modelled in 1518. Here he became intimately acquainted with his famous contemporaries, Ludwig Krug, and especially Albrecht Dürer, who gave him a sitting for his medal. In March 1520, he was requested to leave the city on account of his dealings with the imperial city bailiff, Tilman von Bremen, and other citizens. In September of the same year he was again at Augsburg, and in the following spring we find him at Heidelberg, Worms, Speier, etc. Returning through Swabia, he was allowed to again take up his residence at Nuremberg in 1525. His last signed medal is dated 1527 and depicts a citizen of Augsburg. Afterwards

Albert Dürer. Wood Medallion.

Original from CORNELL UNIVERSITY

all trace of the artist is lost, unless he may be identified with the Hans Schwartz of Oettingen, who in 1540 married the widow of Hans Schäufelin.

Anne blessing the infant Christ.

Lamentations over the body of Christ.

Konrad Peutinger.

Hans Schwartz's earliest signed and dated work is an 'Entombment', carved in wood (1516), which Dr Habich styles "a Donatello in a Burgkmaier shrine", a true Renaissance production savouring of the Quattro Cento. Four medallions in boxwood, executed about the same period, show a close connection with Italian prototypes. Two are in the Kaiser Friedrich Museum, Berlin: 'Anne blessing the Child Jesus', and 'Lamentations over the body of Christ' (both *illustrated*), and the other two: 'The Judgment of Paris', and 'Death with a nude female' belong to Dr Figdor of Vienna. In the Louvre are a statuette of Eve and an 'Ecce Homo', neither signed, by the Master.

The actual series of Schwartz's medals begins in 1517 with a Portrait-medallion of Konrad Peutinger. I have compiled the following list from Erman and Dr Habich's indications:

MEDALS.

1516. 1. Emperor Maximilian (Domanig, *Erzhaus Oestr.* II, 10).
1517. 2. Konrad Peutinger, of Augsburg (*Berl. Mus.; Trésor*, 17, 2).
1518. 3. Frederick II., Count Palatine (*Berl. Mus.*).
4. Melchior Pfinzing; R/. ANIMO FORTI VINCITVR CVPIDO. Female figure and column (*Berl. Mus.*; *Erman*, p. 23). — *Habich*, Pl. D, 5).
5. Melchior Pfinzing. A variety, small (*Vienna*).
6. Sebastian von Rotenhan, Councillor of Mayence (*Trésor* 2, 3. — *Habich*, Pl. A, 9).
7. Johann Burgkmaier, painter of Augsburg (*Berl. Mus.* — *Dannenberg*).
8. Jakob Fugger (*Erman*, p. 24).
9. Otto, Count zu Solms (*Trésor*, 2, 7).
10. Christian of Brunswick (*Habich*, fig. 28).
11. Albrecht of Brandenburg (*Menadier*, *Hohenzollern* II, 6).
12. George of Saxony (*Habich*, fig. 27).
13. Hans Tummer (*Habich*, Pl. A, 12).
14. Jakob Elle (*Habich*, Pl. A, 6).
15. Unknown personage, with MDXVIII in the field (*Nuremberg*).
16. W. von Jörger (*Bergmann*, *Ber. Männer* XI. 49 imitation).
1519. 17. Melchior Pfinzing. This medal occurs with several reverses, and also with an interesting Spes (*Berl. Mus.* — *Trésor* 5, 2. — *Habich*, fig. 45 a).
18. Melchior Pfinzing; small, with bust only, and new R/. (*Dannenberg*).
19. Ulrich Stark and his wife (*Berl. Mus.* — *Habich*, Pl. D, 9).
20. Andreas Imhof (*Berl. Mus.*).
21. Lorenz Stayber (*Berl. Mus.* — *Habich*, Pl. D, 12).
22. Martin Tucher (*Berl. Mus.*).
23. Jakob Welser, of Augsburg (*Berl. Mus.*); 47 mill.
24. Sebald Pfinzing; R/. Arms (*Berl. Mus.* — *Erman*, Pl. I, 6).
25. Lucas Hanolt (*Berl. Mus.*).
26. Kolman Helmschmid, of Augsburg (*Berl. Mus.*).
27. Sigmund von Dietrichstein (*Berl. Mus.*).
28. Hans Burgkmaier, painter (*illustrated.* — *Max Rosenheim Coll^{n}*).
29. Hans Adam Würzeburg.
30. Unknown personage (*Trésor* II, 5).
31. Jakob Welser. 36 mill.
1520. 32. Eitel Friedrich von Zollern, 'Hauptmann im Land Würtemberg' (*Trésor* 3, 1. — *Habich*, fig. 34).
33. Eitel Hans Langennmantell (*Berl. Mus.*).
34. Simon von Liebenstein, cononicus at Speier (*Berl. Mus.* — *Habich*, Pl. D, 10).
35. Charles V. (*Habich*, fig. 40; *illustrated*).
36. Otto Heinrich, Count Palatine (*Habich*, p. 32; Pl. D, 1).
37. Thoman Löffelholz (*Habich*, fig. 38).
38. Matthaeus Lang; 47 mill. (*Vienna*). A variety.
39. Bernhard von Cles, bishop of Trient (*Habich*, fig. 31).

Martin Tucher.

Erman has had the good fortune to recognize as works of Hans Schwartz the drawings (numbering 124 so far) so-called: "Dürer profile Heads", which are preserved in Berlin, Bamberg, Weimar and elsewhere. Many of these drawings have been identified as sketches for medals; Erman gives 35 and Dr Habich 14 more. They were drawn from life.

The portrait of Matthew Lang on the currency of this archbishop of Salzburg is taken from Schwartz's medal (*Habich*, fig. 29), and

Salzburg Thaler of Matthew Lang.

likewise that of bishop Bernhard von Cles on the currency of Trient (*Habich*, fig. 31, 32). Even the Thalers of George of Saxony show the artist's medallic portrait of the Duke (*Habich*, fig. 27).

The medallic portrait gallery of early sixteenth century German celebrities by Hans Schwartz is a remarkable one. Let it suffice to mention the portraits of Hans Burgkmaier, Dr Peutinger, Jakob Fugger, Melchior Pfinzing, Lucia Dörerin, "the tenth Muse and Germany's

*

Original from CORNELL UNIVERSITY

ornament", and above all Albrecht Dürer, whose sympathetic figure the artist depicted carved in wood and sunk in metal. The medals of Charles V., executed during the emperor's residence a-Heilbronn, soon after his coronation, are very realistic in portraiture.

Schwartz' medals are the productions of a Portrait-carver, and stand in contrast with those of Daucher, which exhibit the noble art of relief plastic in stone. He is an impressionist. His style is vigorous and bold. He sacrifices details for expression. Dr Habich resumes his masterly critique of the artist by saying "Unserem modernen plastischen Empfinden steht Schwartz zweifellos näher als irgendein anderer deutscher Medailleur. An Einfachheit der Haltung und Energie der Charakteristik kann einzig *er* den Meistern der italienischen Quattrocentomedaille verglichen werden. Aber erst wenn im Geschmack des kunstfreundlichen Publikums die gegenwärtig so beliebte "Kunstmedaille", dieses französische Salonprodukt, durch ein echtes Gebilde der Plastik ersetzt ist, wird für Hans Schwarz die Stunde kommen und seiner lang verkannten Kunst ihr Recht werden."

Alexander Schwarz.

Dr Domanig in *Deutsche Medaille* suggests after Dr Habich, that it is not always possible to discreminate quite absolutely between the works of Hans Schwarz and Hans Daucher.

SCHWARTZ, HANS (*Austr.*). Mint-master at Vienna, 1518-1532, reappointed on 11. August 1522 in succession to T. Behem. Condemned to death for forgery, and executed in the same year (Luschin von Ebengreuth, *Wiens Münzwesen, Handel und Verkehr im späteren Mittelalter*, Wien, 1902).

SCHWARTZ, Prof. **STEPHAN** (*Austr.*). Contemporary Sculptor, and Medallist, and K. K. Professor at the Viennese Academy; born at Neutra, 20. August 1851; studied at Pest under Landauer, 1865, and learned chasing at Vienna, 1867, with Dziedzinski and Hanusch. He was employed for some time, until 1870, by J. C. Klinkosch (at the time, Mayrhofer and Klinkosch), using his spare moments in studying sculpture under Prof. Otto König.

He is at the present time Professor of sculpture and medal-engraving at the "Kunstgewerbeschule" in Vienna. At the Paris Universal Exhibition, 1900, he obtained a gold medal, and also one at the Jubilee Exhibition of the Berlin Academy.

Since 1876 Director of a school of chasing and engraving.

The following is a list of Prof. Schwartz's principal medallic productions: 1880. Louise Kratschwil, medallion (50 mill.); — 1881. R. von Eitelberger, chased bronze casting (82 mill.); — 1882. Three children playing at balls, repoussé work (83 mill.); — 1883. R. von Eitelberger, profile portrait, bronze casting, gilt (110 mill.); — 1885. Prince Hohenlohe, portrait, bronze chasing (96 mill.); — National Hungarian Exhibition at Budapest, 1885 (66 and 50 mill.); — Seven Medallions: The works of benevolence of Saint Elizabeth, after Moritz von Schwind's drawings, repoussé silver (each 35 mill. diam.); — 1886. Rudolf von Eitelberger, bronze casting (123 mill.); — Another, of the same (62 mill.); —

1887. Jos. Falnesics, profile portrait, bronze casting (165 and 124 mill.); — 1888. Jubilee Industrial Exhibition (64 and 161 mill.); — 1889. Large Plate, Arts ands Industries; — Theodor Billroth, profile portrait (62 and 120 mill.); — 1890. Sculpture, bronze casting (128 mill.); — Leopoldine Schwartz, profile portrait (88 mill.); — Vienna Fashion (145); — 1891. Portrait-medallion of a Child, low relief (88 mill.); — Portrait-medallion of an old Man, high relief (88 mill.); — 1892. Herr und Frau Eduard Friedmann, oval Portrait-medallion (75 and 60 mill.); — Jeannette von Eitelberger, portrait-plaquette (128×97 mill.); — Eugen Weissel, portrait-plaquette (125×95 mill.); — The Morning, bronze casting (208×160 mill.); — The Evening, bronze casting (208×160 mill.); — Julius Wiesner, profile portrait (62 and 122 mill.); — 1893. Stephan and Rudolf Schwartz, profile portraits (160×120 mill.); — Otto Koenig in his workshop, silver casting, chased (197×153 mill.); — Ferdinand Kirschner, portrait-medallion in repoussé silver (118 mill.); — Raphael Donner, medal and medallion (69 and 209 mill.; *one illustrated*); — Comple-

Raphael Donner.

tion of the Hofburg at Vienna (70 mill., and Medallion); — 1894. Edmund Lidner, Portrait-medallion (118 mill.); — Charlotte Siess, Portrait-plaquette (130×96 mill.); — Julius Andrassy (80 and 118 mill.); — 1895. Vindobona, medallion (50 mill.); — A. Jest, boy's head (50 mill.); — 1896. Lili Michalek, portrait-plaquette (150×110 mill.); — St. Hubert, medallion (in

Prof. Stephan Schwartz was entrusted by the Servian government in 1904 to cut the dies for the coinage of Peter I.

5 Denara of Peter I. of Servia.

This engraver is also responsible for the new Montenegrin gold coinage, consisting of 100, 20 and 10 Perpera pieces. The Silver, Nickel and Bronze Coinage of this State was struck at the Paris Mint, 1909.

Montenegro, 20 Perpera, 1910.

Prof. Schwartz has made a great number of pieces in bronze and marble, many medals and small moulded pieces. Among his large works may be named "The Engraver Rudolph von Eitelberger"; "Cardinal Prince Fürstenberg" (Olmütz); "The Styrian Chief Adventus Augusti" (Hofburg, Vienna), in stone, "Die Blütezeit des Rittertums" (the golden age of chivalry) (Neue Hofburg, Vienna); the marble statue of Seneca; the marble statue of Frederick, Count Schönborn (Reichstadtsgebäude, Vienna). His awards include: Paris, 1878; three silver medals; Chicago, 1893, a medal; Berlin, 1896, a small gold medal; Paris, 1900, a gold medal; Vienna 1905, the Grand Duke Karl Ludwig's gold medal. He is a knight of the Franz Josef Order, and Commander of the H. Sava Order. He is professor in the Royal Art School of Vienna. He has gained great recognition and has been the teacher of a majority of the younger men.

At the Salon de la Médaille held at Brussels in connection with the Universal Exhibition, 1910, the same Artist exhibited a series of no less than 40 Medals and Plaquettes, which were very much admired.

At the New York International Medallic Exhibition held in March 1910, he exhibited the following works: — Damenportrait; — Inspiration; — Das Wasser; — Der Alchimist; — Julius Wiesner; — Viribus Unitis; — Dr. Istrati; — Die bildenden Künste; — Graf. F. Schönborn; — Stadt Hall in Tirol; — Stadt Hall Allegorie; — Schiller; — Tunnelarbeiter; — Theodor Billroth; — Drei Portraits; — Notturno; — Elegie; — Adagio; — Fürst Rudolf Liechtenstein; — Dr. Karl Freiherr von Lemayer; — Sigmundus Exner; — Otto König; — H. Hessl; — Mädchenkopf; — Schillermedaille. Obverse and reverse; — R. Donnermedaille. Obverse and reverse; — Trauer; — Kinderkopf; — Kaiser Franz Josef I; — Fürst Nikita von Montenegro; — König Peter von Serbien; — Kaiserin Elisabeth; — Arthur u. Margareth Krupp; — Dr. David Ritter von Schönherr; — Hofkirche, Innsbrück; — St. Hubertus; — Stadt Hall in Tirol. Obverse and reverse; — Viribus Unitis; — Ausstellung in Bukarest.

SCHWARZBERGER (*Germ.*). Manufacturer of medallic buttons at Wasserburg on Inn, nineteenth century.

SCHWARZE, HEINRICH (*Germ.*). Mint-master at Dortmund, 1752-1758.

SCHWARZEBURGER, JOHANN BERNHARD (*Germ.*). Sculptor and Gem-engraver, born at Frankfort-on-M., 4. June 1672, died there in July 1741. He is noted for his Cameos. In all his works he was greatly assisted by his sons **ADOLPH S.** (born about 1714, † March 1738), **FRANZ S.** (born about 1699, † November 1735), and **VALENTIN S.** (born about 1904, † April 1732).

SCHWATHE, HANS (*Austr.*). Contemporary Sculptor at Vienna, by whom is a Plaquette commemorating the erection of a Monument to Charlemagne in St. Peter's Church, Vienna, 1908. This Plaquette is modelled after the designs of the sculptor Rudolf Weyr, author of the monument.

SCHWEDTLER, ABRAHAM (*Germ.*). A Goldsmith of Dresden, by whom are cast Portrait-medals (Conterfecte) of John George I. of Saxony, and Badges, &c., executed between *circ.* 1611 and 1630 (Julius und Albert Erbstein, *Erörterungen auf dem Gebiete der säschischen Münz- und Medaillen-Geschichte bei Verzeichnung der Hofrath Engelhardt'schen Sammlung*, Dresden, 1885, p. 131).

SCHWEGERLE, HANS (*Germ.*). Contemporary Sculptor and Medallist; exhibited at the International Art Exibition, Munich, 1909, a series of cast Portrait-plaquettes in the Renaissance manner.

SCHWEIDLIG, MARKUS of Olmütz (*Germ.*). Administrator of the Mint at Breslau, 1624, 1625-1627, and again in 1629.

SCHWEIGER, HANS (*Germ.*). Seal-engraver at Augsbnrg, 1600.

SCHWEIGER, JACOB (*Germ.*). Mint-master at Emden, 1648-1650. Schlickeysen and Pallmann take him to he the same person as **JAKOB SCHWIEGELT** (*q. v.*), who was acting as Mint-master at Glückstadt between 1644 and 1660.

THE COINAGE OF THE REIGN OF HENRY VII.

BY GEORGE B. PETRIE.

Member of the British Numismatic Society.

INTRODUCTION.

Looking through the back volumes of the *Numismatic Chronicle*, it is somewhat surprising to find how little attention has been devoted to the coinage of this reign; for we find there but three short papers which treat of this particular series.

In compiling this paper, all available and essential material has been carefully collected and classified from the best authorities, and every endeavour has been made to digest and present this in such a manner as to enable the collector to classify his coins of Henry VII without the necessity of constant reference to other works. It is perhaps impossible for a list of the coins of any of the early reigns to be anything like complete on its first appearance, and the only merit to which I can lay claim is, that I have made a judicious search from every source within my reach. I have, therefore, in working out this subject always adhered — with but few exceptions — to the plan of placing my chief reliance on contemporary notes; and, so far as I am aware, I have neglected nothing of importance that is either directly stated by original authorities and contemporary records, or that can be reasonably inferred from what they say.

§ 1. Historical and Numismatic Summary.

With the accession of Henry VII, the first sovereign of the House of Tudor, a new era began. Henry Tudor, Earl of Richmond, was in his thirtieth year (27th August, 1485) when he gained the crown of England. Born at Pembroke Castle on the feast of St. Agnes the Second [1] (28th January, 1457), he was the son of Edmund Tudor, Earl of Richmond and Margaret Beaufort, the great-granddaughter of John of Gaunt and Katharine of Swynford. Edmund Tudor was himself the son of Owen Tudor, who married Katharine of France, the widow of Henry V. Henry VII married Elizabeth of York, the eldest daughter of Edward IV, and thus united the two Roses. They had four children: Arthur, who died (1502) before his father; Margaret, who married James IV of Scotland; Henry VIII; and Mary, who married (i) Louis XII of France, and (ii) Charles Brandon, Duke of Suffolk.

Henry VII had no claim to the throne by birth, as the daughters of Edward IV were still alive. He could hardly claim the crown by his conquest at Bosworth, as he had been invited over by a large party in England. After granting, however, that he was the *choice of the people*, his best claim rested in his proposed marriage with Elizabeth of York, and it was on condition of this "Union of the Roses" that Parliament bestowed the crown upon him. He was crowned in Westminster in October 1485, and the marriage took place in the following January.

The next male heir to the crown was the young Earl of Warwick, son of the Duke of Clarence, whom Henry at once sent to the Tower, in order to have him in his power.

The King's chief advisers were two councillors who had been faithful to him during his exile — John Morton [2], Bishop of Ely, whom Henry promoted in 1487 to Archbishop of Canterbury, on the death of Cardinal Thomas Bouchier; and Richard Fox, like Morton himself, an ecclesiastic, whom in the course of his reign Henry promoted to the bishoprics of Exeter (1487), Bath and Wells (1492), Durham (1494), and Winchester (1502) successively.

As is usual with sovereigns having doubtful titles, Henry's reign was disturbed by two rebellions. The first was raised by Lambert Simnel, the son of one Thomas Simnel, described afterwards in an Act of Parliament as "late of Oxford, joiner", who described himself to be Edward Plantagenet, Earl of Warwick, the son of the Duke of Clarence, then a prisoner in the Tower. In vain did Henry produce the real Warwick to the citizens; but the rebellion continued and was only ended by a severe defeat at Stoke in 1487. Simnel was captured and made a turnspit in the royal kitchen. A second pretender was accordingly found to dispute the throne of Henry, one Perkin Warbeck, who claimed to be Richard Plantagenet, Duke of York, the younger brother of Edward V, who was believed to have been murdered in the Tower. He was a much more formidable leader than Simnel. Even kings supported his cause. James IV of Scotland gave him Catherine Gordon for his wife, and the Duchess of Burgundy, sister of the late king, declared him to be "the White Rose of England". After unsuccessful attempts in various places, Warbeck landed at Whitesand Bay, Cornwall, on 7th September, 1495, trusting for support to the local disaffected population. In a little while he was at the head of an army. At Bodmin he proclaimed himself king Richard IV. He laid siege on the 17th to the north and south gates of Exeter; but soon afterwards withdrew his forces to Taunton. Meanwhile the king sent a strong force under Lord Daubenay to meet Warbeck; but in the meantime he escaped and succeeded in reaching the sanctuary of Beaulieu, in Hampshire. Here he threw himself on the mercy of Henry, he confessed his imposture, and was sent to the Tower. In his prison he became friends with the young Earl of Warwick, and shortly afterwards, for conspiring to escape, they were both executed on 23rd November, 1499, at Tyburn. This insignificant rebellion was momentous in having its reflection upon the coinage of this reign [3], though very few specimens of the coin appear to have been struck.

Henry was very avaricious; and, to satisfy his greed for wealth, he laid heavy fines upon his nobles. He was one of the wealthiest kings that ever sat on the throne of England. He died worth

1. In after years, when he was king, his mother dated a letter to him, "At Calais town thys day of Seynt Annes, that y dyd bryng ynto thys world my good and gracyous prynce, kynge and only beloved son." *St. Annes'* day falls in July; but we have ample evidence that Henry was born in the beginning of the year, and that "Seynt Annes" means St. Agnes. — J. Gairdner's *Henry the Seventh*.
2. Master of the Rolls under Edward IV.
3. *See* § 3. Types, Art, and Portraiture.

£ 1,800.000 sterling, a sum with the purchasing power of some £ 18,000.000 to-day. Henry died at Richmond on 21st April, 1509, in the fifty-second year of his age, and the twenty-fourth of his reign. He was buried in the beautiful chapel which he had added to Westminster Abbey.

We will now proceed to examine more in detail the numismatic side to which the above historical sketch has been an introduction.

Henry VII introduced two important new denominations. In 1489 saw the introduction of the first *pound* sovereign, or double ryal in gold; twenty-two and a half such pieces could be coined out of every pound weight of gold to be coined in the Tower, *two* of these pieces and no more were to be made, unless the King should command the contrary. On this piece the king is represented in the royal robes as on the ryals of France, and it thus might receive the name more legitimately than those of Edward IV; but, in order to distinguish it from the previous ryal, it was decided to call it a sovereign, a term which disappeared after a few reigns, not to be again adopted till the great modern recoinage of George III (fourth issue) 1817. In 1504 the first shillings in silver, were struck, undoubtedly in small numbers, and therefore are of considerable rarity. The coin is at the same time noteworthy, as well as the groat of contemporary mintage, for the earliest realistic portrait of an English king. Henry continued the rose-ryal or half-sovereign, which is, indeed, far rarer than the Pound Sovereign (the Pembroke example fetched £ 205) and struck the double pound sovereign or four-ryal piece. There is also a very rare groat of the portcullis type of this reign, with a full-face bust with plain arched crown which sold at the Thomas sale for £ 14 10*s*. As only one other specimen (Evans collection) of this variety is known it would appear to be a pattern (see also § 3. Types, Art, and Portraiture).

§ 2. Denominations, Weights, and Fineness.

At first Henry made no alteration in the denominations then in existence, but, as previously stated, in 1489 and 1504, two important dates, saw the introduction of the sovereign and profile shilling. The former weighed 240 grains, or double the ryal or noble. It was current for 20*s*. They were issued from the Tower mint only, as were all the gold coins of this reign.

No change took place in the standard of fineness of the metals; the gold being at 23 carats 3 1/2 grs. fine to 1/3 gr. alloy; and the silver 11 oz. 2 dwts. fine to 18 dwts. alloy. The weights remained the same as fixed by Edward IV in 1464.

In this reign there were also struck ryals [1], angels, and half-angels. The angels, of which, as may be seen from the table annexed, were of two issues, weighed 80 grs. and were current for 6*s*. 8*d*. The half-angels, like the angels, consisted of two issues only, were current for 3*s*. 4*d*., and weighed 40 grs.

Table of Issues.

METAL	ISSUE	DATE	DENOMINATION
Gold....	First	1485	Ryal, angel, and half-angel.
	Second	1489	Sovereign (four varieties), angel, and half-angel.
Silver....	First	1485	Groat, half-groat, penny, and half-penny.
	Second	1489?	Groat, half-groat, penny, half-penny, and farthing, [2] and Portcullis groat.
	Third	1504	Shilling, groat, half-groat and penny (Sovereign type).

1. This is doubtless the coin mentioned as a half-sovereign in the statute 19 Henry VII, c. 5, with respect to clipped coins. It must have been struck by virtue of the authority to strike ryals, which were exactly half the value of the sovereign, because the indenture for striking sovereigns contains no mention of half-sovereigns, nor is there any other authority known for the issue of half-sovereigns (Kenyon, *Gold Coins*, p. 77).

2. The attribution of the farthings is somewhat doubtful (*see* § 3. Types, Art and Portraiture).

The silver series consisted of three issues, and of six denominations. There were no issues of halfpennies or farthings of the third coinage. The weight of the groats is 48 gr. and the other denominations in proportion.

§ 3. Types, Art, and Portraiture.

Almost immediately after his victory near Bosworth, Henry VII turned his attention to the coinage, and in 1485 an indenture was made with Sir Charles Daubenay (afterwards Lord Daubenay) and Bartholomew Reed (Rede) who were appointed joint masters and workers of the mint, to coin pieces of the same description as they were fixed at in the fifth year of Edward IV [1]. No material change therefore took place until 1489 in the type which had existed for upwards of two and a half centuries. It has been suggested [2] that there is in almost all the full-faced groats of Henry VII with the arched crown, a peculiar and melancholly expression of character, totally differing from the groats of Edward IV and Richard III, and the light groats of Henry VI, which in general are so similar to Edward IV's, that unless you look to the inscription they would pass you as those of Edward IV.

The gold series in almost all respects — both in type and fabric — resemble that of *one or other*, save in the name, of his predecessors. The obverse of the angels have the usual figure of the archangel, St. Michael, standing, piercing the dragon (of Cadwallader). The reverse has a ship to right, with h and rose at sides of mast. Both designs are striking and interesting. The meaning of the latter design may be open perhaps to question, but that on the obverse will be found in *Revelation*, XII, 7-9. We have also evidence that some of Henry's early angels were struck from altered dies of Richard III (Cf. Nos. 2 and 3). Similar alterations had been executed with neatness in the previous reign to some of the angel dies of Edward V. The angels and half-angels of the first and second issue differ only in the position of the Archangel; in the former the saint has only one foot on the dragon, but on the latter both feet. Of the sovereign we know of four distinct types, and in the list which follows, they are described in the order in which they were apparently issued. This is a handsome coin, being first struck in 1489, and for artistic merit was the finest coin of its time in Europe.

The silver coins of Henry VII exhibit the head of the king full-faced, no difference being made in the bust of the first two issues with any view to the individual likeness of the sovereign it was supposed to represent; in fact, it was broadly speaking, a purely conventional king's head.

Henry VII placed the white rose within the red one, and this was continued as a badge by his successors. He also used the Portcullis, as may be seen at Westminster, where it repeatedly occurs. It was the badge of the Duke of Beaufort, descendants of John of Gaunt, and was, Hawkins observes, "an additional pursuivant to whom he gave the name of Portcullis." In more modern times we still find it surviving as the badge of the Exchequer Office, and as the principal charge in the arms of the City of Westminster, and also the Borough of Harwich.

In the second style of coinage of this reign, the design of the crown is changed from the open crown of fleur-de-lis, of his own previous coins, to an arched crown. The bordering tressure is enriched with small roses in the angles or spandrils. The reverse is precisely as before. Other groats of this kind vary in the number and richness of the tressures which surround the head, and also in the style of the crown, though always arched. The later pennies have also the arched crown. The reverses of the pennies also were of the old type, or nearly so. Folkes mentions a piece of this period which appears to have been a trial for a twenty-penny piece. I am, however, unable to describe the coin, as I cannot trace its present owner.

Groats of the second issue were struck in London only. On the earlier pieces of this issue the arches of the crown are plain; but on the later ones they are ornamented. The cross fourchée on the reverse is the first attempt at a departure from the stereotyped form

1. Pat. I. Henry VII, m. 16, *Lowndes*, p. 38, has by mistake dated this indenture in 1st Henry VI (1422).

2. Sainthill, *Olla Podrida*, vol. I, pp. 139-140.

of the cross pattée which had been in continual use since the reign of Edward I.

Half-groats of Canterbury (second issue) were struck by Archbishop Morton; some having the letter M in the centre of the reverse. Half-groats were struck also at London and York; those of York have generally a key on each side of the king's neck. Some early half-groats of this issue have the crown breaking through the tressure and not arched. They are sometimes classed to the first issue.

Pennies of the second issue are found of Canterbury only, and they all bear the ton mint-mark. "From this circumstance, writes Mr. Grueber of the British Museum, and the occurrence of early mint-marks it is conjectured that the "sovereign type" was introduced at this period: otherwise there are no pennies of the second issue which can be classed to London and York".

Halfpence of the second issue were struck at Canterbury, London and York; some of the latter, like the half-groats of York, have generally a key each side of the king's bust. The attribution of the farthing, usually classed to the second issue, is doubtful, but from the fact of their having the front-face and *arched crown*, their attribution would seem to appropriate them to this reign. No mint-letter or name occurs on them; but from their type they are probably of the second issue. They are, however, only known of London, and are very rare indeed.

THIRD ISSUE.

The Evolution of Design.

From this time begins a new departure in the English coinage. In this issue we have the profile bust, which represents the sovereign at the age of forty-seven. Introduced as it was only a few years before his death, the profile bust, in disuse in England since the days of Stephen, was an interesting departure from the previous two stereotyped issues of his own, and his predecessor's money. From the point of view of art, "the portrait of Henry VII is a work of the highest art in its own kind. Nothing superior to it has appeard since [1]. It was the first real attempt at correct portraiture on English coins since the reign of Offa, king of Mercia (A.D. 760). To Henry VII belongs the honour of placing the art of the medallic engraver on a higher footing than had hitherto been attained in this country. Not only did the obverse receive attention, but the reverse type was also modified, having the shield with arms within a double circle upon a cross fourchée with lis or trefoil in each fork. All denominations of the third issue partake of this type; but in the case of the obverse type of the pennies of this issue, a change occurs, which represents a full-length figure of the king seated on the throne. Thus known as the "sovereign type". Among other important changes made by Henry VII in the third issue was the placing either the Roman numerals VII or SЄPTIM after his name.

The "Portcullis Groat."

Two other coins of interest which call for attention must be noticed here. The first is the portcullis groat, which is one of the rarest coins of the English series. I am only acquainted with two specimens, one in the British Museum, and the other in the Evans collection.

The type is that of the second coinage of Henry VII (Hawkins, Kenyon's edition, p. 268-9, Pl. XXVIII, no. 371); but as previously stated [2] the date of the first issue of this type is uncertain. The weight, it may be mentioned, is about the same as that of the ordinary groats of the second issue of this reign. The late Sir John Evans has suggested [3] that "from the careful manner in which this piece has been struck and from the extreme rarity of this variety of the groat, it appears doubtful whether it should not be regarded as a pattern-piece rather than as a coin intended for actual currency". The specimen illustrated in Ruding [Supp. Pt. II, Pl. XVI, no. 16] was at one time in the collection of the late Rev. E. J. Shepherd, and from thence passed into the cabinet of the British Museum. Although the portcullis, as we have seen, seems to have been one of Henry's favourite badges, it is perhaps strange that it never appears as the mint-mark or type on any of his coins with the sole exception of this groat.

The "Perkin Warbeck Groat."

In Ruding's Supplemental Plate III, no. 33, is given the representation of a silver coin which is presumed to have been struck by the Duchess of Burgundy for Perkin Warbeck, when he set out to invade England in the year 1495 [4]. On what ground this appropriation has been made, Ruding was never able to discover. The coin bears date 1494, but no evidence whatever of the mint where it was struck, or the authority by which it was coined exists. The very singular legend on the reverse MANI TЄCKЄL PhARЄS×IXΘX may possibly have been intended as a prophetic threat to Henry; but this supposition is not warranted by any known record, nor is this coin mentioned by any historian of that period. The motto on the obverse is taken from the 20th Psalm, verse 19, and that on the reverse is the denunciation against Balshazzar, which was written upon the wall of the palace where he kept his impious feast (*See Daniel*, chap. V., ver. 25). The date appears to have been the chief, if not the only reason for the appropriation. Wise says, "*ejus [nempe Warbeck] gratia nummum sequentem in Burgundia cusum fuisse putant antiquarii, propter epocam inscriptani.*" (*Num. Bodleian. Cat.*, p. 241). If it were really struck by order of the Duchess of Burgundy, it might be expected that the rose would have been made more conspicuously prominent than it is upon the coin, bearing in mind the fact that she gave Perkin Warbeck the title of "the White Rose of England". The coin itself is of neat and yet peculiar work, the design and lettering are well formed.

WAS BEDEUTEN DIE MÜNZNAMEN, ‚PENNY, SHILLING UND GROAT'.

‚Penny' zählt in der englischen Sprache zu den ältesten Münznamen: diese Geldsorte war schon zur Zeit der angelsächsischen Könige Grossbritanniens im Umlaufe und ist vom Volke wegen ihrer Beliebtheit auf alle möglichen Münzen [1] fremder Völker übertragen worden.

Heute ist der Penny nur ein Kupferstück und beträgt den zwölften Teil eines Shillings oder 8.5 deutsche Pfennige; aber ursprünglich war er eine grössere Silbermünze. Auch hier trifft also die allgemein beobachtete Regel zu, dass ursprünglich gross, vollwichtig und in Edelmetall geprägte Münzen im Laufe der Zeit zu kleinen, minderwertigen Kupfermünzen herabsinken. Jedem Leser wird hier das Beispiel des römischen Asses vor Augen stehn, der anfangs pfundschwer ausgemünzt in der Kaiserzeit nur noch den sechzehnten Teil seines ersten Gewichtes betrug (20 gramm statt 320 gramm).

Das Wort ‚penny' hat mit dem niederdeutschen ‚penning' und dem hochdeutschen ‚Pfennig' denselben Wortstamm und verbreitete sich von der Küste Grossbritanniens durch den Handel nach der Küste Norddeutschlands und von dort weiter stromaufwärts bis zum mittleren Rhein-, Elbe- und Oderlaufe.

Über die Etymologie des Münznamens ‚Pfennig', der mit den Namen ‚Penning' im Niederdeutschen und ‚Penny' im Englischen identisch ist, sind verschiedene, zum Teil ganz törichte Erklärungen versucht worden.

So hat man ‚Pfennig' mit ‚Pfand' zusammengestellt und als Pfänding' d. h. Pfandmünze, die man beim Betreten eines verbotenen fremden Grundstückes oder Ackers dem Eigentümer als Schadenersatz zahlen musste, zu erklären versucht. Während diese Wortableitung der Lautentwickelung nach möglich wäre:

4. § 1. *Historical and Numismatic Summary.*

1. Ich erinnere hier nur an die Münzbezeichnung ‚*Tributpenny*', d. h. eine Denar des Kaisers Tiberius, eine Münze, von der man annahm, dass die Pharisäer sie Christo, um ihn zu versuchen, vorlegten, vgl. Ev. Marc. XII, 14-17.

‚pfänding' zu ‚pfenning' zu ‚pfennig' —, ist sie sachlich völligs unhaltbar, da ja bei Pfändungen dem Gepfändeten vom Eigentümer auch grössere Geldsummen abgefordert werden konnten.

Auch die heute überall gangbare Erklärung ‚Pfennig' komme von Pfanne, weil die ältesten Pfennige pfannenförmig als Hohlmünzen einseitiger Prägung geschlagen waren, ist schon deshalb zurückzuweisen, weil man die Münznamen Pfennig und Penny nicht von einander trennen darf und die obige Ableitung auf den Namen Penny nicht passt.

‚*Penny*' erkläre ich aus dem keltischen Worte ‚pen' welches ‚Kopf' bedeutet : es war dies also eine ‚*Kopf*'-*Münze*, deren eine Seite den Kopf des Herrschers aufwies.

War es doch ganz natürlich und seit den ältesten Zeiten üblich, dass jeder König oder Fürst dem in seinem Lande cursierenden Gelde auch sein Bildnis aufprägte. Ganz abgesehen davon, dass diese Sitte schon bei der Persern, Griechen und Römern von Anfang an geherrscht hatte, finden wir sie bei den Münzen der alten Britannier wieder, indem auch diese keltischen Barbaren den von struppigem Haar umwallten Königskopf auf ihren rohen Geldstücken zur Abbildung brachten. Als darauf die deutschen Einwanderer, die Angeln und Sachsen, den Namen 'Penny' (d. h. Kopfstück) als Bezeichnung des damals cursierenden Geldes vorfanden, übernahmen sie dies Wort auch zur Benennung ihrer Münze. In ähnlicher Weise sind ja auch die keltischen Gebirgsnamen in andere Sprachen eingedrungen, so : bedeutet der Name ‚Alpen' Schneehäupter und ‚Apennin' Gebirge.

Umgekehrt steht es mit dem Namen ‚*Shilling*' (deutsch ‚Schilling, polnisch ‚szelag'). Während das Wort Pfennig aus England zu den Deutschen eingeführt wurde, ist das Wort Schilling aus Deutschland in Grossbritannien eingedrungen. Diese Geldart erfreute sich offenbar grosser Beliebtheit, da sie auch von den Polen adoptiert wurde. — Der Wert des Schillings ist heute, in den verschiedenen Ländern sehr verschieden und schwankt zwischen einer deutschen Reichsmark und fünf Kupferpfennigen. Auch hier gibt es mehrere Namenserklärungen : Die einen bringen Schilling mit ‚schallen' zusammen und bezeichnen ihn als ‚schallende' oder klingende Münze, die beim Aufwerfen auf die Tischplatte einein hellen Klang von sich gibt.

Diese Etymologie hat man vielleicht mit Rücksicht auf die polnische Wortform ‚szelag', gesprochen ‚Schellong', welche an das deutsche Wort ‚Schelle' erinnert, aufgestellt. — Die zweite Ableitung : Schilling als Verdrehung oder Corrumpierung aus lateinischem ‚solidus' d. h. Dickmünze im Gegensafze zu den Blechmünzen oder Brakteaten aufzufassen, entspricht zwar dem Aussehn dieser Münze, ist jedoch sprachlich undenkbar. Dagegen kommt meine Wortableitung : Schilling von ‚*Schild*' d. h. = Schildmünze, welche den Wappenschild des Herrschers anstatt des Kopfes, wie beim Penny oder Pfennig, aufwies, beiden Bedingungen nach, sowohl der sprachlichen, indem sich Schilling leicht aus ‚schilding' verändern konnte, als auch der sachlichen, indem der Schilling den Gegensatz zum Penny oder Pfennig bildete. Die polnische Wortendung — ong erklärt sich aus der älteren Nebenform Schillung.

Der Münzname ‚*Groat*', in niederdeutscher Form ‚groot', in hochdeutscher ‚Grosch' oder Groschen, im Polnischen ‚grosz' ist von den Sprachgelehrten richtig als vom lateinischen Adjectiv ‚grossus' (=*dick*) abstammend erklärt worden. Die Groschenprägung stellte eben den Gegensatz zu den unpraktischen und zerbrechlichen Brakteaten oder Blechmünzen dar.

REVIEWS.

Aspects of Death in Art. By F. Parkes Weber, M.A., M.D., Fellow of the Society of Antiquaries and of the Royal Numismatic Society. With 58 Figures. 8vo, cloth. Price : 5/. net.

All the world knows Holbein's famous "Images of Death", popularly called the "Dance of Death". In these wonderful designs all the luminous genius of the great artist is displayed. Among them all two only depict Death as a figure of violence ; for the rest, the grim skeleton wears no cruel smile. He is kind to the aged and the poor ; his bony hand is raised in benediction over the aged woman ; he lends his fleshless shoulder for the bent patriarch to lean upon. Death speeds the toilworn labourer's heavy plough ; He precedes the priest, as Server, in his last errand of mercy, a tiny hour-glass under his arm, and sounds the bell which announces his mission while he carries in his right hand a lamp, the Light of death.

The perusal of Dr Weber's most interesting volume reminded me of Holbein's classical composition, as it brings before one's mind all the various aspects of death and the mental attitudes towards the idea of death, illustrated by works of art, and especially by coins, medals, engraved gems, finger-rings, jewels, etc.

Le premier moment de la vie
Est le premier pas vers la mort

wrote J.-B. Rousseau, translating Manilius' line, "Nascentes morimur, finisque ab origine pendet", an old English version of which, "As soon as wee to bee begunne, We did beginne to be undonne" occurs on a curious seventeenth-century medalet in Dr Weber's collection, which medalet first aroused the author's interest in the subject.

"Memento mori" devices were very popular in the fifteenth, sixteenth and seventeenth centuries, which may be attributed to the prevalence of greater mortality from epidemic diseases, intermittent wars, etc., and also to the development of the faculty of thinking and knowledge of ethics.

But the Ancients already viewed Death in its various aspects and deemed the problem of Life and Death no unworthy subject for their consideration. Their literature and monuments give us an insight into their different schools of thought, and while some regard death as the final annihilator of everything, others welcome it as the threshold of a future existence, for which the present life is but a preparation.

Ut mortuus viverem — vivo hic moriturus [1].

Through the religion of Israel the nations attained to the pure idea of monotheism and of a universal God, the father of the human family, and the embodiment of justice and mercy. No other religion made such a contribution to human thought ; and the Jews hold as unique a position in religion as the Greeks do in the sphere of intellect.

Christianity infused a new hope in the thought of Death. Solomon had said : "Man goeth to his long home, and the mourners go about the street... then shall the dust return to the earth as it was, and the spirit unto God who gave it", but the apostle Paul triumphantly exclaims that to him who has faith "Death is swallowed up in victory" and comforts the faithful by telling them "that the sufferings of this little while are not worthy to be compared with the glory which is to be revealed", thus exhorting them to live in this world in view of the future life and its promised rewards, and to endeavour to attain, beyond what is real and tangible, an ideal or a transcendent reality, conceived as the principle and goal of a moral life.

Dr Weber opens his book with a very clever introduction of a subject in which he is so thoroughly at home. Chapter II he divides into eighteen headings, which take up all the aspects of death, from the standpoint of faith, or as the end of pain and misery, as a punishment, vengeance or atonement, emblem of war, symbol of distinction and ruin, leveller of mankind, etc., and also the many attitudes of mind towards the idea of death, scientific investigation, and so forth.

The concluding part of the volume gives the description of coins, medals, tokens, gems, etc. and other objects of minor art which refer to death in one or another aspect. It is surprising how many of these mementoes Dr Weber has been able to gather together, from early Greek coins of Selinus, dating from about 466-415 B.C. and commemorating the freeing of the place from a pestilence by the drainage of the neighbouring marshlands, — the Roman denarius referring to the murder of Julius Caesar, B.C. 44, — etc., to the Medal awarded in 1894 for help in sanitary and medical work during the epidemic of bubonic plague at Hong Kong.

Notwithstanding the completeness of the author's Catalogue, many other specimens of medallic works of the same character might be added to the list One before me (*illustrated*), belonging to

the late Dr P. C. Stroehlin's Collection (Sale Catalogue III, lot 282), is the work of the Zurich medallist J. H. Gessner (1677-1737) and has reference to the dividing of the estate of the Rahn family. On this medal, Death is represented as a reaper cutting down flowers in a field.

Another Swiss medallist, F. Fechter of Basle (1629-1653) is the author of a series of "Moralische Pfennige", described by Dr Weber (pp. 92-94), with the curious inscription HEUT RODT MORN DODT and the type of a skull and crossed bones.

On p. 90 Dr Weber reproduces an interesting memorial badge of Anna Cathrina, daughter of King Christian IV of Denmark, which in vol. III of my "Biographical Dictionary of Medallists", p. 542 I had erroneously attributed to Queen Elizabeth of Bohemia.

In an additional note (p. 152) we find some further interesting information on Charon's money, — which is already dealt with on p. 132 — showing that the coin or coin-like object placed in the mouth of a corpse was intended to serve as an amulet to prevent an evil spirit from entering, or the soul of the decesased from re-entering, the dead body.

Dr Weber's book deals with thoughts and feelings as to death expressed in works of the glyptic art and is therefore of deep human interest.

The illustrations are an admirable feature of its pages, and bring home to the reader the conditions described more clearly than any amount of description.

L. F.

THE NEW COINAGE

(From the *London Gazette*.)

By the King.

A PROCLAMATION.

Determining New Designs for Gold and Bronze Coins.

GEORGE R.I.

Whereas under section eleven of the Coinage Act, 1870. We have power, with the advice of our Privy Council, from time to time by proclamation to determine the design for any coin:

And whereas it appears to Us desirable to determine new designs for the gold and bronze coins mentioned in the First Schedule to the Coinage Act, 1870:

We, therefore, in pursuance of the said enactment, and of all other powers enabling Us in that behalf, do hereby, by and with the advice of our Privy Council, proclaim, direct, and ordain as follows:—

1. The designs for the said gold and bronze coins shall be as follows: —

GOLD COINS

(1) *Five-Pound Piece.* — Every five pound piece shall have for the obverse impression Our effigy with the inscription "GEORGIUS V DEI GRA: BRITT: OMN: REX FID: DEF: IND; IMP:" and for the reverse the image of Saint George armed, sitting on horseback, attacking the dragon with a sword, and a broken spear upon the ground, and the date of the year, with a graining upon the edge.

(2) *Two-Pound Piece.* — Every two-pound piece shall have the same obverse and reverse impression and inscription in all respects as the five-pound piece, with a graining upon the edge.

(3) *Sovereign.* — Every sovereign shall have for the obverse impression the aforesaid effigy with the inscription "GEORGIUS V D.G. BRITT: OMN: REX F.D. IND: IMP:" and for the reverse the same impression in all respects as the five-pound piece, with a graining upon the edge.

(4) *Half-Sovereign.* — Every half-sovereign shall have the same obverse and reverse impression and inscription in all respects as the sovereign, with a graining upon the edge.

BRONZE COINS.

(1) *Penny.* — Every penny shall have for the obverse impression Our effigy with the inscription "GEORGIUS V DEI GRA: BRITT: OMN: REX: FID: DEF: IND: IMP:" and for the reverse impression the figure of Britannia seated on a rock surrounded by the sea, her right hand holding a shield which rests against the rock while in her left and she grasps a trident, and the inscription "ONE PENNY", with the date of the year and a plain edge.

(2) *Half-penny.* — Every half-penny shall have the same obverse impression and inscription as the penny, and for the reverse the figure of Britannia seated as described for the penny, and the inscription "HALF-PENNY", with the date of the year and a plain edge.

(3) *Farthing.* — Every farthing shall have the same obverse impression and inscription as the penny, and for the reverse the figure of Britannia seated as described for the penny, and the inscription "FARTHING" with the date of the year and plain edge.

2. This Proclamation shall come into force on the first day of January, one thousand nine hundred and eleven.

Given at Our Court at *Buckingham Palace*, this twenty-eighth day of November in the year of our Lord one thousand nine hundred and ten, and in the First year of Our Reign.

GOD save the KING.

The above Proclamation was read on the steps of the Royal Exchange Nov. 29 by Lieutenant-Colonel Kearns, the Common Crier and Serjeant-at-Arms of the City of London.

CORRESPONDENCE

THE NEW COINAGE

(*Vide n° 215 Num. Circ. col. 12364*).

Washington, D.C., U. S. A. 27 Oct. 1910.

Dear Messrs. Spink,

Permit me to offer a protest to the tone and manner of a correspondent in your present number under the head of "The New Coinage". This gentleman would apparently deny Wales the right to appear by an emblem on the new coinage, contrasting her claim with a supposed claim of the Isle of Man! It seems to me that His Gracious Majesty George V cannot better inaugurate his reign, which let us hope will be as long as that of the third of that name or of his saintly grandmother, than by granting to the ancient principality a right which has too long been denied her. When Scotland and even Ireland are represented, it is high time that so integral a part of Great Britain should appear by an emblem on the British coinage as the fair land of Cambria, which was a part of the British crown long ere Scotland was united and Ireland was more than a colony of the worst repute. If the leek is not picturesque enough for an emblem, the Welsh harp, the druidical holly, or an oak leaf might appear as a symbol of a people who were in Britain when the English were still wandering in the forests of Scandinavia and Germany.

Arddyr H. C. ap Rychard of Monmouth.

OBITUARY

W. J. MACDONNELL, F.R.A.S.

We much regret to hear from our Correspondent in Australia of the death of the above named.

He further writes: — "The deceased gentleman was an ardent and generous collector of Greek Coins; Greek numismatics being a very favourite study of his. His loss will be greatly felt, as his knowledge was always at the service of those who wished to consult him on the subject".

NUMISMATIC SOCIETIES, MUSEUMS, &c.

BRITISH NUMISMATIC

Oct. 26. — Mr. Carlyon-Britton, President, in the chair. — The Duke of Devonshire, Capt. Walton Mellor, and Messrs. E. K. Burstal, Leonard Collinson, and C. M. Fox were elected Members.

A remarkable hoard of coins of the reign of Stephen was exhibited by the courtesy of the Duke of Devonshire. In the course of a descriptive address Mr. W. J. Andrew remarked that the find as submitted was complete, and comprised 95 silver pennies and 7 halfpennies, representing the only currency known in England in Norman times, the halfpennies being then merely pennies cut into halves along the lines of the cross on the reverse design, and so issued from the mints. The hoard was found in 1867 within the precincts of the foundations of the old Hall at Sheldon, near Bakewell, Derbyshire, and was enclosed within a leaden vessel. With the coins at Chatsworth were some fragments of stained glass which were labelled as found with them, but they were probably mixed with the excavated soil, for Mr. Andrew had Dr. Nelson's authority for dating the glass *circa* A.D. 1400. These fragments, coupled with certain existing foundations, led the lecturer to think they possibly indicated the site of the original chapel at Sheldon, the predecessor of the fifteenth-century building which stood on the adjoining road. The family De Sheldon was of local importance in the twelfth century, and its representative in Stephen's time, as holder of considerable lands within the Peak and its borders, would follow the banner of William Peverel of Nottingham, custodian of the Peak. As an esquire of his household, De Sheldon would be present with his lord at the defeat of David of Scotland at the battle of the Standard in 1138, at Nottingham in 1139 during Peverel's rebellion against the King, with him when he fought at Stephen's side at the battle of Lincoln in 1141, again at Nottingham when the town was lost and regained, to return home in 1142 at the close of Peverel's military operations.

The treasure was exactly what De Sheldon might be expected to have gleaned under those conditions: it included Scottish money of King David; the bulk of it was collected at Nottingham and Lincoln; and it was certainly buried in 1142. To Peverel's rebellion of 1139 Mr. Andrew attributed a series of coins of the Nottingham mint, plentifully represented in the hoard, which were struck from dies from which Stephen's name had been carefully erased. The troubles at Lincoln were suggested by several varieties new to numismatists. A coin of this mint bearing the obverse legend + PERERICM was further evidence of his attribution of this inscription to the Empress Matilda as an imitation of her title IMPERATRIX, the M being now for the first time supplied. To Alexander, Bishop of Lincoln, he ascribed the issue of the whole series of Hawkins type 630. This was present, and also a coin from its obverse die, but furnishing a new reverse design, composed of a fleured compartment upon a long engrailed cross. As money of necessity issued by Peverel at Nottingham during Stephen's captivity in 1141, he classed the type on which a cross Calvary, probably Peverel's badge, was stamped over the King's bust, and of which the hoard contained a dozen examples. Now a fresh variety of it was added, upon which the cross was stamped over the sceptre; and another bore it in a still more pronounced heraldic form. He contended that Hugh Bigod had similarly emphasized his authority in East Anglia by impressing his "cross gules" upon the money of Norwich and Thetford in the form of a large cross extending from edge to edge of the coin, over the entire bust of the King; but a Thetford example only of this money was found at Sheldon. The Abbot of Peterborough's corresponding issue at Stamford was represented by a specimen of the variety on which the sceptre was converted into a cross; and an example issued by the Archbishop of York was new, in that the Annulet, or ring of St. Peter, was added to the head of the sceptre. These coins, with others not there represented, clearly indicated a general resort by the chief potentates of the land to the issue of money of necessity, which should at least circulate under their local authority, at a period when there seemed little likelihood of a return to any regal administration.

The actual date of the deposit of the treasure was deduced from the interesting fact that although no specimen of Stephen's second coinage, namely Hawkins 269, was present in its entirety, its reverse was in evidence on four "mules." Mr. Andrew believed that, for fiscal reasons, on a general recoinage the reverse dies were first prepared and delivered to the moneyers, with permission to use them in combination with the old obverse dies until those for the new obverse design were ready, and thus "mules" resulted during the first months only of a new type. There were many reasons for assuming that Stephen's second coinage was issued soon after his release in November, 1141, and therefore it was evident that the Sheldon hoard was deposited early in 1142. Two of these "mules" were of exceptional interest, and new to numismatists, for their obverse bore a crowned bust, facing, with star to right and sceptre to left, held over the shoulder as on Henry II.'s money, the inscription being + ROBETVS. These, coupled with certain coins bearing the same legend, but on both obverse and reverse otherwise resembling Stephen's second coinage, previously attributed hy him to Robert of Gloucester, led the lecturer to place a new construction on the release of a king in exchange for that of an earl — Robert of Gloucester — without any other conditions, on the restoration of Stephen in November, 1141, namely, that Matilda did not abandon her claim to the throne directly in favour of her son Prince Henry, but that from November, 1141, for an appreciable period at least, if not until his death, Earl Robert became Stephen's real rival for the crown. Other varieties in the hoard exhibited Stephen's first type (Hawkins, 270), with his head to the left instead of to the right, or "muled" with Scottish reverses. The very remarkable character of the find as a whole may be gathered from the fact that nearly one-half of the coins represented either money of necessity or currency issued by other than the regal authority.

Mr. S. M. Spink exhibited a tray of Stephen's money which included examples illustrative of several of the autonomous coinages described above; Mr. E. K. Burstal, a penny of the Thetford mint bearing Hugh Bigod's cross; and Mr. Oswald Fitch examples of Stephen's first two types.

Mr. H. Symonds showed a rare variety of Æ3 of Allectus, found at Dorchester in 1898, with reverse legend VIRTVS AVG; and Mr. S. H. Hamer contributed some notes on the half-crowns issued as tokens by the Overseers of Birmingham in 1788, exhibiting examples of all the known varieties.

ROYAL NUMISMATIC.

Nov. 17th. — Sir Henry H. Howorth K.C.I.E., President, in the chair. Mr. E. J. Jekyll J.P.D.L. and the Rev. A. Laughlin were elected Fellows of the Society while Messrs. F. T. Barnett, B.C. Chetty, J. E. Cree, W. Gunn, D.F. Howorth and T. Nesmith were proposed.

Mr. T. Bliss exhibited seven shillings of Charles I of Aberystwith (mm. book), Bristol (mm. Br.), Exeter (mm. rose), Worcester (mm. pear with pellets), York (mm. lion). Mr. L. A. Lawrence showed two forgeries of the 'mace' type of Stephen reading OSWEF.ON.LVND and OSWEF.ON.NORHA. struck on a short-cross and an Edward penny respectively. Rev. E. Rogers showed a fine series of Jewish coins including four shekels and two

Original from CORNELL UNIVERSITY

half-shekels of Simon Maccabaeus, a specimen of the newly discovered large bronze coins of the second revolt reading 'Jerusalem' instead of Simon, a bronze coin of Eleazar, denarii of Trajan restruck by the Jews and a coin of Antiochus VII struck at Jerusalem with reverse type lily. Mr. E. Shepherd exhibited three specimens of bronze coins of Boeotia restruck on coins of Antigonus I and two base gold Kidāra Kushan coins reading *Srī Shāhi* while Mr. F. A. Walters F.S.A. brought a large Brass of Otho struck at Alexandria with reverse bust of Nike, unpublished, if not unique.

Mr. G.C. Brooke read a paper on the coin-types of Aethelred II in criticism of the paper by Mr. H.A. Parsons read at the last meeting on the same subject. Mr. Parsons had proposed a sequence of types B.C.E.D.A. as preferable to that of Hildebrand A.B.C.D.E. Mr. Brooke pointed out that he quite misunderstood Hildebrand in thinking this was his arrangement; what Hildebrand actually suggested was A.B.C.D.E. with A issued throughout the reign which was quite a different thing. Mr. Parsons' arguments were thus invalidated from the beginning. Proceeding to discuss Mr. Parsons' arguments in support of his arrangement in detail, Mr. Brooke showed that as his table showing the transition from MO to ON based on the Stockholm collection did not agree with a similar table based on the British Museum collection, which by the way supported Hildebrand's arrangement, it could not be relied on. Criticising the evidence of 'finds' Mr. Brooke said it was illegitimate to argue from them unless one knew their exact constituents. Mr. Parsons had also mistaken Hildebrand's meaning occasionally on this. The evidence of mule coins was in favour of Hildebrand, as his type A was the most frequently combined in the other types. Mr. Parsons' evidence from moneyers' names was useless as it was based on the erroneous assumption that Hildebrand's arrangement was A.B.C.D.E. The latter portion of the paper depended on the correctness of the first. It was impossible to suppose that Aethelred's types were influenced by Dunstan as he had retired in disgust at the murder of Edward. *'Crux'* could not mean trouble. The Agnus Dei pieces were certainly coins.

Mr. Garside said that the latter pieces might be, at least, commemorative coins. Mr. Lawrence agreed with Mr. Brooke that no serious objections to Hildebrand's arangement had been brought forward. The President pointed out that the issues were complicated by the large sums of money struck as tribute. Mr. Parsons regretted that owing to his limited knowledge of Swedish he had misunderstood some of Hildebrand's points, but these did not seriously invalidate his arguments. Against type A being issued throughout the reign he said that it was not muled with B and was absent from some hoards. It did not always have the earliest form of MO and had the later ON. Mr. Brooke was not justified in arguing from Domesday Book regarding the procedure in Aethelred's reign. Dunstan must have influenced the coin-types even in his retirement. *'Crux'* even in Roman times meant trouble &c. He held it lay with his opponent to disprove that the Agnus Dei pieces were medals rather than for him to prove it.

The Rev. Edgar Rogers read a short paper on the 'Coin-Types' of the Jewish Shekels. The traditional interpretation of the obverse type as the pot of manna and the reverse as Aaron's rod that budded were unsatisfactory. He proposed to interpret these types in the light of certain passages describing Simon The High Priest the Son of Osias, from the book of Ecclesiasticus, which was composed about the time of Simon Maccabaeus. The obverse type would then be the "vessel of beaten gold" from which the High Priest poured out the wine, and the reverse some spring flower, probably a lily, possibly referring to the meaning of the name Simon. Sir Henry Howorth and Mr. Allan also spoke.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

THE END.

VARIA

M. Dattari, numismate au Caire, a fait don au musée de Bruxelles d'une collection comprenant cinq mille bronzes allant de Dioclétien à Constantin et à ses successeurs; la plupart de ces pièces, où voisinent de nombreuses variétés de types, sont parfaitement conservées.

THE SCANDINAVIAN CURRENCY.

M. Ström, the director of the Danish National Bank, has declared in an interview against the agitation which has arisen in Swedish circles for the alteration of the present money system in the Scandinavian States from crowns to francs, and stated that if the system should be altered it would be much better to take the English or German system, with which the States carry on much more trade, than the franc system. M. Ström states that other Danish financial authorities are of the same opinion.

(*Morning Post.*)

ADVERTISEMENTS

JUST ISSUED.

Aspects of Death in Art. By F. Parkes Weber, M. A., M.D., Fellow of the Society of Antiquaries and of the Royal Numismatic Society. With 58 Figures. 8vo, cloth.

The book is intended to be an essay, not on the iconography of death, but on the mental attitudes towards the idea of death, and the various ways in which the idea of death has, or may be supposed to have, affected the living individual — his mental and physical state, and especially the direction and force of his action, — as illustrated by minor works of art, especially medals, engraved gems, jewels, etc. The book is divided into four parts. The first is meant to serve as an introduction to the whole subject. The second is an arrangement and analysis of the various possible aspects of death and the mental attitudes towards the idea of death, intended to show the headings under which the illustrative works of art may be grouped. The third deals with the medals and coins, and in the fourth the engraved gems, finger-rings, jewels, etc., bearing on the subject, are described.

Price Five Shillings Net.

Postage extra.

Supplied by Messrs. Spink and Son Ltd.

[Published by G. Fisher Unwin. LONDON].

SHORTLY READY

THE

MODERN COPPER COINS

(17th to 19th centuries)

OF THE

MUHAMMADANS

BY W. H. VALENTINE.

This work, which is in the press, is designed to popularise the study of Muhammadan copper coins, and is the outcome of a student's endeavour to identify and arrange them. To this end the author has made faithful drawings of all the specimens of this class of coin that he has been able to find. Commencing with Turkey, the reader is taken numismatically through Egypt, Tripoli, Tunis, Algiers, and Morocco, to Nigeria (for which place the Royal Mint has recently struck a new coinage) and from thence back to East Africa and Arabia. Crossing to Europe, the tour continues throught the Crimea, Georgia, Persia, Afghanistan, Bukhara, and terminates in Chinese Turkistan.

Upwards of 900 coins struck during the last three centuries are illustrated, and the Arabic inscriptions carefully transliterated and explained. To assist in the classification of the coins, a geographical arrangement has been adopted, and six coloured maps have been added to enable the reader to locate the various mints.

The interesting field covered by this work has never as yet been dealt with, possibly on account of the great expense involved. It has been suggested that this may be lessened by using the line block process, and printing the major portion in manuscript form. The author hopes that sufficient promises of support will be received to enable the book to be published at a price not exceeding 10/6 a copy, and he trusts that numismatists generally will give the project a hearty support.

Illustrated specimen-page with Order-form, on application to Spink and Son, Ltd.

COMMON GREEK COINS

BY THE REV. A. W. HANDS

8vo. — 170 pp. — Illustrated. **Price : 5/- nett.**

"It must not be thought that "Common Greek Coins" is merely a catalogue of ancient Greek money, for it is far more than this. The describing of the coins is utilised to give a cleverly condensed, but most interesting, account of Greek history and mythology, commerce and progress in civilisation. The colonies and conquests of the Hellenes, their foolish feuds and transient friendships all come under survey and comment, and the usually erudite style of Greek numismatists is transformed into a brilliant and most readable essay upon the ancient Greek world. This first volume is provided with a useful index and catalogues of the monograms, initials, symbols, and various mint marks are duly set forth to the various chapters, assisted by numerous engravings of all the more important types."

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 12489.*)

*
* *

ERRATUM.

In the second line of the chapter on the Demarateion on p. 12484 in the January number of the Circular the following sentence was accidentally omitted. — "The name of Demarete, "the wife of Gelon, is derived from δημος and ἀρετη ". Insert this after the word "people ".

*
* *

GELA.

The Rhodian Greek colony called Gela was founded in 688 B.C., on the south coast of Sicily, near the borders of the Sicels and Sicanians.

The site is found about twenty miles to the west of Camarina, and fifty east of Agrigentum, on a low hill between the sea and a rich plain watered by the river from which the city received its name. The Sicels are said to have called the river Gelas from the coldness of its waters, and the connection of the Sicel folk with Italy is brought to mind by a word evidently the same as a Latin word for cold water "gelida". Horace in his second Book of Satires sings "Poscit te mulier, vexat, foribusque repulsum perfundit gelida, rursus vocat" (VII, 90). All the derivations of words suggested by ancient writers must be regarded with reserve as many of them are shewn to be merely the ideas of men unversed in the science of philology, In regard to this name Gela very many Greek names begin with the letters γελ, and this root is expressixe of "laughter" and "light" more often than of "cold".

In like manner we cannot tell what the name of Gelon the famous military leader born in Gela meant, for we know not whether his name has reference to his birth-place or to the ideas of laughter or brightness and whether his name was a Greek form of Isaac or of Albert. In the *Studien zu des Griechischen Stichnamen*, von Dr Lor. Grasberger (1888), p. 176.

"Likewise the words Γαληφός, Γαλάτης, Γέλα indicate the meaning of rock, of light white rocks."

The first settlers called the site Lindivi after their old Rhodian home, but as the city grew, and included many Sicels, the native name of the river prevailed and the Rhodian name was applied only to the citadel or acropolis. The site is now visited from the modern city Terranova which has arisen near by. The remains of a Doric temple are still to be seen.

The city of Gela is often associated with two men of renown, Gelon the conqueror of Syracuse who was born there, and Æschylus the great poet who died there. Suidas relates that Æschylus visited Sicily as early as 499 B.C. In the year 468 B.C. he quitted Athens, and came to the court of Hiero (Pausanias, I, 2 § 3). After this visit to Hiero the poet returned to Athens, but in 457 B.C. again visited Sicily, and this time came to reside and die at Gela, only one year after his arrival, in the 69th year of his age.

Athenaeus says "Æschylus, though a man who had acquired such great renown by his poetry, nevertheless preferred having his valour recorded on his tomb, and composed an inscription for it, of which the following lines are part. — The grove of Marathon and the longhaired Medes who felt his courage well may speak of it." The tomb with this inscription was erected in honour of the poet by the men of Gela.

The manner of his death is recorded by Suidas under the word χηλωνημυῶν.

When we turn to the ancient Greek writers to learn what they said of Gela we find that Thucydides (VI, 4) thus relates its foundation, "Gela was founded by Antiphemus from Rhodes and Entimus from Crete, who led a common colony in the forty-fifth year after the founding of Syracuse (688 B.C.). The name of the city was taken from the river Gelas, but the spot (χωρίον) where the city now stands and which was first fortified is named Lindii; The laws given to them were Dorian."

Herodotus (VII, 153) tells us the legend of an ancestor of Gelon who was one of the first colonists.

"An ancestor of this Gelon, who was a settler of Gela, came from the island of Telus which lies off Triopium. When Gela was founded by the Lindians from Rhodes, and by Antiphemus, he was not left behind, and in course of time his descendants becoming hierophants of the infernal deities (Demeter, Persephone) continued to be so, Telinus one of their ancestors having acquired that dignity in the following manner. Some of the inhabitants of Gela, being worsted in a sedition, had fled to Maetorium, a city situated above Gela. These men then Telinus conducted back again without the assistance of any human force... He brought them back on condition that his descendants should be priests of the deities."

Another legend of these early days is given by Pausanias (VIII, XLVI).

"Antiphemus who built Gela having plundered Omphace, a small city of the Sicanians, took away with him to Gela a statue (ἀγαλμα) made by Daedalus." We may note that the priesthood of Demeter and Persephone seems to have been connected with the highest office of state, for Gelon transplanted the cult to Syracuse, and built there a temple for it out of the Punic spoils. Hieron also succeeded him in the priesthood.

Diodorus Siculus (VIII, *Exerpt Vatican*, p. 11) gives details as to the oracle which encouraged the foundation of the city. "Antiphemus and Entimus, the founders of Gela, consulted the Pythian oracle who gave them the following response. "Etimus and you ye warlike sons of famous Crete, who have both come to dwell in the land of Sicily, build there a city which shall be both Cretan, and Rhodian, at the mouth of Gela, and give to it the sacred name of that river."

Virgil mentions the city as one of those passed by Æneas on his voyage along the coast (*Æn.* III, 702). "At a distance appears Camarina by fate forbidden to be ever removed; the Geloian plains and huge Gela called by the name of the river."

Immanisque Gela pluvii cognomine dicta.

Silius Italicus (XIV, 220) mentions the same derivation of the name "Venit ab amne trahens nomen Gela".

About the year 505 Cleander, despot of Gela, began to raise his city to ascendancy over the other Sicilian Greeks, who had hitherto been if not at all equal, at least all independent.

His powerful mercenary force, levied in part among the Sicel tribes (Polyaenus, V, 6) did not preserve him from the sword of a Geloan citizen.

Herodotus says (VII, 144) "On the death of Cleander son of Pantares who reigned seven years over Gela, but was killed by Sabyllus a citizen of Gela, Hippocrates who was brother to Cleander succeeded to the sovereignty (μουναρχίην).

"While Hippocrates held the tyranny, Gelon who was a descendant of Telinus the priest, was with many others and with Ænesidemus, son of Pataicus, one of the body guards (δορυφόρος) of Hippocrates, and soon after was made commander of the whole cavalry on account of his valour. For when Hippocrates besieged the Callipolitæ and the Naxians, the Zancleans and the Leontines, and besides the Syracusans and divers of the barbarians, Gelon signalized himself in these wars and of these cities mentioned, and not one except Syracuse escaped servitude at the hands of Hippocrates.

"But the Corinthians and Corcyræans saved the Syracusans after they had been defeated on the river Elorus, having reconciled them on condition that they should give up Camarina to Hippocrates, that city having originally belonged to the Syracusans. When Hippocrates having reigned seven years met with his death (in 491) before Hybla, while carrying on the war against the Sicilians, Gelon under colour of defending the rights of Euclides and Cleander, the sons of Hippocrates, the citizens refusing to be under them, — in fact when he had defeated the Geloans in battle possessed himself of the sovereignty, and deposed the sons of Hippocrates."

Gelon then in 485 B.C. went to Syracuse, and Herodotus adds "when he had made himself master of Syracuse he took less account of the government of Gela, and entrusted it to his brother Hiero." Later he made half the citizens of Gela remove to Syracuse.

The prosperity of Hiero must have been great, for in 488 B.C. three years after his brother left him at Gela he gained a victory at Olympus in a horse race. Pindar (Olymp 1) speaks of the "rich and happy home of Hiero, who wields the sceptre of justice in Sicily, abounding in flocks, practising the highest of all virtues." Poseidon is spoken of as the god he worshipped "The god who is your family guardian makes you, my Hiero, his special care, and has regard to your pursuits."

Gelon died in 478 B.C. and was succeeded at Syracuse by Hieron. Whether Hieron lived and ruled in Gela until his brother's death is difficult to decide.

In 480 B.C. he helped his brother to gain the great victory at Himera, and Gelon commemorated his help in the inscription at Delphi which recorded his triumph.

The battle on the banks of the Eloras is dated 492 B.C. in a note on p. 212 of *Rev. Macan's Herodotus*.

THE TYPE

The manner in which types symbolizing rivers are designed on many Sicilian coins is interesting and suggestive; we find what is commonly called the river-god chosen as the emblem for the river.

The word god is used in these cases to signify the power of nature revealed in the force of the stream, and the type can only be regarded as religious in the sense that the powers of nature were superhuman.

The rivers Gelas, Selinos, Crimesus, Amenanus, Achelous and the rest were symbolized by a bull, generally with a human head, because the bull was a type of force rushing blindly on as did the force of a mountain torrent, and this natural stream was what they desired to commemorate rather than a divine power to which they owed any worship.

The temples in these cities were dedicated to the great gods of the Hellenic world, and not to the god of the river. The artist chose the poetical fancy of the bull-form as something which he could express in the type.

This idea as a type of the rushing torrent was widely known and used; we find it at Sybaris in the middle of the sixth century B.C., and on the very early Æginetic drachms of Rhegium, issued before the mint of Gela was established. In these cases, and at Gela, the type was probably more simple in its meaning than it afterwards became when copied and adopted at Neapolis and Cumæ where the bull seems to have been associated with the cult of Dionysus. These types have been described in *Coins of Magna Graecia* (pp. 91, 252, 294, 298).

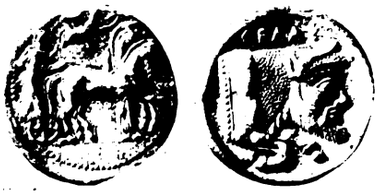
The weird strange figure of the manheaded bull on the coins of Gela reminds us of Virgil's epithet "imanisque Gela fluvii cognomine dicta" (*Æn.* III, 702), and the epithet suggests that the Latin poet may have seen and remembered this type.

COINS OF GELA BEFORE 480 B.C.

EUBOIC ATTIC STANDARD.

I. Tetradrachm[1]. Ideal weight 269·138 grains.

Obv. ΓΑ ΛΕ) inscribed in front and under the figure of the forepart of a man-headed bull, swimming to right. The bull's shoulder ends in a band of pearls varying in number from 7 to 12.



Some specimens show a plain band without pearls. The eye on the creature's face is formed in the usual archaic manner as on the coins of Naxos.

The hair on the bull's neck and in the beard is represented in stiff archaic lines.

Rev. Quadriga to right, driven by charioteer wearing long chiton, and holding reins and goad: the horses are walking; in the field above Nike flying to right crowns the horses: border of dots.

II. Similar to no 1 but the legend ΓΕΛΑΣ in field above the bull. The band on the bull's shoulder consists of a plain band and border of dots or a band of pearls in a sunken band.

The hair on the bull's neck is represented by closely packed dots and the hair on the beard is less stiff than in no 1.

Rev. Similar but the ἔμβολος or upright pin in the chariot pole or ῥυμός is represented. On some varieties the charioteer is bearded.

III. Similar type but legend ΓΕΛΑ above the bull. Shoulder band a row of pearls between plain bands, no hair marked on bull's neck. The hair on beard very coarsely represented in plaits or curls.

Rev. Beardless charioteer holding reins, dressed in long chiton, horses walking. Beyond the horses an Ionic column (μετα or νύσσα or καμπτήρ) rudely indicated.

We can only see that four horses are meant to be represented by the legs, the bodies and heads look as if only two horses were indicated.

IV. Didrachm. Ideal weight 134·57 grains, actual weights vary from 127-135 grains.

Obv. Similar to no 1. legend ΓΑΛΕ) in front of face.

Rev. Bearded man riding a prancing horse to right, wearing only

a conical helmet with long neck piece, his right hand holding dart aloft in act of throwing, his left hand holds the reins: no ground is represented. The horse is archaic in style, the head large and tail thin.

V. Query litra or obol. Weight 12.2 grains. Size ·5.

Obv. Legend $\frac{\Lambda\Xi)}{\Gamma\Lambda}$. Similar to no 1.

Rev. A horse walking to right, with the bridle hanging down in form of a crescent.

Above the horse a wreath in the field: border of dots, query of the period.

VI. Obol; weight 11·3. Ideal weight 11·11. Size ·35.

Obv. Similar to last. ΓΕΛΑ.

Rev. A wheel of four spokes. This is one of the few instances in the Sicilian coinage in which a type is used to distinguish the obol as at Syracuse, but the principle was not strictly observed in Gela. At Tarentum the earliest Litræ bore a cockle-shell on the obverse and a wheel with four spokes on the Reverse.

AN ANCIENT WEIGHT OF GELA.

On December 10th 1906 an ancient weight which, from its inscription, we know was made in Gela, was sold in Vienna at the sale held by the Brüder Egger. In the Sale Catalogue (p. 29, no 425) it was thus described.

"Gela circa 500 B.C. An ancient bronze weight in the form of a knuckle-bone with a handle. Inscription TONCEHOIONEMI, 42 × 81. Mm. 926.5 gr. Fine dark green Patina. A very interesting piece for a Cabinet, first class. Illustrated on Plate XII."

1. Tetradrachms of this early type may be obtained from 40/- upwards according to state of preservation.

Original from CORNELL UNIVERSITY

It was bought for the Court Museum, and Professor Kubitschek has since written an article on the subject.

The inscription when written in a more modern style of writing reads ΤΩΝ ΓΕΛΟΙΩΝ ΕΙΜΙ (I belong to the Geloians) or with σταθμος subaudita (A weight of the Geloians).

It is not however likely to have been used as a coin weight as the following comparison of weights will show.

On p. 83 of "Greechische Gewichte" by Dr Erick Pernice (Berlin 1894) is an account of a weight bearing in relief an astragal, and with the inscription $\frac{MT}{TA}$ which = στατ[ήρ] weighing 924.91 grammes.

This is so nearly the weight of the Gela weight 926.5 that there can be little doubt they were both staters or weights equivalent to double the Salonian Mina.

The weight in grammes is 926.5 or in grains 14298 or 14297.84. Now if the weight were connected with coinage it would equal 53 $\frac{1}{8}$ or 53.125 tetradrachms each weighing 269.138 grains.

The relation of the weight to the litra of 13.5 is equally unsatisfactory. The weight would contain 1058 or 1059 litra.

We might have expected the weight, if related to coinage, to equal 50 tetradrachms; it would then have weighed 13456 instead of 14598 grains.

If we divide the weight by 50 we should get 50 tetradrachms of 285.96 instead of 269.138 grains. The weights of the earliest coins in the British Museum are 267.7, 268.7, 265, 263.2, 267.5, 264.3, 259.1. These no doubt represent coins which were minted at about the ideal 269.138 grains.

The shape of the weight is unlike any of those which we know to have been used in weighing money. Many money-weights bear an inscription telling their value.

In the British Museum Bronze Room, in cases 41-42 we may see a good collection of ancient weights, both for commercial use and for weighing coins. One of these commercial weights found in Crete is square in plan and has a knuckle-bone on the square probably for use as a handle.

One fanciful weight with a ring handle is in the form of a pig. The coin weights are flat square plain pieces of lead, with the value inscribed thereon.

The ring in the Geloan knuckle bone cannot mean that it was used with a steel-yard, because that manner of weighing was not invented until about the 1st century B.C. by the Romans.

The actual weights in the great public Museums of Europe show considerable variations from the norm. Certain stamped devices distinguish the Attic weights, as for instance the astragalos or knuckle-bone, the amphora, the tortoise, the dolphin, and the crescent.

There are examples in the British Museum of a Mina with a dolphin, a half Mina with a tortoise, a weight of four drachmæ with an amphora, a quarter mina with half a tortoise, and a third of a Mina with half an amphora.

Thus we see that in Gela a commercial weight of 926.5 grammes was in use and was known by the symbol of the astragalos. As it was published in a list of coins some students of numismatics might have thought of it as a coin weight, and to save them the trouble involved in thus regarding it this note has been written.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-forty-ninth article.

(*Continued from col. 12501.*)

SCHWEGERLE, HANS (*Germ.*). Contemporary Sculptor and Medallist, residing at Munich. At the Brussels 'Salon de la Médaille' 1910, he exhibited the following works: K. E. Heintz; — Mme Paula Heintz; — Hans Prinzhorn; — Ernst Gloeckner, 1908; — Mme Schwegerle, 1908; — Hermann Schwegerle, 1908; — Eva Jonas, 1908; — Harro, Freiherr von Zeppelin, 1909; — Walpurgis; — Youth riding on Pegasos; — St. Peter; — Juggler; — Youth with owl; — Child's head, etc.

The Die-sinking works of Carl Poellath of Schrobenhausen have issued a number of this artist's works: Commemorative medal of the Regiment of Infantry No 102; — Landgerichtsrat Heintz; — Paula Heintz; — Ernst Gloeckner; — Prinzhorn; — Harro Zeppelin; — Eva Jonas; — Pegasus; — Walpurgisnacht; — V. M. K. "Gaucklertag", Munich; — Prize Medal of the 'Handwerkskammer' Augsburg; — Jubilee medal of the Royal Lyceum "Albertus Magnus" (2 sizes); — Silvia Kalm, of Ratisbon; — Christophorus, 1910, etc.

SCHWEIGER. The name of a distinguished family of Engravers of Basle, who for three generations in the sixteenth century were entrusted with the preparing of coin-dies for that city and neighbouring towns.

The first Die-sinker of that name was: —

SCHWEIGER, GEORG (IORG) (*Swiss*). Goldsmith of Basle; a native of Augsburg. The first mention of him at Basle dates from 1507. In a contemporary document dated 1533, he is named "Jorg Schweiger, goldtschmidt, burger zu Basel". In that year he entered into an agreement to cut coin-dies for Basle, Freiburg in Brisgau, Colmar, Breisach, and Thann, &c. The Batzen of 1533 are the first modern currency of the '*Rappenbund*', which was intended for wide circulation not only inside but also outside the Union. The Union was obliged to withdraw this coinage in 1536 in consequence of the opposition of king Ferdinand and other ruling Princes.

Dr Cahn suggests that the fine Basle Dicken of 1521 and 1522 are by Jorg Schweizer, whose death must have taken place some time previous to 1542.

Dicken of Basle, 1521.

Schweiger died *circ.* 1534. Ambrosius Holbein painted his portrait. He was also acquainted with Urs Graf, who gave him a drawing in 1523 (D. Burckhardt, *Schweiz. Künstler-Lexikon*, III, 96).

SCHWEIGER, HANS (*Swiss*). Son of the preceding, and also a clever Die-engraver, whose name first occurs in 1542. The five cities of the "Rappenbund" were granted in that year the right of issuing large silver currency, on the condition of their subscribing to the war fund against the Turks. In consequence Basle, Freiburg in B., Colmar, Breisach and Thann coined Thalers, Half Thalers and

Thaler of Basle, 1564.

subsidiary currency from 1542 to 1554 in fairly large quantity, the dies for which were cut by Hans Schweiger, who is responsible also for a very rare Pattern Half-Thaler of Basle, 1542, with a representation of L. Munatius Plancus, the founder of the city. Half Thalers and Zehner for Basle, Freiburg i. B., Colmar, and Breisach, which coinage was continued with slight variations in the types for some years. From 1566 Freiburg and Breisach were to place on their coins the effigy and titles of the reigning archduke

Ferdinand. The coins of 1564 show artistic superiority over those of 1542.

SCHWEIGER, SIEGMUND (*Swiss*). Son of Hans S., and his successor as Engraver to the Mint of Basle. We find him in office in 1579, and working for various Princes. In 1580 Archduke Ferdinand forbade the sale of silver and in 1554 erected a mint of his own at Ensisheim, in consequence of which the services of the Basle Engraver were no longer required except for autonomous currency. We hear nothing more of Siegmund S. after that date.

BIBLIOGRAPHY. — Dr Julius Cahn, *Die Baseler Stempelschneiderfamilie Schweiger im XVI. Jahrhundert*, 1808.

SCHWEIGER, ULRICH and his brothers, **CHRISTOPH, CLEMENS** and **GEORG** (*Germ.*). Goldsmiths, Seal-engravers, &c. at Augsburg, about 1550.

SCHWEIGGER, GEORG (*Germ.*). Sculptor, Gem-engraver and Medallist of Nuremberg, born 6. April 1613, died there 13. June 1690. He was a pupil of his father **EMMANUEL S.** and of Christian Ritter.

Bolzenthal mentions as his work three Portrait-medallions of Pirckheymer, Melanchthon, and Theophrastus Paracelsus. One of Luther is described in the Gutekunst Catalogue of medals, and a specimen of this was formerly in Dr F. P. Weber's collection; which is now in the British Museum Domanig attributes to the same artist a uniface Portrait-medallion in honestone of Ferdinand III., undated (*Porträtmedaillen*, &c., n° 190).

Babelon states that Georg Schweigger engraved in 1643 a fine portrait of Ferdinand III. in precious stone, and that by him are also various religious subjects, one of his works having been sold for 60000 florins to Russia (Arneth, *Die cinque-cento Cameen*, p. 80).

BIBLIOGRAPHY. — Bolzenthal, *op. cit.* — E. Babelon, *La gravure en pierres fines*, p. 283. — Domanig, *Porträtmedaillen des Erzhauses Oesterreich*, 1896.

SCHWEINBERGER, ANTON and **FRANZ** (*Germ.*). Seal-engravers at Augsburg, *circ.* 1600.

SCHWENCKER (or **SCHWENNCK**), **LEONHARD** (*Germ.*). Mint-master at Würzburg, *circ.* 1524.

SCHWENDER, HANS (*Germ.*). Mint-engraver at Prague, 1563; he was a native of Joachimsthal, for which Mint he also worked, from about 1563.

SCHWENDIMANN, KASPAR JOSEPH (*Swiss*). Medallist, Gem-, and Coin-engraver, Modeller and Line-engraver, born at Ebikon (near Lucerne), 6. December 1721, died at Rome in November 1786 He was one of the most esteemed artists of his time in Rome, but had a very chequered early life. His father was a joiner, who was unable to provide the youth with the necessary means to learn the profession of draughtsman and line-engraver. Young Schwendimann was sent to Rome, then to Augsburg, where he suffered many privations,

Portrait-medalet of K. J. Schwendimann (by J. Kaufmann).

and even hunger. Later he worked for six months at Zoug as amanuensis to the engraver Hiltensperger. Many were the difficulties he had to encounter until he was able to dedicate himself entirely to the art of his predilection. It was not until he met the famous Hedlinger at Schwytz that his success was assured. The great artist took him under his protection, noticing his clever dispositions, and offering him the instruction he was still in need of. After a few years, he made himself a name at Lucerne, won the patronage of two distinguished statesmen Amrhin and Balthasar, and was even entrusted with the engraving of the State seals and official stamps. In 1772 he went to Rome, where he studied the antique, and attained a high degree of perfection as a medallist. He lived there for fourteen years, but his career was cut short by the hand of an assassin; he was stabbed 24 times with a knife in his own house, and died eight days later, on 1. December 1786. The artist's right hand especially was severely mutilated, and to the friends around him who sought to instil into him hopes of recovery, he exclaimed : " Vedete mia mano e lasciate mi morir. ". He was buried in Rome. A monument, bearing the following inscription, was raised to his memory :

D.O.M

HIC JACET JOSEPHUS SCHWENDIMANN
HELVETIUS LUCERNENSIS
IN INCIDENDIS NUMISMATIBUS NULLI SECUNDUS.

Schwendimann's signature occurs as follows : **I. SCHWENDIMANN FECIT**; — **I. SCHWENDIMAN F.**; — **I. SCHWENDIMAN**; — **I. S.**; — **IOS. SCHWENDIMAN F.**; — **IOS. SCHWENDIMANN F.**; — **IOS. SCHWENDIMANN. HELVET. F.**; — **I. S. F.**;

The following list of the artist's medallic productions is taken from Inwyler's monograph (*Bull. de la Société suisse de numismatique*, 1883, pp. 49-61) : Prize Medal of the Painters' Academy of San Luca in Rome, 1775; 45 mill. (the reverse die of this medal was used by G. Girometti in 1846 for a Roman Scholastic Prize medal for Art); — Pope Pius VI., 1776; 55 mill.; — Memorial medal of Pope Clement XIV., 1775; — Prize medal of Pius VI., 1779; Collegio Romano; 37 mill.; — Charles Theodore's election as Prince Elector of the Bavarian Palatinate, 1777; 51 mill.; (Æ and Æ); — Union of the Palatinate with Bavaria, 1777; 72 mill.; — Renewal at Soleure of the Treaty concluded between the French Crown and the Helvetic Confederation, 1777 (two varieties), 54 mill. This medal won the artist his first great distinction (*illustrated*); — Portrait-medal of Cardinal Valenti Gonzaga, 1878; 42 mill. (Cardinal Gonzaga was the artist's great patron at Rome); — Portrait-medal of Antonio Raphael Mengs, painter; 37 mill. (one of

Treaty between Louis XVI. and the Helvetic Confederation, 1777.

the engraver's best works); — Commemorative medal of the Battle of Sempach (undated, but executed in 1780; one specimen struck in gold from the Emme river); 34 mill. The reverse of this medal was used in connection with Jonas Thiébaud's obverse of the Lucerne 4 Ducat piece for a medal issued in 1815 and intended to commemorate Lucerne's participation in the Allies' Campaign against Napoleon I.; — Third Centenary of the Stanz Compromise, with bust of Nikolaus von der Flüe, 1781; 30 mill.; — Joseph Laber (circ. 1783; only known from plaster cast, and lead impressions of the obverse); 38 mill.; — Ducats of Pius VI. for Bologna, 1782; — Scholastic Prize Medal of Zoug, undated; with figure of St. Oswald; 33 mill; — Portrait-medal of Gustavus III., King of Sweden, 1784 (two varieties : one with Rx legend : SVECIA SERVATA. Storm tossed ship; and the other with an inscription in 13 lines; both 64 mill.); — Cardinal Marco Castelli, Roman prelate, 1784 (two varieties : (a) Façade of the Church at Ravenna; (b) Pius VI. receiving from the kneeling prelate a plan of a Church; both 60 mill.); — Prize Medal of the University of Bologna, 1785;

53 mill.; — Pisan Scudo of the Grand Duchy of Tuscany, 1784; — Portrait-medal of Duke Peter of Curland, undated; 64 mill.

All these medals exist in the Lucerne "Bürgerbibliothek"

Schwendimann was in the act of engraving an official medal for the State of Lucerne when he fell a victim under the murderer's steel (24. November or 1. December 1786).

By him are also a large number of copper plates, armorial bearings, seals, gems, rings, etc.

The peculiarity of his talent is evident in the works which relate to the Renewal of the Treaty between France and Switzerland, Cardinal Al. Val. Gonzaga, Chevalier Mengs, and Union of the Palatinate with Bavaria. He was a worthy disciple of Hedlinger. Meyer of Hamburg in his "Reise in Italien" states that "Schwendimann was for a long time the great artist in Rome", and Fuesslin is equally eulogious.

SCHWENDLER *Vide* **HANS SCHWENDER** *supra*.

SCHWENZER, KARL (*Germ.*). Medallist and Coin-engraver, born at Löwenstein in Württemberg, 26. February 1843, died at Stuttgart, 29. November 1904. He was the second son of a turner, and already manifested in his school days a taste and ability for engraving, in which he received instruction from his elder brother Ludwig. At the age of 14 he was placed as an apprentice with the engraver Schiller at Stuttgart, from 1861 to 1864 he visited the Stuttgart art schools, and from 1864 to 1867 studied under Kröhling at Nuremberg. Here it was that he obtained his first official orders, consisting of a Portrait-medal of Kepler for the University of Tübingen, and a Prize Medal for Trade and Industries of the Württemberg commercial centre. In 1867 and 1868 he worked in Paris for the medallist Paulin Tasset, and later until 1872 he was with Wyon in London.

The Vienna Universal Exhibition brought Schwenzer's name to the front. Among the competitive designs sent in for the five official Prize medals, two of his obtained a first prize, and he was entrusted with the cutting of the dies for these in 1875. During his three years of residence in Vienna, from 1872 to 1875, the artist engraved a variety of medals. In 1875 he returned to Stuttgart, where he lived until his death, with the exception of a stay in Berlin from 1883 to 1885.

Switzerland and Bulgaria are indebted to Schwenzer for various patterns of Coins. A pattern 20 Centimes of Switzerland, 1881, is described in *Bull. de la Société suisse de numismatique*, 1882, p. 76, n° 4. He cut the dies for the nickel coinage from 1879. In 1883 he prepared the dies for the 20 Franc piece, which was coined until 1895, when Landry's type was adopted. Also the dies of the 5 Franc pieces, 1888-1895, are by him.

Swiss 5 Franc piece, 1890.

Among his medals, the following may be mentioned: Freiherr Franz Karl von Hauch zu Haunsheim, on the birth of his daughter Irma, 17. August 1873; — Fifth German Federal Rifle Meeting, 1875; — Vienna Exhibition of Photography, 1875; — Jubilee (4. Centenary) of Tübingen University, 1877; — First Visit of William I., German Emperor, to Strassburg, 1877 (struck in 1879); — Fisheries Exhibition at Berlin, 1880; — Birth of the first son of Freiherr Franz Karl von Hauch zu Haunsheim, 1880; — Golden Wedding of Prince Karl Anton zu Hohenzollern-Sigmaringen and consort Josephine, 1884; — Jubilee (5. Centenary) of Heidelberg University, 1886; — 25th Anniversary of King Charles of Württemberg's reign, a Decoration, 1889; — Completion of Ulm Cathedral, 1890; — Kommerzienrat Albert Niethammer, 1892; — Prize Medal of the Stuttgart Exhibition for Electrotechnique and Industries; — Portrait-medals of Prince Bismarck (two sizes); — Portrait-medal of Nordenskjöld, undated; — Prize Medal for the German Agricultural Society; — Another, dated 1889, for the Württemberg Agricultural Society; — Patterns for a 5 Mark piece of Württemberg; — Various Prize medals, official and unofficial, &c., and numerous Portrait pieces; — Emil Riecke and his consort; — Theodor Diefenbach, uniface Portrait-medallion, 1883; — Anna and Karl Walcher, Portrait-plaquettes; — Karl Walcher; — Archduke Karl Ludwig, 1875; — Election of Prince Alexander of Battenberg to the throne of Bulgaria, 1879 (2 var.); — Prince Alexander of Hesse; — Medal of Merit, granted by Prince Alexander of Bulgaria, undated (1880) (3 var., for Military, and Civil Merit, Sciences and Arts); — Pattern 5 Lewa of Prince Alexander (type not adopted, Russia objecting to the portrait of the Prince on the coinage); — Else Kerner, 1880; — Bernhard Dondorf, 1887; — Jaquette Dondorf, 1887; — Prize Medal for Architecture, with bust of William I., German Emperor, undated (designed by Bendemann); — Silver Wedding of Grand Duke Frederick of Baden and consort Louise, 1881; — 70th Anniversary of Frederick, Grand Duke of Baden, 1896; — Opening of the Kiel Canal, 1895 (signed: **K. S. F.**); &c.

Schwenzer was elected in 1874 honorary member of the Academy of Vienna, and the King of Württemberg and Grand Duke of Baden both bestowed orders upon him for his services to Art. As a man, he was a noble character, true and straight in all his dealings. King Charles had appointed him Court-medallist.

Bibliography. — P. Joseph, *Karl Schwenzer*, Frankfurter Münzzeitung, 1905, p. 195, 211. — W. *Karl Schwenzer*, Berliner Münzblätter, 1905, p. 10. — Corraggioni, *Münzgeschichte der Schweiz*, Luzern, 1896. — Von Heyden, *op. cit.* — Menadier, *op. cit.*

SCHWERDT, A. (*Germ.*). Die-sinker and Medallist of Stuttgart, by whom I have noticed the following medals: Centennial of Homeopathy, with bust of Hahnemann, 1890 (signed: **SCHWERDT STUTTG.**); — First International Congress of the Homeopathic Society, at Hamburg, 1895; — Fifth General German Gymnastic Fête at Frankfort-on-M., 1880 (signed: **A. SCHWERT STUTTGART**); — Federal Choral Festival of Basle, 1893; — Federal Fête of Gymnastics at Lugano, 1894, &c.

SCHWERDTNER, KARL MARIA (*Austr.*). Contemporary Sculptor and Medallist, residing at Vienna; pupil of his father Johann Schwerdtner and Professor Helmer.

By this talented artist are a number of cast Portrait-medallions and Plaquettes; amongst which one of his father (*illustrated*), which he presented to him on 14. July 1903, on the occasion of the 70th anniversary of his birth. Further works by him are: Prize Medal of the Horticultural Show at Vienna, 1901 (with bust of the Archduke Franz Ferdinand); — Hedwig and Norbert Reichert; — Gretl Benk; — Von Billisch; — Ferdinand von Saar, on his 70th birthday; — Inauguration of the Unveiling of the 'Deutschmeister" Monument at Vienna, 1906 (signed: **CARL MARIA SCHWERDTNER JUNIOR**); — Burgomaster Dr Carl Lueger, 1907; — Ludwig Gabillon, 1900; — Dr Wilhelm Winternitz, of Vienna (signed: **C. M. S.**); — Inauguration of the Monument to German Art in Vienna (Deutschmeister Denkmal); — Dr Franz Berger; plaquette; — Archduke Franz Ferdinand; — Ferdinand von Saar, a Viennese poet.

C. M. Schwerdtner, a young man of marked individuality, he naturally seeks for those traits which lie beyond the outward expression of those whose features he is moulding. Herein lies the secret of his success. His first intention was to devote himself to sculpture — to create some large work in which he could show the world a vigorous and daring treatment. A visit to Charpentier in Paris was to be decisive for him. The great artist took no pupils, but he did more than teach young Schwerdtner, for during the six months he was in Paris, Charpentier not only allowed him to visit him in his studio, but corrected his work, and, what is more, explained his own development by means of illustrations and models of his own

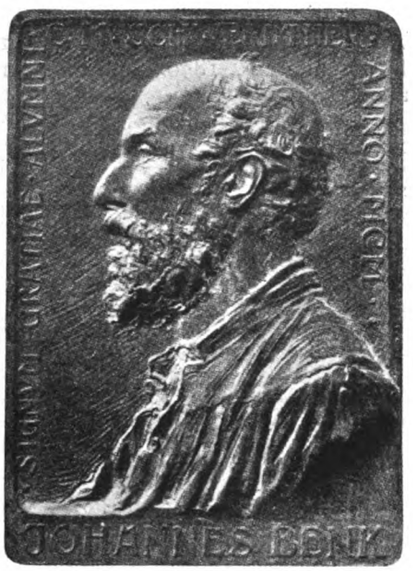
Original from CORNELL UNIVERSITY

work. The knowledge of technique thus gained proved invaluable to Schwerdtner.

The desire to portray is inborn in Schwerdtner, and his "portraits" are portraits in the larger and deeper sense of the word. That of Captain Weyprecht, the North Pole explorer and joint discoverer of Franz Josef's Land with Payer, is wonderfully true. There is an air of nobility and dignity worthy the man whom the medal represents, and the Ministry of War did well in commissioning Schwerdtner to design the Memorial at Pola, which is carried out in pure white marble.

Schwerdtner's Portrait-plaquettes of the artist's father and the sculptor Professor Benk are both full of strength and vigour, while that of the professor's daughter, Frau Urban, shows that the artist can also mould other types : here he has caught the delicate expression of his subject, a true Viennese. In none of his plastic productions does he seek to overweight one characteristic at the expense of another, but makes it his aim to harmonise and blend them all in due proportion.



Portrait plaquette.

At the International Medallic Exhibition of the American Numismatic Society at New York, March 1910, this artist exhibited the

Portrait-plaquette.

following works : Stadtbaudirektor Berger; — Fechtmeister Werdnik; — H. E. Burgsmaster Lueger; — Deutschmeister Monument ; — Prof. Winternitz; — Prof. Freud ; — Union Fechtclub; — Prof. Laurenz Müller; — Johann Schwerdtner.

SCHWERDTNER, JOHANN (*Austr.*). Contemporary Sculptor and Medallist, born at Vienna on 14. July 1834, died in 1909; pupil of J. Fischer, and Wenzel Seidan, and the Academy of Arts of Vienna. At the age of 20 he entered the K. K. Military-geographical Institute as pupil in line-engraving, where he remained until 1864, in which year he founded the Works which he directed until his death. Since 1869 he was a member of the Society of Sculptors of Vienna, and since 1873 a member of the Jury

Portrait of Johann Schwerdtner
(by his son).

at Viennese Arts and Crafts Exhibitions. In 1874 he founded the Independent Society of Viennese Engravers ". On the occasion of his professional Jubilee in 1897 Schwerdtner was presented with the large gold Salvator medal by burgomaster Dr Karl Lueger in the name of the city of Vienna.

Although some of his medallic productions are clever and skilful, the artist does not rank with the great masters of the Austrian school of medallists, headed by Scharff, and Tautenhayn. Among his numerous works, I may mention the following of which I have seen descriptions : 1868. Third German Federal Rifle Meeting at Vienna, 1868 (obv. only); — 1871. Third Choral Society Festival at Vienna; — 1872. Tenth Anniversary of the Male Choral Society of Vienna ; — 1874. Prize medal for Latin scholarship at the State Gymnasium of Graz; — 1876. Fortieth Anniversary of the Hydrotherapic Institute of Kaltenleutgeben, with portrait of Dr Emmel; — Joseph Schindler, of Gräfenberg; — 1877. Prize Medal of the Exhibition of Arts and Crafts in Vienna (2 var.); — 1879. Centenary commemoration of the Franchise granted to the town of Fiume; — 1883. Commemorative medal of the "Ottakringer Liedertafel's" foundation; — 1884. Prize Medal of the Krems Industrial Exhibition ; — 1886. Meeting of Saxon Societies at Kronstadt (Transsylvania) ; — Jubilee of Kaltenleutgeben Hydrotherapic Institute ; — 1889. Marriage of the Crown Prince Rudolph with Princess Stephanie of Belgium ; — 1890. Jubilee (Centenary) of the Neusatz Rifle Club ; — Dedication of the "Kaiser" church bell at Retz, 1889 (Æ. only); — Bronze badge of the "Schlaraffia Vindobona" ; — Commemorative medal of the Third Gymnastic Fête at Hainfeld ; — Commemorative medalet of the Foundation of the Vienna Numismatic Club; — Wilhelm and Mathilde Cubasch; — Opening of the "Türkenschanz" Park at Vienna ; — Opening of the Railway Line from Jamboli to Bourgas, in Bulgaria (3 var.); — 1891. Schlaraffia Vindobona ; — Social evening of Viennese artists and actors, 14. March 1891 ; — Trip of the Numismatic Club to Carnuntum ; — Visit to Constantinople of the Viennese Male Choir ; — Portrait-medal of A. M. Beschorner; — Austrian Athletic Club ; — Priestly Jubilee of Florian Polifka, of Aspang; — 1892. Trip of the Numismatic Club to Göttweig ; — Fifth Centenary of the Foundation of Weyer (Lower Austria) ; — 40th Anniversary of the St. Pölten Sharpshooters' Club; — Olmütz Industrial Exhibition ; — 1893. Social evening of the Vienna Male Choir, 21. January 1893 ; — 40th Anniversary of the St. Pölten K. K. Rifle Corps; — Visit of the Vienna Numismatic Club to Herzogenburg; — 30th Anniversary of the Athletic Club of Neunkirchen ; — First Visit to Vienna of the Haydn Orchester Club ; — 1894. Ritter Lorenz von Liburnau Institute ; — Journey to Constantinople of the Austro-Hungarian Export Commission ; — Volunteer Fire Brigade at Hainfeld, badge; — 1895. Trip to Krems of the Vienna Numismatic Club; — Fourth Centenary of the Lower Austrian Rifle Club at Krems; — Choral Festival at Perchtsldodorf (Lower

Austria); — 25. Anniversary of the Volunteer Fire Brigade of Herzogenburg; — 1896. Philipp Franz von Siebold, on the 100th Anniversary of his birth; — Eighth Lower Austrian National Rifle Meeting; — 1897. Portrait-medallion of Charlotte Wolter, Hofburg actress; — 1898. Jubilee of H. M. Francis Joseph I. (many varieties); — Jubilee medal of the Industrial School Committee of Retz; — Riflemen's Badge of the Retz Rifle Club; — Fourth Centenary of the Rifle Club of Bregenz, and Kaiser Jubilee Rifle Meeting; — Inauguration of the Josef Struber Monument at Pongau; — Badge of the Graz Schlaraffia; — Private Jeton; — Scholastic Jubilee Badge of the District of Perg; — 1899. Andreas Hofer, commemorative medal; — 1900. Rifle Meeting medal of Perg; — 1902. Jubilee of Karl Andorfer; — Fisheries Exhibition at Vienna; — 1903. Opening of the "Commerce Exchange" at Vienna; — 1905. Schiller commemoration medals; — 1906. Plaquette of the Wiener-Neustadt Military Academy; — Visit of the Vienna Male Choir to London, &c.

Undated. Vincent Priessnitz, physician at Gräfenberg, † 1851; — Prize Medal of the Horticultural Club of Klosterneuburg; — Badge of the Fisheries Club; — Prof. Griepenkerl, &c.

Schwerdtner usually signed: **J. S.**; — **J. SCHWERDTNER**; — **J. SCHWERDTNER F.**; — **J. NER**; — **SCHWERDTNER**; — **JOS. SCHWERDTNER.**

Schwerdtner was a clever Engraver in ivory and copper.

Prof. von Renner's obituary notice of Johann Schwerdtner gives a very full account of Schwerdtner's life and artistic career.

BIBLIOGRAPHY. — *Mittheilungen des Klubs der Münz- und Medaillenfreunde in Wien*, 1890. — *Various Catalogues*, &c. — Prof. von Renner, *Johann Schwerdtner*, Mitth. der oest. Gesellschaft für Münz-und Medaillenkunde, 1909.

SCHWERT. *Vide* **SCHWERDT** *supra.*

SCHWERTGE, NIKOLAUS (*Germ.*). Mint-engraver at Simmern, *circ.* 1572-1582 (Frankf. Münzz., 1903, p. 372). He worked under Mint-master Jacob Mertz, and coined under Count Palatine Reichard.

SCHWIEGELT, JAKOB (*Germ.*). Mint-master at Glückstadt, 1644-1660, under Christian IV. During the last few years of the Thirty years' War, the Glückstadt mint did not work (Chr. Lange's *Sammlung schleswig-holsteinischer Münzen und Medaillen*, 1908).

SCHWINGERSCHUH, PAUL ERDMANN VON (*Austr.*). Mint-master at Prague, 1755-1784, in connection with **A. STÖHR**, Mint-warden. Their issues are signed **S.S.**, and occur also on coins of Schlick. The mint of Prague was closed on 18. February 1784, but reopened on 28. August 1795.

SCIPIONE AMICI, GIULIANO DI (*Ital.*). Gem-engraver to Pope Paul II., 1464-1471.

SCLATER, ROBERT (*Brit.*). A Scottish Medallist of the second quarter of the nineteenth century, who lived at Edinburgh. His works date from 1826. By him are: Portrait-medal of George Heriot, † 1624; signed: **SCLATER F.** (a presentation medal of Heriot's Hospital in Edinburgh); — Medal of the Highland and Agricultural Society of Scotland, instituted 1784; obv. Heads of Geo. III., Geo IV., and William IV., in profile to left; — Medal of the Royal Caledonian Club, instituted in 1838 (signed: **SCLATER SC.**) (Cochran Patrick, *Scottish Medals*, 1884).

SCOPAS (*Greek*). This inscription **CKOΠAC** occurs on a fine hyacinth intaglio of the Leipzig Library, representing a beardless male head. M. Babelon adds, in his description of the gem, that it is unlikely that the Engraver is the same person as the famous sculptor of the bas-reliefs of the Mausoleum.

Scopas was an artist of pre-imperial times.

The signature **ΣΚΟΠΑΣ** on gems purporting to be ancient is undoubtedly modern.

The signature has been added in modern times on various gems: Oedipus and the Sphinx; signed: **ΣΚΟΠΑ·ΕΠ·** (Stosch); — Bust of Apollo Citharedus (Sellari); — Head of Epicurus, sard (Count Butterlin); — Young woman at her toilet (Caylus).

BIBLIOGRAPHY. — Furtwängler, *Antike Gemmen.* — King, *Antique Gems*, p. 224. — Babelon, *La gravure en pierres fines*, 1894.

SCOTHEM, JAN VAN (*Dutch*). Mint-master at Middleburg, appointed 19. October 1355, under Willem **V.**

SCOTT, MAJOR then **LIEUT. COL. B.** (*Brit.*). Officiating Mint-master at Calcutta, appointed on 22. September 1891, and in office until 1st March 1892; 23. November 1897 to 6. July 1900; 1. October 1900 to 30. November of the same year; and again from 1. November 1902 to 22. April 1904. He also officiated at Bombay, 1895-1897.

SCOTT, B. (*Brit.*). Engraver of coins and Medallist to the empresses of Russia, Elizabeth and Catherine the Great, 1754-1762. Iversen states that his initials **B.S.** occur on Roubles of the years 1754 to 1757, and on two small Memorial medals of Elizabeth, and I have further noticed it on a Portrait-medal of Catherine II., 1761, and on a commemorative medal of the Battle of Poltawa (signed: **B. SCOTT F.**).

SCOTT, J. D. (*Brit.*). Engraver of a St. Patrick's Total Abstinence Society medal of Montreal, 1841 (Leroux, *Médaillier du Canada*, p. 111).

SCOTT, R. (*Brit.*). This signature occurs on a Prize medal of the Glasgow East End Exhibition, 1890. The engraver is a local Die-sinker and Seal-engraver.

SCOTT, ROBERT (*Amer.*). First Engraver of the United States Mint at Philadelphia, appointed on 23. November 1793, and apparently in office until January 1824. Evans states that "information is wanting as to the nativity of Scott, but at the time of his appointment he seems to have been turning the down-hill of life. He is remembered as rather under size, and as an honourable and agreeable gentleman".

The first official coinage of the United States dates from 1793 and consists only of Cents and Half Cents. In the following year, silver Dollars, Half Dollars, and Half Dismes were also issued, and in 1795 the Eagles and Half Eagles were first struck.

Dollar of the United States of America, 1795.

The earliest coins issued by the United States Government were Half Dimes. This issue, which took place in October 1792, is thus described by Washington in his message to Congress, 6. November 1792: "There has been a small beginning in the coinage of Half-dismes; the want of small coins in circulation, calling the first attention to them".

On these early coins, the portrait of Martha Washington is said to have been used for the personification of the head of Liberty; —

Half Disme. Obv. LIB. PAR. OF SCIENCE & INDUSTRY. Head of Liberty (portrait of Martha Washington) with flowing hair to left, beneath: 1792.

℞. UNI. STATES OF AMERICA. Eagle flying to l.; beneath: HALF | DISME | * 10, 5 mill. — 21 grains.

Half Disme of 1792.

Of these Half-dismes only 100 dollars' worth were struck and placed in circulation. They are now very scarce and sought after by collectors.

The same portrait of Martha Washington occurs also on a Pattern Disme of the same year.

Pattern Disme. Obv. LIBERTY PARENT OF SCIENCE & INDUS. Head of Liberty to left, with flowing hair; beneath: 1792.

Rv. UNITED STATES OF AMERICA. Flying eagle, head to left; beneath: DISME. 14 mill. — 57 grains.

Disme of 1792.

To these coins may be added a Pattern Cent, also of 1792, with the same portrait.

Pattern Cent. Obv. LIBERTY PARENT OF SCIENCE & INDUSTRY. Head of Liberty to right with flowing hair; on truncation: BIRCH; beneath: 1792.

Rv. UNITED STATES OF AMERICA. Within laurel-wreath tied below with a ribbon, the inscription: ONE CENT; under the wreath: $\frac{1}{100}$. Edge inscribed: TO BE ESTEEMED * BE USEFUL. 21 mill. — 217—286 grains.

Although the last piece only bears the engraver's name, it is most probable that Birch cut the dies for all three coins.

Pattern Cent, 1792.

The head of Liberty on the United States silver currency (Dollars, Half Dollars, Quarters, Dimes, and Half Dimes) continued for several years to be a modified type of the portrait of Martha Washington.

SCUAP, NICOLA. Signature of Nicolaus Schwabe *q. v.*

SCUDDER, JANET (*Amer.*). Contemporary Sculptor and Medallist, born in Terre Haute, Indiana, on 27th October 1874, a daughter of William Hollingshead and Mary Sparks Scudder, a descendant from Thomas Scudder of London, who with his wife Mary emigrated to Salem, Mass. in 1635. Miss Scudder was educated at the High School in Terre Haute, began to study sculpture at the Cincinatti Art Academy under Louis J. Rebisso, and continued at the Art Institute, Chicago, under Lorado Taft. Later she entered the Académie Vitti and Collarrossi in Paris, finally becoming the pupil of Frederick Mc Monnies.

While studying in Chicago Miss Scudder was given orders for two figures for the Columbian Exposition, one for the Illinois Building, and another for the Indiana Building. She was awarded a Bronze medal at the Chicago's World's Fair, and also at the Louisiana Purchase Exposition, St. Louis. In 1901 five Portrait-medallions by her were acquired by the French State for the Luxembourg Museum.

Miss Scudder's principal works are: Seal for the Bar Association of New York; — Cinerary Urn for Daniel Mather Walbridge, Woodlawn Cemetery, New York; — Fountains for Archbold Cottage, Bar Harbor, Maine; — Other Fountains for Mrs. E. Howard Child, Westwood, Mass; Chas Platt, N.Y.; James Burge, Southampton, L.I.; Richmond Art Association; — Statue of "Japanese Art" for the Brooklyn Art Museum; — Marble sun dial for Mrs. Warner M. Leeds, Port Washington, L.I.; — Bronze Memorial Tablets to Arthur Middleton Reeves, Richmond, Indiana; — Marble Memorial to Bishop Hare, Sioux Falls, Iowa; — "Frog Fountain" and Collection of 8 silver Medallions, purchased by the Metropolitan

Miss Mildred Barnes.

Museum New York, in 1904; — Collection of Medallions in Congressional Library at Washington D.C. and Indianapolis Art Museum, etc.

Miss Scudder is a Member of the American National Sculpture Society, and National Society of Arts.

Her principal Portrait-medallions are the following:

1900. Mrs. Michael van Buren; — Mrs. Warner M. Geeds; — Miss Leslie Emmett; — Miss Alice Jones; — 1902. Bishop Hare; — Percy Chubb Esq.; — Miss Margheretta Mac Veagh; — 1903.

Master Billy Fahnestock.

Portrait of a Gentleman (*illustrated*); — 1904. A. J. Parsons Esq.; — Master Royal Parsons; — Master Billy Fahnestock; — Miss Caroline Reeves Foulke; — Arthur Middleton Reeves Esq.; — E. Howard Child Esq.; — 1905. Miss Helen Seely; — Mrs. Alice

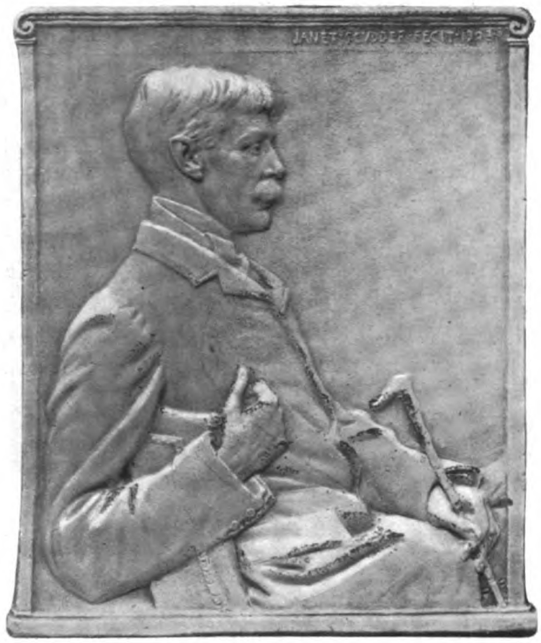
Eno; — Miss Mildred Barnes (*illustrated*); — 1906. Mrs. William Eno; — 1909. Francis Whitehouse Esq., etc.



Portrait of a Gentleman.
(*Reduced*).

Miss Janet Scudder has been very successful so far, thanks to her real talent and keen artistic perception. Her work is delicate, but does not lack in boldness and originality.

Articles treating of this artist's work have appeared in the "Studio".

At the International Medallic Exhibition of the American Numismatic Society at New York, March 1910, she exhibited a dozen of her works; also a selection of thirteen of her best medallic productions at the Brussels Salon de la Médaille, 1910.

Bibliography. — *Information kindly supplied by the artist and by Mr. Theodore Spicer-Simson.* — *The Studio.* — *Catalogue of the International Medallic Exhibition of the American Numismatic Society, March 1910.*

SCULTET VON SCHOLTISHEIM, SALOMON (*Bohem.*). Mint-engraver at Prague, 1636-1656. Beside coin-dies, he cut Religious medals, some dies of which are still preserved at the Vienna mint.

SCYLAX (*Greek*). Gem-engraver of the Alexandrine period, by whom only two absolutely authentic gems are know. One signed **CKYΛAΞ** is an intaglio representing a young Satyr dancing (Furtwängler, *o. c.*, p. 49-50); and the other, purchased for 2500 frs. by the Bibliothèque nationale, Paris, at a sale of Dr Sambon's in March 1902, is a Portrait-intaglio (*illustrated*), youthful male bust in profile to right; behind the head, **CKYΛAΞ**. The work is charmingly delicate and of exquisite style. This gem was found at Brindisi.

Portrait-intaglio, by Scylax.

Referring to the first of these two works of Scylax, the youthful Satyr dancing, Prof. Furtwängler says: "Die Arbeit des Steines ist eine ganz vorzügliche; trotz der zierlichen Ausführung des Details herrscht doch eine so feine Mässigung, eine so ächt antike Frische im Ganzen, ein solcher Gegensatz zu allem Weichlichen und Unsichern, dass ich die Gemme nur für antik halten kann. Wie schön und klar sind die Formen des Körpers, wie einfach derb das stumpfnäsige Satyrgesicht, und wie zart geschmackvoll ist das Pantherfell behandelt."

Among the dubious gems, whether antique with a signature added in modern times, or entirely modern, I may mention the following bearing the inscription of Scylax: — Cameo representing Hercules Musarum (formerly in Baron Roger de Sivry's collection). This gem is considered as original by M. Babelon (Daremberg & Saglio's Dict., *art. Gemmae* II, 1479); — Eagle's head, sard (formerly in the collection of Lord A. Percy, and now in the Hermitage, St. Petersburg; probably borrowed from the Blacas gem, inscribed **CKYΛA**). An imitation of this gem, from the Castellani collection exists in the British Museum, with the inscription **CKIΛAK**; — Head of Pan, full face, amethyst (Blacas); — Head of C. Antius Restio, sard (formerly in the Marlborough Collection); — Male portrait, sard (ibid.); — Head of a bald man, garnet (formerly in Baron Roger de Sivry's cabinet); — Man standing holding a bow, sard (ibid.); — Mask of Satyr, front face (Ibid.); — Combat between a giant and griffin, sard (St. Petersburg), etc.

Pichler imitated some of these.

In the Poniatowski collection were the following eighteenth century gems, inscribed Scylax: Bacchus bringing Semele from Hades, oriental cornelian; — The centaur Phobus pouring out wine for his guest Hercules, oriental cornelian; — Hercules in the art of striking Telamon, who, to appease him, points to the altar he is constructing in his honour, oriental cornelian; — Thetis inquiring of Achilles the cause of his affliction, cornelian.

Bibliography. — Furtwängler, *Antike Gemmen.* — Ibid,, *Jahrbuch* &c., 1889. — Babelon, *op cit.* — King, *Antique Gems*, 1860. — Murray, *Catalogue*, &c. — Raspe, *op. cit.* — Prendeville, *The Poniatowski Gems.*

SCYMNUS, CKYMNOC (*Greek*). The only authentic gem known with this signature **CKYMNOY** was formerly in the Kibaltchich Collection (St. Petersburg). In his catalogue of the collection, Dr Sambon describes this gem thus:

"Jeune Faune courant vers la droite; il agite de la main gauche le thyrse et verse, de la main droite élevée, le contenu d'une coupe. Il regarde en courant une panthère qui gambade à ses côtés. Derrière, se lit la signature du graveur **CKYMNOY** (d'une authenticité incontestable). Intaille sur cornaline orientale. Travail hellénistique d'une grande finesse. Conservation irréprochable. Pièce d'élite.

"C'est la seule pièce connue avec cette signature."

Intaglio, by Scymnus.

This signature occurs also on another gem, which is modern, and described by King as representing Bacchus followed by a panther.

S. D. also **SEBA. DATT.** *Vide* **SEBASTIAN DADLER.** Medallist at Augsburg, 1619-1653.

S D. *Vide* **DANIEL SIEGMUND DOCKLER.** Medallist at Nuremberg, † *circ.* 1688.

S. D. *Vide* **SEBALD DIERLEBER.** Mint-master at Dresden, 1635 1640. He appears to have been Mint-warden at Prague from about 1625.

S. D. *Vide* **SIMON DANNES.** Mint-master at Schleitz, 1669-1675 and 1678-1680; in Harzgerode, 1675-1676.

S. D. *Vide* **SIEGMUND DANNIES.** Mint-warden at Minden, 1682-1689; Mint-master at Stargard, 1689-1692, and Königsberg in Prussia, 1695-1697.

S. D. *Vide* **SEBALD** and **DRENTWETT.**

S. D. A. (*Ital.*). According to Milanesi and Armand these initials may be the signature of a Florentine Goldsmith **SALVESTRO DELL**,

AVACCHIA, who worked for some time at Rome for Pope Leo X. Vasari states that this goldsmith excelled in all the branches of his art.

The initials **S. D. A.** occur on a medal of Cardinal Giangiacomo Sclafenati, undated; 58 mill.; — and on another of Filippo Sclafenati; 54 mill.

Bibliography. — Armand, *op. cit.* — Heiss, *op. cit.*

SEATON, CHRISTOPHER (*Brit.*). A Scotsman, pupil of the Danish Gem-engraver Christian Reisen, was in 1750, says King, "at the head of his profession in London." He endeavoured to give an extreme finish to his gems: hence they are weak, cold, and without spirit. His chief works are portraits of Pope, Inigo Jones, and Sir John Newton, for the last of which he was paid 25 guineas" (p. 273). Raspe describes further by him a Head of Psyche, in white cornelian, and a Portrait of Charles I., in the character of the Ecce Homo.

Seaton engraved the Great seal of George III. and also, in the opinion of Mr. Frank Bowcher, one of those for use in Ireland under the same reign.

Bibliography. — Mariette, *op. cit.* — King, *op. cit.* — Raspe, *op. cit.*

SEBALD, MARTIN (*Germ.*). Sculptor and Medallist of the nineteenth century, died in the early part of 1888 at Augsburg. He worked for the **DRENTWETT** Die-sinking establishment for many years (*circ.* 1875-1887) as Modeller of the medals they issued. The firm was founded in 1842 at Augsburg by Gottfried Drentwett († 2. May 1871), and continued by his son Carl Drentwett (born 9. April 1848-† 24. March 1878), who made the business over in 1869 to the lithographer Heinrich Schmidt, the present owner.

Schlickeysen-Pallmann (p. 380) led me in error when I mentioned (Vol. I, p. 614) the name of Sebald Drentwett as that of the founder of the Drentwett private mint. For a list of some of Sebald's productions, confer my article on Drentwett (Vol. I, *NE*, pp. 614-616).

By Sebald are also a number of Portrait-medals of German celebrities, as Goethe, Schiller, Prince Bismarck, Count Moltke, etc.

SEBASTIANI, HEINRICH JUSTUS (*Germ*). Mint-warden, 1692-1694, and later Mint-master, 1694-1702 at Steuerwald. His initials **H. S.** or also **N. I. S.** occur on the coins.

(*To be continued.*)

THE COINAGE OF THE REIGN OF HENRY VII.

BY GEORGE B. PETRIE.

Member of the British Numismatic Society.

§ 4. The Mints and Mint-marks.

Henry VII, it would seem confirmed the claim of the Archbishop of Canterbury to dies, which claim had apparently been previously witheld by Richard II, as no coins of this mint are known of that reign, with the sole exception of one piece, which, having blundered legends, may be a contemporary forgery. The other remaining mints in operation during Henry's reign were at Durham, London, and York. A mint existed at Norwich in the reign of Edward IV, but we find no coins struck there subsequent to 1465. It would therefore appear that Norwich, as a provincial mint ceased its activity before 1470. It may also be assumed that Bristol and Coventry ceased in 1483, as no coins are known subsequent to Edward IV.

(a). *The Provincial Royal Mints : The Canterbury Mint.*

The Royal mint in this city, Ruding states, " continued to be worked during the reign". All the coins must be of great rarity, as I have only met with prelatical half-groats, pennies, and half-pennies. None are described of this mint by Hawkins. On the other hand it is quite possible that those with a fleur-de-lis instead of a cross at each side of the bust may belong to the regal mint. I incline to this view from the fact that the lis is a prominent mint-mark of the gold and the silver pieces of the London mint.

(b). *The Durham Mint.*

Coins were struck here during this reign, but I have not been able to discover when the royal mint ceased to be worked; and I know not whether the coins of this reign are not all of the bishops coinage. No half-groats or half-pennies of the first issue appear to be known of this mint, and I can only instance a single penny. "The episcopal mints end with the second issue (1526-1543) of Henry VIII, Archbishops Cranmer and Lee, and Bishop Tonstall being the last to exercise this right. As also no more coins were struck at Durham from this time onwards, it may be concluded that this mint had been lately a purely ecclesiastical one"[1].

(c). *The York Mint.*

Half-groats of the first issue only appear to have been struck at this mint. They have a rose, and the lis mint-marks, with rosette stops. A half-groat is, however, figured in Ruding (*Suppl.*, Pl. II, No. 22), having the lis mint-mark with rosette stops on the obverse, and mint-mark cross and saltires as stops. It is the only one I can trace, and it would therefore appear to have been struck in small numbers.

(d). *The Tower Mint, London.*

As previously remarked, the gold coins still continued to be issued from the Tower mint only, and in silver, groats, half-groats, pennies, and half-pennies. Angels and half-angels are numerous; but the Sovereigns are all rare, while the ryal is of the highest rarity, only four specimens are known to exist. There was an example (No. 758) in the Rashleigh Collection, which now rests in the cabinet of Mr. R. C. Lockett of Liverpool. All the known specimens of the ryal have the cross fitchée mint-mark, which also occurs on a groat of the first issue. From this fact we may take it that none were struck after 1489. A farthing of this mint is known, but I have only been successful in tracing one example, that in the British Museum. Its attribution seems doubtful, it is similar to the half-penny of the second issue, but the cross fourchée on the reverse is replaced by a cross pattée. They are of exceptional rarity.

(a). *The Ecclesiastical Mints : The Canterbury Mint.*

One of the prominent features of the archiepiscopal coins of Henry's reign which strike one at first is, that as a rule, while they have the mint-mark of the archbishop, they occasionally, and without any apparent reason, have the current mint-mark of the ordinary regal coins as well, for which I find it difficult to satisfactorily account. I believe, however, that the numerous mint-marks of this reign were adopted at the ecclesiastical mints some time after they had been in existence in the London mint, and further they may have continued to be used longer than at the Tower mint. The half-groats are numerous, but the smaller denominations are all rare or very rare. Of the second issue pennies only are known of this mint, they were struck by Archbishop Morton, and have the ton mint-mark.

(b). *The Durham Mint.*

Bishop Sherwood struck pieces with an **S** on the king's breast, from 1485 to 1489. Richard Fox, his successor, received the temporalities September, 1494, being translated to Winchester in 1502. The pennies with **DR** and **RD** are all distinguished by a mitre over the shield on the reverse; some consider that those with **RD** sould be appropriated to Ruthall (1509-22); but pennies with **TD** above the shield are undoubtedly coins struck by Thomas Ruthall. We read that Richerdson covenanted with Fox that the money he coined should have " a prevy marke, so that it may be evydently knowen "; and the mitre is " evydently " the distinction on the pennies with **DR** and **RD**. Bishop Christopher Bainbridge (1507-09) struck pennies with **BD** or **DB**. The name of the place of mintage is spelt **DIRhTM**, **DVRhTM** and in one instance **DURhTM**.

1. H. A. Grueber's *Handbook*, p. 80.

(c). *The York Mint.*

When Henry VII ascended the throne, Bishop Thomas Rotherham held this See, and he struck pennies with the letter T on one side and a key on the other side of the king's bust; some have the key replaced with a cross. Others also have a quatrefoil or the letter b in the centre of the cross on the reverse, or two T's, or T and a small trefoil at each side of the bust, and on others T and a fleur-de-lis. No halfpennies of the first issue are known. Those of the second issue are very rare, one figured in Hawkins (Pl. XXIX, No. 377) with key below the bust, is in the National Collection, while another in Ruding (Pl. VI, No. 26) is similar, but omits the saltires in the obverse legend. Half-groats of the third coinage are found having the martlet mint-mark alone, or in combination with the cinquefoil, and usually are well struck. The York pennies of the third issue are generally without any mint-mark, and when found it is too indistinct to be described with certainty.

§ 5. Obverse and Reverse Inscriptions.

It will not be necessary here to do more than briefly outline the different legends, with their transcriptions and scriptural references.

Gold.

The legends on the coins of this reign show no new mottoes, and are, in all cases, the same as those of its predecessors.

Sovereigns. — As previously mentioned of these there are four disctinct varieties, and on each the obverse and reverse legends differ in some detail in the abbreviation, punctuation, or in the style of letters. Dealing with them in the order of issue they may be described as follows. Type I (*see* Catalogue, No. 30). Around, variously abbreviated, is the legend, IhC AVTEM TRANSIENS PER MEDIVM IBAT (But Jesus passing through the midst of them, went His way : *Luke*, IV, 30), devised in commemoration of the great naval victory over the French fleet off Sluys, A.D. 24th June 1340. On this piece trefoils are used as stops. Type II (No. 31). We must consider the legend on the reverse of this coin as blundered in some way, from the spelling of Transiens as *Transciens*. The letters both on the obverse and reverse are smaller, and do not indicate the same high class of workmanship as is found on the previous coin. Moreover, what the last two letters mean on the reverse of this piece is by no means quite clear. It should be noticed that the stops on the obverse are saltires, and on the reverse trefoils. Type III (No. 32). This example mainly differs from the two previous coins in the shape of the letter M now reading M. Saltires appear on both sides for stops. In the catalogue which follows, I have been so fortunate as to trace a variety of this type, which, it will be noticed reads on the reverse somewhat differently to those usually met with (*see* No 33). Type IV (No. 34). On this coin the letters are larger and more coarse in execution, and mostly of the Roman style, instead of the early ecclesiastical character. The crossed A's and open C's, combined with the modern M's and N's, the E's are also peculiar. Both on the obverse and reverse cinquefoils are used as stops. The concluding word of the Irish title is curious by the omission of the letter h, which seems to have originated on the ryals of Edward IV. : it occurs on all except type III.

Ryals. — The ryals of Henry VII. are of great rarity, only four specimens being known. The legend reads on the obverse, hENRIC DI GRA REX ANGL Z FRANC DNS IBAR, with trefoil stops. Reverse, IhC AVTEM TRANSIENS PER MEDIV ILLORV IBAT, with trefoils as stops.

Angels and Half-Angels. — They read (after the mint-mark), hENRIC DI GRA REX ANGL (or ANGLI, ANGLIE, AGL) Z FRA (or FR, FRANC, FRANCI). The reverse usually reads. PER CRVCEM TVA SALVA NOS XPE RED (or REDE, REDEM) "By Thy cross, save us, O Christ, our Redeemer. Half-angels are found reading on the reverse O CRVX AVE SPES VNICA "Hail! O cross, our only hope." As for the legends suggested by the reverse, the liturgical, being taken from the Sarium *Breviary*, for the Feast of the Invention (May 3rd) and the Exaltation (September 14th) of the Cross. With the slighest alteration, *Per tuam crucem salva nos, Christe Redemptor*, is a response, while *O crux, ave spes unica* occurs there as the first line of the seventh verse of the famous hymn *Vexilla Regis prodeunt* [1].

The angels of the first coinage of this reign have for the most part no mint-mark; one, however, has the cinquefoil on the obverse, and another, with the same mint-mark on the obverse, has the escallop on the reverse. The reverse legend has the open E or Ɛ, like a Ɜ (three) reversed, and always with rosette stops (*see* No. 27). This coin is undoubtedly transitional between the first and second coinages of Henry — the obverse being that of his first and the reverse that of the beginning of his second coinage. It has the same legend at the ryals.

Silver.

The early groats and half-groats of Henry VII. exhibit the usual obverse legend hENRIC DI GRA, etc., with reverse legend POSVI DEVM (or DEV) ADIVTOR (or ADIVTORE) MEVM (or MEV), CIVITAS LONDON, "I have taken God as my helper." This motto continued in use in England until the beginning of the 17th century, so that it was employed in this country for at least 270 years.

On some of the coins of this reign, the name of the king is followed by Roman numerals (*see* Third Issue) or by the word SEPTIM [2]. In regard to peculiarities on these coins, the name of the king is spelt hENRIC followed by the mark of contraction which occurs only in the third coinage, and is peculiar, being a semicolen with the comma which is uppermost, like the figure 9. This peculiar comma also occurs after certain words in the legend on the profile coins of James I, and Henry VIII. It has been interpreted [3] as a mark of abbreviation for VS, *i. e.*, hENRICVS. This seems to me the only explanation of it possible.

Half-groats, pennies and halfpennies are found with the same legends, only abbreviated in proportion to the circumference available on the coin. In the later pennies the word FRAN is omitted. The rare shilling reads as the groats of the third issue.

References, etc.

In the list which follows I have throughout given a reference to the collection where the coin is to be found, or the work where it is published or engraved, as I am of opinion that it offords much assistance is studying the coins.

In concluding this review of the coinage of Henry VII., I must express my indebtedness to Messrs. W. J. Andrews, J. B. S. Mac Ilwaine, E. H. Waters, J. Tennant, H. W. Monckton, Dr. A. J. Evans S. M. Spink and many others.

Finally, let me add, that I shall be glad to be advised (through Messrs. Spink and Son, Ltd.) of any errors or omissions that may be found by readers of the *Numismatic Circular*, while this list is passing through the press, in order that the Catalogue may be as complete as possible in the light of recent research.

The endeavour has been to produce a list which, while being useful to the numismatist, may also be instructive to those desirous of closely examining particular points of the coins themselves. With this object in view it has been though better to incur risk of erring on the side of fulness rather than omit anything which might be useful. The coins are numbered consecutively for convenience of reference.

DESCRIPTION OF THE COINS.

GOLD

First Coinage. 1485-1489.

Ryal.

1. *Obv.* No mm. hEN·RIC·DI·GRA·REX·ANGL·Ʒ·FRANC· DNS·IBAR Trefoil stops. King wearing arched crown, holding in r. hand sword, in l. shield bearing quartered arms of England and

1. The Responsony at 2nd Vespers runs :
V. *Mihi autem absit gloriari nisi in cruce Domini nostri Jesu Christi.*
R. *Per Tuam crucem salva nos, Christe Redemptor, qui mortem nostram moriendo destruxisti et vitam resurgendo reparasti, Alleluya.*

1. This is the first occurrence of such marks of distinction on English coins, with the exception of a few pennies of Henry III.

(*To be continued.*)

AN EXTREMELY RARE PROOF CROWN OF QUEEN VICTORIA.

O. — Legend: — VICTORIA DEI GRATIA. Head and neck of the Queen in profile, looking to the left. On the truncation of the neck: W.WYON, R.A.; below it the date, 1879. A decorated diadem and an ornamented fillet bind the wavy hair, which is parted on the forehead, carried over the top of the ear, the ends of the locks being plaited, and gracefully collected into a knot behind the head. The whole within an ornamented rim.

R. — Legend: — BRITANNIARUM REGINA FID: DEF: The Arms of the United Kingdom contained in a plain square shield, surmounted by a Royal crown. The shield bears the Arms of England in the first and fourth quarters, Scotland in the second, and Ireland in the third. The colours are heraldically represented. A branch of laurel on each side of the shield, the lower portions of the branches being crossed below it, and tied together by ribbon, formed into a bow, with hanging ends. Beneath the crossed branches, and between two ornaments, the rose, thistle, and shamrock, united. The whole within an ornamented rim.
E. — Plain.

HENRY GARSIDE.

AN EXTREMELY RARE PATTERN SIXPENCE OF QUENN VICTORIA.

An extremely rare pattern sixpence struck in silver, and dated 1887, is in my possession. I believe there was no example of the type either in the Montagu or Murdoch collections, but I have seen a similar piece in the collection in the Museum of the Royal Mint, London. As I am not aware of the existence of any additional specimens, I thought the subjoined description and the accompanying illustrations of the obverse and reverse would be of interest to some of the readers of the "Numismatic Circular".

O. — Legend: — VICTORIA DEI GRATIA BRITT: REGINA F: D: Bust of the Queen, in profile, looking to the left. Below the truncation of the bust: — J. E. B. Her Majesty is represented wearing a widow's cap decorated with frilling and surmounted by the Imperial crown. On the ermine bodice which is adorned with a tucker, the Ribbon of the Most Noble Order of the Garter. The Badge of the Imperial Order of the Crown of India and a portion of The Star of the Garter are shown on the left breast. The hair is parted on the forehead and carried behind the ear to the rear of the head. A necklace of beads, with a pendant in front, round the neck. An eardrop is suspended from the left ear. From the back of the head depends drapery ornamented with a lace border and arranged in folds, which fall on the shoulders. The whole within an ornamented rim.

R. — On The Garter, which is heraldically coloured, and inscribed: — HONI SOIT QUI MAL Y PENSE, the Arms of the United Kingdom contained in a modified form of the plain square Tudor shield, surmounted by an Imperial crown. The shield bears the Arms of England in the first and fourth quarters, Scotland in the second and Ireland in the third. The colours are heraldically expressed. Above the Garter, the date, 1887, bisected by the Imperial crown. Below the Garter: — SIX PENCE. The whole within an ornamented rim.
E. — Milled with straight lines at right angles to the face of the coin.

HENRY GARSIDE.

SOME COINS OF THE BRITISH EMPIRE.

IMPERIAL.
KING EDWARD VII.
SILVER CROWN.
TYPE I.

The following abbreviations are used in describing the coins: —
O — Obverse.
R — Reverse.
E — Edge.

CROWN, 1902.

O. — Legend: — EDWARDVS VII DEI GRA: BRITT: OMN: REX FID: DEF: IND: IMP: Head and neck of the King and Emperor in profile, bare, and looking to the right. The truncation of the neck is plain, below it: — DES. The whole within an ornamented rim.

R. — A representation of Saint George attacking the Dragon. The saintly knight is mounted on horseback, his left hand holding the bridle rein. He is shown wearing a crested helmet with a tail of hair floating behind. A chlamys flowing freely at the back of Saint George is fastened in front by a fibula. On the right shoulder a balteus for suspending the gladius. The feet and lower portions of the legs are protected by armour, except that the toes are shown uncovered. The horse apparently half advances, half shrinks, from the fabulous animal at its feet. Saint George has broken his lance by wounding the winged monster, and a portion of it remains in its body, the other part is shown lying upon the ground. The dragon is represented preparing itself for a deadly spring, and Saint George is about to slay it with the gladius he holds in his right hand. In the exergue, the date, 1902, and the letters: — B.P. The whole within a linear circle, encircled by an ornamented rim.

E. — Inscribed: — DECUS ET TUTAMEN * ANNO REGNI II *

REVIEWS.

Catalogue des médailles commémoratives de chemins de fer de tous les pays. Supplément. By Auguste Moyaux. Bruxelles, 1910. Large 4to.

Price: 6/.

Five years have elapsed since the publication of M. Moyaux's Catalogue of Railway medals, which gives the description of about 500 pieces. Since that time the author has been able to add 200 more to his list, mainly from the collections of Messrs. G. W. de Potter, R. Warocqué, Edm. Peny, Ritter A. von Loehr, and others.

The present supplement offers a special interest to English collectors as it contains the description of over 90 English Railway medals and fifteen British Colonial ones.

Specialists of this series will find M. Moyaux's volume useful and interesting. It is to be regretted that there are not more collectors of medals who specialise in certain series for the sake of publishing catalogues of their collections to the general advancement of knowledge and benefit of science.

Die Münzensammlung des Stiftes Schotten in Wien. I Band. Römische Münzen. By Dr Albert Hübl, professor at the K. K. Schottengymnasium, XII, 344 pp., 4to. Vienna and Leipzig, 1910.

Price: 20 Kr. = 17/.

This Catalogue of the Roman coins preserved in the "Stift Schotten" is dedicated to Herrn Leopold Rost, superior abbot of the Institute, who continued the work begun in 1866 by Norbert Dechant of classifying the collection, which is one of the best in Vienna.

The collection is a very old one, but it owes its increase and present importance to the splendid gift of the numismatic cabinet of Franz von Timoni, Austrian consul-general to the republic of Ragusa.

The later Roman series described in the present volume are arranged on the new principles of classification under mints, inaugurated by the Viennese numismatists Theodor Rohde, Oberst lieut. O. von Vötter, and others.

The catalogue gives the description of 591 coins of the Roman Republic, 3042 of Roman Imperial times and 1145 Byzantine coins.

In the introduction the author supplies an interesting historical account of the collection under his charge.

The book is beautifully printed and forms a handsome volume, deserving a place in every numismatic library.

***

The Coins and tokens of Nova Scotia. By Eugene G. Courteau M.D. 30 pp. 7 plates. Large 8vo. St. Jacques, Out.

Price: 10 s.

We have received from Dr Eugene G. Courteau a copy of his new book on the Coins and Tokens of Nova Scotia. The principle upon which the coins &c are arranged is an exceedingly good one; every piece of the 115 in the series is minutely described and about 70 are illustrated (obverse and reverse) upon VII plates by photo-process, from which, by comparison, it is easy to give any individual piece its proper number in the series.

Dr Courteau is a numismatist who practically shows his love for the science in producing this work; first by his labour in getting together and classifying the coins and tokens; second, by setting out the results of his careful study of the types and varieties in a lucid and interesting manner; and, third, by publishing at considerable expense his complete monograph that fellow collectors may reap the benefit of his experience and research.

We recommend this work to all collectors who aim at getting anything like a complete set of the coins and tokens of Nova Scotia; if they are busy men it will save them much time, and if men of leisure it will help them to discover, it may be, varieties that have escaped even the keen eye of the author or perhaps that have never come under his notice at all. He does not claim that his work is perfect and so is open to receive descriptions of any pieces that appear to differ from those described.

Another point to mention is that the relative rarity of the types is indicated by figures up to 10 (which stands for *unique*) and thus forms an index to value as well.

Histoire numismatique du comté puis duché de Luxembourg et de ses fiefs. Abbaye d'Echternach. Comté de Chiny. Seigneuries de Moiry, de Schönecken et de Saint-Vith. Comté de Salm en Ardenne. Seigneuries d'Orchimont. Terre-franche de Cugnon (Mémoires publiés par la Classe des lettres et des sciences morales et politiques de l'Académie royale de Belgique. Collection in-4°. Deuxième série, tome V, 1910). Par Ed. Bernays et Jules Vannérus. Bruxelles, 1910, 802 pp., in-4° et 29 planches lithographiées.

Price: £ 2.10.0.

Dr. Jur. Ed. Bernays, whose name is not unknown to readers of the *Numismatic Circular*, as a collector of foreign, so called "counterfeit" Sterlings, and who has written numerous important memoirs on these, is joint-author, with M. Jules Vannérus, state-archivist at Antwerp, of the present "Numismatic History of the County and later Duchy of Luxemburg".

Luxemburg, at the time of its fullest extension, comprized not only the actual Grand Duchy, but also the Belgian province of that name, the northern portion of the present German Lorraine with Diedenhofen (or Thionville) and a small district (St. Vith), which is now incorporated with the Prussian province of the Rhine. The rulers of Luxemburg imitated in part the coinages of their neighbours, which is easily accounted for by the geographical situation of the country. They also issued currency in conjunction with Treves, Lorraine, Bar, and with Namur.

The florins of John the Blind, first introduced in Bohemia in 1325 and coined by the Lombards, are henceforth to be classified under Bohemia, and not Luxemburg, at any rate those with the particular mint-marks of a Bohemian lion, or crown, or helmet. It is not however an impossibility that Florins were also coined in Luxemburg, as we get some of Flanders, Hainault, the county of Looz, Brabant, &c.

Prof. Paul Joseph tells us in his review of the present monograph that he has given up the attribution of the KAROLV — Florins (n° 120) to the German King Charles IV and has accepted the prevailing opinion that they belong to Hungary. On the other hand n° 127 with the mint-mark, an eagle, might be given to a German mint.

The result of Messrs Bernays and Vannérus's work is solid and the outcome of years of painstaking labour and research. The archives have been thoroughly investigated for official records in connection with the coinage; these documents are reproduced in-extenso, thus extending the usefulness of the work to the historian, the social-oeconomist, the archaeologist and politician.

To form an idea of the scope of this 'Numismatic History of Luxemburg', we may refer to its predecessors. In 1880 N. van Werveke published his "Catalogue descriptif des monnaies luxembourgeoises, conservées au Musée de Luxembourg", containing the description of 289 coins, with two documents and an Index, forming together, a volume of 50 pages. Raymond Serrure in 1893 issued his "Essai de numismatique luxembourgoise", a book of 226 pages, with a catalogue of 272 coins, accompanied by 222 engravings in the text, a number of official documents and historical annotations. The present 'Histoire' forms a large Quarto of 202 pp. with XXIX plates, and ranks among the best treatises on local numismatics which have seen the light in the last few years.

NUMISMATIC SOCIETIES, MUSEUMS, &c.

ROYAL NUMISMATIC SOCIETY.

December 15. — Sir Henry H. Howorth, K.C.I E., President, in the Chair. Messrs. F. T. Barrett, J. E. Cree, W. Gunn, D. F. Howorth, B. C. Chetty and T. Nesmith were elected Fellows of the Society, and Mr. F. E. Burton J. P. was proposed for election.

Mr. F. A. Walters, F.S.A., exhibited a light groat of Henry IV, with the name hENRIC punched over RICARD, which strengthens the contention that the early or heavy groats of Henry IV. continued to bear the name of Richard II.

Mr. H. Symonds showed a rare bronze coin of Magna Urbica with reverse VENVS GENETRIX (Coh., n° 11) found in Dorsetshire, and a specimen of the base-metal touch piece of Charles I, pierced for suspension. Mr. H. Garside exhibited a very rare pattern sixpence of 1887 having the date above and the value in words below the usual reverse design. Mr. W. R. Hubbard showed a denarius of C. Serveilius, 63 B.C. restruck IMP. VES. by Vespasian, and an unpublished large bronze coin of Hierapolis in Phrygia of the second century A.D. with obverse. Bust of the Senate IEPACVN KAHTOS; and reverse, Hercules sacrificing at an altar. Rev. E. Rogers showed a paper facsimile of a Mexican dollar used at funerals in China.

Mr. Henry Symonds read a paper on "The Trial of the Pyx, the Mint-Accounts and Mint-marks of Charles I".

The proving of the coinage by assay was first regulated by an indenture of Edward III and the custom followed at varying intervals from that time onward.

The standard plates were kept in the Chapel of the Pyx in the Cloisters of Westminster Abbey, which is popularly supposed to have been the place of trial, but there is direct evidence to show that at least from 1527 to 1640 the trial took place in the Star Chamber in the old Wesminster Palace. The Tower mint alone appears to have been subject to trial; the country mints do not seem to have submitted their productions to be tested. Mr. Symonds then quoted from the records the warrant to summon a jury, a report of the proceedings and the verdict on the trial of the Pyx for 1631. The jury were goldsmiths of London, and a number of Privy Councillors were also present. The mint mark was changed after each Trial, sometimes oftener. A table was given for the reign of Charles I, showing the dates of the Trial, the mint marks adopted, the denominations and amount in the pyx, from which the amount issued each year could be judged. Mr. Symonds proceeded to give a number of interesting quotations from the mint accounts, one of the most important of which was an allowance for payment "5500 tokens of 2d. each used for the healing of the King's evil". This proves that Charles I. used base-metal touch pieces, and no doubt the pieces described in Med. III, Pl. XXXIII, 23. It was also established that Nicholas Briot never was chief engraver to the mint, and that he died in London about the end of 1646. The President, Miss Farquhar, and Col. Morrieson also spoke.

Mr. J. G. Milne read a paper on "Alexandrian Tetradrachms of Tiberius" from a recent find. Besides one coin of Ptolemy II, the hoard contained 61 coins of Ptolemy XIII, and 136 of the seventh year of Tiberius, soon after which it must have been buried.

Ptolemaic tetradrachms are known to have continued in circulation till quite late times, but it appears that those of Tiberius did not. A remarkable feature about the coins in this hoard was the fact that the weights varied from $5\frac{1}{2}$ to $13\frac{1}{2}$ grains. No explanation of this could be given, as an analysis revealed no corresponding difference in the quantity of silver. The indifferences of the moneyers to weights may be seen from the fact that two specimens from the same obverse and reverse dies weighed 8.14 and 5.54 grammes respectively. Great carelessness was also shown in the execution of the dies. The workmanship of the reverse dies being much inferior to that of the obverse.

The explanation of the latter fact appears to be that the reverse dies wore out much more quickly than those for the obverse, so that less trouble was spent on their preparation.

***

BRITISH NUMISMATIC.

Nov. 30. — *Annual Meeting*. — Mr. Carlyon-Britton, President, in the chair. — La Bibliothèque d'Art et d'Archéologie, Brigade-Surgeon Lieut.-Col. H. M. Morgan, and Messrs. John W. Aitken, G. W. Barber, B. L. Belden, and J. M. Dent were elected to membership. — Officers and Council for 1911 were elected as follows : *President*, Mr. Carlyon-Britton; *Vice-Presidents*, Lord Grantley, Lord Peckover of Wisbech, and Messrs. L. A. Lawrence, Bernard Roth, Max Rosenheim, and J. Sanford Saltus; *Director*, Mr. Shirley Fox; *Treasurer*, Mr. A. C. Hutchins; *Librarian*, Lieut.-Col. H. W. Morrieson; *Secretary*, Mr. W. J. Andrew; *Council*, Miss H. Farquhar, Major W. J. Freer, Dr. Stanley Bousfield, Dr. P. Nelson, and Messrs. G. R. Askwith, P. J. D. Baldwin, T. Bearman, G. Thorn Drury, Oswald Fitch, Lionel L. Fletcher, Mellor Lumb, W. Beresford Smith, S. M. Spink, H. W. Taffs, and F. A. Walters.

The Gold Medal, founded by Mr. J. S. Saltus for the contributor of the paper in the Society's *Journal* which in the opinion of the Members was the best in the interests of numismatic science, was awarded by the ballot of the members generally to Mr. Carlyon-Britton, and will be presented at the next meeting.

The Director, Mr. Shirley Fox, gave a brief account of the work accomplished by the Research Committee during the year. They had now obtained almost complete accounts of the amounts of bullion coined from the beginning of the reign of Henry III. to the death of Richard III., and had accumulated material with special reference to the "long-cross" coinage and the reigns of the first three Edwards. Amongst the more important facts which his brother. Mr. Earle Fox, and he had been able to establish were : (1) Identification of the latest variety of the "short-cross" coinage. (2) Date of the closing of the provincial mints and introduction of the sceptre type in the "long-cross" coinage. (3) Issue by Edward I., for several years after his accession, of "long-cross" coins bearing his father's name. (4) Identification and full history of Edward I.'s "new money" of 1279, which included, for the first time, groats and round farthings. (5) History of the great coinage of 1300. (6) Issue of money in the palatinate of Durham by the King's Receiver whenever the temporalities were in the King's hands, and identification of several groups of *sede vacante* coins. (7) Separation of the coins of Edward I. and Edward II. The lecturer explained that it would be some time before all the above matters could be treated in detail in the Society's *Journal*, but, in collaboration with his brother, he hoped to contribute instalments from year to year.

Mr. Fox afterwards gave a short address, illustrated by drawings on the blackboard, on the form of the crown on Plantagenet and the earliest Tudor coins, which was supplemented by remarks and drawings by Mr. F. A. Walters.

Exhibitions. — By Mr. Fox, a large series of coins showing the evolution of the king's crown. By Dr. Nelson, drawing from late twelfth-century glass of a square-shaped crown circular to that depicted on some of the Anglo-Saxon and Norman coins. By Mr. S. M. Spink, a fine specimen of the rare sovereign of Elizabeth with mint-mark "hand" for the years 1590-92; pennies of Edward the Confessor of the sovereign type on which the cross on the orb is omitted (Winchester mint), and the birds represented as martlets by the absence of legs and feet (Gloucester mint); a large badge in silver and old paste brilliants of the Loyal Association, 1745; and casts of the quarter-angel of James I., which until recently had been believed to be non-existent. By Mr. Henry Garside, the rare pattern sixpence for 1887.

VEREIN FÜR MUNZKUNDE NURNBERG.

In der am 5. Dezember 1910 abgehaltenen Sitzung vom '*Verein für Münzkunde Nürnberg* (E. V.)' teilte der Vorsitzende mit, dass die Prägung der Handelsvorstands-Medaille gesichert ist, gab über einen in Fürth gemachten Münzfund einige Notizen und machte

auf die bevorstehende Hauptversammlung aufmerksam. Den Vortrag des Abends hatte Herr Kaufmann P. Kunth übernommen. In allgemein fesselnder Weise sprach der Herr Vortragende über das Thema: 'Zur Münzgeschichte des siebenjährigen Krieges.' Bei der Fülle des Materials behandelte der Herr Redner einstweilen nur die Zeit bis 1760, das weitere sich auf einen Vortrag im nächsten Jahre vorbehaltend. Es war von Interesse für die Anwesenden, die Entwicklung des preussischen Münzwesens zur unaufhaltsamen Verschlechterung und schweren Landesschädigung auf Grund archivalischen Materials mitanzusehen. Zuerst die einander scharf bekämpfenden 'Münzentrepreneurs', dann der König selbst durch seine Resolutionen — alles half getreulich zusammen. Und dabei würden in diesem Vortrag erst die Nachprägungen fremder Münzsorten im eigenen Lande vorgeführt! Herr Dr. Will legte eine stattliche Reihe der bekannten Halbbrakteaten (Wittelsbach 1—7) mit bisher unbekannten Varianten vor und erläuterte dieselben. Weiter legte er einen Händleinspfennig mit deutlichem V.... in der Umschrift aus dem Ergersheimer Fund vor, welcher mit einem aus dem Schillingsförster mit V. L. ... unbedingt für Ulm in Anspruch zu nehmen ist. Weiter brachte derselbe Herr noch eine ächte chinesische Schwertmünze zur Vorlage. Herr Stahl sr. legte den Nürnberger Taler 1663 und das Gold-Unicum 1687 mit dem schreitendem Engel vor und zeigte, dass die Reversseite mit der Stadt der gleiche Stempel ist. Herr Hummel brachte vier neue schöne Personenmedaillen, Herr Frankenbacher drei Bleiabschläge unbestimmter Herkunft, Herr Gebert vier verschiedene Denkmünzen, Herr Perge die beiden Industrievereins-Denkmünzen, die Herren König und Köhler militärische Denkmünzen, Herr A. Müller verschiedene Sterbmünzen.

FINDS

Un propriétaire des environs de Perpignan, travaillant à sa vigne, a mis à jour un pot de terre ancien contenant dans une bourse plus de 600 piécettes de formes tout à fait irrégulières. La plupart paraissent être d'un alliage d'argent et de cuivre. Cette monnaie date de plus de 2000 ans. Sur le nombre, treize deniers ou demi-deniers de l'époque romaine paraissent en argent pur et sont très bien conservés.

La frappe en est parfaite et, d'après les effigies, fort ancienne: Lupus Rutilius, général et jurisconsulte romain, vivait environ 120 ans avant J. C. Cneius Norbanus, partisan de Marius, 108 ans avant J.-C. Caïus Vibius Pansa, consul romain, était un lieutenant de César à l'époque de la Gaule. Une pièce d'Auguste, empereur romain, a été frappée en 28 avant J.-C. Deux pièces portant l'effigie de l'Imperator sont postérieures à Jules César et datent du commencement de notre ère.

CORRESPONDENCE

The Editor,
The Numismatic Circular

Dear Sir,

Having been a collector of Hertfordshire seventeenth Century Tokens for some years, I have come across several unpublished Tokens, & some varieties of those mentioned in Boyne's Standard work.

It occurred to me that a new list of the Tokens of this county might be of use to collectors.

If you would insert this letter in the "Circular" I should be very much obliged, as I am anxious to get into touch with collectors of Hertfordshire Tokens. I have no doubt that many readers of your paper could assist me, and I should be very glad to receive any information I can.

I am
Dear Sir
Yours truly
W. L.
C/o The Editors

OBITUARY

MR. J. VERITY.

Mr. James Verity, of High Bank, The Drive, Roudhay, Leeds, died on Monday, December 26th 1910, in The Nursing Home, Queen's Road, Southport, Lancashire. Mr. Verity was born in Pudsey, Yorkshire, in the year 1845, and was formerly in business in Earlsheaton, near Dewsbury. He was elected a Member of the Numismatic Society of London in 1874, and was also a Member of the British Numismatic Society.

UTILE DULCI.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

VARIA

DER VERUNGLÜCKTE JUBILÄUMSTALER.

Berlin. Die sonst nach allen Richtungen so schön verlaufene Universitätsfeier hat nun doch einen Misston oder richtiger gesagt einen Missklang hervorgebracht, und zwar durch die *Prägung der Jubiläumstaler*. Dies neueste Erzeugnis der Berliner Münze wird auf den ersten Blick meist für eine jener minderwertigen Medaillen gehalten, wie sie bei Schützenfesten und ähnlichen Veranstaltungen für wenige Groschen zu kaufen sind. Die eine Seite trägt die Doppelköpfe von Friedrich Wilhelm III. und unserm jetzigen Kaiser, die andere wird ganz von einem ausgesprochen blechern anmutenden Reichsadler ausgefüllt. Der Druck ist unklar und verschwommen und das ganze Erzeugnis macht einen unbegreiflich unechten Eindruck. Sogar einen schweren münztechnischen Fehler hat man sich nicht gespart. Alle andern Münzen werden nämlich immer so geprägt, dass, wenn man zwei aufeinanderlegt, sie sich ganz genau decken und dass Rand fest auf Rand liegt. Bei dem Jubiläumstaler sind aber die Köpfe der beiden Monarchen so hoch im Relief gehalten, dass die Ränder niemals in ihrer ganzen Rundung glatt aufeinander aufliegen können. Wenn man also, wie es im Grossverkehr üblich ist, die Stücke in Rollen zusammenpackt, so bilden sie nicht einen feststehenden Zylinder, sondern sehen aus wie eine leicht gekrümmte Wurst. Es ist ein Glück, dass unsere Dreimarkstücke nicht über die Grenzen des Landes hinausgehen und dass daher nur diejenigen Ausländer, die nach Deutschland kommen, nur zu berechtigten Anlass haben werden, sich über die Geschmacklosigkeit der deutschen amtlichen Prägekunst lustig zu machen. Hoffentlich findet dieser Jubiläumstaler auch in Deutschland keine grosse Verbreitung, und am besten wäre es, man würfe das Scheusal in die Wolfsschlucht.

Le Cabinet des médailles de Munich s'est enrichi, pendant l'exercice 1909-1910, de 7.057 monnaies, gemmes, médailles, plaquettes, dont 6.702 pièces allant depuis le moyen âge jusqu'à nos jours. Ce chiffre élevé s'explique par le fait que toutes les découvertes de « trésors » reviennent directement à cette collection royale. Le reste est acquis à l'aide de généreuses donations.

Parmi les pièces les plus précieuses, le compte rendu de M. le Dr G. Habich, directeur, mentionne un modèle en pierre du prince-électeur Otto-Henri, du Palatinat, et une petite merveille d'art, que M. Habich croit être de travail flamand-bourguignon, la médaille d'Antoine de Bourgogne, le demi-frère de Charles le Téméraire. Parmi les antiques, il y a quelques statères d'argent du Ve siècle av. J.-C., trouvés en 1907 dans l'île de Milo; un demi-statère d'or, frappé en Sicile, du roi Pyrrhus d'Épire. Les gemmes se sont enrichies d'un cylindre-cachet babylonien en lapis-lazzuli, qui remonte à environ 2400 av. J.-C., et d'un original particulièrement heureux des meilleures pierres taillées grecques : une chalcédoine portant une grue aux ailes éployées, attribué à quelque artiste de l'entourage de Dexamenos, vers 400 av. J.-C.

Le Cabinet des médailles a en outre le bon esprit de s'intéresser au renouveau moderne de l'art des tailles et des frappes, et de réunir la collection assez complète des meilleures œuvres contemporaines. En 1909, il avait même ouvert un concours de médailles d'art qui avait donné d'assez bons résultats.

ADVERTISEMENTS

JUST ISSUED.

Aspects of Death in Art. By F. PARKES WEBER, M. A., M. D., Fellow of the Society of Antiquaries and of the Royal Numismatic Society. With 58 Figures. 8vo, cloth.

The book is intended to be an essay, not on the iconography of death, but on the mental attitudes towards the idea of death, and the various ways in which the idea of death has, or may be supposed to have, affected the living individual — his mental and physical state, and especially the direction and force of his action, — as illustrated by minor works of art, especially medals, engraved gems, jewels, etc. The book is divided into four parts. The first is meant to serve as an introduction to the whole subject. The second is an arrangement and analysis of the various possible aspects of death and the mental attitudes towards the idea of death, intended to show the headings under which the illustrative works of art may be grouped. The third deals with the medals and coins, and in the fourth the engraved gems, finger-rings, jewels, etc., bearing on the subject, are described.

[PUBLISHED BY G. FISHER UNWIN. LONDON].

RECENTLY ISSUED.

COMMON GREEK COINS

BY THE REV. A. W. HANDS

8vo. — 170 pp. — Illustrated. **Price : 5/- nett.**

" It must not be thought that " Common Greek Coins " is merely a catalogue of ancient Greek money, for it is far more than this. The describing of the coins is utilised to give a cleverly condensed, but most interesting, account of Greek history and mythology, commerce and progress in civilisation. The colonies and conquests of the Hellenes, their foolish feuds and transient friendships all come under survey and comment, and the usually erudite style of Greek numismatists is transformed into a brilliant and most readable essay upon the ancient Greek world. This first volume is provided with a useful index and catalogues of the monograms, initials, symbols, and various mint marks are duly set forth to the various chapters, assisted by numerous engravings of all the more important types. "

(*The Egyptian Gazette.*)

COINS OF MAGNA GRAECIA

BY THE REV. A. W. HANDS.

(The Coinage of the Greek Colonies of Southern Italy).

1. Vol., 8vo, paper covers, 336 pp., with numerous illustrations in the text, one Map and a Chart.

" The Coins of Magna Græcia " contains information that certainly cannot be found elsewhere in English. A great deal more has been done than a mere digest of Sambon, Evans, and Lenormant, — there is plenty of independent work. English Collectors of Greek coins ought to be very grateful for the collection of so much good material, and most especially for the arrangement of everything in chronological periods, which are so much more satisfactory than the system of the volume on Italy of the British Museum Catalogue, the only volume that was accessible hitherto. ".

C. W. C. OMAN.

Price : 7/6 net.

FOR COLLECTORS OF MODERATE MEANS.

" Coins of Magna Græcia", by the Rev. A. W. Hands (London, Spink and Son Limited, 17 and 18, Piccadilly, W.).

Mr. Hands deprecates the notion of being mistaken for an expert, but he is a fellow of the Royal Numismatic Society, and has shown already in his work on " Common Greek Coins " how attractive he can make the subject for experienced collectors no less than for beginners. In this new work he deals with the coins of Magna Graecia — the Greek colonies scattered over the foot of Italy — as he had dealt previously with the coins of Greece; and he has such a wealth of illustration at his command that, whilst he treats the coinage with detail and exactitude, his readers learn both history and geography, and are entertained with myth and legend. Mr. Hands has specially in view the requirements of collectors of modest means, and he assures us that large numbers of these coins may be obtained at a very small cost. The work begins with the history and coinage of Tarentum, to which no less than 51 pages are devoted, but then much of the information applies no less to other colonies. The coinage of Metapontum has 29 pages, and many examples of the coins will make readers long to get at the originals. Twenty-one

colonies in all are dealt with, and there is also a carefully-written essay on the weight standards, to which is appended a diagrammatic chart. We may add that the book is beautifully printed, well indexed, and has a first-rate map.

(*Sheffield Advertiser.*)

***

It seems to me to be just the sort of book to interest people in the subject. I remember that I was always repelled from Greek and Roman numismatics by the dulness of the exponents. It all seemed to me so far away and remote from human interest.

Your method of illuminating the history by means of the art and imagination illustrated by the coin is the right way.

I hope the book will be as successful as it deserves to be. It represents a vast amount of study and research.

READY SHORTLY

THE

MODERN COPPER COINS
(17th to 19th centuries)

OF THE

MUHAMMADANS

BY W. H. VALENTINE.

This work, which is in the press, is designed to popularise the study of Muhammadan copper coins, and is the outcome of a student's endeavour to identify and arrange them. To this end the author has made faithful drawings of all the specimens of this class of coin that he has been able to find. Commencing with Turkey, the reader is taken numismatically through Egypt, Tripoli, Tunis, Algiers, and Morocco, to Nigeria (for which place the Royal Mint has recently struck a new coinage) and from thence back to East Africa and Arabia. Crossing to Europe, the tour continues throught the Crimea, Georgia, Persia, Afghanistan, Bukhara, and terminates in Chinese Turkistan.

Upwards of 900 coins struck during the last three centuries are illustrated, and the Arabic inscriptions carefully transliterated and explained. To assist in the classification of the coins, a geographical arrangement has been adopted, and six coloured maps have been added to enable the reader to locate the various mints.

The interesting field covered by this work has never as yet been dealt with, possibly on account of the great expense involved. It has been suggested that this may be lessened by using the line block process, and printing the major portion in manuscript form. The author hopes that sufficient promises of support will be received to enable the book to be published at a price not exceeding 10/6 a copy, and he trusts that numismatists generally will give the project a hearty support.

Illustrated specimen-page with Order-form, on application to Spink and Son, Ltd.

JUST ACQUIRED.

DESCRIPTION HISTORIQUE DES MONNAIES FRAPPÉES SOUS L'EMPIRE ROMAIN.

communément appelées médailles impériales.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

SELINUS.

The meaning of the name will depend upon whether we derive it from a Semitic root סלע a rock, or from a Greek root signifying the plant called Selinum.

Those who care to investigate the subject may refer to the work by Dr. Lor. Grasberger "Studien zu den griechischen Ortsnamen", p. 175. If the Greek settlers took possession of a Phoenician trade post and retained the Semitic name, then the city was the Rock city, like Petra of the Edomites, but if the Greek settlers founded their colony on a new site then it is more likely that the name given to their city had reference to the plant growing there in abundance.

The site of Selinus, founded about the year 628 B.C., is on the South West coast, about twenty-eight miles East of Lilybaeum, and about forty-five West of Agrigentum.

Thucydides (VI 4) tells us that in 728 B.C. a band of Greeks from Megara in Greece settled first at Trotilus, then at Leontini, and being driven out thence, founded Thapsus, but being expelled they settled at Megara the Hyblaean, Hyblo, a Sicel king having given up the place to them, and led them in. After inhabiting it two hundred and forty-five years they were expelled from the city and country by Gelo, tyrant of Syracuse. Before their expulsion, however, a hundred years after their settlement, they founded Selinus, having sent Pamillus for the purpose, who came from Megara, their mother-city, and joined them in founding it." The mother land of Megara being the northern half of the Corinthian isthmus was able to trade both in the western and eastern seas. The old Megara was only 25 miles from Corinth, and 20 miles from Athens. Hence the familiarity of the colonists with the use of the wild celery plants as a symbol of victory in the games.

The early settlers of Selinum were in a similar position to those of Himera, each being planted as outposts of Hellas, on the very borders of the lands of Phoenicians, Sikans and Elymians.

When the city of Selinum was founded there were no Greek settlements nearer than Gela distant 90 miles, until 599 B.C. when Aeragas was built.

Strabo does not help us with any account of the early city; he merely says "The Megaræans of Sicily founded Selinus" (VI, 272).

Diodorus Siculus (XIII, 59) gives a different date for the foundation of the city. Speaking of the fall of Selinus under Hannibal he says: "It was thus that the city of the Selinuntines was taken 242 years after its foundation." This implies the year 655 B.C. as the year of the first settlement.

As early as 580 B.C. or about 50 years after its foundation according to Thucydides, the city was engaged in hostilities with Segesta.

The border of the territory of the Selinuntines to the West was the river Mazarus, about 15 miles distant, and the citizens had erected a fort at the mouth of the river mentioned by Diodorus (XIII, 54).

Towards the East the territory extended as far as the river Halycus, or Salso, at the mouth of which the Selinuntines had founded a colony, called Minoa or Heracleia, mentioned by Herodotus (V, 46). About 509 B.C. "there sailed with Dorieus also other Spartans, joint-founders of a Colony, as Thessalus, Parsebates, Celeas, and Euryleon; who on their arrival in Sicily were killed, defeated in battle by the Phoenicians and Egestæans. Euryleon alone survived this disaster, and having collected the survivors of the army, he possessed himself of Minoa, a colony of the Selinuntines, and assisted in liberating the Selinuntines from their monarch Peithagoras, but afterwards when he had removed him, he himself seized the Tyranny of Selinus, and continued monarch for a short time, for the Selinuntines having risen up against him put him to death, though he had taken sanctuary at the altar of the Forensian Zeus" (Διὸς ἀγοραίου βωμοῦ).

The reasons or causes which led this outpost of Hellenism to join the Carthaginians under Hamilcar in his great expedition to Himara are unknown. In the account of the siege of Himera by Diodorus (XI, XXI) we learn how tho Selinuntine cavalry, sent to the assistance of Hamilcar, arrived too late, and how the letters to the Carthaginian leader were intercepted by Gelon.

Selinus may have been visited by many Carthaginian traders, as it was one of the nearest ports in Sicily, and the citizens may have been overawed by the greatness of the preparations made for the invasion, of which they had greater knowledge than the other Greek cities.

The interesting question naturally arises as to whether we may associate the early coins of Selinus with the Tyrant Peithagoras or with Euryleon who succeeded him.

THE TYPES.

The type on the earliest coins of Selinus is a leaf of the wild celery, then as now found in abundance in that neighbourhood. This was chosen as the παρασημα, or town badge, and therefore placed on the coins. The best-known and clearest account of the plant is that given by Pliny (*H. N.*, XIX, VIII).

"Apium, which grows spontaneously in wet places is called Heleoselinum; it has one leaf and is not hirsute. That again which grows in dry places is called Hipposelinum; this has several leaves and is like the Heleoselinum. There is a third kind called oreo selinum with hemlock-like leaves, small root, and with smaller flowers". He then describes the cultivated kinds. The plant on our coins is the Ἑλειοσελινον from ἕλος a marsh, called by the Romans Apium Palustræ, from Apis, a bee, because it was loved by the bees. Linænus (p. 379) called it "Apium graveolens", because of its fragrance so often mentioned by the poets.

Its growth in wet places is thus referred to by Virgil (Georg. IV, 121).

"I might both sing how endive, and banks green with parsley, delight in drinking the rills."

Theophrastus also thus refers to it (lib. VII, 6).

"For the Heleioselinon grows along watercourses, and in marshes, with few leaves and without hairs." Nicander, about 135 A.D, called this plant Ἑλειοθρέπτον = marshbred.

The name σελινον is probably derived from ἑλίσσω, because its leaves are turned round or rolled up or curled over at the edge; some however are inclined to derive σελινον from ἕλος a marsh.

The English Smallage or Smallache comes from the French word "Ache".

It is found in England, and in the "English Botany" by J.-L. Boswell Syme (Vol. IV, p. 99) is thus spoken of: "In its wild state Celery is known in Britain by the name Smallage. In its native ditches it is rank and coarse and is certainly unwholesome, although used by some in flavouring broths or soups."

The cultivation of the plant was introduced to England from Italy in the seventeenth century, and our word Celery is derived from the Italian "Sellari", the plural of "Sellaro", a corruption from Selinon. The cultivation consisted in the covering of the stems with earth to keep them from the light.

Our English word "Parsley" is a corruption of "Petroselinon", a late word for the Hipposelinon. The prefix ἱππο was used to indicate a larger or coarser kind of plant as ἱππο λάπαθον, a coarse kind of sorrel, ἱππο μάραθον, horse fennel, ἱπποφαές, Euphorbia spinosa.

There are illustrations of the wild celery in the old Botanical work by Remberti Dodonaei Mechlinensis, from the celebrated

Plantini press, 1583, p. 683, and also in the translation of that work by Henry Lyte esq., 1578. "A niewe Herbal", p. 606. The valuable MS of Dioscurides called "Codex Aniciæ Julianæ. Vindebonensis" Med. Gr., 1, was photographed in 1906, and contains the oldest drawing of the Apium Palustræ. The MS is of the date 512 A.D.

There is a work by Dr H. O. Lenz, 1859, called "Botanik der alten Griechen und Römer" in which on p. 557 this plant is mentioned and some of the passages in the Classic authors here mentioned are there noted, but not all of them.

Burgon regarded the wild celery (σέλινον) as a religious symbol; however, Mr. G. Macdonald says on p. 95 of "Coin types": "But it is not necessary to have recourse to such an explanation in cases where we know either from ancient writers or from modern travellers that the animal used as a type was a conspicuous feature of the locality on whose coins it is found. Much the same may be said of the plants that are made to do duty as badges. We have spoken of the leaf of wild celery at Selinus, and of the single ear of barley at Metapontum. An illustration that is better than either is the silphium of Cyrene." On p. 124, Mr. Macdonald points out that the survival of the badge as a subsidiary emblem is, it may be pointed out, an argument in favour of the view that they were παράσημα or badges of the city, for this is the only supposition on which their retention would be intelligible, so it is with the selinon leaf at Selinus, the pomegranate at Side, the wolf at Argos, &c."

Plutarch in 'de Pythiæ Oraculis', XII, p. 399F after saying the frog was not the badge or παρασημα of the Corinthians, adds "as the Selinuntines are said once to have dedicated a golden Selinus leaf "and the people of Tenedos the axe".

Here Plutarch clearly regards the leaf of the selinon and the axe as the παρασημα or arms of Selinus and Tenedos respectively.

"The Selinuntines could not have found a more appropriate device. The plant grew in great abundance in their territory.

Its close association with the Isthmian games must have caused it to appeal with peculiar force to the earliest settlers when they found it growing on the banks of the stream beside which they were to make their home.

Whether as the ancients averred, the name (which was common to river and to city) was derived from the plant, or whether as some modern scholars believe, it is rather of Semitic origin, the Selinon leaf would furnish an excellent canting badge."

The golden leaf of Selinon offered by the Selinuntines reminds us of the golden ear of corn sent by the Metapontines as an offering to Delphi (Strabo, VI, 264). Probably the chief reason for the adoption of the plant as a city badge is to be found in its association with the crowns or wreaths of victory given to the victors in the Isthmian and Nemean games. Pindar several times mentions it, as in his fourth Nemean Ode (l. 143) "his brows were green with Corinthian parsley."

Also in his second Isthmian Ode (23): "The Isthmian victory with horses which Poseidon gave to Xenocrates and sent him a wreath of Doric parsley wherewith to bind his hair."

An interesting story is told in Plutarch's life of Timoleon; he says: "As he was ascending a hill... he met some mules loaded with parsley, and his men took it into their heads that it was a bad omen, because we usually crown sepulchres with parsley, and thence the proverb with respect to one dangerously ill. "Such a one has need of nothing but parsley." To deliver them from this superstition, and to remove the panic, Timoleon ordered the troops to halt, and making a speech suitable to the occasion said "that crowns were being brought to them before the victory, and offered themselves of their own accord".

For the Corinthians from all antiquity having looked upon a wreath of parsley as sacred, crowned the victors with it at the Isthmian games... The general having thus spoken took a chaplet of parsley and crowned himself with it first, and then his officers and the common soldiers did the same."

The story is thus told by Diodorus (XVI, LXXIX).

When the troops of Timoleon were ready to attack the Carthaginians, he relates: —

"At that moment some oxen arrived, carrying by chance bundles of Selinum for the camp.

Timoleon cried aloud, I accept this omen of victory, for with selinum the crowns of victors are prepared for the Isthmian games. At these words the soldiers decorated their helmets with crowns of parsley and marched joyously to battle, persuaded that the gods had announced their victory".

We have seen that Linnaeus called the plant "Apium graveolens", and some think it was chosen for chaplets on account of its fragrance. This is spoken of by Theocritus, Ode III: "Soon wilt thou make me rend the wreath in pieces small, the wreath of ivy, dear Amaryllis, that I kept for thee, with rose buds twined, and fragrant parsley". (καὶ εὐέδμοισι σελίνοις).

Not only the victors in races were crowned with parsley, but also those who took the prize for song.

Virgil (Bac. VI) speaks of "Linus, the shepherd of song divine, his locks adorned with flowers and bitter parsley."

And Juvenal (VIII, 226) speaks of Nero "delighting to prostitute his rank by disgraceful dancing on a foreign stage, and earn the parsley of a Græcian crown". Parsley was also used in feasts, perhaps for its fragrance. Horace (Ode I, 36, 16) thus mentions it several times "nor let there be roses wanting to the banquet nor the ever green parsley nor the short lived lily". Again (Ode II, VII, 24) "Who takes care to quickly weave the chaplets of fresh parsley or myrtle", and again (Ode, IV, XI, 3). "I have parsley in my garden for the weaving of chaplets."

Also in Ode, XI, 3. "In the garden of Phyllis there is parsley for the weaving of chaplets."

There is one curious reference to parsley being eaten at a feast in the play by Aristophanes "The Clouds" l. 982 "Nor used it to be allowed when one was dining to take the head of a radish or to snatch from their elders dill or parsley".

COINS OF THE FIRST PERIOD TO 480.

I. Didrachms; ideal weight 134·57. Size ·85 to ·9.
Obv. Selinon leaf, no border or legend.
Rev. Incuse square of twelve divisions, the alternate ones deeper.

II. Obv. Similar to no 1.
Rev. Incuse square of eight divisions, alternate triangles deeper, forming a Maltese cross.
III. Obv. Similar to no 1.
Rev. Incuse square of ten divisions, six deeper.
IV. Obv. Similar to no 1.
Rev. Similar incuse square of sixteen divisions.
V. Obv. Similar to no 1.
Rev. Incuse square of eight divisions separated by double radiating lines.

COINS WITH MARKS OF VALUE.

VI. Didrachm. Same weight and size.
Obv. Selinon leaf: on either side of stalk ●●
Rev. Incuse square of twelve divisions, the alternate ones deeper.
VII. Similar to no VI, but on Reverse Incuse square with ten divisions.
A specimen in B. M. weighs 136·3, unusually heavy.

COINS WITHOUT MARKS OF VALUE.

VIII. Didrachm. Obv. Selinon leaf.
Rev. Selinon leaf in linear square within incuse.
IX. Obv. Selinon leaf.
Rev. Selinon leaf in incuse square: letters in corners Ϟ Ǝ ⅄ I, or Σ E I Λ.

SMALL SILVER COINS.

X. Obols. Weight 9·8. Size ·46.
Obv. Selinon leaf.

CAMARINA.

The Dorian colony at Camarina was founded by settlers from Syracuse in the year 599 B.C. on the South coast of Sicily, at the mouth of the little river Hipparis, now called Camarina. The site is about twenty miles to the east of Gela, and forty miles from Cape Pachynum, the promontory at the south-east angle of Sicily. Near the ancient site is the village called Scoglieti and the modern town of Vittoria.

We cannot expect to find many coins of this first period issued by the citizens of Camarina, because the first city only existed for forty-six years, during which time the only coinage in use was that of Corinth, Athens, or Ægina, and perhaps that of Magna Græcia.

The only coins of Camarina issued during the archaic period are litræ of the second city, and the more important business must have been conducted with the larger coins of Gela, the city which ruled the men of Camarina. The privilege of striking litræ would be granted as not involving the independence of Camarina.

THE FIRST CITY 599-552 B.C.

Thucydides gives the following account of the foundation of the first colony (VI, 5).

"Camarina was in the first instance founded by the Syracusans, just about a hundred and thirty-five years after the building of Syracuse, its founders being Dascon and Menecolus".

THE SECOND CITY 495-485 B.C.

Thucydides goes on: "But the Camarinaeans were driven out, after a war, by the Syracusans, on account of their revolting from them. Some time after, Hippocrates, Tyrant of Gela, having received their territory as a ransom for some Syracusan prisoners, himself acting as founder, resettled Camarina".

The destruction of the first city seems to have taken place in 553 B.C. and the site seems to have been left desolate until 495 B.C., when Hippocrates founded the second city. We have another account of the foundation of this second city by Herodotus (VII, 154): "But the Corinthians and Corcyraeans saved the Syracusans after they had been defeated in battle on the river Helorus, and they saved them having reconciled them on the following terms, that the Syracusans should give up Camarina to Hippocrates, for Camarina originally belonged to the Syracusans". Freeman suggests this defeat of the Syracusans may have helped to bring about the fall of the Geomoroi. In a note in R. W. Macan's "Herodotus" on p. 211 the date of the battle on the Helorus river is given as 492 B.C.

The second city did not last more than ten years, for Gelon who succeeded Hippocrates removed all the citizens of Camarina to Syracuse in 485 B.C. Herodotus (VII, 156) says "Gelon strengthened Syracuse, and that city was everything to him, and it grew up rapidly and flourished. For first of all he removed all the Camarinaeans to Syracuse, and made them citizens, and destroyed the city of Camarina".

THE NAME OF THE CITY.

Several suggestions have been made as to the origin of the name Camarina. Perhaps the most common derivation is that from the Greek word καμάρα, which signifies any object bearing an arched cover or roof, such as a carriage, a boat, a vaulted chamber, or a sewer. If the old Greek cities of the archaic period resembled the Saracenic cities of Sicily, we could understand the application of the term vaulted to them all, but we should ask why any one city should be thus distinguished.

It seems much more probable that the name was derived from a poisonous plant, either the Aconite or the Delphinium consolida, the Larkspur, and this suggestion is supported by ancient evidence. In an old work on Greek Proverbs, published at Antwerp in 1612, we find this idea put forward by Zenobius or Zenodotus (Centuria V, no 18, p. 119).

He is giving notes on the Proverb "μὴ κίνει καμαρίναν" (don't stir Camarina), and he makes two suggestions. One is that the name was that of a marsh or lake which the citizens wished to drain, but having consulted the oracle found they were forbidden to move in the matter. However they disobeyed the oracle and suffered severely in consequence, hence the Proverb, which is found in the Anthologia Graeca (Palat. Cod., IX, 685).

Μὴ κίνει καμαρίναν, ἀκίνητος γὰρ ἀμείνων, μή ποτε κινήσας τὴν μείονα μείζονα θείης. "Don't stir Camarina for it is better left alone, lest when you have stirred it you make bad worse". This legend of the marsh or lake reminds us that on the coins of the city the swans which frequented the lake are represented. But the Proverb may also have regard to the second explanation given by Zenobius: "Some say that Camarina is an evil smelling plant". The Proverb might well be used of such a plant, and indeed very similar words were addressed by a peasant in Sicily to the writer in 1870 when about to gather a poisonous plant.

The words of Zenobius are supported by Dioscorides, a writer of the second century of our era, who says that the (δελφινιον) Delphinium was also called κάμαρας (Noth, 3·84). The reason for this name being given to the plant is stated by Pliny to be the fact that "the roof of the Aconite is small and like unto a sea crab, and therefore some have named it κάμμαρον". The spreading fingerlike roots of the Aconite may well be said to resemble a crab (*H.N.*, XXVII, c. III). Both the Delphinium and the Aconite belong to the Helleboreæ, they are described in "Medical plants" by R. Bentley and H. Trimen (Vol. I, p. 4). Selinus is an example of a city in Sicily being named from a plant growing around its site; there is therefore no unlikelihood of Camarina being also similarly named.

THE OBVERSE TYPE.

From the Obv. type of the archaic coins of Camarina we gather that the chief cult of the citizens was that of Pallas Athene.

Her standing figure appears on the Obv. of the litræ, armed with Helmet and Ægis, and wearing a long chiton and diplois. From the fact that the head of Athene appears also on the bronze coins issued about 245 B.C., we may gather that this cult was long retained at Camarina. The cult of Athene was widely spread in Sicily, for we find her image on the coins of Syracuse, Eryx, Leontini, Morgantina, and Tauromenium. Pindar speaks of Pallas as "the guardian goddess of the city", in his fifth Olympian ode, celebrating a victory gained in 452 B.C.; this shows that the old temple of the first two cities had been either restored or rebuilt.

THE REVERSE TYPE.

The figure of Nike, flying, on these early litrae, is among the earliest representations of that goddess. During this period we also find the same figure on the coins of Syracuse, Catana, Himera, Cossura and Morgantina.

Here, however, there is only the olive-wreath to indicate that the victory may have been connected with the games or races.

On a lake near the city, swans were probably found by the earliest settlers, and were regarded as sacred to the nymph of the lake near which the city was built.

Hence on the earliest litrae we find a swan with the figure of Nike on the reverse.

Later we shall see the nymph depicted on the beautiful didrachms, riding on her sacred bird. On the coins of this first period the nymph does not appear.

The beautiful coins of Clazomenæ, on which a swan appears as

the reverse type, were not issued until much later, between 387 and 300 B.C.

On these coins the swan is associated with the head of Apollo, perhaps in reference to the legend of their dying songs. Confer the beautiful passage in Plato's Phaedo 85, B.

THE COINS OF CAMARINA 495-485 B.C.

I. Litra. Weight 13·7 grains. Size ·45.

Obv. Legend retrograde ꟻЯAMAꓘ.

Pallas standing to left, wearing long chiton with diplois; aegis, and crested helmet, and leaning on her spear, behind her a shield: plain border.

Rev. Nike flying to left wearing long chiton with diplois; at her feet, a swan to left: all within an olive-wreath.

II. Weight 9·4. Size 5.

Obv. KAMARI NAION.

Pallas standing as in no 1, but the shield is in front: plain border.

Rev. Similar to no 1.

The letters R and ꟻ are both found until 420 B.C. R is the earlier form.

In regard to the letter A this form occurs at all periods. Of the other forms A and A the former A is the more ancient, seldom occurring after 478 B.C. A is an early form, but is met with as late as 450 B.C. at Syracuse and Segesta. About 480-460 B.C. the form A was used at Agrigentum and Catana.

The form A was not used until circa 250 B.C., except on a coin of Agyrium of the fourth century, and in some monograms.

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-fiftieth article.

(*Continued from col. 12563.*)

SECCHI, LUIGI (*Ital.*). Contemporary Sculptor and Medallist, residing at Milan, from whom I have been unable to obtain any information as to his artistic career.

At the Brussels "Salon de la Médaille" 1910, he exhibited a Portrait-medal of Camille Boito, 1905, and at the New York International Medallic Exhibition, March 1910: Prof. Carlo Baravelle; — Senator Francesco Brioschi; — Portrait of a young Lady; — Virile portraits; — Senator Giuseppe Colombo; — Comm. Camillo Boito; — Cav. Prof. Luigi Brianzi; — Senator Luca Beltrami; — Senator Luca Beltrami's mother.

SIBILLE, Mme JULIETTE (*French*). Contemporary Sculptor, born at Paris; pupil of Chapu, and P. Dubois. At the Salon of 1892 this artist exhibited a Portrait-medallion of a young Lady.

SECOND, JEAN, surname of **JEAN EVERARDI** or **NICOLAÏ** (*Flem.*). Poet, and Medallist of Malines, born at The Hague, 14. November 1511, died at the early age of 25 on 27. September 1536. His life has been told by Pinchart, Picqué, Raymond Serrure, and again more recently by Dr Simonis, in his *L'Art du Médailleur en Belgique*, 1900 (pp. 35-92).

The artist's father, Nicolas Everaers, was born at Gruysperke, near Middelburg, and from humble circumstances he rose to become President of the Council of Holland. The mother, Elisa Bladelle, was a native of Malines. The youth's first teachers were Jacques Wolcard, of Berg-op-Zoom, and Stenenmeulen, of Malines. Nothing is known of his childhood, but in 1527 he settled at Malines, where he became a favourite in the brilliant circle of dignitaries of the court of Margaret of Austria. At the age of seventeen, he modelled his first medal, a portrait of his father. In 1532, he went to Bourges to study law, and after a year obtained the degree of doctor-in-laws. In 1534, we find him filling the post of secretary to the Cardinal of Toledo in Spain. His stay there was of short duration. The emperor Charles V., to whose ears the fame of the delightful poet had reached, appointed him his private secretary and panegyrist. As such, Second accompanied the emperor in his expedition to Tunis in 1535. The African climate proved injurious to his health, and he was obliged to return to Spain, where however he did not recover his strength. Returning to Tournay, he was taken ill with fever, and died on 27. September 1536.

Kits, who found in 1838 a Portrait medal in lead of Second's mistress Julia, was the first to draw attention to the medallic work of the poet. Picqué in 1873 published his medal of Nicolas Grudius and Anna Cobella. Cumont in 1894 gave a list of eight of his productions, to which Dr Simonis has been adding ten more, at least tentatively.

List of Medals. 1. Nicolas Everaers, the artist's father, with the legend: NICOLAO EVERARDI PATRI IOAN. FILIVS. F. Ꞵ (only known from a later casting); — 2. Another, with the legend: IO. SE. F. MDXXXI (in the collection of M. Mayer-van den Bergh, of Antwerp); — 3. Joachim Ringelbergh, of Antwerp (*Trésor, Med. all.*, Pl. IX, 9); 4. Lucius Brassicanus, poet; — 5. Johannes Dantiscus, bishop of Culm, undated (Simonis, Pl. III, 3; diam. 55 mill.); — 6. Aegidius Buslidius (Gilles Busleiden), poet, undated; — 7. Julia, the artist's first mistress, of Malines (lead portrait-medal). In a letter, dated 8. May 1533, to Jan van Schoorl, a painter of Utrecht, Second mentions that he has just modelled a medal, and that he

Portrait-medal of Erasmus of Rotterdam.

has already done that of Julia; his terms are very explicit: *Rogo sincere judices, vix enim inducor, ut credam judicium quod de Juliae imagine proferebas, fuisse incorruptum*; — 8. Franciscus Craneveld, 1533; honestone; 48 mill. (Hague Museum); — 9. Nicolas Grudius, brother of Second; — 10. Anna Cobella, first wife of Grudius; — 11. Neera, second mistress of Second, whom he met in Spain; — 12. Jean Carondelet, archbishop of Palerme, provost of Saint Donat at Bruges; — 13. Charles V.; Ꞃ. The Pillars of Hercules; modelled in honestone, and bronze (*Trésor, Med. all.*, p. 38, n° 2). This was executed in various sizes; — 14. André Alciat, lawyer of Bourges, Count Palatine; Ꞃ. ΑΝΔΡΟΣ ΔΙΚΑΙΟΥ ΚΑΡΠΟΣ ΟΥΚ ΑΠΟΛΛΥΤΑΙ Caduceus between two cornucopiae, undated (1533); — 15. Nicolas Grudius and Anna Cobella (two specimens in the Brussels Museum); — 16. Nicolas Perrenot, cardinal Granvella, minister of Charles V.; — 17. Johann Danielis, secretary of Charles V.; — 18. Erasmus of Rotterdam; formerly ascribed to Quentin Metsys, but given to Second by Dr Simonis (*op. cit.*, p. 80-88).

Second probably modelled his portraits in wax, or honestone, after the fashion of his German contemporaries, and only some specimens were cast in bronze. Most of the known pieces in bronze exist only in later casts of the seventeenth century.

The artist's most famous poetical works are *Les Baisers* and his

SECRÉTAIN, LOUIS (*French*). Goldsmith of Tours, who in 1486 was condemned, for making spurious coin, to be boiled alive and afterwards to be hanged.

BIBLIOGRAPHY. — Babelon, *La Monnaie*, p. 163.

SEDLATZEK, FR. (*Germ.*). Die-cutter whose name occurs on the Token described below : Obv. Head, to right, above crossed laurel-branches. WILHELM II. DEUTSCHER KAISER. ℞. FR. SEDLATZEK BRESLAU | 44 RING 44 | JETZT NVR | IM HAUSE DER | NASCHM (Delicatessen market). APOTHEKE | · .— | FABRIK FÜR STEMPEL | SCHABLONEN | & | MEDAILLEN. Aluminium. 22 mill. Edges beaded.

SEECK, M. (*Germ.*). London Agent of Messrs. L. Chr. Lauer and C° of Nuremberg, and Designer of a Souvenir medal of the Universities of Oxford and Cambridge. On obv. are coats of arms and dates of foundation of the various colleges arranged around arms of University; the ℞. shows a figure of the Muse of Learning while the background represents a view of the respective university town; the legend is OXONIA (resp. CANTABRIGIA) ALMA MATER MEA (*Studio*, XXIX, 209).

SEEL, or **SÖLL**. Two Die-cutters of that name, **PETER**, and **PAVL S.** were employed at the mint of Salzburg, *ca.* 1632-1665, and 1660-1695 resp. They descended from a family of Salzburg officials, the name of one George Seel occurring as early as 1506-1509 as Justice of the peace at Tittmoning.

Herr Gustav Zeller has published a very full monograph on the work of these Engravers : *Die Familie Seel und ihre Medaillen*, Mitth. des Klubs, &c., 1893.

SEEL, PAUL (*Austr.*). Son of Peter Seel; Medallist, and Mint-engraver at Salzburg, *circ.* 1660-† 1695. He learned the art of die-cutting with his father, and worked also as a Line-Engraver. From 1660 to 1665 he assisted his father at the Salzburg mint; from 1665 until his death, he filled the office of Chief-engraver; his successor was Ignaz Portenschlager (1695-1715).

Paul Seel worked for and under archbishops Guidobaldus Count Thun (1654-1668), Maximilian Gandolfo Count Khuenburg (1668-1687), and Johann Ernest Count Thun (1687-1709).

Amongst his most noteworthy productions are : Large gold coins (multiples of the Ducat) with the arms of Max Gandolfo and the Patron Saints Rupert and Virgil, dated 1668; — Thaler commemorating the Eleventh centenary of the Archiepiscopate under Max Gandolfo 1682; — Silver Portrait-medal of Max Gandolfo, 1686; — Oval Portrait-medal of Johann Ernst Count Thun,

John Ernest Count Thun, archbishop of Salzburg.

1687 (*illustrated*); — Large gold coins (multiples of the Ducat) with arms of Johann Ernest, dated 1687.

Paul Seel's reputation must have been considerable. He cut a vast number of so-called "Pilgrim's Badges" and "Monastic Medals" (generally in yellow brass), which range from Westphalia and Switzerland to Hungary, and from Saxony and Silesia to the coast of the Adriatic. The probable date of their production is probably comprised mainly between 1680 and 1690.

The artist signed his medals **PS**, and less frequently **SP**; his full name occurs only on the round Portrait-medal of Archbishop Max Gandolf Count Khuenburg, 1686, and on the oval one of Archbishop Johann Ernest Count Thun, 1687; but the great majority of the works of the two Seels are unsigned. The initials **SL** no doubt also represent Seel.

Count Karl Liechtenstein, bishop of Olmütz.

Prof. Domanig suggests the attribution to Paul Seel of an oval Portrait-medal of Count Karl Lichtenstein, bishop of Olmütz (*illustrated*), which in treatment and style bears strong analogy with the artist's authenticated productions, and he reproduces on Pl. 85, n° 74 (*Die Deutsche Medaille*) a Pilgrim's Badge, undated, signed **P. S.**, with the Adoration of the Shepherds on obv. and on ℞. The three King worshipping the Infant Christ.

By Paul Seel are further : Oval medal on the Capture of Budapest, 1686 (signed : **P. S.**) (2 var.); — Oval medals of the Priory of Chiemsee (Upper Bavaria), with bust of Pope Sixtus II. (signed : **P. S.**) (2 var.); — Oval Pest Amulet of Munich; — Oval medals, Academy of the Militia angel. St Thomas ab Aquins, Salzburg, founded in 1669 (4 var.); — 11th Centenary of the Benedictine Nunnery of Nonnberg, 1682; — 11th Centenary of the Benedictine Monastery of St. Peter at Salzburg, 1682 (signed : **P. S.**); — 5th Centenary of the Abbey of Windberg at Sossau, near Straubing, 1677 (heart-shaped); — Oval medal on the Relief of Vienna, 1683; — Sixth Centenary of the Foundation of the Shrine of Mariazell, 1757 (2 var.; one signed **P. S.**); — Erection of the Column of the Holy Trinity in Vienna, etc.

BIBLIOGRAPHY. — Gustav Zeller, *Die Familie Seel und ihre Medaillen*, Mitth. des Klubs der Münz- und Medaillenfreunde in Wien, 1893. — *Sammlung berühmter Medailleure und Münzmeister nebst ihren Zeichen*, Nürnberg, 1778.

SEEL, PETER (*Austr.*). Medallist, and Mint-engraver at Salzburg, *circ.* 1632-1665. His name first occurs in contemporary records in 1632 as archiepiscopal Seal- and Coin-engraver at the Salzburg mint, and for a period of 33 years he held his office, which only old age compelled him to give up. His colleague at the Mint from 1630-1655 was the Tyrolese Engraver König (otherwise Mathias Khuenig von Baumbhausen) of Hall, and after that period he was assisted by his son Paul.

Peter Seel's productions for the archiepiscopal mint consist mostly of dies for the Salzburg currency, from the Thaler downwards, including the Ducat, of archbishops Paris Count Lodron, and Guidobaldus Count Thun. By him are also the two gold medals with a representation of the façade of Salzburg Cathedral, dated 1654 and 1655. We may note that this Engraver did not cut any Portrait-medals of the Salzburg archbishops, and that his work is inferior to his son's.

That the artist accepted commissions outside the Salzburg mint is apparent, as by him are, for instance, the medal commemorating the Breaking out of the Plague at Munich in 1634; — Fourth Centenary of Fraukirchen, 1640; — Transfer of the image of the Holy Child from Cloister Dieffendorf in Bavaria to Salzburg, 1650 (3 var.); — and Seventh Centenary of the Battle of Lechfeld near Augsburg against the Huns, 1655.

He is probably responsible also for a number of Pilgrims' Badges and Monastic medals, in which his son Paul is said to have made a special mark, *circ.* 1680-1690. Prof. Domanig describes one of

these Badges in his recent work (*Die Deutsche Medaille*) under the name of Peter Seel, but admits that it is impossible to discriminate between the works of father and son. The appended list, compiled by Zeller, from Beierlein's descriptions, comprises productions of Peter and Paul. Seel and other related engravers, for the following shrines and holy places: — *Adelwany* (Upper Austria) (8 var.); — *Altötting* (Bavaria), Pilgrims' Badges, Rosenkranz medals, Badges of the Jesuits College, &c. (25 var.).; — *Andechs* (Hl. Berg) Benedictine Monastery and place of Pilgrimags near the Ammersee in Upper Bavaria (2 var.); — *Armesberg* (Bavaria) (2 var.); — *Augsburg* " Udalricus" Victory crosses (7 var.); — *Augsburg and Mariazell*; — *Benedictbeuern* (7 var.); — *Bogenberg* (Lower Bavaria) (2 var.); — *Chiemsee* (Herren-Chiemsee) (3 var.); — *Dorfen* (3 var.); — *Dorfen* (and *Altötting*); — *Dorfen* and *Lofer*; — *Duntenhausen*; — *Ebersberg* (signed : V. S.); — *Edenberg*; — *Elend* (2 var.); — *Ettal* (near Oberammergau) (6 var.); — *Fischingen* (ct. St. Gallen); — *St. Florian* (2 var.); — *Frauenberg* (Styria); *Frauenstein*; — *Fraukirchen* (Bavaria) (2 var.); — *Freiburg in Brisgau* (Dominican Cloister of St. Katharina Senensis) (6 var.); — *Füssen* (signed : G. N.); — *Heiligenberg* (near Olmütz) (2 var.); — *Heiligenblut* (near Erding in Bavaria) (2 var.); — *Innsbruck* (Serviten Cloister); — *Inchenofen*; — *Iunsee* (Benedictine Monastery near Kaufbeuren); — *Kettenzell* (in the Black Forest); — *Kirchenthal* (near Lofer in Pinzgau) (3 var.); — *Cologne*, Æ polygonal medal, Obv. Birth of Christ; Rℓ. The three Kings, &c.; and " Rosenkranz" medal; — *Lechfeld* (2 var.; one signed : P. S.); — *St. Mang in Füssen* (on the Lech); — *Maria-Eck* (near Traunstein, Upper Bavaria); — *Einsiedeln* (Switzerland) (11 var.); — *Maria-Einsiedel* (near Munich) (2 var.); — *Maria-Plain* (near Salzburg), (4 var.); — *Maria-Saal* (Carinthia); — *Maria Scharten* and *Maria Taferl*; — *Maria Schmerz*; — *Maria-Taferl* and *Mariazell* (on the Danube in Lower Austria) (9 var.); — *Mariazell* (Styria) (8 var.); — *Mettenham* (Bavaria); — *Munich* (4 var.); — *Munich* and *Altötting*, Plague Amulets (2), one dated 1634; — *Pantaleon*; — *Ponlach* (shrine of Maria-Brunn at Ponlach near Tittmoning in Upper Bavaria) (2 var.); — *Prague*, Æ. oval, DOLOROSA.AD.S. IACOBVM. &c.; signed : P. S. (2 var.); — *Ratisbon* (Monastery of St. Emeran); — *Salzburg*, Congregational medals of the Sacrament or Red Brotherhood (5 var.; two signed : P. S. and P.SL.); Plague Amulet, St. Sebastian's Church, &c.; — *Scheyern*; — *Seitenstetten* (Lower Austria) (2 var.); — *Seligenstadt* (4 var.); — *Sonntagsberg* (20 var. or more); — Plague Amulets, signed or unsigned; — *Tegernsee* (Upper Bavaria) (2 var.); — *Trens* (near Sterzing, Tyrol); — *Vilgertshofen* (near Schongau, Upper Bavaria) (3 var.); — *Waldsassen* (Cistercian monastery and holy place in the Upper Palatinate); — *Waldthurn* (2 var.); — *Warta*; — *Weihenlinden* (near Aibling, Upper Bavaria); — *Weingarten* (Benedictine monastery in Württemberg (4 var.); — *Weissenstein* (Tyrol); — *Vienna* and *Mariazell* (5 var.); — *Wessobrunn* (Bavaria); — *St. Wolfgang am Burgholz* (Upper Bavaria); — and numerous Religious badges, &c. of uncertain places of issue, St. Michael Brotherhoods, &c. (the description of 22 varieties is given by Zeller and 22 more by Pachinger); — *Vilsbiburg* (Lower Bavaria); — *Wiblingen* (near Ulm) (2 var.). These Badges and Medals are chiefly oval, and struck in yellow brass, rarely silver, dated or undated, with or without signatures.

The post of Engraver at the Salzburg mint does not appear, from the mint archives, to have been a very remunerative one; the Die-cutter was paid for piece work only, receiving a fixed salary (Wartegeld) of 30–60 Gulden, and one can hardly wonder that the Seels sought to extend the field of their activity outside their place of residence.

"Die Seelschen Medaillen sind Kleinkunststücke, sind Werke eines eicht deutschen Meisters, sie sind ein getreues Abbild deutschen Kunstlebens. Ebenso stolz wie die Italiener auf ihren Abondio und Hamerani, dürfen wir Deutsche auf unseren Seel sein, den Begründer einer neuen Schule. Seel ist für das siebzehnte Jahrhundert das gewesen, was für unsere Zeit der Wiener Meister Anton Scharff war" (Pachinger, *loc. cit.*, 1).

SEELÄNDER, NICOLAUS (*Germ.*). A noted Line-engraver of the first half of the eighteenth century, appointed Engraver to the Ducal Library at Hanover in 1716, in which office he remained until his death in 1744. He was born at Erfurt, and apprenticed to a locksmith, but early devoted himself to Line-engraving and Die-sinking. His first known medallic production is a Portrait-piece of Count Philipp Wilhelm von Boineburg, Statthalter of Erfurt. In 1715 he executed a large coronation medal of George I. of Great Britain (of a silver weight of 16 oz.; fully described in *Medallic Illustrations*, II, $\frac{429}{15}$; signed on obv. N. SEELÄNDER. FECIT) [1]. Dr Bodemann, in his short monograph of the artist, published in 1890, relates that Seeländer came over to England in 1715, in order to present personally his Coronation medal to the King. Although armed with a letter of introduction from Leibnitz to the Princess of Wales, he had to wait many weary months before his work could be brought to the notice of the sovereign, who after keeping it sometime caused it to be returned with a message that the medal pleased him very well, and that the Engraver was at liberty to strike replicas for sale. In the mean time the poor artist appears to have spent his all and to have been in straitened circumstances, as he complains in a letter to Leibnitz, dated 13. February 1716. In the famous philosopher, Seeländer had found a patron and friend, and to him he owed the appointment in that same year of Line-engraver to the Hanover Library, with a monthly salary of 20 Thaler 30 Mariengroschen. In that capacity he engraved the fine copper-plates (of seals, coins, monuments, relics, landscapes, etc.) of the *Origines Guelficae*, published after Leibnitz's death by his successors.

Seeländer cut the engravings of Treuer's *Geschlechtshistorie der v. Münchhausen*, and in 1743 he published: *Zehen Schriften von Teutschen Müntzen mittlerer Zeiten; mit einigen historischen Erläuterungen erkläret und in dreyzehen Kupfer-Platten vorgestellt*. Hannover, 1743, 4°. But his most important numismatic treatise is the *Numophylacium Brunsvico-Lubneurgicum sive Thesaurus numorum iconicorum et uncialium, quae Serenissimi Principes ac Duces Brunsv.-Luneb. ab initio seculi XVI. ad annum MDCCXXXVII cudi jusserunt, aeri impressa per Nicolaum Seeländer*. This folio work contains engravings of 1383 coins and medals of members of the Ducal house of Brunswick-Lüneburg from the beginning of the sixteenth century to the middle of the eighteenth. Seeländer further engraved the 147 copper-plates of the catalogue of the numismatic collection of Gerhard Walter Molanus, abbot of Loccum, the well-known friend of Leibnitz, *Catalogus nummorum, quos seu Ducum seu Ducissarum seu civitatum rariores colligere studio curaeque habuit Gerardus, Abbas Luccensis*. The greater part of this collection was purchased by George II. and now forms part of the Duke of Cumberland's cabinet. By order of George II. 20 copies of the Seeländer copper plates were pulled off for presentation in 1754, and 30 more in 1853 by order of George V.

The compilers of *Medallic Illustrations* state that Seeländer filled the post of Mint-engraver at Hanover (p. 739), but this is apparently an error. Unfortunately however it is a well-known fact now that this Engraver cut a large number of dies for spurious mediaeval coins, chiefly bracteates. His forgeries number not far short of 300; some are imitations from originals, others are concoctions. In the Berlin Cabinet eight drawers full of these false bracteates exist, and they are represented also in the Cassel, Donaueschingen, Leipzig, and other official and private collections. They are distinguished by the bluish tint of the silver. Dr Buchenau states that they were chiefly produced by the *repoussé* process.

In Göttweih monastery are beside bracteates also Carlovingian Deniers, which are undoubtedly the work of Seeländer.

Seeländer published his own forgeries amongst original coins in his "Numophylacium Brunsvico-Luneburgicum", and these remained undetected until about fifty years ago. Even Schlumberger has reproduced some of this Engraver's spurious coins as originals in his standard work: " Des Bractéates d'Allemagne", Paris, 1873 (Pl. II, 21?; VI, 67; VIII, 101, etc.). A number of

1. The British Museum only possesses a lead specimen of this medal. Casts are found in the Gotha Ducal Cabinet, and Apell Collection at Erfurt. The dies were in the possession of the medallist G. G. Adams, but I do not know what became of them after his death.

Seeländer's forgeries have been described by Dr E. Bahrfeldt, Dr H. Buchenau, Leitzmann, C. F. von Posern-Klett, and other writers.

Nagler mentions a medal by Seeländer commemorating the Inauguration of the Numismatic Cabinet of the Duke of Gotha, with a bust of Frederick II., and an allegorical representation on the Rℒ.

SEELIGER, MELCHIOR (*Germ.*). Mint-assistant at Breslau, 1627.

SEFFNER, PROF. KARL (*Germ.*). Contemporary Sculptor, residing at Leipzig, who modelled a Portrait of Schiller, which was used for medals and plaquettes commemorating the Schiller Festivities, 9. May 1905. At the Brussels "Salon de la Médaille" 1910 he exhibited two uniface Portrait-medals: Friedrich Schiller, 1905; — Dr Lahmann, 1905. These medals are cast in bronze.

SEGALA, FRANCESCO (*Ital.*). Milanesi suggests that the letters **F. S.** on an Italian Portrait-medal of Sperone Speroni, a Paduan writer, may represent the name of Francesco Segala, a Paduan sculptor and bronze founder, who flourished *circ.* 1565.

SEGAN. *Vide* **SAGAU, F.** *supra.*

SEGER, CLAUS (*Austr.*). Mint-master at Ingolstadt, *circ.* 1400-1402 (Lori I, 28).

SEGER, PROF. ERNST (*Germ.*). Contemporary Sculptor, residing at Charlottenburg, born at Neurode in 1865. He is the author of several Portrait-medals and Plaquettes: — Grempler, 1896; — Privy Councillor Molinari, President of the Breslau Chamber of commerce, 1906; — J. Heimann, founder of the Jewish Orphanage at Breslau, 1907; — Silver Wedding medal (Bender consort), etc.

At the Brussels 'Salon de la Médaille', he exhibited a silver medal entitled: Sorcière.

SEGNANI, NICOLO (*Ital.*). Medallist of the second and third quarters of the nineteenth century, by whom are Portrait-medals of Karoline Unger-Sabatier, the famous singer, 1837, and others.

SEGNI, ANTONIO (*Ital.*). Papal Mint-master at Fuligno, 1500-1516. His issues are signed **A.S.**

SÉGOFFIN, JEAN VICTOR JOSEPH AMBROISE (*French*). Contemporary Sculptor and Medallist, born at Toulouse and residing at Paris; Prix de Rome, 1897; Officier d'Académie, 1906.

In 1905 he was entrusted by the "Société des Amis de la Médaille française" with the modelling of a Plaquette, entitled: Le Rêve du Travailleur.

SEGUIN, PIERRE (*French*). Goldsmith, and Coin-engraver at the Mint of La Rochelle, *circ.* 1600; he died in 1602.

SÉGUY, B. (*French*). Mint-master at Lyons, from *anni* VIII to XI of the First French Republic. His privy-mark on the coins is **SB** interlinked.

SÉGUY, PASCAL (*French*). Contemporary Gem-engraver, born at Paris; pupil of Bissinger. By him is a Portrait-cameo of Czar Nicholas II., onyx of two strata, which he exhibited at the Salon in 1894.

SEHLEN (or **SÖHLE**), **JOHANN CASPAR VON** (*Germ.*). Mint-warden at Magdeburg, 1688; Mint-master there, 1691-1695. His initials **I.C.S.** occur on the currency.

SEHUSEN, CONRAD and **HEINRICH** (*Germ.*). Mint-masters at Rostock, 1371-72.

SEIBOT, "SYBOTO DICTVS" (*Germ.*). Mint-master at Augsburg, *circ.* 1388.

SEIDA, WOLF (*Austr.*). Mint-Assistant at Hall in Tyrol, *circ.* 1550.

SEIDAN, CAROLINE (*Bohem.*). Wife or Daughter of Wenzel Seidan, and his collaborator in several of the medals which he engraved (*Vide* **WENZEL, SEIDAN**).

SEIDAN, WENZEL (*Bohem.*). Medallist and Coin-engraver, born at Prague in May 1817; probably a son of the Prague gold-chaser Franz Seidan, who in 1791 applied for a post at the Mint; pupil of the Academy of Fine Arts at Prague; died at Vienna on 20. March 1870.

In 1841 Seidan obtained a scholarship and again in 1842. In 1844 he is styled "Privatgraveur" and allowed to have a medal struck at the Mint of Baron von Kübeck. He then visited Italy to complete his artistic studies, returning by way of Paris in 1847. In that year he cut dies for the medals of Cornelius and Overbeck, for which he was rewarded with a prize of 1000 florins by Emperor Ferdinand I. and the large Prize medal for Art by King Frederick William IV. of Prussia. In 1848 the Engraver applied for the office of Mint-engraver at Prague, and in 1850 removed to Vienna. Between 1852 and 1869 he had a large number of medals struck at the Vienna Mint. In 1866 he put his name forward as a candidate for the Directorship of the Imperial "Graveurakademie".

Seidan's most noteworthy medallic productions are: Archduke Frederick, 1841; — Franz Anton Count Kolowrat, 1843; — The Constitution of 15. March 1848 (issued in 1849); — Franz Count Schlick, 1850; — Banus Josef Jelačič; — Jan Kollar, poet, 1852; — Visit of Emperor Francis Joseph to Prague, 1852; — Francis Joseph's Visit to Bohemia, 1854; — Journey of the Emperor and Empress to Hungary, 1857; — Josef Count Radetzky von Radec, 1858; — Johann Nepomuk Paris, archaeologist, 1859; — Visit of the Emperor to Prague, 1860; — Faculty of Proprietorship granted

Rℒ. of Medal on the Constitution of 15. March 1848.

to Israelites, 1860; — Abbot of Strahov Hieronymus II. Josef Zeidler, 1862; — Franz Palacky, historiographer, 1861; — W. Hanka, librarian, 1861; — Opening of the Diet at Frankfort-on-M., 1863; — Vienna enlarged by the absorption of suburbs, 1865; — Bohemian Industrial Society medal, 1866; — Wolfgang Emanuel von Graffenried Burgenstein, 1866; — Prize medal of the town of Hohenmauth for the Agricultural School of Tetschen-Liebwerd (engraved in conjunction with Caroline Seidan); — 1867. Jubilee of the Evangelical Districts College of Eperies; — Wittingau Male choir; — Congress of Physicians and Naturalists at Rimaszombat; — Coronation of Queen Elizabeth in Hungary; — Medals for Valour issued for the Principality of Montenegro; — Professor Joh. Ev. Purkyné (issued in 1868); — 1868. Medal on the Constitution of State; — Laying of the Foundation stone of the National Theatre at Prague; — Rifle Meeting Prize Medals for the town of Braunau (in conjunction with Caroline Seidan); — Assassination of Milos Obrenovic; — Town of Erlau, Fünfhauser Rifle Meeting; — Visit of Francis Joseph I. to Galicia; — 50th Anniversary of the Transsylvanian Railway; — Agricultural Show at St. Johann; — Moldavian Deputation at the Hungaration Royal Coronation; — Ritter von Lorenzutti and the Prague Draughts Club; — Rifle

Corps of Saaz; — Choral Society of Werschetz; — Heinrich Fügner, founder of the Sokol Society; — Sixth Congress of Physicians at Vienna; — Trooping of the Colours of the Karbitz Veteran Corps; — Journey of the Emperor and Empress to Croatia; — Sanctioning the Constitution; — 1869. Journey of Francis Joseph I. to the East; — Sejourn of the Emperor at Rustschuk; — Congress of Hungarian Naturalists at Arad (engraved in conjunction with Caroline Seidan); — Arrival of Francis Joseph I. in Egypt; — Karl Ritter von Ghega (1869), in commemoration of the building of the Semmering Railway.

Domanig mentions a manuscript list of this artist's medals, to which I have not been able to obtain access.

The Vienna Mint Museum preserves some dies and puncheous by him: Three matrices of 1871 for Double Gulden with laureated bust of Emperor Francis Joseph I. (signed: **SEIDAN**); — Medal on the Constitution of 15. March 1848; obv. Ferdinand enthroned; ℞. *illustrated* (signed: **W. SEIDAN PRAG**); — Erection of the so-called Hentzi Monument at Ofen, 1849 (only ℞.); — Austrian Victory at Temesvar, 1849 (signed: **W. SEIDAN F.**); — Centenary of the Foundation of the Order of Maria Theresia, 1857 (signed: **SEIDAN**); — Prize Medal of the Agricultural Society of Beraun in Bohemia, 1855 (obv. signed: **W. S.**; ℞. by L. Cossa); — Prize Medal of the Austrian Society of Arts, 1859 (issued at a later date, and signed: **W. SEIDAN F.**).

Beside the medals, etc. mentioned above I have met with the description of the following other medallic productions of Wenzel Seidan: Medal of the Prague University, 1848; — Radetzky Monument, 1858; — Franz Palacky Monument, 1867; — Friedrich von Schiller; — Birth of Crown Prince Rudolf of Austria, 1858; — Francis Joseph's fortunate escape from accident, 1853; — Marriage of Francis Joseph I. with Princess Elizabeth of Bavaria, 1854; — Projected Visit of the Emperor and Empress to the frontier of Moldavia, 1868; — Third German Federal Rifle Competition at Vienna, 1868; — Commemorative medal of the Jesuit Mission, 1861; — Opening of the Prague to Dresden Railway, 1851; — Centenary of the Foundation of the Orient Academy in Vienna, 1854; — Inauguration of the First Council of State at Vienna, 1. May 1861; — Austro-Prussian Alliance in the Schleswig-Holstein War against Denmark, 1864; — Inauguration of the Ringstrasse, 1. May 1865; — Commemorative medal of the Bohemian Constitution, granted on 20. October 1860 and withdrawn on 20. September 1865; — Withdrawal of the Constitution, 20. September 1865 (issued for Hungary); — Campaign of 1866; — Naval Victory at Lissa, 20. July 1866; — Bohemian Campaign, 1866; — Vienna menaced in the Campaign of 1866; — Peace of Prague, 23. August, and Peace with Italy, 3. October 1866; — Hungarian Coronation, 1867; — Moldavian homage in connection with the Coronation at Ofen-Pest, 1867; — Confirmation of the December Constitution, 1867; — Freedom of Speech and Public assembling, 1868; — Second Centenary of the Shrine of Maria-Taferl, 1860; — The Semmering Railway, 1854; — Austro-Hungarian State Railway, undated; — Dr A. C. Lorenzetti, Trieste; — Dr J. E. Puskyn, Prague; — Convention of Hungarian Physicians at Eger, 1858; — Commemorative medals of the XIV. Congress of Hungarian Physicians at Fiume, 1869; XVI. at Mehadia, 1872; XVII. at Raab, 1874, and Rimazambat, 1866; at Arad, 1870, Karlsbad, 1862; Presburg, 1865, etc.

SEIDEL (*Germ.*). A native of Bayreuth, Contractor of mints for Württemberg, 1758-1759.

SEIDENSTÜCKER, CHRISTOPH ENGELHARDT (*Germ.*). Mint-master at Zellerfeld, 10. May 1783—† 10. October 1785. The initials **C. E. S.** occur on coins of these years of George III. for Brunswick-Lüneburg.

SEIDENSTÜCKER, ENGELHARD DANIEL (*Germ.*). Mint-warden to the district of Lower Saxony, *circ.* 1737.

SEIDLITZ, JOHANN GEORG (*Germ.*). Gem-engraver, and Medallist, born at Koblenz towards the end of the seventeenth century, who settled at Vienna, where in the first half of the eighteenth century he was working as Die-cutter to the Vienna medal-manufacturer Johann Förber, who owned an imperial grant to strike medals, and had branches at Ratisbon, Nuremberg, and Vienna. Nagler states that the period of his greatest activity at Vienna is comprised between 1699 and 1711, and that he was still living in 1730. He left many works, which are usually signed with his initials, or his name in full, *Seidlitz*.

One of this artist's best productions is the commemorative medal of the Capture of the Fortress of Landau by the Roman King in 1702 (*Num. hist.*, 190), and Portrait-medals of the Roman Queen Amalia Wilhelmina, 1705 (on her Coronation); — Charles III., King of Spain, undated (1705) (*illustrated*); — Lille taken and

Charles III., King of Spain.

the French frontier forced, 1708 (with bust of Emperor Joseph I.); — Capture of the Citadel of Ryssel, 1708; — Emperor Joseph I.; ℞. Emblem and motto, undated; — Another, with armoured bust of Emperor, and signed on truncation; — Marriage of Joseph I., 1699; ℞. IUNXIT AMOR, etc. Two hearts, etc.

This Engraver signed with the initals **I. G. S.** dies for Thalers struck at Pressburg (Schulthess 2538, 2542). Mariette mentions his name as an Engraver of gems also.

Philipp Christoph Becker was a pupil of Seidlitz.

Bibliography. — Johann Newald, *Beitrag zur Geschichte des österreichischen Münzwesens im ersten Viertel des XVIII. Jahrhunderts*, p. 16. — *Medallic Illustrations*, etc. — Bolzenthal, *op. cit.* — Mariette, *op. cit.* — Ris Paquot, *Dictionnaire*, etc. — Nagler, *Allgemeines Künstlerlexikon*. — Domanig, *op. cit.*

SEIFRIED (*Austr.*). Moneyer at Vienna, 1287, 1288.

SEIFRID DER MÜNZER in der Scheffstrasse (*Austr.*). Moneyer at Vienna, 1405 (? 1435, 30 März).

SEITZ, JOSEPH (*Germ.*). Engraver and Chaser, born at Munich in 1820, where he resided. By him are Seals, and other productions of similar kind.

SEIZ, V (*Germ.*). Medallist and Coin-engraver at Passau, *circ.* 1688-1706. He may have been a son of the Passau sculptor, Johann Seiz

Portrait-medal of Max Gandolf, archbishop of Salzburg.

(or Seitz), whose period of activity is comprised in the first half of the seventeenth century.

Original from CORNELL UNIVERSITY

V. Seiz's signature occurs on Thalers of Passau, 1703-1706. A large gold medal with facing bust of Max Gandolph, archbishop of Salzburg, 1668, is signed : **SEIZ F.**, which signature occurs also on a Portrait-thaler of Johann Philip Count Lamberg, bishop of Passau, 1703.

Bibliography. — Domanig, *Die Deutsche Medaille*, 1907. — Zeller, *Salzburger Münzeisenschneider*, etc., Num. Zeits., XX. — Nagler, *op. cit.*

SELCHE, CARL LUDWIG (*Germ.*). Die-sinker and Mint-master or Inspector at Dusseldorf, *circ.* 1767-1770 (Exter I, 514). His initials **C. L. S.** occur on the currency issued under his administration at Dusseldorf.

SELD, GEORG (*Germ.*). Goldsmith at Augsburg, *circ.* 1492-1500.

SELD, HANS (or **JOHANN**) (*Germ.*). Medallist at Augsburg, who in 1521 obtained from Emperor Charles V. a permission to manufacture medals. His signature occurs on Augsburg Goldgulden and silver Batzen, and he was probably Die-cutter to the mint. His productions, says Bolzenthal, hardly place him in the ranks of artists.

SELER, KASPAR (*Germ.*). Mint-master at Würzburg, 1556, Nördlingen 1556, and Augsburg, 1570.

SELEUCOS (*Greek*). Gem-engraver of the hellenistic period, fourth century B.C. or later. The signature occurs on an amethyst intaglio of the former Carlisle collection, representing Philoctetes. M. Babelon mentions this gem after Murray (*Handbook of Greek Archaeology*, p. 172), Furtwängler, and Brunn, as a genuine antique work.

A Head of Silenus, cornelian intaglio, signed **CЄΛЄYK**, formerly in the Cerretani collection at Florence, is described in Stosch (p. 220, n° 1358), but the original appears to have been lost. The British Museum, and Hague Museum replicas are modern. Brunn did not admit the name as that of an artist, and even the inscription is suspected by Furtwängler, while Stephani declares the whole to be modern. A paste, in the former Stosch collection, showing a Portrait of an unknown person, and of very fine work, bears the same signature.

The following gems signed *Seleucos* are spurious. Head of Herakles (*Brit. Mus. Cat.*, n° 2038) ; — Herme of Priapus, square emerald (Thoms) ; — Cupid and a wild boar, amethyst (Worlidge).

Bibliography. — Babelon, *Pierres gravées*, p. 132. — King, *op. cit.*, p. 225. — Furtwängler, *Gemmen mit Künstlerinschriften*, Jahrbuch, etc., 1889, p. 83. — S. Reinach, *op. cit.* — Raspe, *Tassie Gems.* — Stephani, *Angeblics Steinschneider*, p. 224. — *Pierres de Stosch*, p. 220, n° 1358. — Brunn, *op. cit.*

SELING, PAUL WENZEL (*Bohem.*). Mint-master at St. Joachimsthal, 1668-1670.

SELLAN, G. (*Span.*). Medallist, and Mint engraver at Madrid, under Alfonso XII. and XIII., *circ.* 1875-1893, when he he was succeeded by the present Chief-engraver, Bartolomé Maura y Monianer.

Beside engraving dies for the regular coinage of Spain, Sellan also executed a number of commemorative and artistic medals. The coins are signed **G. S.**, except some Pattern pieces of both Kings which bear the signature **G. SELLAN**. On the occasion of the Visit

"Baby" Dollar of Spain, 1891.

of Alfonso XII. to the Madrid mint, 28. June 1875, a medal in gold, struck from the obv. die of a 100 Peseta piece, and with an inscription on the Rℒ., was issued in commemoration of the event.

The first coinage of Alfonso XIII. is dated 1888 ; the dies are by Sellan, and were in use until 1893, when the second coinage by Maura was issued. The following denominations exist of the 1888 coinage, either as Patterns, or Official coins. *A.* 100, 20 Pesetas ; *Æ.* 5, 2, 1 Peseta, 50 and 20 Centimos ; *Æ.* 10, 5, 2 and 1 Centimos.

Among G. Sellan's medals I will only mention : Portrait-medal of King Amadeo I., The Mediterranean fleet, 1870 ; — Marriage Medal of Alfonso XII. and Marie de Mercedes, 1878, etc.

Bibliography. — *Catalogo de la Colección de Monedas y Medallas de Manuel Vidal Quadras y Ramon de Barcelona*, 1892.

SELLENT (*Span.*). Medallist of Barcelona, early part of the nineteenth century, by whom I have seen a medal on Charles IV.'s visit to Barcelona, 1802.

SELLER, KASPAR (*Germ.*). Coining engineer at Augsburg, where he introduced in 1555 a new press and a process of his invention to mill the edges of coins. At the diet of 1559 Ferdinand I. allowed him an advance of 6000 fl. towards his expenses in the pursuit of his minting improvements.

SELLIGUE (*French*). Engineer, and inventor of a coining-press. A Pattern 5 Franc piece, 1833, was issued from his press, bearing on Rℒ. **G. TORREZ** 1833 within an oval surrounded by rays and a representation of Selligue's press on obv. (*Dewamin*, Pl. LVII, 1).

SELLIUS, HEINRICH WILHELM (*Germ.*). Mint-master at Elbing, 1761. His issues are usually signed **H. W. S.**

SELLIUS, ONESIMUS, C (*Roman*). "Flatuarius de via sacra", probably a coin-engraver of Roman times.

SELTER, JOHANN (*Germ.*). Medallist and Coin-engraver, in the service of the Counts Palatine at Mannheim, *circ.* 1705-1716. Many coins and medals by this Engraver are described in Exter's *Sammlung Churpf. Münzen*, p. 324, 335, &c. 351, &c. 365, 373, &c. 381, &c. 386, &c. 405, 417.

Domanig describes and reproduces two Portrait-medals by him of Countess Palatine, Anna M. Ludovica, undated (n°s 360-361),

Obv. of Portrait-medal of Anna M. Ludovica, Countess Palatine.

and another of Prince-Elector Johann Wilhelm of Palatinate-Neuburg, undated (signed : **SELTER**). The coins are signed : **J. S.**

Bibliography. — Domanig, *Die Deutsche Medaille*, 1907. — Nagler, *op. cit.* — Bolzenthal, *op. cit.*

SELTMANN, JOHANN CHRIST. (*Germ.*). Die-sinker of the early part of the nineteenth century, who worked in various towns of Southern Germany, *circ.* 1800-1815 and finally settled at Dresden.

SELVATICO, LUDOVICO (*Ital.*). Mint-master and Engraver (?) at Modena 1612-1613, Pesaro 1621, and Parma 1629. The coins struck by him for Cesaro d'Este are attributed to the Engraver Giulio Fiammingo.

SELVATICO, PAOLO (*Ital.*). Sculptor of the second half of the sixteenth century, about whom Bolzenthal makes the following comment : "Tiraboschi hardly considers Paolo Selvatico as worthy of mention, and speaks of him as a mere official in the Mints of Modena and Parma, but this is unjust. Selvatico was long in the

Generated at Washington University in St. Louis on 2022-05-13 02:14 GMT / https://hdl.handle.net/2027/coo.31924069735599

Original from CORNELL UNIVERSITY

service of Alfonso II. d'Este at Modena; he followed later Cesare d'Este to Ferrara, and ended his life in the employment of Ranuccio I. Farnese at Parma in 1606. The beautiful dies for coins which were preserved in the Mint at Milan and Royal Cabinet, and now the property of the Estes in Modena, give him a place among the great masters of the art. He also applied himself assiduously to the study of ancient coins, and his works therefore resemble the antique in many respects. Cicognara, by reason of these dies, ascribes to him a medal of Giovanni de Medici, the reverse of which is copied from the 'Decursio' sestertius of Nero, and bears the legend : **PROPVGNATORI ITALIAE**. In the portrait of Giovanni de' Medici Selvatico has given such a spirited expression, and also so much softness, that one wonders at his genius. According to Zani, Selvatico was born at Florence in 1547 and died in 1606." (Bolzenthal, p. 158).

Modern critics ignore however the name of Selvatico altogether, and no reliance can be placed on Cicognara and many of the old writers' attributions. The dies of coins, ascribed to Selvatico, are productions by other artists, under whose names they will be found enumerated.

SELVI, ANTONIO (*Ital.*). One of the most prolific Medallists of the first half of the eighteenth century, was born at Venice, but flourished at Florence, where he died in 1755. He was a pupil of Massimiliano Soldani-Benzi. He spent most of his life in the service of the Ducal Court of Tuscany, and executed a large number of Portrait-medals of the Grand Dukes. He is said to have visited England, and to have resided some time in this country. Cicognara (*Stor.* II, 414) states that he let a considerable number of medallic productions go under his name in the making of which he had no part. His medals are always cast and of poor workmanship.

Richard Molesworth.

Among Selvi's best known Portrait-medals I may mention : John Molesworth, 1712 (signed : **A. SELVI. F.**); — Richard Molesworth, 1712 (unsigned); — Sir Andrew Fountaine, 1715 (signed : **A. SELVI. F.**); — Professor Francis Hutcheson, undated (1694-1746); — William III. and Mary (unsigned : *Med. Ill.*, I, $\frac{689}{76}$); — Galileo Galilei; — Count Giuseppe Prospero Giannini; — Gius. M. S. Bertini; — Ant. Cocchi (1695-† 1758), 1745; — Giov. Batt. Fagioli; — Manfredo Malaspina; — A. Vallisniesi, of Padua, 1707; — Empress Maria Theresia, undated; on her Accession (signed : **A. SELVI. F.**); — Francis I., 1745; on his Coronation (signed : **A. S. F.**); — Marc Antonio Mozzi; — Count Lor. Magalotti; — Large Portrait-medallion of the Carmelite preacher, Pater Marcus a sancto Francisco, 1748; — A. Vallinieri, Padua, 1713; — P. Valcarenghi, Padua, 1752; — Large Portrait-medallion of Michel Angelo; Rℒ. Allegorical figures of Painting, Sculpture and Architecture; — Pantaleone Dolera, undated (1710; signed **A. F. SELVI. F.**); — Series of Portrait-medals of the Grand Dukes of Tuscany; — Guido Grandi, mathematician, 1738, etc.

Bibliography. — Bolzenthal, *op. cit.* — Nagler, *op. cit.* — *Medallic Illustrations*, &c. — *Various Sale Catalogues.*

SEMAN, BARTHOLOMEW (*Brit.*). Gold-beater, usually called **BARTHOLOMEW GOLDBETER** was 'Master of the King's Mints, 10th year of Henry V., until 11th of Henry VI., within the Tower of London, and in the town of Calais. He died in 1430, and was buried in the Church of St. John Zachary.

The indenture appointing Goldbeter as Mint-master is dated 13th February 1422. Henry V. died 31st August in that year. On that event Goldbeter was charged to hold his office as before. He petitioned the Parliament which met in November for more remuneration, speaking of his already "great and insupportable loss". That Parliament accordingly added the profit of the exchange to his office; and on the petition of the northern commons ordained that he should have a mint at York as well as at London and Calais, for gold and silver. On the 16th February, 1423, his old indenture was endorsed with a memorandum extending the renewal thereof to York and Bristol. No Bristol money of this period is known. As to York, Goldbeter worked the mint there, and retired. Complaints were made to the Parliament held at Westminster on 20th October of the same year, that Goldbeter, after having been at

Noble of Henry VI., 'Annulet' Coinage.

York, and set up his mint there, had since retired, and praying that he might be compelled to return, he was ordered back.

Gold coins exist of Henry V., issued by Goldbeter, and engraved by Gilbert Vanbranburgh : they are the Noble, Half-noble, and Quarter noble of the 'annulet' type, with pierced cross mint-mark. The noble is only known by a unique specimen in the British British Museum. The same denominations were issued under Henry VI, with fleur-de-lys instead of pierced cross.

The silver annulet money attributable to Henry V., with his special pierced cross, is found in every denomination, Groat, Half Groat, Penny, and Halfpenny (except perhaps, the Farthing) from both the London and Calais Mints. The Calais coins are very scarce.

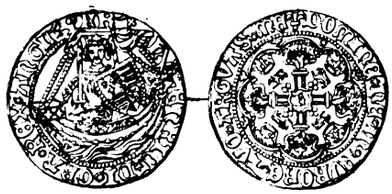
Original from CORNELL UNIVERSITY

After the accession of Henry VI. these are common. Goldbeter was responsible for the London, Calais, and York issues of Henry VI., struck under his Mint-mastership.

'The annulet coins with the pierced cross of following type ✠ are found of both London and Calais, but are less common of Calais than of London. Mr. Walters attributes these coins to Henry V. and believes that they were those first struck by Bartholomew Goldbeter under the authority of the enactment of the second Parliament of the year 1421 (the 9th year of Henry V.), which met at Westminster on December 1st, and of the subsequent indenture dated February 13th, 1422. Henry V. died on the 31st of August of the same year, but there was time before his death to do a good deal, and probably no time was lost owing to the urgent need of remedying the great scarcity and bad condition of the currency, which was as that time causing much trouble and discontent among the people. Goldbeter would naturally place the Tower mint in working order before proceeding to Calais; and it would have been active longer than the latter mint at the death of Henry V., thus accounting for the London groats at least being more common than those of Calais, which are not very easy to obtain.



Half-Noble of Henry VI., 'Annulet' coinage.

"As the authority conferred by the original indenture would lapse with the death of Henry V., and was not renewed by the Regency until the 16th of February following, an interval of nearly six months, it is probable that work at both the London and Calais mints ceased during this time.

"With the renewal of his authority and with its extension to York and Bristol, Goldbeter would appear to have made a new departure with fresh dies, which, while resembling very closely (although not exactly) those of the last issue, have all the pierced cross of the following type ✠ as a mint-mark, which Mr. Walters suggests as being the distinguishing mark of the earliest coins of the reign of Henry VI. We are practically certain that the York annulet groats and half-groats were struck by authority of the renewed indenture of the first of Henry VI., and all the known specimens, together with the corresponding penny and halfpenny, have the second type of pierced cross as mint-mark." (F. A. Walters, *The silver coinage of the Reign of Henry VI.*, 1902, pp. 5, 7-9).

Bibliography. — F.-A. Walters, *loc. cit.*, *Coinage of Henry V.*, Num. Chron., 1906. — Chaffers, *Gilda Aurifabrorum*. — Ruding, *Annals*, &c.

SEMBLER. *Vide* **SEMLER**.

SEMILLARD, PAROTHE (*French*). Goldsmith at Troyes, *circ.* 1595-1599. In December 1599 he was appointed Die-cutter to the Mint there, but does not appear to have held the office (Rondot, *Graveurs de Troyes*).

SEMLER, CHRISTOPH WILHELM (*Germ.*). Mint-warden at Nuremberg, 1689-1724.

SEMON (ΣΗΜΟΝΟΣ) (*Greek*). Gem-engraver's signature on a sixth century gem (Ionian), in black jasper, the subject of which is a Female figure, nude, kneeling to right, and holding a hydria which she is in the act of filling at a fountain. This intaglio is preserved in the Berlin Museum.

Intaglio, by Semon.

The inscription is delicately engraved, without depth and in perfect harmony with the subject. The signature does not draw the attention, as becomes an artist's signature, and there is no reason therefore to consider it as the name of the owner of the gem.

Bibliography. — Babelon, *op. cit.* — Furtwängler, *op. cit.* — Brunn, *op. cit.*

(*To be continued.*)

THE COINAGE OF THE REIGN OF HENRY VII.

BY GEORGE B. PETRIE.

Member of the British Numismatic Society.

DESCRIPTION OF THE COINS.

GOLD.

First Coinage. 1485-1489.

(*Continued from col. 12568.*)

24. *Obv.* Mm. Heraldic cinquefoil. hENRIC·DI'·GRA·REX ANGL ⊻ FRANC·⊻· Trefoil stops.
Rev. No Mm. PER·CRVC'·TVA'·SALVA·NOS·XPC· REDEMTOR Trefoil stops. St. Albans find.

25. *Obv.* As No. 22.
Rev. Mm. escallop. IhC AVT TRANSIENS PER MEDIV ILLOR IB. Stops doubtful. Shield broader and more round, and rests on the gunwale of ship. British Museum.

26. *Obv.* As No 22.
Rev. Mm. escallop. PER : CRVCE : XPE REDE : Rosette stops. British Museum.

27. *Obv.* Mm. heraldic cinquefoil. hENRIC DI·GRA·REX ANGL ⊻ FRANC·⊻ Trefoil stops.
Rev. Mm. escallop. INC·AVT·TRANSIES'·PE·MEDIV· ILLOR·IB Rosette stops. St. Albans find.
[*Num. Chron.*, Third Series, Vol. VI, Pl. VII. 7.]

Half Angels.

28. *Obv.* Mm. rose and sun united. hENRIC × DI G RA × REX ANGL. Type as the Angel.
Rev. Mm. rose and sun united. ⁘O⁘CRVX×AVE⁘SPES⁘ VNICA. Wt. 38 ¼ grs. Evans Collection.
[*Ken.*, Pl. VII, 52.]

29. *Obv.* Mm. rose and sun united. hENRIC (struck over RICARD) × DI × GRA × REX ANGL.
Rev. Mm. rose and sun united. ⁘O⁘CRVX×AVE×SPES⁘ VNICA Ship, etc., with R (struck over E) and rose at sides of mast.
Wt. 38 grs. Murdoch Catalogue (No. 387).

Second Coinage. 1489-1509.

Sovereign or Double Ryal.

(Type I.)

30. *Obv.* Mm. heraldic cinquefoil. hENRIC·DI'·GRA·REX ANGL·FRANC·Z·DNS·IBERNE' Trefoil stops. King, front-faced, robed, and wearing arched crown, the principal arch being surmounted by an orb and cross, and supported by two lower arches which cross each other at right angles; all the arches ornamented. Sceptre in r. hand terminating in a lis, the orb in l., seated on throne with concave back. The base of throne is solid, without legs, the seat wide and with arms; at each corner an ornamental pillar.
Rev. Mm. cinquefoil. IhS · AVTE TRANSIES : PER MEDIV · ILLORV·IBAT: Trefoil stops. Shield of arms (France and England quarterly), surmounted by a large double ornamented arch, the orb on top extends to the rim of the coin. The whole within an inner beaded circle.
Evans Collection.

(*To be continued.*)

THE OLD AND THE NEW COINAGE.

The introduction of a new design in coinage is at least one occasion on which the Mint and its staff are called upon to forsake the undisturbed equanimity with which they are sometimes jealously charged. Of old dies there is always a big stock to draw

upon; the preparation of new ones involves much additional work, even though the eagerly-awaited coins drop very gently into financial currents. There will be little or no alteration in the Georgian coins which are now being prepared, under the superintendence of Mr. Ellison Macartney, except that the portrait of the King is substituted for that of King Edward and turned, in accordance with custom, in the opposite direction from that faced by the preceding Sovereign. Those in authority were offered suggestions of novelty, one of which, if carried into effect, would have abolished the Latin of the inscription and substituted one in English; but precedent has been followed and the new coin will continue to speak in the old language. It is possible that two denominations of the silver coinage, the florin and the sixpence, will bear new designs on the reverse, but this point has not been finally settled and definite information of what the alteration, if any, is to be, is for the present withheld. The only coins of the new design so far struck are sovereigns, half-sovereigns, shillings, and halfpennies.

No specific date is fixed for the issue of the newly-designed coins. The Bank of England, which is responsible for the distribution of gold and silver, demands what it requires from the Mint, and in the supplies sent in response the coins of new pattern automatically take the place of those of the old. So long as the old ones remain they are employed in the usual way. Bronze money is issued direct to the public, and any one might give an order at the Mint, though a *minimum* of £5 is fixed. Of Edwardian pence there happens to remain at the Mint a fairly large stock. The halfpennies, on the other hand, are almost exhausted, and this means that one of the first coins of new design to make its appearance will be the halfpenny. A somewhat notable omission from the new coinage will be the five-shilling piece. Probably the majority of people will not be surprised to hear that the "cartwheel" lacked public support and will therefore follow into oblivion its almost equally inconvenient companion, the four-shilling piece. No five-shilling piece has been struck since 1902; the four-shilling piece dropped out of existence, so far as the Mint is concerned, in 1890. In such a case a coin meets with quite a natural death. The Bank of England, as it were, feels the public pulse, and as soon as they find a certain class of coin in their stock which is not only not asked for, but unceremoniously repulsed, they know that it has become practically worthless from the point of view of circulation, and the Mint quietly ignores it. Some might be inclined to think that farthings and threepenny-bits ran some risk of meeting the same fate, but both enjoy a considerable vogue. Statistics show that for the last ten years the average annual demand for threepenny-bits has been equal in value to £70,000, and for farthings £6,000.

REVIEWS.

Coins of the Roman Republic in the British Museum. By H. A. Grueber, F.S.A., Keeper of the Department of Coins and Medals. 3 vols. London, 1910.

Price: £7.10.0.

It is just over half a century since an enthusiastic student of Roman numismatics approached the Trustees of the British Museum for permission to examine and classify the rich collection of coins in the Medal Room. It was the year before Mommsen's famous work on the history of Roman coinage appeared, and up to that time the classification of the Roman coins, both Republican and Imperial, was such that it was of comparatively little use either to the historian or the numismatist. Date and locality were alike disregarded, and the Republican coins were classified under the families to which the moneyers who issued them belonged. The student and collector to whom, in a happy hour for the Department of Coins, the Trustees granted the facilities desired, was John Francis William, Count de Salis, and the three bulky volumes before us form, along with Mr. Wroth's recently published "Catalogue of the Imperial Byzantine Coins in the British Museum", a fitting memorial to the patience, knowledge, and genius of Count de Salis, and a worthy tribute to the services which his ten years' work in the Medal Room rendered to the Roman branch of numismatics. The chronological and geographical arrangement introduced by him has been maintained practically as he left it some forty years ago, and Mr. Grueber adopts it throughout his catalogue with but slight modification.

Collectors and students of numismatics everywhere will accord a hearty welcome to these volumes. The British Museum collection of Republican coins is so vast that the description of its specimens alone would provide the collector interested in this branch with the means of identifying almost any coin. In the comparatively few cases where an issue is unrepresented in the National Collection Mr. Grueber has added descriptions and illustrations from other collections, so that in his catalogue we have a complete guide to the coins of the Roman Republic. The scheme of the work includes also the coinage of the Empire under Augustus to the year 3 B.C., after which date the names of the moneyers disappear finally from the coins.

To say that the descriptive work of the catalogue is a model of accuracy, thoroughness, and lucidity is but to say that it is done by the experienced hand of Mr. Grueber. The notes attached to the descriptions show on every page not only an intimate acquaintance with the literature of numismatics but also a wide knowledge of the history of the Republic. They give, so far as we have been able to test them, everything that is required in the way of historic or numismatic commentary. In the General Introduction prefixed to the catalogue proper Mr. Grueber has given us summaries of the history of the various coinages, bronze, silver, and gold. To these are added short but interesting chapters on the moneyers, the types, fabric and style, and kindred topics. There are also separate introductions to each of the various periods, explaining and justifying the classification adopted. This plan of the work, though excellent for many reasons, has the serious defect that it makes it very difficult to avoid repetition, which in the present instance, we must confess, becomes irksome at times. Of the various cases of this we have noted we may cite the twice-told details of Crassus's preparations for his ill-fated expedition to Syria in 55 B.C. In the notes there are some instances calling still more urgently for the pruning knife, *e.g.*, in Vol. II, we have historical details in connection with the Battle of Munda given thrice over within a few pages. The compilation of the catalogue has, of course, occupied many years, and it is, we think, unfortunate that the earlier portion of the work had already gone to press in 1905, the year in which there appeared Dr. Haeberlin's epoch-making essay on the earliest Roman coinage. Hitherto the opening chapters in the history of Roman coinage, despite the work of Mommsen and others, had remained full of obscurity, but Dr. Haeberlin's researches have thrown great light upon the subject, and in particular upon one of the most difficult problems of Roman numismatics, the lowering in weight of the early bronze money. How did it come about that the *as libralis*, which was originally a pound of 12 ounces, eventually weighed only half an ounce? The reduction of the weight to one ounce and the final reduction to half an ounce were the subject of legislative enactment, and are known to have been made in 217 B.C. and 88 B.C., and these changes have been generally connected with the political situations after Trasimene and the Social War. The history, however, of the earlier reductions of the bronze standard is much more uncertain, and many theories have been advanced. For the early series of the *aes grave*, the variation in weight of the actual specimens of the *as* and its subdivisions is so considerable that no certain evidence can be obtained from them. For instance *as* No. 1 in the catalogue weighs slightly under eleven ounces, while Nos. 20 and 21 in the same series weigh less than five ounces and are actually lighter than several of the half *ases* with which they are classed. Writers generally agree that sometime before 217 B.C. the *as* of the two ounce standard was introduced, but on the question of when and why and how the original libral standard was reduced to this weight there has been much dispute. It is, of course, obvious that the early bronze coins must have been extremely cumbersome. It needs no more than a glance at the decussis figured on Plate VIII., with a diameter of over four inches and weighing a couple of pounds, to enable us to realise this. But so long as the only coinage of Rome was bronze a serious reduction in the weight could hardly be regarded as satisfactory. Consequently it has been commonly held that the earlier reductions of the bronze standard were due to political

Original from CORNELL UNIVERSITY

necessities, that it was in fact a case of State bankruptcy. The real clue to the reduction is the subordination of the bronze unit to the silver unit. Once this came about, once the *as* represented simply a certain amount of silver, it became *token* money, and the reduction in weight was a matter of no consequence. Now it is well established that silver was not issued at Rome till 269 or 268 B.C. But Dr. Haeberlin's researches have made it most probable that Rome issued a silver coinage from a mint at Capua, established as early as the beginning of the *aes grave* at Rome (say, about 335 B.C.), and that a relation between the two coinages was gradually established, and in consequence the silver standard was superseding the bronze before the actual issue from the Roman Mint of the famous first silver denarii of 268. In the light of Dr. Haeberlin's conclusions, we cannot but regret that Mr. Grueber has been compelled to retain the classification of the early *aes grave* according to the theory of Mommsen. During the Second Century B. C. the classification of Roman coins becomes extremely difficult, owing to the fact that many of the kinds of evidence upon which the expert relies are lacking in this period. On the one hand there is not a further reduction in the standards of bronze or silver, nor are new denominations introduced, and on the other hand the evidence of hoards does not become available till the beginning of the First Century B.C. The classification has to be based on most minute observation of fabric and style, on trifling changes in the forms of the lettering, or on very slight variations in the type, such as the form of the ear-ring of Roma on the obverse of the denarius or "an additional lock of hair on her left shoulder". It is here that Count de Salis's work is of particular value. After 100 B. C. the evidence of "finds" becomes immensely important, and Mr. Grueber rightly devotes considerable space to it. He is fully alive to the need of caution in dealing with this class of evidence. Negative evidence in hoards requires especial care, for the absence of some pieces may be simply due to their rarity, and not to the fact that the burial of the hoard preceded their issue. Then, again, there is always the danger of arguing in a circle, when, after using the presence or absence of certain issues in the hoard to determine the date of burial, we then from the date of burial deduce the dates of issues present or absent. As an example of the value of hoards we may mention the one unearthed at Fiesole in 1829. It consisted of more than 4,000 denarii, and contained specimens of almost every known issue from the first issue of silver down to the date of burial in 87 B. C. Among the various facts that have been deduced from the composition of hoards it is interesting to note that soon after the death of Julius Caesar the bulk of the coinage in currency throughout Italy was still Second Century or Early First Century.

The third volume of the catalogue is reserved for indexes and plates. This is an excellent arrangement which will greatly facilitate reference. The indexes are very full and useful. It seems a pity that it was necessary to include tables for the conversion of inches and grains into millimetres and grammes, and that the book could not have been brought into line with Continental publications by the use of the decimal system thoughout. The space occupied by these tables might very profitably have been used for a short glossary of technical terms. The plates are most excellent. There are no less than 123, and on them we have beautiful reproductions of some thousands of carefully-selected specimens.

The Keeper of the Coins is to be congratulated on the completion of a work which will rank as one of the most solid contributions to Roman numismatics since the appearance of Mommsen's work.

Catalogue of the Greek Coins of Phoenicia (British Museum, Catalogue of Greek Coins). By George Francis Hill, M.A.
With one map, a table of the Phoenician alphabet, forty-five plates, CXLVI pp. introduction and 361 pp. text.
Published by order of the Trustees. 8vo, 1910.
Price : £ 1.15.0.

The present volume is the twenty-sixth of the series begun in 1872, and deals with the coins of the cities and dynasts of Phoenicia down to the close of the Greek Imperial Coinage under the Emperor Gallienus.

The mints responsible for the coins described here are Aradus (with the connected localities of Carne, Marathus, and Simyra), Berytus, Botrys, Byblus, Caesarea-Arca, Dora, Orthosia, Ptolemais-Ace, Sidon, Tripolis and Tyre.

To the already existing material described in the catalogues by M. Babelon (*Les Perses Achéménides... Chypre et Phénicie*, 1893; *Traité des monnaies*, II) and by Dr Jules Rouvier (*Numismatique des villes de la Phénicie*, publ. in *Journal international*, 1900-1904), Mr. Hill has added much valuable information, from the coins represented in the National Collection and a large number of others preserved in various cabinets, many from the Berlin Royal Museum. All these he has carefully described, and reproduced a judicious selection in the supplementary Plates.

In his Introduction, the author has fully discussed the types, throwing much light on interesting numismatic and archaeological questions, correcting in some cases erroneous opinions of earlier students, and suggesting new attributions, different chronology of certain issues, etc., in keeping with present-day knowledge.

The study of the coins of Phoenicia is a fascinating one, not only to the numismatist who takes a special interest in that series, but also to the student of Eastern worship, civilisation and archaeology. The coin-types are a very striking evidence of the polytheistic cult of the Phoenician sea-coast. In the pre-Alexandrine period, they depict or allude to such deities as Astarte, Baal, Beruth, Dagon, Melqarth, etc. and after the hellenization of the Semitic cults in Syria, to many of the gods and heroes of the Greek pantheon. At Byblus Egyptian influence is witnessed to by the introduction of Isis, Kronos, Harpocrates, etc. on the types.

Among the early coins of Byblus, the British Museum possesses specimens of the issues of the kings Elpaal, Azbaal, Ainel, and Adramelek. In the numismatic series of Sidon, besides coins of uncertain classification, some of which Mr. Hill ascribes tentatively to king Bodashtart (?), we have silver and copper currency of Straton I, Tennes, Euagoras II, Straton II, and Mazaeus of the period preceding the Macedonian conquest.

Some of the mints dealt with in this volume only issued Imperial coins with Greek or Latin legends and inscriptions.

To review in detail a work such as Mr. Hill's requires a competence beyond mine, but these few notes should impress on the readers of the *Numismatic Circular* the extreme importance of this latest volume of the British Museum catalogue of Greek coins, which is so indispensable to the student and is daily rendering invaluable services to all interested in ancient numismatics.

Corpus Nummorum Italicorum. By H. M. King Victor Emanuel. Vol. I. Large 4 to, 532 pp. + XLII plates. Royal Academy of the Lincei, Rome, 1911.
Price : £ 2.8.0.

The first volume of the standard work on the coins of Italy upon which the King has been engaged for nearly twenty years has just been published, through the press of the Royal Academy of the Lincei, Rome.

The whole work, when completed, will consist of ten or more volumes, and will be of the utmost importance to all students of Italian numismatics. The subtitle of the "Corpus Nummorum Italicorum" indicates that it is "A first attempt at a general catalogue of the medieval and modern coinages issued in Italy or by Italians in other countries", but more than this it will give a most exhaustive view of the whole subject.

Hitherto the numismatist had to refer to a number of monographs if he wished to study Italian coins, such as those by the Signori Gnecchi on Milanese coins, by Senator Conte Papadopoli on the coins of Venice, by Prof. Malaguzzi on the coins of Bologna, and the older works by Promis on the numismatic series of Savoy, etc., by Cinagli on the Papal coins, by Orsini on the Florentine ducats and later issues, by Cav. Sambon on South Italian coins, as well as

Original from CORNELL UNIVERSITY

innumerable papers of more or less value published in numismatic reviews, magazines, etc. within the last two hundred years.

From these works, and above all from his own unrivalled and unique collection, the King has gathered some of the material of his vast compilation, which is of supreme interest on a scientific point of view no less than for the study of history and art of the various periods.

The task which King Victor Emanuel has undertaken is one of which magnitudo can only be appreciated by numismatists. Italy, for many centuries, was of all countries, one of the most productive and important centres of coinage. Much patience and research, systematic and scientific study, aided by a vast erudition, are the qualities which made the King eminently fitted for the carrying out of a work on so large a scale and so minute in detail.

It is well known that His Majesty began collecting when almost a child, and he must have realized very early in the day the great need of some general catalogue of Italian coins. With the object of compiling such a work, he not only became thoroughly acquainted with all the literature on the subject, but spared himself no pains or trouble to increase his collection by procuring all the coins, not represented in the Royal Cabinet, which came up for sale in his country and abroad, and even purchased large collections, amongst which that of the late senator Marignoli, which was justly famous and considered as one of the finest belonging to private individuals in Italy.

In the compilation of the catalogue, the King profited by the actual assistance of experienced numismatists, foremost among these Colonel Ruggero, who is well-known as a numismatic writer.

The first volume deals with the coinages of the House of Savoy. It gives short historical notes of the Rulers and Princes of that house, and a full description of the coins issued by them or struck in their names, with all the details of metals, weights, dimensions, types, together with the necessary information upon the mints from which they were issued. The text fills 532 pages in large quarto and is illustrated by 42 plates reproducing the various pieces and important varieties.

Since the days when Promis wrote his Monete dei Reali di Savoia in 1841 many fresh coins have turned up and much documentary information has been added to the then available knowledge on the subject. To the numismatic series of his illustrious and famous ancestors, King Victor Emanuel has given his predilection. The coins of the fifteenth and sixteenth centuries representatives of the House of Savoy, Philibert I, Charles John Amedeus, Philip II, Philibert II, Charles II, ranging between 1470 and 1550, rank among the most artistic productions of the Italian Renaissance, and rival in merit the fine issues of the mints of Milan, Mantua, Florence, Naples, Rome, etc.

The further volumes of the « Corpus Nummorum Italicorum » will be awaited with great eagerness. Dealing with the wide variety of currencies issued by no fewer than 250 mints from early medieval times to our present day, they will form an unequalled record of the endless vicissitudes of Italian history and varied currents of art. The earliest days witness the confusion of Byzantine, Lombard, Ostrogothic and Barbarian monetary systems and issues.

Later come the Carlovingian deniers; the coins issued by Italian cities and religious foundations which were granted the right of minting from the Empire; the gold currency of the Normans in Sicily, followed by the famous early issues from the free cities, the Fiorini of Florence, the Zecchini of Venice, the Scudi of Genoa; the Papal coins; the Angevin and Aragonese currencies of South Italy; and finally the coinages of the Northern mints from the Cinque Cento until the union of Italy under the King's grandfather, Victor Emanuel II.

Such names as Benvenuto Cellini, Caradosso, Francia, Leone Leoni and Pastorino appear among those of the Engravers of the zecche of Rome, Milan, Florence, Mantua, etc. which speaks for the artistic interest offered by the Italian coins of the fifteenth and sixteenth centuries.

The edition of the Corpus intended for sale will be of 1200 copies at a price of 60 lire or £ 2.8.0 each; and the sale is entrusted to the National Society for the Orphans of State Employés, which will receive the whole benefit of the sum produced, except for a small portion destined for the Italian Numismatic Society.

Rome, 6 février.

L'Académie des Lincei a acclamé le roi président d'honneur à la suite de la publication du *Corpus nummorum italicorum*, ouvrage de numismatique dont le souverain est l'auteur.

FINDS

THE FIND OF ROMAN COINS AT EDWINSTOWE, NOTTS.

On November 12th 1910, in a field at Kingsland Farm, in the parish of Edwinstowe, a small Roman clay pot, of light colour, was turned up by a plough in charge of William Woodcock, in the employ of Mr. J. Herbert, tenant of Lord Savile, Rufford Abbey.

The pot, which was broken, contained coins covered with a thick deposit of verdigris, over which a sandy coating had formed, so that it was impossible to say whether they were of silver or bronze. A few, having been cleaned, turned out to be Roman silver Denarii, or the silver " pennies " mentioned in the New Testament. They are coins rather smaller than the modern sixpence, but thicker, and with a purchasing power of quite half a crown at date of their issue, though now equal to about 8d. They were the usual pay of a day labourer in Roman times—viz., " a penny a day. "

Claimed as treasure trove by the Crown, the coins were handed over to the Coroner for the Retford district, Mr. E. S. Spencer, solicitor, Retford. There are 369 coins, but a few may have been lost in the soil, as the pot was broken by the ploughshare. The coins were entrusted for identification and classification to a Retford gentleman, who is a numismatist, and having been wholly or partly cleaned, they proved to be all silver Denarii, of the best period of the Roman Empire—viz., of the periods of the Flavian and Antonine Emperors, from A.D. 68 to A.D. 192, as follows: —

2	Coins of Emperor	Galba, acceeded	A.D. 68
1		Otho	69
37	Flavians, and	Vespasian	69
5	Conquerors of	Titus	72
25	Judæa	Domitian	72
12		Nerva	96
114		Trajan	98
68	Antonine	Hadrian	117
47		Antoninus Pius	138
15	Emperors	Marcus Aurelius	140
1		Commodus	175
9	Uncertain.		
33	Empress, various.		
369			

It will be observed that there is only one coin of the Emperor Commodus, who reigned 12 years, which fact probably marks the date at which they were buried during his reign, and in the earlier half, say about A.D. 186, when the Roman occupation of England and Wales was complete, and when Roman military stations existed at Little Chester, by Derby; Chesterfield, Lincoln, and Doncaster. Roman settlers have also left evidences of dwellings in Notts at Brough (Crocolanum), near Collingham; Littleborough (Agelocum), Oldcotes, and at Martin, by Bawtry. In 1802, 82 bronze coins and 30 silver Denarii were found in a pot in a field by Morton Hall. In 1833 a find occured at Obserton of 940 bronze coins on the road between Retford and Worksop, mostly of the date of the Emperor Constantine the Great, who was born at York, and acceded A.D. 306. On the same road at Babworth, about 1860, was found a coin of Emperor Probus, A.D. 280, and two of Emperors Aurelian and Vaballathus, A.D. 270, the latter being the son of Queen Zenobia of Palmyra, or Tadmor-in-the-Wilderness, built by King Solomon in the height of his glory. In 1899 two large Sestersiæ, of bronze, of Hadrian and and Vespasian, and a Follis of Constantine, were

Original from CORNELL UNIVERSITY

dug up in Retford, and numerous coins were for many years dug up at Littleborough, as recorded in Piercy's History of Retford.

There is no evidence that Edwinstowe was a Roman station, but it was a very ancient Royal Desmene of Saxon Kings, on the outskirts of the King's Forest of Sherwood, close to the Parliament Oak, where King John held a Council, and to Clipstone, where Edwin and other Saxon monarchs had a Royal residence, and the name of the farm where these coins were found is still " King's-land-farm. " The greatest of the kings of North-Humber-Land was Edwin, who defeated the Pagan usurper of his kingdom at the battle of the Idle, near Gamston, Retford, who fortified the Pictish Castle, Edwin's Burg (Edinburgh), as his northern stronghold, while his most southern territory was at Edwinstowe, and at the Saxon palace of Clipstone.

The fact that *some* of the coins recently found are in absolutely mint condition points to the fact they were issued by the Roman Government directly for military pay, and not for merchants' use (as they would be more worn), and considering that they have been buried in the earth more than 1,700 years, the whole are in a remarkable state of preservation.

The Coroner's jurisdiction is statutory as far back as the reign of Henry III., when coroners were specially instructed to hold inquiries in connection with the finding of treasure trove to ascertain what the find was and who were the finders. Under the circumstances, Mr. Spencer did not consider that it was necessary to hold an inquest, and therefore communicated with the Treasury on the subject. He has recently received a letter from the solicitor to the Treasury saying that there is no need for an inquest to be held. We understand that Mr. Spencer has put in an application for some of the coins to be given to the Retford Grammar School museum and other institutions. The reward to the finder is a matter entirely at the discretion of the Lords Commissioners of the Treasury.

E. Wilmshurst.

TREASURE TROVE.

A discovery of treasure consisting of about 200 gold nobles of the reign of Edward III. has just been made at Fakenham.

The finder made inquiries through *Hobbies*, and the matter was brought to the notice of Mr. Fred. W. Burgess, an expert on curios, who recognized the importance of the find. The Solicitor to his Majesty's Treasury has been communicated with, and an inquest will be held shortly. Many of the pieces are in mint preservation, and among them are some very rare types. The varieties include coins struck at Calais and London mints. Some issued between 1351 and 1360, in addition to the titles of King of England and Lord of Ireland, have that of King of France. Those issued between 1360 and 1369 have the title of Duke of Aquitaine and not of France. The nobles issued 1369-77 have both titles, and of these, which are somewhat scarce, there are several varieties. The gold nobles of the reign of Edward III. were almost pure gold, only half a grain of alloy being used. The design of the obverse is that of the King armed and crowned, standing in a ship, from a mast-head of which flies a streamer bearing the cross of St.-George.

The value of the find will be some hundreds of pounds, and, according to modern usage, the man, who made the discovery while digging a drain, will receive a large share of the proceeds.

NUMISMATIC SOCIETIES, MUSEUMS, &c.

ROYAL NUMISMATIC.

January 19.— Sir Henry H. Howorth K.C.I.E. President, in the chair. Mr. Frank E. Burton J.P. was elected a Fellow of the Society. Mr. G. F. Hill read a paper on Classical Influence on the Italian Medal. The medallic art has been described as in a sense the art *par exellence* of the Italian Renaissance; the medal appealed most strongly to Italians of the time by the scope which it gave to the expression of individuality and *virtu*. Ancient coins, especially of the Roman Empire, being found in the soil more frequently than any other kind of antiquity, were the chief means, apart from literature, by which the memory of great men of antiquity was revived, and were passionately admired by humanists from Petrarch onwards. Imaginary Portrait-medals were made, where real ones were not obtainable. The precursors of the true Renaissance medals were closely modelled on Roman coins or medallions. Pisanello's first medal, of John VIII Palaeologus, continues the series of Roman medallions of John's predecessors in the Roman Empire.

But the influence of classical models on Pisanello is merely suggestive; he shows no trace of imitation. The great medallists of the Florentine school imitate ancient models on the reverses of their medals, which are mostly shop-work in which they were not interested, while the portrait-obverses are original in conception and execution.

The medallists of the Roman school in the fifteenth century (such as Cristoforo Geremia) and of Venice (such as Guidizani and Boldu) were strongly but naively influenced by classical models. In the sixteenth century a more sophisticated imitative art arose, of which Alessandro Cesati is the best instance; a group of medals with portraits of Augustus, Priam, Dido and Artemisia may be attributed to him. Cavino of Padua represents a different school, that of the artists who imitate with intent to deceive. The general inference to be drawn from the study of the subject is that the following of classical models was, except in the case of the greater artists, detrimental to the sincerity and directness of the art.

SOCIÉTÉ FRANÇAISE DE NUMISMATIQUE.

Séance du 3 décembre.

Le président annonce que l'Académie des Inscriptions a accordé un prix de 1.000 francs à la Société pour l'ensemble de ses travaux.

M. Bordeaux communique, au nom du commandant de Kesling, un *triens* mérovingien frappé à Bordeaux par un monétaire inconnu.

M. Dieudonné étudie, à propos d'une acquisition récente du Cabinet des médailles, les nombreux types monétaires du règne de Charles VII.

Le docteur Bailhache fait circuler un douzain inédit de Charles X, cardinal de Bourbon, frappé à Beaucaire.

Le comte de Castellane communique un document de 1499, relatif au monnayage provençal de Louis XII et établit un rapprochement entre la reprise du type à la croix de Jérusalem et les préparatifs de l'expédition de Naples et les projets de croisade.

M. Adrien Blanchet présente un exemplaire de la médaille très rare frappée en 1501 comme souvenir de l'entrevue de Louis XII et de l'archiduc d'Autriche. On peut le considérer comme la dernière médaille conçue dans l'esprit du Moyen âge.

NEWCASTLE SOCIETY OF ANTIQUARIES.

At the annual meeting of the Newcastle Society of Antiquaries held on Friday Jan. 27 in the Castle, the Duke of Northumberland presiding, a report was presented as to the result of the excavations which have been carried out on the site of the Roman town of Corstopitum (Corbridge).

The report stated that the committee had carried out a vast amount of exploratory work during the past season. Much of this had to be carried down to a considerable depth, so that the surface area exposed was proportionately less. The work had again been directed by Mr. R. H. Forster, who remained on the spot from first to last, and had the active support of Mr. H. H. E. Craster and Mr. W. H. Knowles, the latter again undertaking the task of measuring and preparing drawings of the work. The excavations had also had the supervision of Professor Haverfield, who, as in previous years, remained during the vacation with associates from Oxford. The committee recalled the fact that at the outset of these investigations little else was known of Corstopitum beyond its name as given in

the first " Item Britanniarium " of the Antonine Itinerary, and such information as is to be found in Horsley. So far the excavation committee had demonstrated that Corstopitum dated from an early period in the Roman conquest of the Tyne valley and shared in the vicissitudes of succeeding centuries, and that its occupation continued until the very eve of the departure of the Roman troops from Britain.

The DUKE of NORTHUMBERLAND referred to the find of gold coins at Corstopitum, and to the dispute between the British Museum and himself as Lord of the Manor as to their possession. He had made up his mind, he said, that he was going to try and secure for local antiquaries the trust of these coins. He was a Trustee of the British Museum, but he thought that, while there were some objects of such extraordinary interest and national importance that they should be in the National Museum, there were others the interest in which was enormously enhanced by the locality in which they were found. For educational purposes the local museum, such as the Castle, was quite as useful, although useful in another way, as was the great National Museum which they all hoped to see supported, continued, and improved to the highest degree.

VEREINS FÜR MÜNZKUNDE IN NÜRNBERG

* In der am 2. Januar 1911 sehr stark besuchten satzungsgemässen Hauptversammlung des *Vereins für Münzkunde in Nürnberg* konnte der Vorstand von dem Blühen und Gedeihen des Vereins (z. Z. 100 Mitglieder), der Schatzmeister von dem ausgezeichneten Stand der Kasse und der Pfleger von wertvollen Zugängen zur Bücherei und zur Sammlung berichten. Die Herren Zippelius und Neumann beantragten nach Durchsicht der Kasse Entlastung für den Schatzmeister, die ihm unter Dankeserstattung erteilt wurde. Auf Antrag des Herrn L. Neu wurde die bisherige Gesamtverwaltung (C. F. Gebert-Vorstand, H. Lohrer-Schatzmeister und stellvertretender Vorstand, Friedr. Müller-Schriftführer, Friedr. Köhler-Pfleger und W. Lauer-Beisitzer) durch Zuruf wieder gewählt. — Nach Schluss der Hauptversammlung hielt Herr Dr. H. Buchenau, Konservator des Kgl. Bayer. Münzkabinetts in München, seinen angekündigten Vortrag über: *Die Münzen der Reichsmünzstätte Nürnberg im Mittelalter*. In allgemein fesselnder Weise legte der Herr Redner in fast zweistündigem, durch eine kleine Pause unterbrochenem Vortrage alle die vielen sicher oder doch wahrscheinlich aus der Nürnberger Reichsmünzstätte hervorgegangenen Münzen vor, Originalstücke sowohl als Zeichnungen unterstützten seine Ausführungen, die auch das gesamte benachbarte Gebiet mit umfassten. Zuerst war es die reichhaltige Pfennigperiode, der sich dann die Hellerperiode anschloss. Langandauernder Beifall belohnte den Vortrag des Meisters auf dem Gebiete der Mittelaltermünzen-Forschung und der Vorsitzende sprach es unter zustimmendem Beifall in seiner Dankesabstattung aus, dass wir uns freuen, dass solch ein Forscher an unserem vaterländischen Kabinett tätig ist. — Weiter gelangten noch zur Vorlage das prächtige, von Herrn Dr. E. Bahrfeldt-Berlin der Vereinsbibliothek als Geschenk überwiesene Werk *Die Danziger Münzen* und der von dem Mitgliede Herrn Joseph Hamburger-Frankfurt a. M. gestiftete vollständige Katalog Feil mit Preisliste in schönem Einbande. Herr Leutnant König brachte die Medaille, welche den Herren übergeben wurde, welche seiner Zeit mit dem Parsival-Luftschiff die erste Fernfahrt von Anzahl bayerischer und anderer Kriegsdenkmünzen und ein Nürnberger Ratsmandat, Herr Hummel eine neue, für Amerika bestimmte Denkmünze.

OBITUARY

MONSIEUR CORNELIUS VON FABRICZY.

Nous apprenons la mort de l'excellent historien d'art Cornelius von Fabriczy, décédé à Tubingue le cinq octobre dernier à l'âge de soixante et onze ans. On lui doit de nombreuses contributions de grande valeur à l'histoire de l'art, spécialement de l'art italien, dispersées dans les principales revues allemandes, notamment dans le *Jahrbuch der Kœnpreuszischen Kunstsammlungen*; signalons entre autres, dans cette dernière revue, une étude de grande importance sur *L'Arc de triomphe d'Alphonse Ier d'Aragon au Castel Nuovo de Naples* (1899 et 1900) et quantité de publications de documents d'archives sur les artistes italiens des XVe et XVIe siècles.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(For further particulars see first page of this Circular.)

*** "I think the subject on which the officers of the garrison spoke most feelingly was the devotion and noble spirit of discipline and determination shown by the Sikhs. There were but a hundred of them in a garrison of nearly four hundred, but the officers said that without them they could never have held out, and that but for these Sikhs not one of them would have been there now. These Sikh soldiers only grew more enthusiastic as the siege because closer and times seemed harder. With calm self reliance they stood proudly at bay like a rock with the waves beating against it. And so great was the sense of discipline which their stern old native officer Gurmukh Singh instilled into them, that when during an attack the sick struggled out of hospital to join in the fight he would not excuse even their impulsive bravery, but told them that a soldier's first duty was to obey, that they had been ordered to hospital and there they must stay. It was the discipline ingrained into these men that saved the garrison.

As long as a Sikh was on sentry, while Sikhs were holding a threatened point, Captain Townshend had nothing to fear. The enemy would never catch a Sikh off his guard, and could never force their way through a post of Sikhs while one remained alive. They saved the garrison, and the officers gratefully acknowledge their service." *Vide The Relief of Chitral.*

The 14th Bengal Infantry are now the 14th Prince of Wales's Own Ferozepore Sikhs.

Badge. The Plume of the Prince of Wales.

ADVERTISEMENTS

RECENTLY ISSUED.

COMMON GREEK COINS

BY THE REV. A. W. HANDS

8vo. — 170 pp. — Illustrated. **Price : 5/- nett.**

"It must not be thought that "Common Greek Coins" is merely a catalogue of ancient Greek money, for it is far more than this. The describing of the coins is utilised to give a cleverly condensed, but most interesting, account of Greek history and mythology, commerce and progress in civilisation. The colonies and conquests of the Hellenes, their foolish feuds and transient friendships all come under survey and comment, and the usually erudite style of Greek numismatists is transformed into a brilliant and most readable essay upon the ancient Greek world. This first volume is provided with a useful index and catalogues of the monograms, initials, symbols, and various mint marks are duly set forth to the various chapters, assisted by numerous engravings of all the more important types."

(*The Egyptian Gazette.*)

A NEW COMMEMORATIVE MEDAL

OFFICIALLY STRUCK BY THE
COMMISSÃO DO CENTENARIO DA GUERRA PENINSULAR
TO COMMEMORATE THE FIRST CENTENARY
OF THE PENINSULAR WAR 1808-1814.

May be obtained from SPINK & SON, LTD., SOLE AGENTS IN THE UNITED KINGDOM.

Silver. 69 mill. ($2\frac{3}{4}$) ..... **Price. £2. 2s. Od.**
Real Bronze. — ..... **Price. £0. 15s. Od.**
Post Free.

"There has been issued a very artistic medal to commemorate the Centenary, whose spirited design puts to shame many an official medal produced on our own side of the Channel".

Times.

(re. Centenary of Busaco, Oct. 4. 1910).

SPINK & SON'S
MONTHLY
NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 12615.*)

SEGESTA.

The site of this ancient barbarian city is on a high hill about six miles from the sea, which there forms a great bay called Castellamare. Palermo is about thirty-four miles distant towards the east, and Eryx about fifteen towards the west, while on the south the territory of the city bordered on that of the Greek Colony, Selinus, about twenty-seven miles distant, with which the Segestans were continually at war. The ruins of Segesta may be seen still, a few miles from the modern town of Calatafimi, on a hill now called Monte Barbaro. Considerable remains of a theatre, and of baths exist on the ancient site, and near it are the ruins of a Doric temple never completed. It is described as peripteros-hexastylos (of thirty-six columns).

The earliest coins of Segesta are, apparently, the work of Greek artists although the citizens were regarded as barbarians by the Greeks.

The north-western part of Sicily was in the fifth century inhabited by Sicanians and Phoenician settlers on the west, but at Segesta some other race appears to have made a settlement. It does not seem to be known with any certainty whence they came, but in all probability, they, like the Sicanians, came from Italy. The desire to be regarded as descendants of the Trojans was very common in Magna Graecia, and the legends appear to shew the influence of Greek colonists, among whom the Cyclic poems, concerning the fate of the Trojans after the fall of their city, were well known. In regard to the name Segesta the question arises as to whether the Greeks applied the name of the city to a mythical hero, invented by them to explain the name they did not understand, or whether the name may be regarded as evidence of the truth of the legend.

Perhaps we should associate Segesta with such names as Taras, Metabos, Liparus, Latinus, Lacinius, and Italus, who all appear as mythical heroes giving their names to places. Dr Lor. Grasberger has given several suggestions as to the origin of the name of this city, but nothing satisfactory has yet been put before us in harmony with the types and inscriptions on the coins.

The learned Doctor's references to Αἰγέστη, Goat city, and Ἀκίστη, which he connects with Acestes and Asklepios seem difficult to reconcile with the coin-inscriptions. The whole subject of the origin of Greek city-names is full of difficulty, and, at any rate in the case of this city, no light has been thrown upon its early history by examining its name. Confer pp. 58, 91 *Studien zu den griechischen Ortsnamen*.

The name of the Elymi and that of their city Segesta were looked upon by Dionysius as names commemorating the rule of the Trojan Elymus and a woman named Segesta.

It is noticeable that the artists who designed the coins evidently had in their minds the legend, told by Tzetzes and Dionysius, concerning the river-god in the shape of a dog. No mention of Elymus or Segesta is found in the Iliad, and the account given by Dionysius seems to be merely a rationalistic interpretation of the story told by Tzetzes. We know from the coins that the name of the city was spelt Segesta, but later we find it was softened into Egesta. It has been suggested that the Romans changed Egesta to Segesta in order to avoid the ill-omen in a name so similar to their own word " Egestas " meaning extreme poverty, but the legends on the coins disprove that idea.

The following extracts from Greek writers give the ancient versions of the legends connected with the foundation of the city.

Thucydides considered the Elymi to be derived from two tribes Trojans and Phocians.

Thucydides (VI, 2). after reference to the Cyclopes and Læstrygones of the poets turns to the more historical period saying " The Sicanians appear to have been the first who settled in Sicily after them; indeed as they themselves assert even before them, as being the aboriginal population; but as the truth is found to be, they were Iberians and were driven from the river Sicanus, in Iberia, by the Ligurians and it was from them that the island was at that time called Sicania, having previously been called Trinacria; and still even to this day they inhabit Sicily in its western districts. But on the capture of Troy, some of the Trojans, having escaped the Greeks, came in vessels to Sicily, and having settled in the neighbourhood of the Sicanians, were all together called Elymi and their cities Eryx and Segesta (Ἔγεστα) ". There were also settled with them some of the Phocians, who, while returning from Troy, were carried by a tempest first to Libya and then from that country to Sicily.

Dionysius of Halicarnassus (lib. I, LII) describing the voyage of the Trojans says " When they were near to Sicily, whether they stopped there purposely, or whether they were driven there by the violence of the winds so frequent on this sea, they landed on the island at a place called Drepana, where they had the good fortune to meet those who had departed from Troy before them with Elymus and Ægestus. These had chance to meet with a favourable wind, their vessels, moreover, were not loaded with heavy luggage, and so they arrived in Sicily a short time before. There they settled near the river Crimesus on land given to them by the friendly Sicanians who were relatives of Ægestus, who had been born and brought up as shall be related.

One of the ancestors of Ægestus, an illustrious chief of the Trojan race, had a quarrel with Laomedon. This King put him to death, for I know not what cause, and all his sons, in fear lest some day they might do him harm.

But in regard to his daughters who were unmarried he thought it unworthy of him to take their lives, but on the other hand he thought it would be dangerous to him if they should marry Trojans. He therefore put them into the hands of some merchants with orders that they were to be carried to the farthest lands. A certain young chief embarked with them in the same ship, as he was in love with one of them, whom he married on his arrival in Sicily. He had a son named Ægestus who learned the language and customs of the country.

When his father and mother were dead Ægestus obtained from Priam, King of Troy, permission to return to his own land. But after having fought through the war with the Greeks, the city being on the point of being taken, he returned to Sicily with Elymus and three ships.....

The Trojans of the band of Elymus and Ægestus fixed their homes in this part of Sicily and ever since they have always been called Elymians; on account of the fame of Elymus, for being of royal blood his name was given to all the people.

Strabo (XIII, p. 608) writing concerning the fall of Troy says " There is another account that he (Æneas) disembarked at Ægesta in Sicily with Elymus a Trojan, and took possession of Eryx and Lilybæus, and called the rivers about Ægesta Scamander and Simois: that from Sicily he went to Latium, and settled there in obedience to an oracle ". Hellanicus of Mitylene about 400 B.C. wrote of Æneas passing into Italy from the north through Thrace. Callias in 280 B.C. mingled the stories of Odysseus and Æneas, but Timaeus of Tauromenium. about 260 B.C., completed the ideal story of Æneas founding Rome. As early as 258 B.C. the Romans had claimed the citizens of Segesta as kindred folk on account of their Trojan descent.

Niebuhr (c. XIII) in his History of Rome gives an account of the literature relating to this subject.

Elymus is said by Tzetzes (ad Lycophron 959) to have been a natural son of Anchises and brother of Eryx. Virgil also refers to Elymus in the Ænead (V, 73, confer note by Servius).

Strabo (VI, 272) also tells of another tradition concerning the founders of Segesta. " They say that Ægesta was founded by the Greeks who passed over as we have related when speaking of Italy, with Philoctetes to the Crotoniates, and were by him sent to Sicily with Ægestus the Trojan ".

This Ægestus is the Acestes of Virgil.

(Aen. I. 195, 550, 553. V. 29, 711, 61, 73, 301, 757.)

The river Scamander mentioned by Strabo is also alluded to by Diodorus Sic[s] (XX. 71) who relates how " Agathocles dragged the poor citizens out of the city Segesta, and slew them by the banks of the Scamander". Although we cannot look upon the Trojan legend as having any historical foundation, the original founders seem not

Original from CORNELL UNIVERSITY

to have been Greeks, for Thucydides (VII, 57) includes them as Barbarians; he says ". Of barbarians there were the Segestans who indeed invited them (Athenians) to their aid with the greater part of the Sicels.

But the fact that the earliest coins bear Greek inscriptions and are evidently the work of Greek artists, shews that there was some mingling of Greeks with the early settlers, and the Trojan legend may have merely signified that in an earlier period than that of the foundation of Naxos and Syracuse, Greeks had penetrated as far west in the Island as Segesta; and there was a natural tendency to attribute to the fugitives from Troy such early settlements of Greek people. Hellanicus stands alone in his story (apud Dionys. 122); he represents the Elymi as having been driven from South Italy by the Oenotrians previous to the similar migration of the Siculi. Scylax (p. 4, § 13) classed the Elymi as of a different race to the Trojans.

The Elymi have been called Pelasgians but that is a name representing an unknown quantity. It is in harmony with their South Italian origin, but we must remember there were Pelasgi with the Trojans at Troy. Whether a Pelasgian origin would account for their early knowledge of Greek seems a disputed point.

THE NYMPH SEGESTA.

This weird legend is told by Tzetzes in his notes on the "Alexandra" of Lycophron (line 471, p. 56, Ed Potter 1697) and also by Servius in his notes to Virgil (*Æn.* 1.550) and by Dionysius (1 52.)

As they all agree in the main story it may be told as follows. The Trojan Phoenodamas, according to Tzetzes, or Hippotes or Ippoteus or Ipsostratus, according to Servius, had three daughters. When Neptune sent a sea monster to devastate the shores, the people consulted Apollo, who decreed that a virgins hould be sacrificed. Laomedon tried to make Phoenodamas offer one of his daughters, but he raised a tumult of people crying that Laomedon whose guilt had brought on the suffering should offer his own child Hesione; this was done but the maid was saved by Heracles, says Tzetzes.

Servius says that Ippoteus sent off his daughter Egesta in a ship which safely reached Sicily. Tzetzes represents the daughter of Ippoteus as sent off by Laomedon and landed in Lybia. Both writers represent Egesta as taken to wife by the river-god Crimesus in the shape of a dog.

The offspring of this marriage was Ægestus or Acestes who built the city Segesta and named it after his mother.

The earliest coin-types of the city evidently allude to this legend, and are witnesses to the existence of the story long before the time when Tzetzes and Servius related the legend.

The legend is suggestive that a plague may have been the cause of the immigration into Sicily, and that in those times human sacrifices were offered.

Another sign of the early period of the settlement is the attribution of the founder's origin to the union of a river-god with a human maiden. Dogs were connected with the cult of the god Adranas, who had a great temple on Mt Atona, in the sacred enclosure of which a thousand splendid dogs were kept, which, according to Aelian, appear to have been like the Mt. St. Bernard dogs, friendly guides to strangers who had lost their path.

If some fugitive maiden flying from a plague stricken spot, and escaping from the horrible fate of dying as a human sacrifice, was received by some priest or leader, some native worshipper of Adranos, accompanied by his sacred dogs, such a legend as that ot Segesta and the dog-formed river-god might have been evolved. According to Movers (I, 340, 405) the cultus of Adranos was akin to that of the Phoenician Moloch or Adar.

The legend of Segesta bearing a child to a divinity in the form of a beast belongs to the same series as that of Europa, carried off by a bull, told by Apollodorus.

The human sacrifice related in the legend reminds us also of the legends of Iphigeneia and Polyxena, the daughter of Priam, sacrificed at the tomb of Achilles, related by Arctinus. The mention of a sea-monster sent to devastate the shores reminds us of the legend of Andromeda told by Apollodorus and Hyginus. The inhabitants of Segesta, in the days when their mint was established, were Greeks so familiar with the legends of the Cyclic poems that they thought it natural to employ them in furnishing designs for their coinage.

Whatever may have been the race of men who first built a city on Monte Barbaro, the men who designed the earliest coins of Segesta were evidently Greeks.

THE INSCRIPTION.

No explanation of the legend **ΣΕCΕΣΤΑΞΙ⋮ΕΜΙ** has met with general approval, the three final letters no doubt must be the Greek εἰμι, and signify "I am", but the letters **Ξ⋮⋮** though they are Greek characters do not convey any meaning acceptable to all readers.

It has been suggested that we have in these letters a specimen of the ancient Elymian speech. M. Kinch (*Zeitsch. Num.*, 1888, s 187) suggested that the letter **⋮** was meant to represent the letter **H** and he would read Σεγεσταξιη εἰμι "I am a Segestanian coin".

M. R. Meister (Berlin, Phil. Wochen, 1890, s, 672) read the legend as Σεγεσταδιη εἰμι and considered the termination -αδιος as Æolic. He notices that Thucydides said the Elymi came from Phocaea, which was near the Æolians. In Sicily itself we have an example of the interchange of the letters **Ξ** and **Δ** in the names Ζαγκλη and Δανκλη.

The question then arises as to whether the termination αδιος could be used as an ethnic ending. M. Kinch refers to Μυσαδιος as the Æolic for Μυσος.

Was there such a name as Σεγεσταδης from which we could form the adjective Σεγεσταδιος?

The difficulty in the way of accepting this suggestion is that we cannot easily receive the **⋮** as an **H** or **E**, we do not read **Σ⋮CΕΣΤ** but **ΣΕCΕΣΤ**.

Another suggestion made on p. 600 of A. Holm's "Geschichte Siciliens" is that we should understand the **Ξ⋮⋮** as meaning **Δ⋮⋮** or "div" meaning Segesta the goddess".

He then goes on to suggest that the inscription is similar to some found in Lycia and notes that the Lycians and Trojans were well-known to each other and the myths of the foundation of the city imply that Trojans and Phocians settled in Segesta.

May not the **Ξ⋮⋮** be equivalent to **Δ⋮F** the digamma was pronounced like the Latin v, and υ was used for β by some Greeks.

Thus we should have Σεγεστα διϝ "Segesta the noble" as in *Iliad*, II, 615, we find 'Ηλιδα δῖαν we also have in *Iliad*, II, 221, δῖα γυναικῶν (noblest of women) and δῖος ὑφορβός *Odys.*, 21, 240, and of nations δῖοι Αχαιοί. The pronunciation of β was softer than our **B**. Later Greek writers used it for the Roman **V**. In Magna Graecia β was used probably for the digamma βελη for ἴλη.

COINS OF SEGESTA BEFORE 480 B.C.

I. Didrachms. Ideal weight: 134.57 grains. Size .85.

Actual weights of specimens vary from 124-136 grains.

Obv. **⋮⋮ΞΑΤ⋮⋮⋮Α⋮**.

Head of the nymph Segesta to right, wearing necklace; her hair turned up behind under diadem over which the ends fall: border of dots.

The eye is formed in the normal archaic manner.

Rev. A hound to right, with his nose to the ground: border of dots.

The inscription is sometimes not retrograde.

II. Similar to No I but the dog wears a collar and in the inscription **⋮⋮⋮** instead of **⋮Α⋮** and with three more letters at end **⋮⋮⋮⋮⋮ΞΑΤ⋮⋮⋮**.

III. Similar to No II omitting **⋮⋮⋮** from inscription and on Reverse above the hound a symbol as a murex, barleycorn.

IV. Similar to No III.

Rev. Hound looking back, above a murex: border of dots.

V. Obv. **⋮ECΕ⋮ΤΑΞ⋮ ⋮**.

Similar head of nymph with diadem of beads.

Rev. A hound running to right: border of dots.

The general appearance of the coins is somewhat noticeable, as the die of the Obverse, on side on which the head is struck, was

Generated at Washington University in St. Louis on 2022-05-13 02:14 GMT / https://hdl.handle.net/2027/coo.31924069735599

Original from CORNELL UNIVERSITY

smaller than the flan, and therefore the edge of the coin was forced up all round forming a rim.

This side of the coin is scientifically the Reverse, but it is convenient to call the side on which is the head the obverse. The two little projections formed in the casting of the flan are just perceptible in most of the coins. The die on which the head was engraved must have been in some way guided very accurately in the striking because all the coins have the head perfectly centred and the raised rim is very equally thick. Some of the contemporary coins of Syracuse, however, were struck in a similar manner.

A. Holm does not include any of the coins of Segesta in the Archaic period, but the eye on the face of the nymph when fullfaced is archaic, as on the coins of Syracuse of that date, and the style is archaic.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS
Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-fifty-first article.

(*Continued from col. 12630.*)

SENG, PAUL (*Germ.*). Mint-official at Zellerfeld, 1602.

SENHOUSE, WILLIAM (*Brit.*). Bishop of Durham, 1502-1507, issued Pennies in the name of Henry VII. His successor was Christopher Bainbridge, 1507-1509.

SENNI, ARCADIO (*Ital.*). Contemporary Sculptor, born at Fivinzano; pupil of Dupré. At the Paris Salon of 1895 he exhibited nine Portrait-medallions.

SENSCH HOLCZ, ULRICH (*Austr.*). Mint-master at Eger, 1460-1469.

SENSENSCHMIDT VON SIEGEN, HANS (*Germ.*). Mint-master at Frankfort-on-M., 1535-39, 1540.

SENZILLO Y LEAL (*Span.*). Medallist of the latter part of the seventeenth century.

SEPSAUX, JEHAN DE (*French*). Provisional Mint-master at Chalons-sur-Marne, 1426.

SÉPULCRE, CHEVALIER DU SAINT (otherwise **MARX SCHWAB**) (*Germ.*). "Goldsmith of Augsburg, *circ.* 1550, who is supposed to have been the inventor of a coining-press, introduced in France by Guillaume de Marillac, superintendent of the Paris "Monnaie du Moulin" and Mint-master general, 1551-1555.

SEPULVEDA, MARIANO GIAQUINTO (*Span.*). Medallist of the latter end of the eighteenth century and early part of the nineteenth, who was residing at Madrid, where in 1800 he was appointed Die-cutter at the Mint. He signed his medals **M. G. S.**, or **SEPULVEDA** in full.

Amongst his medallic productions I will mention the following: Proclamation Medal of Charles IV., Madrid, 1789; ℞. ACCLAMATIO AVGVSTA; — Another, with ℞. REGNORVM REGIMINE SVSCEPTO, etc., MDCCLXXXIIII Spain standing; — Medal, with busts of Charles IV. and consort, Marie Louise, struck in illustration of J. P. Droz's process of coining, 1801.

BIBLIOGRAPHY. — Nagler, *op. cit.*

SERBALDI, PIER MARIA. *Vide* **PIER MARIA DA PESCIA** *supra.* Engraver of coins and gems, born at Pescia (Tuscany) *circ.* 1455, was still living in 1522. He was appointed on 24. August 1499 Die-cutter to the Roman Zecca, on the decease of Lorenzo Corbolini. The terms of the brief of Alexander VI. conferring upon him this office for life, with the option of taking a substitute, establish his preeminence over his contemporaries. Leo X. appointed both Engravers conjointly, Pier Maria, and Vittore Camelio, on 24. June 1515, to the post of 'Intagliatori delle Zecca", both for life, and with the same emoluments. Traces of payments made to Pier Maria for work done are found of the dates 1516, 1520 and 1522, and also one of 1504, for Pius III. Armand does not ascribe any of the coins of Pope Alexander VI. to Pier Maria, and considers them the work of an inferior artist, probably Lorenzo Corbolini. The fine 2 ½ Zecchini, Teston, and Grosso with portraits of Leo X. are no doubt by Pier Maria and Vittore Camelio in conjunction.

SERCLAS, EVERARD (*French*). Die-cutter at the Paris Mint, 1401.

SEREGNI, LUIGI (*Ital.*). Medallist, and Coin-engraver, born at Milan in 1819, was employed at the Mint of Venice from 2. May 1849 to 6. May 1861, and later at Milan. In 1862 he engraved a fine Portrait-medal of Garibaldi, which is a presentation-piece from the Italian colony in Peru to Doctors Agostin Nelaton and Fernando Zanetti, in gratitude for their care over the famous vanquished hero of Aspromonte. The medal was struck at the Milanese mint, in 1864. By him are also: Prize Medal of the Urbino Exhibition, 1867; — Portrait-medal of Carlo Cattaneo; — Jules Favre, 1868, etc.

SERENA, GIOVANNI (*Ital.*). Mint-master at Monluel (Savoy) under Philibert II.

SERIES *Vide* **LUDOVICO SIRIES** *infra.*

SERMAITE, GILLES (*French*). Die-cutter at the Paris Mint, under Philip IV. from 1294 to 1296. By this Engraver is the Agnel reproduced below.

Agnel of Philip IV.

SERONO, GIOVANNI BATTISTA (*Ital.*). Mint-master at Milan, in conjunction with Giovanni Francesco Caltignano, from 8. February to 6. April 1582.

SERRÃO, JOSÉ (*Port.*). Mint-master at Rio de Janeiro, appointed on 26. September 1777.

SERSTEVENS, MARC 'T (*Flem.*). Mint-master at Antwerp, from 17. September 1697 to 25. October 1701.

SERRE, JEHAN DE (*French*). Received in 1421 instructions to inspect the various French mints. His name occurs in connection with the mints of Chinon, Puy-en-Velay, Fontenay-le-Comte, Loches, Orleans, Mont-Saint-Michel, etc.

SERRE, JACQUES (*French*). Contemporary Sculptor and Medallist, residing at Aïn Tagrout (Algeria). At the Universal Exhibition, 1900, he exhibited Portrait-medallions.

SERVET, EMILE (*Swiss*). Engraver residing at Geneva, mentioned in the "Revue suisse de numismatique", 1899, p. 206, as the Engraver of a fine Rifle Competition Watch, presented at the Cantonal Rifle Competition at Yverdon, 1899.

SERVI, COSTANTINO DE' (*Ital.*). Florentine Painter, Sculptor and Architect, born in 1544, died in 1622. In 1585 he was residing in Rome, where he was carving a statue of St. Paul for Pope Sixtus V.

Milanesi suggested the attribution to this artist of a medal signed **C. S.** of Sixtus V., on the ℞. of which is St. Francis of Assisi supporting a church crumbling down.

BIBLIOGRAPHY. — Heiss, *op. cit.*

SESEMANN, GREGORIUS (according to Nagler, **GOTTFRIED**) (*Germ.*). Mint-master at Wismar, 30. January 1675 to 26. September 1680, and Copenhagen, in the service of King Christian V., 1680-1690. He died in the early months of 1691.

Sesemann was also a Medallist and Coin-engraver. For Wismar he cut dies, amongst others, of Ducats 1676, and Sechslinge,

Dreilinge, etc. undated, signed **G. S.** He no doubt engraved coin-dies also for the Copenhagen mint. His signature occurs on a Portrait-medal of Christian V., with Rℒ. view of Castle Frederiksborg, 1682, and another, dated 1676, commemorating the Defeat of the Dutch and Return of Cayenne to Denmark (*illustrated*).

Medal of Christian V., 1676.

A specimen in gold, 44 mill. in diam., and weighing 85 grammes, brought £. 16 at the O'Hagan Sale (London, April 1908, lot 727). This medal is reproduced in *Van Loon*, French Ed., Vol. III, 189.

SESTIUS, C. This signature occurs on a gem of the former Stosch Collection, representing a Wild Boar passant (Raspe, *Tassie Gems*, n° 13006).

SESTO. A family of Goldsmiths and Engravers of Venice, who were employed at the Zecca there for over a century.

Numismatists, writes M. Babelon (*Revue de l'art ancien et moderne*, 1908, p. 296) know that from the time of Doge Andrea Contarini's government (1368-1382) the Venetian matapans bear, abbreviated, the signatures of the artists who engraved the dies, and that the archives furnish ample information on the Engravers of the Venetian currency. These documents show that towards the end of the fourteenth century, the office of Die-cutter was filled by members of a family of goldsmiths named **SESTO**, who succeeded each other from father to son in this position. The earliest we are acquainted with is **BERNARDO SESTO**. Then followed his two sons, **LORENZO SESTO** and **MARCO SESTO**, who in a document of 1394 are styled : *Incisori ai coni dall'argento*. Later, at the beginning of the fifteenth century, we meet with the names of **GIACOMO** and **ALESSANDRO SESTO**; and we hear of another member of the same family, **GIROLAMO SESTO**, whose in 1447 was no longer living. Several of these artists, who skill may be appreciated in examining the Venetian coins, did not content themselves with applying their talent to the execution of coin-dies, the necessary uniformity of which did not give them scope to alter conventional types, but more ingenious than others, and no doubt stimulated by the curiosity which Petrarch (who died in 1374) had encouraged, they imitated Roman coins, and like the artists in the pay of the seigneurs of Carrara, engraved medals, with subjects of their own invention and inspired from the antique. We thus possess Restitution coins, after the antique, signed by Lorenzo, Marco, and Alessandro Sesto.

" C'est à Julius Friedländer que revient le mérite d'avoir, le premier, signalé ce groupe curieux de médailles qui, avec celles des princes de Carrare, et celles de Constantin et d'Héraclius, forment la tête des médailles italiennes, vers la fin du XIV^e^ siècle.

" L'ancienne opinion à laquelle Alfred Armand paraît être demeuré fidèle, et qui faisait de ces pièces des médailles de restitution, attribuables à une époque très postérieure à la date qu'elles portent, n'est plus défendable aujourd'hui, en présence des documents d'archives auxquels nous avons fait allusion.

" La seule question qu'il soit aujourd'hui permis de se poser, au point de vue chronologique, c'est de savoir si les dates de 1390 et 1393, lues sur les médailles que nous venons de décrire, donnent bien l'époque véritable de l'apparition de la médaille italienne. Ne faut-il pas remonter plus haut encore ? Pétrarque n'aurait-il pas été lui-même le promoteur, l'instigateur des premières médailles ? C'est à Pétrarque, le prince des humanistes, que les critiques modernes font remonter les premières interprétations judicieuses des monuments de l'antiquité. Lui-même raconte dans ses *Lettres*, qu'il achetait les médailles romaines que lui apportaient les paysans et qu'il y déchiffrait avec émotion le nom des empereurs. Il se forma un médaillier ; on le voit qui offre des médailles en or et en argent à l'empereur Charles IV, en l'incitant à contempler les belles effigies dont elles sont ornées. Pétrarque enfin séjourne à la cour des seigneurs de Carrare qui, précisément dès 1390, ont des médailles à leur propre effigie, dans le goût romain. Les Sesto sont en rapports avec lui ; il leur donne des conseils pour la direction de leurs tendances artistiques ; il les gourmande en leur proposant des modèles et les pousse à imiter l'antique. Sans doute, Pétrarque était mort depuis seize ans lors de l'apparition, en 1390, des premières médailles datées que nous possédions. Mais n'y en eût-il pas d'autres, datées ou non, qui furent exécutées antérieurement, et du vivant même de Pétrarque ? Il n'y aurait rien de bien surprenant, convenons-en, à ce qu'un avenir, prochain peut-être, réponde affirmativement à cette préoccupation de notre esprit, toujours curieux de sonder de plus en plus la genèse des choses.

" Les premiers médailleurs furent hantés par le désir de copier l'antique, de l'imiter, de le pasticher, de l'égaler en habileté technique. C'est ce que nous montrent les médailles des Sesto et celles qui reproduisent les traits de François I^er^ et de François II de Carrare. C'est un lieu commun de dire que la même préoccupation est manifeste dans les créations des artistes postérieurs. M. Alfred Armand l'a particulièrement bien montré en étudiant l'œuvre de Pisanello, dont la première médaille à date certaine est celle qu'il exécuta en 1439 à l'effigie de Jean VIII Paléologue, à l'occasion du voyage de ce prince en Italie, pour assister au concile de Ferrare. ". (E. Babelon, *La Collection Armand Valton au Cabinet des Médailles*, Rev. de l'Art, 1908, pp. 296 sq.).

C. von Fabriczy thus refers to the Sesti (*Italian Medals*, pp. 10, 11, 72) : " Of the same period as the medals of the Carraras we also possess three medal-like struck proofs, so-called " essais " or " testoni " of die-engravers, the work of a Venetian family of die-engravers, the Sesti, with their names and dates (1393 and 1417). The obverses are direct copies of the imperial coins of Galba and of a Greek coin (Alexander the Great or Antiochus of Syria) ; on the reverse are a standing figure (Venetia ?) and a mythological scene (the Rape of Persephone or the Rescue of Andromeda). These are, to an even greater degree than the medals of the Carraras, direct and conscious imitations of Roman imperial medallions. Since they possess a general striking similarity of style to the Carrara medallions, these latter medals have lately been pronounced to be probably works of the Sesto family, perhaps of that same Marco who in 1393 produced the proof bearing the bust of Galba. ".

Capture of Carrara by Francesco II.

Mr. G. F. Hill in a recent article contributed to the *Burlington Magazine* (February 1911) on " Classical Influence on the Italian Medal ", which subject he dealt with also in an admirable address before the ' Royal Numismatic Society ' at the January 1911 meeting, also refers to the Carrara medals. He observes that " the obverses of these medals of the two members of the Carrara family (one is *illustrated*) are most distinctly inspired by Roman sestertii. Even the size of the original is adhered to. The reverse, however, is as old-fashioned as possible ; obviously no attempt has been made to improve on the ordinary moneyer's style. Nothing could illustrate better the struggle between classical and Gothic influence. That the date inscribed on these little pieces, commemorating the capture of Carrara by Francesco II, is the date about which they were made, is proved by a description of one of them in the Duc de Berry's inventories. "

"These then, are the most remarkable among the precursors of the Renaissance medal proper. The Carrara pieces, like the coins of Frederick II, however, remained without influence on the development of the medal. Even in the purely external matter of technique they had no influence; nearly all the medals worth consideration for the next hundred years are cast, not struck from dies. That is to say, the medallist makes his model in wax instead of sinking his design with the graver in a metal die. Obviously the wax process gave to the medallic art in its infancy just that freedom from the old traditions of die-engraving which was necessary for its healthy development."

SESTO, ALESSANDRO (*Ital.*). Die-cutter and Medallist at the Mint of Venice, in the early part of the fifteenth century. A medal by him is signed : **ALESANDER SEXSTO INTAIATOR EN MONETA ME FECIT 1417**, and bears on obv. a bust, in which some have recognized a portrait of Alexander the Great, and others, amongst them, Schlosser, that of Antiochus V. of Syria, copied from a tetradrachm.

SESTO, BERNARDO (*Ital.*). The first Engraver of the name whom we know as having been employed in the cutting of coin-dies at the Mint of Venice, in the latter part of the fourteenth century and beginning of the fifteenth. He is styled : *Intagliatore dei coni dell' oro.*

SESTO, BERNARDO (*Ital.*). Son of Luca S.; appointed Assistant-engraver at the Mint of Venice, 27. October 1483.

SESTO, GIACOMO (*Ital.*). Die-cutter at the Mint of Venice in the early part of the fifteenth century. His tomb in Santo Stefano bears the inscription : *MCCCCIV sepoltura de S. Jacomo Sesto intagliador alla moneda de Veniesia.*

SESTO, GIROLAMO (*Ital.*). Die-cutter at the Mint of Venice; was no longer living in 1447.

SESTO, LORENZO (*Ital.*). Son of Bernardo Sesto, and Die-cutter at the Mint of Venice, towards the end of the fourteenth century and beginning of the fifteenth (from March 1394, and still in office in 1411). He also executed imitations of ancient coins; one of Galba bears the legend : LAVRENTI SESTO ME FECIT.

SESTO, LUCA (*Ital.*). Die-cutter at the Mint of Venice; appointed before 1447, and thirty years later, 1483, still in office, and requesting the Council of Ten to adjoin him his son Bernardo as assistant. In 1447 he was commissioned, in conjunction with Alessandro Leopardi, to execute the image of the Redeemer for the die of the Ducat. In 1485, on the accession of Marco Barbarigo, he was probably no longer living, and Camelio was Chief-engraver at the Zecca.

SESTO, MARCO (*Ital.*). Son of Bernardo, and brother of Lorenzo Sesto; also a Die-cutter at the Mint of Venice, towards the end of the fourteenth century and beginning of the fifteenth. He also engraved dies for medals and copies of antique coins. One of these, is thus described by M. Babelon :

+ MARCVS.SESTO ME.FECIT.V. (*Marcus Sesto me fecit, Venetia*). Bust of the emperor Galba.

℞. PAX.TIBI.VENETIA. Allegorical figure of Venice, standing, holding standard of St. Mark; at her feet, a wheel; in the field, the date 1393.

Others, probably by him, are described above.

SETTELE, JOHANN MICHAEL (*Austr.*). Die-engraver at the Vienna Mint, 1765.

SETTELE, MATTHIAS (*Austr.*). Die-engraver; born in 1746, died at Vienna on 16. September 1808. He was appointed at the Vienna Mint on 23. March 1764, first as an apprentice, and later as Engraver. On 30. September 1808, an entry in the Mint Records states that the first Assistant-engraver Matthias Settele was no longer living.

SETZER, KONRAD (*Germ.*). Contractor of the Mint at Ratisbon, 1357.

SETELE. *Vide* **SETTELE** *supra.*

SEUD, P. (*Ital.*) Schlickeysen-Pallmann mention this signature as that of an Engraver at Rome, 1705. This is a misreading for **F. SEVO.**

SEVER, ANTON (*Austr.*). Contemporary Sculptor and Medallist. I have seen by him a Portrait-medal of the Poet Preseren.

SEVERO DA RAVENNA (*Ital.*). Gem-engraver of the sixteenth century. Mariette mentions his name, after Pomponius Gauricus, who sets this artist above all others, and styles him sculptor, scalptor, caelator. King remarks : "Severo is probably the pupil of Marc-Antonio who engraved the copper plates with the monogram **S.R.**"

The inscription SEVERUS, probably the owner's name, occurs on a gem in plasma, Hygiaea offering a bowl to a serpent. According to Raspe the inscription is CELIC.SEVERI on one stone, and on another **H. CEOYHPOY.**

BIBLIOGRAPHY. — Mariette, *op. cit.* — Babelon, *op. cit.* — King, *op. cit.*, 225, 262. — Raspe, *op. cit.*

SEVESTE, CHARLES EMILE (*French*). Contemporary Sculptor, born at Lille; pupil of Chéret. At the Salon of 1878 and 1879 he exhibited two Portrait-medallions.

SEVO, FERDINANDO (or **FRANCESCO**) (*Ital.*). Medallist, a native of Piedmont, who was working for the Mint at Rome, *circ.* 1705, as Engraver of coin-dies. His signature **F. SEVO** occurs on the reverses of three varieties of Scudi, all dated of An VI of Clement XI. (1705), VOX DE THRONO BASILICA LIBER. The Pope reading homily in Santa Maria Maggiore.

SEWARD, J. S. (*Brit.*). Engraver of the latter part of the eighteenth century, who resided at Lancaster. His signature occurs on a Medal commemorating the Building of the Manchester Infirmary and Lunatic Hospital, 1796, and on another on the Rebuilding of the Liverpool Royal Exchange, burned in 1798.

SEWELL (*Amer.*). Die-sinker of New York, of Irish origin, by whom is a Fenian Brotherhood Badge, 1866, struck for presentation to the members of the association.

The Fenian Brotherhood was an Irish political organisation having for its object the overthrow of English rule in Ireland and

Fenian Brotherhood Badge, 1866.

the establishment of a Republic there. The movement was initiated in the United States soon after the great famine in Ireland of 1846-47, which, together with the harsh exactions of the landlords, compelled many Irishmen to emigrate from their island with a deeply-rooted sense of injustice and hatred of the English. The Fenians organised themselves so far on the model of a republic, having a senate at the head, with a virtual president called the "head-centre", and various "circles" established in many parts of the U. S. They collected funds and engaged in military drill, and sent agents to Ireland and England. An invasion of Canada in 1866 and a rising at home in 1867 proved abortive, as also the

attack on Clerkenwell prison in the same year. Another attempt on Canada in 1871 and the formation of the *Skirmishing Fund* for the use of the *Dynamitards* and the institution of the *Clanna-Gael* leading to the "Invicibles", and the Phoenix Park murders (1882) are later manifestations of this movement. The Home Rule and Land League movements practically superseded the Fenian. The name is taken from an ancient military organisation called the Fionna Eirinn, said to have been instituted in Ireland in 300 B.C.

SEYBEN, ULRICH (*Germ.*). Mint-master at Rostock, 1526-34.

SEYDLITZ. *Vide* **SEIDLITZ** *supra*.

SEYMOUR, HORACE (*Brit*). Deputy Master and Controller of the Royal Mint, 1894-1903. He was a kinsman of the Marquess of Hertford, and was born in 1843. He entered the Treasury in 1867, and had a long period of service as private secretary to various distinguished personages, including "Bob" Lowe, Lord F. Cavendish, and Mr. Gladstone. The last-named made him a Commissioner of Customs. In 1890 he became Deputy Chairman of the Board, and in 1894 was transferred to the Mint.

SEYSSES, AUGUST (*French*). Contemporary Sculptor, born at Toulouse; pupil of Falguière. At the Salon of 1895 he exhibited a Plaquette representing a Start for the Hunt.

S. F. *Vide* **SALOMON FRITSCH** or **FRENZEL**. Mint-master at Oppeln, 1625.

S. F. *Vide* **SCHAUBEN FEC.** Die-sinker at Copenhagen, 1590-1599.

S. F. *Vide* **SAMUEL FISCHER**. Die-sinker at Berne, 1679.

S. F. *Vide* **SCHULTZ**. Die-sinker at Copenhagen, 1716-1724.

S. F. *Vide* **SCHOLZ** Warden, and **FÖRSTER** Master, of the Nuremberg Mint, 1760-64.

S. F. *Vide* **SCHABEL**. Die-sinker at Vienna and Venice, 1765-1797.

S. (F.) T. *Vide* **SAMUEL TOMSCHÜTZ**. Mint-master at Frankfort-on-M., 1836-37.

S. F. *Vide* **TOBIAS SCHÖBL** and **JOSEPH FABY**. Mint-master and Warden at Günzburg, 1774-1789.

BIBLIOGRAPHY. — Schlickeysen-Pallmann, *op. cit.*

SF and **.S^{a} FR**... (*Germ.*). Erman mentions two medals bearing these signatures: 1591. Christoph Silbereisen, abbot of Wettingen (Switzerland); and 1593. Hugo Blotius, Imperial librarian (Berlin Museum. Erman, Pl. VIII, 1). The signature **SF** occurs in raised letters on the reverses of both; that of Blotius is fully signed on obv. but the inscription is illegible. The artist may have been a Viennese.

BIBLIOGRAPHY. — Erman, *Deutsche Medailleure*, p. 66.

S. G. H. *Vide* **SAMUEL GOTTLIEB HELBIG**. Mint-master at Dresden, 1804-1813.

S. H. *Vide* **SAMUEL HANHARDT**. Mint-engraver at Basle, 1624-1654.

S. H. *Vide* **SEBASTIAN HUGGENBERG**. Mint-engraver at Salzdahlen, 1689-1700.

S. H. or **S. H. S.** *Vide* **SALOMON HAMMERSCHMIDT**. Imperial Mint-warden at Breslau, 1665-1711.

SHAA (or **SHAW**), **SIR EDMUND** (*Brit.*). "Son of John Shaa, of Dronkenfeld, Chester, Goldsmith and Engraver to the Royal Mint, London, in 1462. He was chosen Sheriff in 1474, and Lord Mayor 1482-3, Warden of the Company in 1474. At the Coronation of Richard III., which took place during his mayoralty, he attended as cup-bearer with great pomp, and his claim to this honour was formally allowed and put on record. He founded and endowed a free school at Stockport, in Cheshire, in the year 1487. His will contains a bequest to the goldsmiths to support this school. He also directs "16 rings of fine gold to be graven with the well of pitie, the well of mercie, and the well of everlasting life", and to be given to his friends.

Noble of Edward IV.

Anno 2 of Edward IV. (1461) Edmund Shaa was appointed Engraver for life of the London and Calais Mints, with a salary of 20 *l.* per annum. In 1465 a writ directed to the warden of exchange and money in the Tower of London, and in Calais, dated in the fifth year of the king, recited to above appointment, and ordered seven shillings to be paid to Shaa, annually, for making and engraving one dozen of irons, to be made by him every year during his life. The writ of 1465 respecting Shaa was renewed in the last year of Edward IV. (1482 or 1483).

In all probability many of the dies for the London and Calais issues of Edward IV. were engraved by Edmund Shaw. The coinage of that reign comprises: *A*. I. Issue (1464 ?), Noble; — II. Issue (1465-1470), Rose Noble or Ryal, Half-Rose Noble, Quarter Rose Noble, and Angel; — III. Issue (1471-1483), Angel and Half Angel. — *Æ*. I. Issue (1461-1464), Groat, Half-Groat, Penny, Halfpenny, and Farthing; heavy coinage; — II. Issue (1464-1483), same denominations; light coinage.

BIBLIOGRAPHY. — *Dict. Nat. Biogr.* — Chaffers, *op. cit.* — Ruding, *op. cit.* — Grueber, *op. cit.*

SHAA (or **SHAW**), **SIR JOHN** (*Brit.*). Goldsmith, Warden to the Mint 1492-97, of Wood street, Cheapside, Engraver to the Mint in 1483, was Mayor in 1501-2, probably the son of Sir Edmund. In the privy purse expenses of Henry VII. (1497) we find: "To Master Shaa for a George of Diamants iiij *li* iiij *sh*". Also "To John Shaa for iij rings of gold viij *li*". Sir John Shaw was knighted on the field at Bosworth. The first Lord Mayor's feast in the present Guildhall was given by Sir John Shaw. He was the first mayor who caused the Aldermen to accompany him on horseback to the water side to take barge for Westminster.

An entry in Ruding (p. 34) gives the names of *John Shaa* and *Bartholomew Rede*, Operarii Monete, anni 10-13 of Henri VII. Under Richard III., he is the only Engraver mentioned.

Angel of Henry VII.

The coinage of Richard III. for which Shaa was responsible consists of: *A*. Angel and Half-Angel; *Æ*. Groat, Half-Groat, Penny, and Halfpenny.

Shea no doubt engraved also dies for Henry VII's coins.

In Plantagenet times, and probably later, dies were not engraved, as so many numismatists imagine, but produced by striking prepared punches, each representing a portion of the design, into the metal — a very simple and rapid process.

BIBLIOGRAPHY. — As above.

SHAMJI, JEWRAM (*Indian*). Die-engraver at the Mint of Calcutta, 1838-1845.

SHANNON, C. H. (*Brit.*) Contemporary Sculptor, and a former

Member of the London Society of Medallists, at the Exhibition of which in 1901 he showed a number of drawings for medallions.

SHARINGTON (or **SHERINGTON**) **SIR WILLIAM** (*Brit.*) "Vice-treasurer of the Mint at Bristol, born about 1495, came of an old Norfolk family, and was the eldest son of Thomas Sherington († 1527?) and his wife Catherine, daughter of William Picton of Little Bentley, Essex (Blomefield, *Norfolk*, X, 201-3). He entered the service of Sir Francis Bryan, and subsequently became page of the king's robes. In 1540 he bought the dissolved Lacock Abbey, Wiltshire, for 783 *l.*, and on 3. May 1546 he became vice-treasurer of the mint at Bristol(*Cal. State Papers*, Dom. 1547-1581, p. 3). He was made knight of the Bath at the coronation of Edward VI. on 15. February 1546-7. His position at the mint he used to perpetrate extensive frauds. In April 1547 the council forbad the coining of any more 'testons' or shillings, two-thirds of which were alloy. Sharington nevertheless bought up large quantities of church plate from the Somerset villagers, and during May, June, and July, coined it into testons. He also made over 4,000 *l.* in three years by shearing and clipping coins, and to conceal his frauds he made false copies of the books of the mint and destroyed the originals. Fearing discovery, he entered into the plots of Thomas Seymour, baron Seymour of Sudeley, who promised to protect him. Sharington in return lent Seymour money and put the mint at Bristol at his disposal; he also undertook to coin 10,000 *l.* to be devoted to raising adherents for the admiral. With part of his ill-gotten fortune he purchased of the king Winterbourne, Aubrey, Charlton, and other manors, chiefly in Wiltshire, for 2,808 *l.* But his frauds and Seymour's plots soon came to the knowledge of the government. On 6. January 1548-9 Lacock Abbey was searched by the council's agents, and on 19. January Sharington was arrested. He was examined several times in the Tower during January and February; at first he denied his frauds and all knowledge of Seymour's designs, but made full confessions on 2., 11., and 16. February. A bill for his attainder passed all its stages in both houses of parliament between 11. February and 7. March. Seymour's connivance at Sharington's frauds was made one of the counts in his indictment (Cobbett, *State Trials*, I, 501-2); but Sharington, who threw himself on the king's mercy, was pardoned, and an act restoring him in blood was passed, 30. December 1549 — 13. January 1550.

"In the following April he was again in employment, being commissioned to go to Calais and receive an instalment of the French purchase-money for Boulogne. He was also able to buy back his forfeited estates for 12,000 *l.*; he seems in addition to have made a voluntary restitution of some property to the king, and Latimer, in a sermon preached before the king in the same year, extolled his example and described him as 'an honest gentilman and one that God loveth' (*Frutefull Sermons*, 1575, f. 115 *b.*). In 1552 he served as sheriff of Wiltshire. He died in 1553 (*Acts of the Privy Council*, 1552-4, p. 370). His portrait among the Holbein drawings in the royal library, Windsor Castle (*Cat. Tudor Exhib.*, p. 148), has been engraved by Dalton (Bromley, p. 11). He married (1) Ursula, natural daughter of John Bourchier, second baron Berners; (2) Eleanor, daughter of William Walsingham; (3) Grace, daughter of one Farington of Devonshire, and widow of Robert Paget, alderman of London. He left no issue, and was succeeded in his estates by his brother Henry." (Lee, *Dict. Nat. Biog.*, vol. LI, pp. 399-400.

Sir William Sharington issued the following denominations of coins at the Bristol Mint:

HENRY VIII. *N.* Sovereign; *R.* Groat, Half Groat (Third Coinage).

N. Sovereign; Crown, Half-Crown; *R.* Shilling, Groat (Fourth Coinage).

N. Sovereign, Crown, Half-Crown; *R.* Groat (Fifth Coinage). Irish. *R.* Sixpences of 37th and 38th years of reign.

The base money of Bristol is very plentiful.

EDWARD VI. *N.* Half-Sovereign, bearing king's portrait, but his father's name (First Coinage).

Kenyon states that Sharington's counterfeit coins are not known.

Chaffers, *Gilda Aurifabrorum*, p. 47, gives the following data 1548-50. — *Sir William Sharrington*, of Durham House, Master of the Mint 3rd, 4th, and 5th Edward VI., and Vice-Treasurer of the Mint at Bristol, was indicted before the Lord Mayor, and convicted on his own confession of having counterfeited, in the Mint at Bristol, 12,000 pounds of coins resembling the Testoons, without any warrant from the King, and against his Royal prohibition; also of having defrauded the King in clippings and shearing of the coins, making the same thereby too light, and converting the same to his own profit, to the amount of £4,000 at the least; and for

Bristol Sovereign of Henry VIII.

falsifying the indentures and books. He was attained of treason, and all his lands, etc. forfeited. This counterfeiting of the money was supposed to have been done at the instigation of the King's uncle, the Protector, Sir Thomas Seymour, the Lord Admiral, to enable him to carry on his treacherous designs. Sharrington received a pardon under the great seal in 3rd Edward VI., and was afterwards restored in blood by an Act passed 3rd and 4th Edward VI. His house in Mark Lane, a stately mansion, was bestowed by the King on Henry, Earl of Arundel, who made it his residence".

BIBLIOGRAPHY. — S. Lee, *Dict. Nat. Biogr.* LI. — Kenyon, *op. cit.* — Hawkins, *op. cit.* — Ruding, *op. cit.* — Grueber, *Handbook*, etc.

SHARPE, JOHN (*Brit.*). Die-engraver at the Royal Mint, London, *anni* 1-4, 1509-1514 (according to Ruding), 1509-1547 (according to Schlickeysen). Ruding gives a second Engraver, **DEMAIRE**, as having been employed at the Royal Mint under that reign. It is therefore difficult to ascertain the work of either artist.

The following denominations were issued under Henry VIII: *N.* Double Sovereign, Sovereign, Half-Sovereign, Crown, Rose Crown (3 specimens known), Half-Crown, Ryal or Rose Noble, Angel, Half-Angel, Quarter Angel, George Noble, and Half-George Noble (unique; *illustrated*). — *R.* Shilling or Teston, Groat, Half-Groat, Penny, Halfpenny, and Farthing.

Half-George Noble of Henry VIII.

The Half-George Noble which is now in Lieut.-Col. H. Leslie Ellis's Collection was thus described in the Murdoch Sale Catalogue, 1903 (lot 418). It brought £495 at the Sale.

HALF GEORGE NOBLE, mm. rose on both sides, obv. hENRIC'× D'+G'+R'+AGL' Z + FRA'×DNS'× hYBE', type as the George Nobles with rose upon the ship's mast and h K at sides, but the gallery of the vessel is decorated with circular ornaments instead of the usual trellis pattern seen on the three preceding coins; R/. × TALI× DICA' ⁝ SIG♀MES'× FLVCTVARI + NEQT, St. George on horseback piercing the dragon, wt. 36 grs., *in almost perfect preservation, unique.*

*** From the Shepherd (lot 211) and Montagu (lot 719, £275) collections. The following account of this remarkable coin is culled from the Montagu sale catalogue, p. 99: "This very interesting and unique coin was brought from Paris many years ago by Mr. Curt, the dealer, who sold it to the Rev. E. J. Shepherd for £70; at the latter's sale it was purchased by Mr. Montagu for £255. It is evident from the style of lettering of the inscriptions, which are in Roman characters, that this coin belongs to a later date than

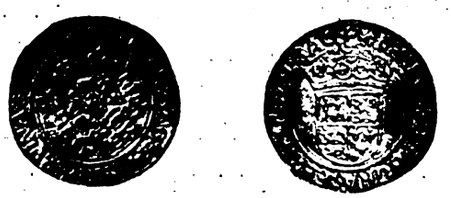
Original from CORNELL UNIVERSITY

the George Nobles. The letter K on the reverse is therefore probably the initial of Katherine Howard or Katherine Parr, and not of Katherine of Aragon as on the Nobles. This would partly account for the great rarity of this coin, which may be a pattern ".

The Rose Crown is another rarity of the reign of Henry VIII. A specimen was sold at Messrs. Sotheby Wilkinson & Hodge, June 5, 1907, and fetched £220. It was thus described in the Sale Catalogue : —

Obv. A shield crowned bearing the arms of England and France quarterly, all within two inner circles, the innermost one linear, the outer dotted, both pierced above by the ball and cross on top of the crown, mm. a rose, legend hENRIC'·8 ⁝ DEI ⁝ GRA' ⁝ REX ⁝ AGL' ⁝ Z ⁝ FRA'; Rℒ. A full-blown single rose of five petals, surrounding it four fleurs-de-lys arranged crossways, between these a lion passant guardant and the letter h crowned, placed alternately, all within inner circles as on the obverse, mm. a rose, legend hENRIC'·RVTILANS ⁝ ROSA ⁝ SINE ⁝ SPINA, the letters on both sides in Roman characters, except the letter h, the numeral Arabic.



Henry VIII., Crown of the Rose.

⁂ The coin is of the same general type and appearance as the contemporary French Crown of the sun. It weighs 51 grains. The directions for making the coin and the reason of its issue, are given in Ruding, as well as the cause of its withdrawal. Money had been steadily removed from this country to the continent, in consequence of its superior value, and in spite of repeated requests made by Henry to various continental monarchs, till in 1526 matters had reached such a pass, that legislation was necessary. On July 24th a writ was issued to Wolsey " commanding him to carry into effect the king's design of reducing his money to the standard of foreign coins, and to determine the rate, value, fineness, lay, standard and print as by him and the Council should be thought requisite ". On August 22nd following, a proclamation was made and it was ordained " that all persons should receive the Crown of Gold of the Sun, and all other crowns of the same weight and fineness for four shillings and sixpence being of full weight, etc. And whereas the Crown of the Sun was a strange coin, the King with the advice of his Council, thought fit that there should be a piece of gold of his own coin of like fineness, weight and goodness as the said Crown of the Sun to be called the Crown of the Rose, and to be current for four shillings and sixpence ".

On the 5th of November in the same year, an additional value was placed upon the current coin by proclamation, and provision was made for the striking of the George Noble and Half George Noble.

Snelling, 1763, gives a picture of a Crown of the Rose with a lion mint-mark and some differences in the lettering. It was evidently copied from a picture, and not known as the Crown of the Rose, as Snellings' note says : We constantly meet with this coin in all the placarts publish'd in the Low-countries between anno 1546 and 1650, and yet we esteem it the rarest piece minted by this King, nor have we ever had the pleasure of seeing one of them ". Ruding, 1841, copying Snelling's picture, notes this coin is not now known in any collection. Kenyon, 1888, says the Crown of the Rose mentioned in the Proclamation of the 22nd of August is not known, and was probably never struck.

Another interesting and rare coin of the reign of Henry VIII., is the Pattern crown in silver a specimen of which brought £128 at the Murdoch Sale, 1903, lot 454, and £79 at the Wakley Sale, 1909, lot 1.

Pattern Crown, mm. lis on both sides, obv. HENRIC·8 DEI·GRACIA·ANGLI·FRANCI·Z·HIBERN·REX, half-length figure of the king crowned facing, holding sword and orb; Rℒ. ANGLICE·Z HIBERNICE·ECCLESIE·SVPREMVM·CAPVT, the royal arms with lion and dragon supporters, crown above, H R (in mon.) beneath, wt. 415 grs. (*Snelling, Patts.* pl. 5, 2), *exceedingly fine and of great rarity.*

⁂ This extraordinary pattern (whether coin or medal being a disputed point) is one of the rarest in the English series and the finest of the only two specimens which are known, the other being purchased at the Cuff sale (£140) for the British Museum. This is from the Thomas (lot 271, £130), Wigan (£165), Brice, Montagu (1888, lot 186, £106), and Moon (lot 104, £107) collections.

Specimens of this coin exist in the British Museum, St. Petersburg Museum, Bodleian Library (said to be the only genuine one); Lord Pembroke had one; and in our times the late R. A. Hoblyn, and J. E. T. Loveday possessed each a specimen (*Vide* Loveday. The Henry VIII. Medal or Pattern Crown, *The British Numismatic Journal*, I, pp. 137-147).

The late Mr. J. G. Murdoch also possessed Patterns of the Double Sovereign, first coinage (lot 452, £170) and Angel (lot 453, £39.00.0). *Vide* Sale Catalogue, March, 1903.

SHAW, EDMUND. *Vide* **SIR EDMUND SHAA.** *supra.*

SHAW, JOHN. *Vide* **SIR JOHN SHAA** *supra.*

SHAW, J. G. (*Brit.*). Mint-master at Madras, from February 1856 to March of the same year, and April to June 1859. He died in November 1860.

SHAW, KATHLEEN (*Brit.*). Contemporary Sculptor and Medallist, born at Edmonton (Middlesex); pupil of Ch. Desvergnes, and Alfred Gilbert. Amongst her medallic works I have noted the following : 1899. Mrs Leigh Brown, Portrait-medallion; — Salon 1894. Mrs Hutchinson; — 1897. Miss A. C***; — Lily; — 1901. Five Portrait-medallions; — 1904. Henry Bruce-Armstrong Esq.; — 1905. Miss Helen Dunham.

SHEKLETON, Dr J. F. (*Brit.*). Officiating Mint-master at Calcutta, 7th February to 7th March 1866, 9th August 1867 to 16th January 1868, 19th November to 26th December 1871, 2nd to 10th February 1872, 3rd to 30th August 1872.

SHELLY (*Brit.*). Designer of the commemorative medal of the Industrial Exhibition at Plymouth, 1865.

SHEPHERD (*Brit.*). Contemporary Sculptor and Medallist, who resided for some time in London, but went back to the Colonies. He is the author of some medals, of which however I have omitted to make a note.

SHERIFF (*Brit.*). Engraver of medals of the Birmingham Medical Coinage, with bust of Aesculapius, and Torso on Rℒ.

(*To be continued.*)

LEAVES FROM MY NOTE BOOK.

The Action off the Dogger Bank. The following original interesting letter, describing the action of the 5th August, 1781, was written by Lieutenant Baxter of the Berwick immediately after the engagement.

Dear Sir, — We were cruising off the island of Shetland for about nine weeks, without any thing material happening till the 14th July; at which time we received orders to join Admiral Parker on the coast of Norway, which we effected in forty-two hours. After waiting sometime for our convoy, left that coast; and on the 5th of August, being then about forty leagues from the Naze of Norway, we had the happiness of discovering the Dutch fleet, with a large convoy. Admiral Parker made the signal to form the line of battle; and although they were almost two to one, being eleven two-decked ships and we only seven, we immediately rushed into action; the Berwick had the honour of leading the van. We supported ourselves against a seventy-four, a sixty-four, and a frigate, about fifty minutes, at which time they were all three driven out of the line, and we were obliged to tack to get into action again

along with our Admiral. The action continued from six minutes before eight in the morning till eleven o'clock, at which time they left the field to us; and much grieved were we that we were not able to follow them.

The largest ship they had, although the water was very smooth, sunk that night. It is supposed to be the Batavia, one of the ships we engaged and forced to quit the line; her shot, of which we have a number on board, weigh thirty-nine pounds. During the action we had eighteen killed and fifty-eight wounded forty six of them now in a bad way. Mr Smith and I were both slightly wounded, but still able to do our duty. But thank God neither our gallant Commodore (Stewart) nor Captain is of the number, sure braver men never had a command: as a proof of which I will give you the Commodore's orders to the Master, in his own words. After calling a gentleman who was killed afterwards, to be a witness, he said, "Mr Forbes, you are to lay my ship as close to the enemy as possible without entangling my yards, or I will call you to a severe account, if you survive this day" which orders were so well obeyed, that the Master received the commodore's public thanks the next day. We have not a mast or a yard that has escaped the enemy's shot, and some of them have many quite through; we likewise had ten guns dismounted. Our squadron were the following ships.

Fortitude, 74. — Admiral Parker, Captain Robinson.
Princess Amelia, 80. — Captain M'Cartney, killed.
Berwick, 74. — Commodore Stewart, Captain Ferguson.
Buffalo, 60. — Captain Truscott.
Bienfaisant, 64. — Captain Braithwaite.
Preston, 50. — Captain Graham.
Dolphin, 44. — Captain Blair.

.....I am, Sir, your most obedient servant.
Signed : Joseph Baxter.

Berwick, off Aldborough
10th August 1781.

C. W.

LA MEDAGLIA DI CONCINO DE CONCINI CONTE DELLA PENNA E SIGNORE DI GATENAIA MARESCIALLO DI FRANCIA.

Nella mia collezione di medaglie trentine ne conservo una di un membro del ramo principale della famiglia Concini, dal quale discende quella laterale trentina.

La medaglia appartiene al maresciallo di Francia Concino de Concini e porta la seguente iscrizione :

D[r] ✻ C·CONCINI·MARQ·DANCRE·MAR[AL]
DE·FRANC[E] Stemma Concini.

℞. ✻ TVTA·SORTE·FIDELITAS ✻ all'essergo ·1614·
Ancora intrecciata da una pianta rampante sormontata dal globo alato.

Rame. Diametro 37 mm.

La famiglia Concini è oriunda di Valdarno d'Arezzo, donde un Bortolameo qm Gio Battista si recò a Firenze per attendere all'ufficio di notaio iniziando la sua carriera presso i signori di Piombino. Cosimo I della casa dei Medici, che aveva conosciuto la valentia di lui lo fece venire alla sua corte in qualità di segretario. Questi si conciliò a poco a poco la stima del suo signore e salì a tanta altezza che il Medici, negli anni 1548 e 1549, gli affidò delicati e gravi incarichi a Genova e alla corte di Carlo V a Bruxelles, cui propose di sopprimere la repubblica di Siena ed incorporarla al dominio imperiale. Nella guerra che nel 1552 scoppiò contro Siena, Bortolameo si trovava al campo in qualità di ministro. Siena che fu presa ed annessa ai domini imperiali sicedette poi per opera del Concini alla casa dei Medici. Più volte fu egli a Roma nel 1559, 1565 e 1572 per vigilare il conclave e per cooperare alla nomina d'un cardinale toscano al pontificato, che però non riuscì, e nel 1572 per assistere alla incoronazione di Cosimo come granduca.

Degli affari diplomatici della Toscana il Concini ebbe da solo la direzione e li trattò con tanta competenza ed efficacia, che attesi i suoi distinti servigi nel 1572 ottenne da Cosimo il privilegio di esenzione di ogni gabella e la nobiltà con la concessione di portare il titolo di conte della Penna dell'antica consorteria degli Alberti signori di Talle e Cantenaia, dai quali i Concini pretendevano di trarre l'origine, mentre, secondo il Litta, quella nobile famiglia era estinta da lungo tempo.

Morto nel 1574 il suo protettore Cosimo I, il Concini perdette tutta l'influenza alla corte toscana, che non riebbe più fino alla morte avvenuta nel 1578, quando era più che settantenne. Lasciò dietro di sè un figlio, Gio Battista, che nel 1560 fu lettore di diritto canonico a Pisa, nel 1562 uditore della Rota in Mantova, cavaliere di santo Stefano e nel 1569 passò alla corte di Firenze come cancelliere. Ebbe anche lui come il padre difficili incarichi diplomatici. L'imperatore Massimiliano II oltre avergli accordati parecchi altri privilegi gli confermò nel diploma la derivazione dai conti della Penna. Nel 1576 fu eletto senatore, poi commissario a Pisa, quindi uditore supremo e consultore privato del granduca Francesco I di Toscana. Morì nel 1605.

Da Gio Battista e Camilla Miniati nacque Concino. Libertino e pieno di vizi com'era ancora nella prima età i suoi genitori fecero di tutto per allontanarlo dalla Toscana. Si presentò opportuna l'occasione allorchè nel 1600 Maria de Medici sposò Enrico IV, re di Francia. Concino passò a quella corte presa nei lacci di tanti intrighi di concubine e di ministri; egli aveva ereditato il talento dei suoi avi condito del garbo fiorentino e della destrezza italiana. La fortuna di arrivare alle più alte cariche, che possan mai desiderare, Concini la dovette all'influenza di Eleonora Dori detta Galigai, divenuta poi sua moglie sebbene fosse di umili natali; ella aveva avuta la sorte di essere figlia della nutrice di Maria de Medici. Eleonora secondo gli storici ebbe tanta influenza sullo spirito della regina, che regolava a suo capriccio le inclinazioni di lei. Venduta agli Spagnoli Eleonora mantenne il disonore, che macchiava i due coniugi Enrico IV e Maria de Medici. Dopo la morte di Enrico IV (1610) la Dori non riconobbe più freno alla sua ambizione e si adoperò ad inalzare il marito alle prime dignità; da cavalier d'onore della regina, fu successivamente creato primo gentiluomo di camera, luogo tenente del governo di Peronne, governatore di Amiens e di Normandia di Caen, di Pont de l'Arche, di Quilleboeuf e alla fine primo ministro, dice Voltaire, senza conoscere le leggi del regno e maresciallo di Francia, senza aver mai tratta la spada, comperò pure il marchesato di Ancre. Ogni autorità, decisione o iniziativa dipendeva interamente da'suoi cenni, insomma per sette anni si impose alla Francia.

Tanti favori elargiti ad uno straniero misero in apprensione i principali signori del regno cosicchè si condensò sul capo dei due favoriti una tremenda procella, che sparse a larga mano l'odio del giovane re Luigi XIII, del popolo e dei grandi. Nel 1617 gli affari del maresciallo andavano a precipizio; i libelli che lo diffamavano si leggevano con piacere doppertutto. I capi dei malcontenti erano il principe di Condè e il marchese di Mayenne, il quale ultimo offerse i suoi servizi per pugnalarlo. Un primo tentativo andò a vuoto per un malinteso, ma il giorno 24 aprile 1617 nel mentre Concini usciva dal Louvre per prendere parte ad una partita di caccia, il capitano delle guardie Vitry colla connivenza del re, lo stese morto al suolo con tre colpi di pistola, mentre Luigi XIII si mostrava al balcone per ricevere gli applausi del popolo festante. Il suo corpo fu sepolto nella chiesa di San Germain l'Auxerrois, donde lo trasse il giorno dopo la plebe per trascinarlo al Ponte Nuovo e per appenderlo ad una forca; fu poi barbaramente dilaniato, fatto a mille pezzi venduti al popolo sitibondo di vendetta.

Eleonora Dori, moglie di Concino, detta Galigai, perchè si diceva discendente di quella nobile famiglia, dama d'Atour, dopo la morte del marito fu tratta alla Bastiglia, posta sotto processo e sebbene non avesse commesso delitti, nulladimeno il marchese Luynes ottenne che il giorno 8 luglio 1617 fosse condannata a

Original from CORNELL UNIVERSITY

morte. Nello stesso giorno fu condotta al supplizio e bruciata viva.

Il Concini lasciò grandissime ricchezze; oltre la rendita della sua carica, un milione all'anno, aveva molti milioni di franchi assicurati in Francia, a Roma ed a Firenze. Nel momento della sua morte stava comperando la contea di Montbeliard. Nel 1617 comparve in pubbico una tragedia di quattro atti intitolata: *Il maresciallo d'Ancre*; un'altra, dello stesso anno, sulla morte della moglie col titolo, *Maga straniera*, non è che una grossolana satira.

La morte dei due coniugi fu la prima causa della fortuna del cardinale Richelieu.

Concino de Concini lasciò dietro di sè un unico figlio, Arrigo, appena dodicenne, che trascinato dalla plebe, dovette assistere al triste spettacolo del supplizio paterno. Fu poi condotto in carcere a Nantes e dichiarato dal parlamento plebeo, ignobile ed incapace di coprire qualunque carica. Nel 1622 Maria de Medici gli ottenne la libertà, ma a condizione di uscire dal regno. Le ricchezze di sua casa erano passate nelle mani del marchese di Luynes. Arrigo si ritirò a Firenze, e morì colà a ventisei anni, il giorno 25 aprile 1631. Egli fu l'ultimo rampollo di questo ramo dei Concini.

Stemma.

Inquartato, 1 e 4 d'azzurro al monte di tre cime d'argento, sormontato da tre penne di struzzo, d'argento; 2 e 3 d'oro alle catene d'argent poste in croce di sant'Andrea e sormontate dall'aquila bicipite imperiale di nero; il tutto allusivo ai conti della Penna e ai signori di Catenaia, le catene formano lo stemma dei Galigai.

Rovereto nel gennaio 1911.

Q. Perini.

REVIEWS.

The Chinese Numismatic Riddle. A Discovery of the Identity of the astronomical and religious Symbols of the "Temple Money" of the Far East with those of Chaldaea, Babylonia, Ancient Egypt, Greece and Rome, the Aztecs of Mexico, the Incas of Peru, etc. By Frank C. Higgins, F.R.N.S., President of the New-York Numismatic Club, 1910.

8° pp. covers 34 pp.; woodcuts.

Price: Twenty-five Cents (1/-).

* *May be obtained from Spink and Son L^d.*

Mr. F. C. Higgins, the versatile President of the New-York Numismatic Club, has lately devoted his attention to the symbolism of Chinese Coin-charms and Amulets, and he gives us the result of his study in a clever and most interesting monograph, forming a brochure of 34 pages with numerous illustrations in the text.

He describes these Talismans as forming "almost a complete breviary of pious thoughts concerning the beginning and end of mankind as well as of human progress here below".

He then traces the development of religious symbols through the ages among the various peoples from the earliest dawn of civilization. He shows the affinity of Far Eastern religious conceptions with those of the Chaldaeans, Babylonians, Ancient Egyptians, Greeks and Romans, and the marvellous series of analogies presented by the symbolism of the Christian faith with that of other emblems of faith. He dwells at length on the cult of the sun-god, which he tells us, foreshadows Christianity, and concludes "that a great solar myth underlies all the ancient mythologies", "the highway from Tokio to Delphi being one unbroken path of the Sun as a religious and religio-political symbol".

The study of the development of religious ideas and evolution of man's thoughts as a moral being is a most fascinating one, but its aspect changes entirely according to one's starting point. Instead of seeking for vestiges of lower beliefs surviving in the higher faith, as the modern school of theology does, we must go back "to a primeval era when man worshipped the One and True God, falling away into idolatry as the result of sin and superstition".

Paul, the great apostle of the Gentiles, tells us in Rom. I, 23 "that man changed the glory of the incorruptible god into an image made like to corruptible man, and to birds, and four-footed beasts, and creeping things", etc., and a striking example of the truth of this statement we find in the Chinese talismans with all their magic and superstitious imagery.

Comparative religion, at the suggestion of archaeology, has fastened upon the striking similarities between the early Bible historical account of Creation and the cosmological myths of Babylon, and subsequently, upon the hero-stories of Israel, which are common to every age and clime.

But is the problem not easily solved if we trace their common origin in the primeval Arabian home of the race? Genesis does not depend on Babylon; but Genesis is revealed truth, and this truth which was the common property of our first ancestors degenerated amongst the nations into either the refined or crude myths which from Far East to Far West point to a common origin.

If the divine authority of Holy Writ be accepted, scientific investigation into the religious conceptions of every age and clime becomes easy; but scientific enquiry into the evolution of man's ethics apart from God's revealed truth is a delusion. There is an essential difference between revealed truth and all its rivals. Take Vedaism, Brahmanism, Budhism, Lamaism, or aught else in India and the adjacent lands; take Confucianism, Taoism, Foism, in China; take Sabaism, Jovism, Fetichism, ancient and modern; can any one of these systems allege a single fact at its basis? The religion of the Bible, Old and New Testament, Judaism or Christianity, rests on distinct realities, not on mere ideas of man's minds.

If our Christian faith is an evolution of the Sun-cult (*Vide* pp. 32-34), if with Manes we must hold that our Lord was a manifestation of the solar principle, then "our faith is vain" and we are no better off than the poor Pagans to whom we send our missionaries. The mission of Baha Ullah, whose cult is now becoming fashionable, is the religious unification of all people, including Christians, Jews, Atheists, Mussulmans, Zoroastrians, Buddhists and Brahmins, with the fundamental proposition of a "Divine Unity of man with god, which unity manifests itself in the brotherhood of mankind".

The god of many an up-to-date theologian is a creation of his own mind, akin to the gods of the Ancients, the Greeks and the Romans, conceived in their own imagination. The God of the Bible is a different and as remote to such gods as the East from the West.

The Bible gathers around the Person of Christ all the wealth of its Divine revelation, and all the strength of its incomparable illustrations. Creation itself and all its wonders are only types pointing to Christ, who is the Centre of all the counsels of God. This is very different from considering Christianity as the evolution of human thought, and instead of "the history of paganism being the history of a great striving after truth and light and the story of a long preparatory evolution of the human soul to fit it for the final revelation of the majesty and misericorde of the Omnipotent", it is the history of man's downfall from the original knowledge of the true God, just and wise, shewn plainly by Cain's departure from his Creator in self-will on account of his sin.

I trust Mr. Higgins will forgive me for stating my own view of the problems he raises in his valuable paper, which I have read with the utmost interest.

Corean Coin Charms and Amulets. By H. A. Ramsden, F.R.N.S. Author of "Kwan Ei Tsu Ho Coins of Japan", "Sugar Estate Tokens of Cuba", etc. Published by Jun Kobayagawa Co, Yokohama, Japan, 1910. 8vo. 40 pages. 3 Plates.

Price: 1 $ = 4/2.

(*To be had from Spink and Son L^d, London*).

Chinese, Japanese and Annamese Coin Charms and Amulets have received, we are told by Mr. Ramsden, their full share of attention, both from native and foreign authors. But the Talismanic coins of the Hermit Kingdom have been sadly neglected, and the present work is the first published on the subject. Of the 217 specimens described in this monograph, some 200 are mentioned for the first time. The productions of the land of the Morning Calm are quite distinct from those of the other Far Eastern countries, and

Digitized by Google
Original from CORNELL UNIVERSITY

once their general style and fabric is pointed out, no great difficulty will be experienced in allocating them. " Their bizarre shapes, artistic designs and uncommon patterns with symbolical conceptions and quaint inscriptions, give them a charm all their own. Their delicate and attractive appearance convey an impression of refinement quite lacking in the vigorous Chinese talismans, or the whimsical Japanese E sen and the unpretentious Annamese Amulets".

" Corean Coin Charms are often found enamelled or painted with bright colours. The trial issue of silver with enamelled centres for current purposes, which was not adopted on account of expense in manufacturing, no doubt were made in imitation of these gaily decorated charms".

Some of these Charms, which are fairly common, show the same pattern on both sides.

Many specimens display in the centre the symbol of the male and female principle surrounded by quaint devices or mottoes; others show figures and animals in relief, bats and butterflies; fish shapes, fan shapes, weight shapes, geometrical patterns, scalloped and star shapes, etc.

The principal types are illustrated on three autotype Plates and a large number of wood blocks interspersed in the text.

To all those interested in Far Eastern studies, we warmly recommend Mr. Ramsden's book, which will appeal to them.

Medallic Illustrations of the History of Great Britain and Ireland. Plates CXXI-CXXX (British Museum).

Price: 6/.

To be had of Spink and Son Ltd.

The ten plates and accompanying letterpress of the latest section of this important medallic work cover five years of the reign of Queen Anne, extending from the commemoration of various British victories in 1704 to the battle of Malplaquet, which was fought on August 31st, 1709. The medals throughout this period are chiefly concerned with the perpetual battles and sieges of the time, together with the general successes of the allies both in Spain and Brabant. There is an interesting series connected with the union of England and Scotland, which was effected on May 1st, 1707. The national collection includes various medals of James III., "the Elder Pretender", struck for distribution among Jacobite sympathizers, and also two examples of his touch-pieces for presentation to those suffering from scrofulous complaints. The attempted invasion of Scotland by the French in March, 1708, brought forth a variety of satirical medals.

Queen Anne on one occasion directed medals to be struck in gold and silver which recorded less serious shooting than that of battles. At Dresden, in September, 1707, the annual festival of shooting at the popinjay was celebrated with unusual splendour. John Robinson, the English ambassador, was fortunate enough to shoot down the last piece of the mark, and was proclaimed King of the Popinjay and winner of the silver cup.

Busts of the Queen, of Marlborough, and of various royal allies are frequently shown. Amid all these warriors and rulers, it is pleasant to find that the medallists of the day did not entirely ignore the world of letters and science: John Locke, the philosopher,' was commemorated in copper; and John Ray, the naturalist, who has been termed "the Darwin of the seventeenth century", in copper and silver.

A PRACTICAL SYSTEM OF CATALOGUING COINS & NUMISMATIC BIBLIOGRAPHY.

By A. H. Cooper-Prichard.

PREAMBLE.

Everyone whose experience of cataloguing Coins or Numismatic Bibliography has extended into practically all periods and countries has felt the difficulties resulting from the frequent changes in geography; it is the object of the proposed system to remove these difficulties.

Another object which this system aims to facilitate is the complexity of cross references in numismatic bibliography. For instance a coin of the Carthaginian occupation of Sicily belongs to three separate divisions, since it is, also, a part of the great Hellenic-series. Its attribution to any of these divisions must be a matter of personal opinion, for the classical numismatist has no right to compel me to classify it under Hellenic coins, when my preference is for a geographical classification, and another person, again, will prefer to place it with the issues of Carthage. The matter of its classification must, therefore, be left to individual judgment, but in the bibliography one may reasonably look for it under all three heads, thus necessitating cross references. An inspection of the proposed system will demonstrate with what saving of labour and time this may be accomplished.

Finally, this system of geographical arrangement, although invented expressly for numismatic purposes, is adapted to the needs of the bibliography of all other sciences in which geographical classification is of importance, as in Zoology and Botany, and even to Commerce, but its especial use, next to the numismatical, will be found in Archeology and History, and, for that reason, certain forms have been introduced which do not refer to the science of Numismatics, but an inspection of the system will show that their omission does not affect the remainder.

SOME COINS OF THE BRITISH EMPIRE.

The following abbreviations are used in describing the coins: —
O — Obverse.
R — Reverse.
E — Edge.

BRITISH HONDURAS.

QUEEN VICTORIA.

SILVER TEN CENTS.

TYPE I

TEN CENTS, 1894.

O. — Legend: — VICTORIA QUEEN. Head and neck of the Queen, in profile, looking to the left. The truncation of the neck is plain. Her Majesty is represented wearing a diadem richly jewelled and heightened with alternate crosses pattee and united roses, thistles, and shamrocks. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The hair is bound by an unornamented fillet which is tied into a bow at the back of the head, the hanging ends being crimped. The whole within an ornamented rim.

R. — Inscription: — CENTS in two lines, within a beaded circle, encircled by two plain concentric circles divided by three love-knots into three equal compartments, the two upper ones containing the legend: — BRITISH HONDURAS, and the lower one the date, 1894, between two beads. The whole within an ornamented rim.

E. — Milled with straight lines at right angles to the face of the coin.

Henry Garside.

THE NEW COINAGE

DESIGNS FOR SILVER MONEY.

The following proclamation concerning the new silver coinage was published in the *London Gazette*. It will be noticed that there is to be a change in the designs for the reverse of the florin and of the sixpence.

By the KING.

A PROCLAMATION

Determining New Designs for Silver Coins.

GEORGE R.I.

Whereas under section eleven of the Coinage Act, 1870, We have power, with advice of Our Privy Council, from time to time by proclamation to determine the design for any coin:

And whereas it appears to Us desirable to determine new designs for the silver coins hereinafter specified, being some of the silver coins mentioned in the First Schedule to the Coinage Act, 1870:

We, therefore, in pursuance of the said enactment and of all other powers enabling Us in that behalf, do hereby, by and with the advice of Our Privy Council, proclaim, direct, and ordain as follows: —

I. The designs for the said silver coins shall be as follows: —

(1) *Half-Crown.* — Every half-crown shall have for the obverse impression Our effigy with the inscription "GEORGIUS V DEI GRA: BRITT: OMN: REX" and for the reverse the Ensigns Armorial of the United Kingdom contained in a shield surmounted by the Royal Crown and surrounded by the Garter bearing the motto "HONI SOIT QUI MAL Y PENSE," with the inscription "FID: DEF: IND: IMP:" together with the words "HALFCROWN," and the date of the year, with a graining upon the edge.

(2) *Florin.* — Every florin shall have the same obverse impression as the half-crown, with the inscription "GEORGIUS V D.G.BRITT: OMN: REX F.D.IND: IMP:" and for the reverse four crowned shields arranged in the form of a cross; in the angles four sceptres springing from the Star of the Garter in the centre, together with the words "ONE FLORIN" and the date of the year, with a graining upon the edge.

(3) *Shilling.* — Every shilling shall have the same obverse impression and inscription as the half-crown, and for the reverse Our Royal Crest with the date of the year placed across the Crest, with the inscription "FID: DEF: IND: IMP:" together with the words "ONE SHILLING", with a graining upon the edge.

(4) *Sixpence.* — Every sixpence shall have the same obverse impression and inscription as the half-crown, and for the reverse the same impression and inscription as the shilling, together with the word "SIXPENCE", with a graining upon the edge.

(5) *Silver Fourpence, Threepence, Twopence, and Penny.* — Every silver fourpence, threepence, twopence, and penny shall have for

the obverse impression Our aforesaid effigy, with the inscription "GEORGIUS V D.G.BRITT : OMN : REX F.D.IND : IMP:" and for the reverse the respective figures "4," "3," "2," "1," (according to the denomination or value of the piece) in the centre, with the date of the year placed across the figure, and encircled with an oak wreath surmounted by the Royal Crown, with a plain edge.

2. This Proclamation shall come into force and have effect as from the first day of January, one thousand nine hundred and eleven.

Given at Our Court at *Windsor Castle*, this Twenty-third day of January, in the year of our Lord one thousand nine hundred and eleven, and in the First year of Our Reign.

GOD save the KING.

A similar Proclamation with reference to the new gold and bronze coinages was published in *The Times* of November 30 last.

SETS OF SPECIMEN COINS.

The following notice is issued by the Deputy-Master of the Mint: —

Specimen coins bearing His Majesty's effigy will be issued by the Royal Mint in three sets as follows: —

A.	B.	C.
£ 5 piece.	£ 1.	Half-crown.
£ 2 piece.	Half-sovereign.	Florin.
£ 1.	Half-crown.	Shilling.
Half-sovereign.	Florin.	Sixpence.
Half-crown.	Shilling.	MAUNDY.
Florin.	Sixpence.	Fourpence.
Shilling.	MAUNDY.	Threepence.
Sixpence.	Fourpence.	Twopence.
MAUNDY.	Threepence.	Penny.
Fourpence.	Twopence.	
Threepence.	Penny.	
Twopence.		
Penny.		

EIN MERKWÜRDIGER IRRTUM

betreffs der Vornamen des Luftschiffers Blanchard hat sich bei einer ihm zu Ehren geprägten gleichzeitigen Medaille eingeschlichen und soll in Folgendem näher beleuchtet werden.

Als im Jahre 1788 der damals schon weltberühmte Erfinder des Fallschirms und Überflieger des Ärmelkanals bei Warschau einen Aufstieg unternommen hatte, wurde auf dies Ereignis in der Prägeanstalt des Berliner Stempelschneiders und Münzgraveurs Loos (geb. 1735, † 1819) eine kleine Silbermedaille hergestellt, die statt der dem Luftschiffer zukommenden Vornamen *Nicolas François* sonderbarer Weise die Vornamen *Joannes Petrus* aufweist.

Die betreffende geprägte Silbermedaille hat das Gewicht von 10 gramm und einen Durchmesser von 30 mm. Der *Av.* zeigt das bezopfte rechts blickende Brustbild des Luftschiffers, darunter den Namen des Stempelschneiders LOOS. Die Umschrift lautet IOANNES—PETRVS—BLANCHARD.

Im *Rv.* erblickt man einen Luftballon über einer Landschaft, auf welcher ein paar Häuser an einem breiten Strome und ein Gebüsch sichtbar sind. In der Gondel des Ballons sitzt der Luftschiffer und hält eine Fahne hinaus. Weiter unten nähert sich ein Fallschirm mit einem darin herabgelassenen Hunde dem Erdboden. Unten reichts ist ein Denkstein mit vier Planetenzeichen (Mercur, Venus, Mars, Uranus). Die Umschrift am Rande mit grösseren Buchstaben lautet: IMPAVIDVS SORTEM NON TIMET ICARIAM; die innere Inschrift mit kleineren Buchstaben lautet VARSOVIAE—MDCCLXXXVIII und wird vom Ballon geteilt.

Ähnliche Irrtümer sind mir nur bezüglich einzelner Jahreszahlen auf wenigen Medaillen, bezw. Münzen, bekannt. Auf einer einseitigen Bronce-Medaille *Marats* steht das falsche Geburtsjahr 1746 (statt 1744); auf einem 6 sols-Stück *Louis XV* von Frankreich findet sich die Jahrzahl 1779, während der König schon 1774 starb; *Napoleon I* soll seine Geburt ins Jahr 1769 (statt 1768) verlegt haben, um als geborener Franzose zu gelten. Während der letztere Fall auf bewusster Fälschung beruht, scheinen dei beiden ersteren blosse Irrtümer zu sein.

Wie aber zwei falsche, Vornamen erdacht werden konnten, welche Absichten der Prägende damit verfolgte, ist mir rätselhaft. Zwar gibt es noch einen *Pierre* (*Petrus*) *Blanchard*: aber dieser Jugendschriftsteller kann hier nicht mit dem Luftschiffer verwechselt worden sein, da er 1788 erst 16 Jahre alt war. Kann vielleicht ein freundlicher Leser eine Erklärung des obigen Irrtums beibringen?

Marienburg Wpr.

Prof. R. NADROWSKI.

NUMISMATIC SOCIETIES, MUSEUMS &c.

BRITISH NUMISMATIC SOCIETY.

January 25. — Mr. Carlyon-Britton, President, in the Chair. — Mr. C. A. Cain, A. W. Lafone and Hal Waddington were elected Members.

Mr. Bernard Roth, Vice-President, on behalf of the Society, presented the John Sanford Saltus Medal to Mr. Carlyon-Britton, to whom it had been awarded by the ballot of the members at the Anniversay Meeting for his contributions to the Society's publications.

Miss Helen Farquhar read the third of her series of articles on 'Stuart Portraiture' describing the coins and medals of William and Mary, including those of the King after the Queen's death. From references in the State Papers and other Manuscripts she attributed to George Bower, whose work as cuneator had hitherto met with little notice, the half-guinea and tin halfpenny and farthing of 1689. Following the story of the Roettier family to the death or departure from England of its various members, she endeavoured to trace the earlier dies for the great recoinage to the several engravers, establishing the claims of James Roettier to the principal share of the work, comprising dies and puncheons for the country mints to the exclusion of Henry Harris, the official chief-engraver. She also drew attention to the very gradual development of a more medallic style of portraiture after the dismissal of James Roettier from the Tower mint in 1696-7, as exemplified in John Croker's gold pieces at the termination of William's reign; and illustrated by lantern-slides the slight changes which appeared in the portraits of 1696-7 when Croker superseded Roettier.

Mr. Dalton presented to the Society the second part of 'The Provincial Token Coinage of the Eighteenth Century.' Numerous and interesting coins and medals in illustration of the subject of Miss Farquhar's paper were shown by Mr. Spink, Mr. A. H. Baldwin, and the lecturer. Mr. Mac Ilwaine exhibited five varieties of the early Irish silver penny, as supplemental to Mr. Roth's paper on that subject in the current *Journal* of the Society; and Major Freer, the badge of the Turkish Order of the Medjidie, third class.

Specimens of the new bronze halfpenny, submitted by Mr. Baldwin, evoked the remark from the President that, as on the present money, the mechanism of the striking still raised a faint trace of the device of the one side upon the other, which was a defect unknown until recent years.

***

BRITISH NUMISMATIC.

February 22. — Mr. Carlyon-Britton, President, in the chair. — Mr. Alfred Anscombe was elected an Honorary Member and Mr. J. F. Mallett a Member. —

Original from CORNELL UNIVERSITY

Mr. Shirley Fox read a further instalment of the 'Numismatic History of the First Three Edwards,' by himself and his brother, Mr. H. B. Earle Fox, and showed, from the evidence of contemporary chroniclers and official documents, that the long-cross coinage bearing the name of Henry III. continued to be issued until the end of 1278, and remained the sole currency of the country until the middle of the following year. Two varieties of it were identified as having been issued under Edward I., and the later of these bore the names of moneyers— Phelip in London and Joce at St. Edmundsbury— who were not appointed to their office until May, 1278. In the summer of that year the king's attention was drawn to the clipped and worn state of the coinage, and, in consequence of statutes passed by the Parliament held at Gloucester, inquiry was made into the clipping of coin by the Jews, many of whom were convicted and hanged. In the meantime the king, having taken the administration of the mints of London and Canterbury into his own hands, appointed Gregory de Rokesley and Orlandino de Podio to be keepers, in place of Bartholomew de Castello, and preparations were made for the issue of a new coinage, the dies for which were delivered to them in May, 1279. The new money, however, was not ready until nearly three months later, and pending its issue, the king, who had forbidden the circulation of mutilated coin, supplied, from his own treasure, whole and unclipped money of the old type, which was exchanged, at ten cities, for clipped. The most conspicuous reforms in the new coinage were the suppression of the practice of cutting the penny into halves and quarters to serve as small change, and the issue of the first round farthing. Another innovation was the striking of a *grossus sterlingus*, equal to four ordinary sterlings. An exchequer memorandum, which has been preserved, shows that the pound tower (= 5,400 grains troy) of sterling silver was to be coined into 243 pence, but as farthings of the same standard would have been inconveniently small, it was ordered that they should be made of baser metal, and that only 812 of them should be coined out of the pound tower instead of 972, so that their normal weight would be 6.65 grains troy, instead of 5.55 grains troy, which would be that of a quarter of a penny. Base farthings were not struck after Christmas 1280, when the small coins were ordered to be of the same fineness as the pence, and the identification of those of 1279 is therefore easy. Identical in style with them were the pennies reading EDW. REX ANGL. DNS HYB, and others on which the word Rex was abbreviated to R, with a mark of contraction placed across the tail of the letter. The groats, the issue of which did not last more than four or five years, were the well-known pieces misdescribed as patterns by Hawkins. All the coins of 1279 were struck in London only. At the end of the year a new agreement was drawn up by which Master William de Turnemire was appointed master moneyer throughout England, and was to work mints at Canterbury, Bristol, and York, as well as in London. He does not seem to have struck groats in the provinces, but the pence and farthings issued under this instrument are easily distinguished, the dies having been made, in part, with the irons used for the previous issue. A noteworthy characteristic is the invariable use of the inverted N, which was found mixed with the normal form in 1279, but after this issue disappears for many years. The agreement does not provide for halfpence, which, the chroniclers state, were put into circulation on August 15th, 1280, when the long cross coins were finally demonetised, and no halfpence are mentioned in the mint accounts closed on May 19th, though a large amount of them figures in the account running from that date to October 18th. The year 1280 saw the opening of royal mints at Lincoln and Newcastle, in addition to the cities already named, and the Bishop of Durham's coinage began with the first type issued by William de Turnemire. At St. Edmundsbury considerable delay was caused by a dispute between the Abbot and the King over the former's claim to receive an "assay," or test piece of standard silver, and no coins were issued until the end of June. One consequence of this appears to have been the irregular production of a die of local workmanship, differing widely in style from the official type, and recognisable by the spelling HIB for HYB. Another consequence was the survival of the name of the moneyer, Robert de Hadeley, on the coin, when moneyers' names had been suppressed at all other mints. An inquiry was ordered into the matter a couple of years later, but, though the result cannot be ascertained, a lenient view must have been taken by the authorities, since Hadeley remained in office until 1287. The Archbishop of York did not succeed in establishing his claim to two dies without litigation, and his mint did not begin to work until near the end of the year. His coins, which are all of a single type peculiar to north country mints, are of great assistance in establishing the chronology of the various issues.

Mr. J. B. S. MacIlwaine supplied an account of an interesting discovery near Dundrum, co. Dublin, in 1893, of 650 half crowns, shillings, and sixpences of the gun-money coinage of James II., contained in a large earthenware vessel which he exhibited. The find added twelve varieties to the recorded list. About 1885 some 200 half crowns of this issue had been found near the same site.

Presentations :— By the King of Italy, the first volume of the 'Corpus Nummorum Italicorum' : Miss H. Farquhar, 'Medallic History,' 1802 : Mr. L. L. Fletcher,' Australian Copper Coinage,' by M. H. Long.

Exhibitions :— By Mr. Shirley Fox, a series of Edwardian coins in illustration of his paper; Mr. Bernard Roth, a new variety of the stater of Dubnovellaunus, reading DUBNOV, somewhat resembling the class 'Evans,' pl. iv, fig. 10; Mr. W. C. Wells, a long-cross penny of Henry III. issued by Lucas of Northampton from a die which appeared to have been used for a previous type before being recut : Mr. Westropp, a forgery of Charles I.'s halfcrown with mint mark (R); Mr. L. L. Fletcher a series of 41 varieties of the early eighteenth century copper tokens of Ulster; Mr. MacIlwaine, an unrecorded fourpenny piece of 1852, Britannia type; Mr. Henry Garside, the pattern half crown of 1875.

ROYAL NUMISMATIC.

February 16. — Sir Henry H. Howorth K.C.I.E. President, in the chair. Mr. Felix W. Warre was proposed for election as a Fellow of the Society.

Mr. Fredk. A Walters F.S.A. exhibited a very rare bronze medallion of Antoninus Pius with reverse, the Earth with Four Seasons and a half circle of the Zodiac above (Cohen no. 1168). There are specimens of this rare piece in the British Museum and in the Bibliothèque Nationale. Mr. Bernard Roth F.S.A., exhibited a unique gold stater of Dubnovellanus having in addition to the usual symbols a rayed disc similar to that which is found on Gaulish staters of the Veliocasses, a specimen of which was also shown.

Mr. H. A. Grueber read a paper on the coinage of the Trumvirs, Antony, Lepidus and Octavian illustrative of the History of the times. Mr. Grueber selected this period as in his estimation no other series of coins illustrated more fully or vividly the development and extension of the Roman Empire. The series opened with a coin of Mark Antony bearing his portrait and struck almost immediately after the death of Julius Caesar. The next series of coins was that relating to the formation of the Triumvirate, which gives portraits of the three Triumvirs. These were issued at Lugdunum by Mark Antony. From that date the series is almost continuous and the more important events commemmorated were the first war with Sextus Pompey in Sicily; the victories of Brutus and Cassius in Greece and Asia Minor; the battle of Philippi; the siege of Mutina and its capture by Octavian; the second war with Sextus Pompey and his defeat at Naulochus : the wars with the Parthians and the victories of Vestidius and the death of Labienus; the triumph of Mark Antony at Alexandria and lastly battle of Actium and the subsequent rejoicings at Rome. It is to this date that Mr. Grueber assigns the origin of the Roman Imperial coinage. As all these coins were struck outside Italy, which was regarded as neutral ground by the Triumvirs on their partition of power, Mr. Grueber gave a summary of the history of the Provinces. An account of the gradual development of portraiture on the coins of the Republic was also given as it was this period that witnessed the rise of the practice of putting the portraits of living individuals on coins and the gradual exclusion of all signs of republicanism from the Roman coin-types.

Sir Henry H. Howorth pointed how well the period chosen for Mr. Grueber's paper illustrated the great interest of Roman coins as

SOCIÉTÉ FRANÇAISE DE NUMISMATIQUE.

Séance du 7 janvier.

Une communication a été faite par M. Collombier sur deux écus d'or de Charles VIII, dont un inédit.

M. Bordeaux a signalé un vol de médailles récent commis au préjudice du musée d'Aix-la-Chapelle, puis présente les nouvelles monnaies d'argent d'Albert Ier, roi des Belges. Il a fait connaître que le point secret qui, d'après le ministre Tarbé, distinguait, à l'atelier de Paris, les monnaies frappées pendant le second semestre, a été retrouvé jusque sur les écus de 1652 et 1648.

Le colonel Allotte de la Fuye a présenté un méreau de plomb de type encore inconnu frappé pour les voyages de la monnaie de la Rochelle.

Le comte de Castellane et M. Dieudonné ont exposé diverses considérations sur le double tournoi sous Charles VII et Louis XII.

M. Blanchet a démontré par des textes que les types du jeton du pharmacien Rouvière se rapportaient bien à la spécialité de thériaque.

(*Chronique des Arts*).

Die *Bayerische Numismatische Gesellschaft* hielt am 14. Januar 1911 in München ihre Hauptversammlung ab. Der Vorsitzende, Herr Staatsminister von *Frauendorfer*, Exz., gab den Jahresbericht bekannt, welcher von einer steigenden Mitgliederzahl berichten konnte und teilte mit, dass Herr Prof. Dr. Pick-Gotha zum korrespondierenden Mitglied der Gesellschaft ernannt wurde. Herr k. Generalkonsul Th. *Wilmersdœrffer* als Schatzmeister berichtete über die Kassenverhältnisse der Gesellschaft und wurde ihm unter Dankeserstattung Entlastung erteilt. Exz. v. *Frauendorfer* gab hierauf noch bekannt, dass die Gesellschaft anlässlich des 90. Geburtstages unseres Prinz-Regenten Luitpold eine Denkmünze in beschränkter Anzahl erscheinen lassen wird, zu der von dem bestbekannten Künstler Hans Schwegerle der (preisgekrönte) Entwurf überlassen wurde. Herr Gebert-Nürnberg dankte unter Beifall dem Gesamtvorstand für seine Tätigkeit im abgelaufenen Vereinsjahr; *Herr Bürklin* sprach Dank und Anerkennung für das interessante und reichhaltige Heft der letzten Vereinsmitteilungen aus. — Nach Schluss der Hauptversammlung zeigte Herr Gebert an der Hand archivalischer Nachrichten, dass das bisher rätselhafte *F* auf einer Reihe von Denkmünzen aus den Jahren 1686 bis 1692 der Namen des Nürnberger Kaufmanns *Johann Färber* bedeutet. Der Mann hatte sich ein kaiserliches Privilegium zu verschaffen gewusst, bei dessen Ausübung ihm aber der Rat und die Rechenpfenningschläger, sowie auch die vom Rat privilegierten Denkmünzenfabrikanten Gebrüder Lauffer, Kleinert und Wolrab die grössten Schwierigkeiten machten, so dass Färber 1693 Nürnberg verliess.

(*Numismatische Mitteilungen.*)

FINDS

Deux importantes trouvailles ont été faites, qui réjouissent tous les numismates. L'une, qui remonte au mois d'octobre dernier, a eu pour théâtre Lenggenwill, dans le canton de Saint-Gall. Elle comprend 249 bractées d'argent datant du millieu du XIIIe siècle. Ces monnaies ont dû être enfouies au temps de l'abbé de Saint-Gall Berchtold von Falkenstein, soit à une époque très agitée. Quelques spécimens n'ont pu être identifiés jusqu'ici; les autres sont des monnaies frappées par les villes ou par les autres seigneurs du pays ayant droit de frappe. Elles ont vu le jour sous le régime de la convention monétaire de 1240. Sur ces 249 pièces 75 sont des monnaies de la ville de Saint-Gall; il y a aussi des monnaies de Constance, de Lindau, da Reichenau, etc.

Tout récemment, une trouvaille plus considérable encore a été faite à Dompierre, près de Moulins. Un propriétaire qui faisait exécuter chez lui des fouilles, a découvert 2800 monnaies d'argent et de bronze qui remontent à l'époque gallo-romaine. Sur ce nombre il y a, paraît-il, des exemplaires extrêmement rares.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(*For further particulars see first page of this Circular.*)

(*To be continued.*)

WAR MEDALS & DECORATIONS.

(*Continued from p. 12669.*)

85069 Royalist Silver Badge, Obv. Bust of King to left, in his hand a crown of thorns and scroll, the latter inscribed CHRISTI TRACTO. Legend in two circles IANII: 30: 1648, &c. Rℒ. Rock buffetted by winds and waves. F. & V. R. 5 15 »

85070 General Sir Thomas Fairfax. Gold Oval Badge. Obv. Bust of the General to left. Rℒ. MERVISTI POST. HAC. MELIORA 1645. Of the highest rarity in gold. V. F. 50 » »

A military reward bestowed by the Parliament and the City of London in gold to superior officers.

These medals were issued upon the appointment of Fairfax to the office of General-in-Chief of the Parliamentary forces and was probably bestowed upon all who had fought with him at Marston Moor.

85071 Another, Silver-gilt. Obv. Bust of Sir Thomas. Legend THO. FAIRFAX. MILES. MILIT. PARL. DVX. GEN. Rℒ. As above. F. & R. 10 » »

85072 American Indian Chiefs Badge. Obv. Bust of King to left, laureate, hair long, in armour and mantle. Legend, GEORGIVS. II. DEI. GRATIA. Rℒ. A European seated under a tree holds out the pipe of Peace, adorned with wings, to an Indian who, seated opposite to him, points to the meridian Sun, a fire between them. Legend, LET US LOOK TO THE MOST HIGH WHO BLESSED OUR FATHERS WITH PEACE. 1757. F. & E. R. 35 » »

∴ When the rupture took place with France in 1756, England formed alliances with several chiefs of the American Indians who were presented with these medals which they wore with great ostentation.

With the Indians the feathers of the swan and the wild-goose, and the wings of those birds are emblems of peace, and each person at a negotiation takes in turn three deliberate whiffs of a pipe adorned with such feathers or wings before the business is commenced. The Sun, its appearance and its course are very frequent subjects of solemn reference and appeal in their discussions.

85073 American Indian Chief. Bust of King to right, hair long, in uniform with sash and mantle, a wreath of laurel. Legend, GEORGIVS. III. DEI. GRATIA. 1794. Rℒ. The Royal Arms. F. & V. R. 15 » »

Illustrated in Leroux's Medaillier du Canada, p. 156.

85074 Friendly Association to the Bantry Garrison, 1797. Obv. A crown above, FRIENDLY ASSOCIATION; below, BANTRY GARRISON. Rℒ. Vessels in a storm. Legend, AFFLAVIT DEUS DISSIPANTUR. Exergue, JAN. MDCCXCVII. By Mossop. V. F. & E. R. 30 » »

∴ The Republicans of France, after subduing the Royalists in La Vendée, turned their attention in 1796 to the possible invasion of England. This however, upon mature deliberation, was found to require more capital than France had at her disposal, and an expedition was planned on a smaller scale to invade Ireland. In the summer of that year several members of the Executive Committee of the Society of United Irishmen held a conference in Paris, which resulted in the French Government sending a fleet of 44 sails, including 17 line-of-battle ships, with a considerable army on board, to the coast of Ireland. This ill-fated fleet met with a succession of disasters from first to last. When off the coast of Ireland a dense fog set in and when that cleared away a gale of wind commenced, which scattered the ships, several being wrecked, and others driven out to sea. A few ships entered Bantry Bay, but these were obliged to return, making no attempt to land. The garrison of Bantry had made every preparation in their power to defend their post against the French, and although they were not called upon to act on this occasion, the Friendly Association of Ireland had a medal struck for distribution amongst the garrison as a reward for their loyalty and energy. The Officers of the Galway Militia, who formed part of the garrison received the medal in silver. — Vide *Tancred.*

85075 H. E. I. Co large silver medal for the capture of Java 1811. Obv. Troops storming Fort Cornelis. Rℒ. Persian inscription within

ADVERTISEMENTS

COMMON GREEK COINS

BY THE REV. A. W. HANDS

8vo. — 170 pp — Illustrated. **Price : 5/- nett.**

" It must not be thought that " Common Greek Coins " is merely a catalogue of ancient Greek money, for it is far more than this. The describing of the coins is utilised to give a cleverly condensed, but most interesting, account of Greek history and mythology, commerce and progress in civilisation. The colonies and conquests of the Hellenes, their foolish feuds and transient friendships all come under survey and comment, and the usually erudite style of Greek numismatists is transformed into a brilliant and most readable essay upon the ancient Greek world. This first volume is provided with a useful index and catalogues of the monograms, initials, symbols, and various mint marks are duly set forth to the various chapters, assisted by numerous engravings of all the more important types."

(*The Egyptian Gazette.*)

Supplement to the Coinage of the European Continent,

by W. C. HAZLITT

Spink & Son, 1897. Large 8°, 193 pages.

Reduced price 4/- *nett.*

Every purchaser of Hazlitt's " Coins of Europe " should get this present appendix, which contains much new and useful information.

JUST ISSUED.

ıspects of Death in Art. By F. PARKES WEBER, M. A., M. D., Fellow of the Society of Antiquaries and of the Royal Numismatic Society. With 58 Figures. 8vo, cloth.

The book is intended to be an essay, not on the iconography of eath, but on the mental attitudes towards the idea of death, and he various ways in which the idea of death has, or may be supposed o have, affected the living individual — his mental and physical state, and especially the direction and force of his action, — as illustrated by minor works of art, especially medals, engraved gems, jewels, etc. The book is divided into four parts. The first is meant to serve as an introduction to the whole subject. The second is an arrangement and analysis of the various possible aspects of death and the mental attitudes towards the idea of death, intended to show the headings under which the illustrative works of art may be grouped. The third deals with the medals and coins, and in the fourth the engraved gems, finger-rings, jewels, etc., bearing on the subject, are described.

COINS OF MAGNA GRAECIA

BY THE REV. A. W. HANDS.

(The Coinage of the Greek Colonies of Southern Italy).

1. Vol., 8vo, paper covers, 336 pp., with numerous illustrations in the text, one Map and a Chart.

" The Coins of Magna Græcia " contains information that certainly cannot be found elsewhere in English. A great deal more has been done than a mere digest of Sambon, Evans, and Lenormant, — there is plenty of independent work. English Collectors of Greek coins ought to be very grateful for the collection of so much good material, and most especially for the arrangement of everything in chronological periods, which are so much more satisfactory than the system of the volume on Italy of the British Museum Catalogue, the only volume that was accessible hitherto. ".

C. W. C. OMAN.

Price : 7/6 net.

Original from CORNELL UNIVERSITY

Mr. Hands deprecates the notion of being mistaken for an expert, but he is a fellow of the Royal Numismatic Society, and has shown already in his work on "Common Greek Coins" how attractive he can make the subject for experienced collectors no less than for beginners. In this new work he deals with the coins of Magna Graecia — the Greek colonies scattered over the foot of Italy — as he had dealt previously with the coins of Greece; and he has such a wealth of illustration at his command that, whilst he treats the coinage with detail and exactitude, his readers learn both history and geography, and are entertained with myth and legend. Mr. Hands has specially in view the requirements of collectors of modest means, and he assures us that large numbers of these coins may be obtained at a very small cost. The work begins with the history and coinage of Tarentum, to which no less than 51 pages are devoted, but then much of the information applies no less to other colonies. The coinage of Metapontum has 29 pages, and many examples of the coins will make readers long to get at the originals. Twenty-one colonies in all are dealt with, and there is also a carefully-written essay on the weight standards, to which is appended a diagrammatic chart. We may add that the book is beautifully printed, well indexed, and has a first-rate map.

(*Sheffield Advertiser.*)

***

It seems to me to be just the sort of book to interest people in the subject. I remember that I was always repelled from Greek and Roman numismatics by the dulness of the exponents. It all seemed to me so far away and remote from human interest.

Your method of illuminating the history by means of the art and imagination illustrated by the coin is the right way.

I hope the book will be as successful as it deserves to be. It represents a vast amount of study and research.

THE

MODERN COPPER COINS

(17th to 19th centuries)

OF THE

MUHAMMADANS

BY W. H. VALENTINE.

Price 10/6 net.

This work, is designed to popularise the study of Muhammadan copper coins, and is the outcome of a student's endeavour to identify and arrange them. To this end the author has made faithful drawings of all the specimens of this class of coin that he has been able to find. Commencing with Turkey, the reader is taken numismatically through Egypt, Tripoli, Tunis, Algiers, and Morocco, to Nigeria (for which place the Royal Mint has recently struck a new coinage) and from thence back to East Africa and Arabia. Crossing to Europe, the tour continues through the Crimea, Georgia, Persia, Afghanistan, Bukhara, an terminates in Chinese Turkestan.

Upwards of 900 coins struck during the last three centuries a illustrated, and the Arabic inscriptions carefully transliterated an explained. To assist in the classification of the coins, a geographic arrangement has been adopted, and six coloured maps have bee added to enable the reader to locate the various mints.

The interesting field covered by this work has never as yet bee dealt with, possibly on account of the great expense involved. has been suggested that this may be lessened by using the line blo process, and printing the major portion in manuscript form. Th author hopes that sufficient promises of support will be received t enable the book to be published at a price not exceeding 10/6 a copy and he trusts that numismatists generally will give the project hearty support.

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

ERYX.

Speculation as to the meaning of the names of ancient cities is often regarded as unprofitable, but it is to some minds a pleasure, interesting and suggestive. Here is an example: the name Eryx has not been explained, but by deriving ἔρυξ from ἐρύκω (fut. ἐρύξω) (I hold) we may regard the name as an ancient equivalent of our old English "hold", once used for castles or forts.

The Latin word for a fort, arx, from "arceo", belongs to the same root as ἐρύκω, being its Italian form. Varro defined an arx as "the most fortified place in the city and that which might most easily be defended from an enemy".

The name Eryx, if this derivation is allowed, points to the inhabitants of the city being Sikels or Lucanians or at any rate some S. Italian tribe, and not utter barbarians such as the Elymi are thought by some to have been.

The hill on which Eryx was built formed one of those many natural forts which successive tribes have occupied during many ages. Virgil evidently regarded it as one of those famous in history, for he compared Æneas to three mountains, Athos, Eryx and Apenninus (Bk XII, 701-3).

The summit on which the fort was built was over 2000 feet above sea-level and the extensive view over the sea was of importance to those interested in watching the fleets of the Carthaginians, whether as friends or foes. To the west the view includes the Ægean isles, to the south Cossyra may frequently be seen, and in clear winter weather the Cap Bon on the African coast may also be seen on the horizon. The precipitous slopes are in parts well wooded and in the spring the verdure around is most luxuriant.

Most people have heard of Eryx as the site of a celebrated temple of the Phoenician Astarte, first, and then of the Greek Aphrodite, and last of the Roman Venus, but from the coins of the archaic period it seems most probable that this eastern cult was introduced some time after 480 B.C. into Eryx. Some foundation stones of the temple of the goddess may still be seen in the castle precincts, and very ancient portions of the old wall of the arx may also be seen.

On the coins of the later periods this cult is clearly represented. Our attention must now be devoted to the elucidation of the coin-types of the period before the Phoenician settlement.

The name of the city was, as in many other instances, applied to an imaginary hero such as the Eryx of Virgil.

The importance of Eryx to the Romans of Virgil's time arose from the legend that the Julia gens was descended from Æneas, the son of Venus. The growth of the myth among the Romans has been related in the chapter on Segesta.

Virgil speaks of Eryx as a brother of Æneas; (Æn. V. 24 "Let us turn our course where she invites us, the trusty shores of your brother Eryx, and the Sicilian ports", and again (line 412) "These arms your brother Eryx formerly wore". The legend of Eryx is thus given by Diodorus Sic. (IV, 23). Hercules when he came to the lands of Eryx was challenged to fight by that king, who was the son of Venus, and a king of the country called Butas. For the prize of the combat Eryx offered his kingdom and Hercules his cows. Eryx was troubled at the suggestion, holding that his kingdom was worth more than the cows of Hercules, but that hero, having shewn him that if he lost his cows he lost also his immortality, Eryx accepted the conditions. However he was conquered, and lost his lands.

Hercules granted them to the natives, and allowed them to enjoy the fruits of the land until one of his descendants should come and reclaim possession, which came to pass when Doricus the Lacedemonian came to Sicily several generations after Heracles, and taking possession of the land founded Heracleia. That city prospered and aroused the envy of the Carthaginians who feared it might become more powerful than Carthage, and would destroy their supremacy. They therefore attacked the city with a large army, took it by assault and razed it.

The passages in Thucydides (VI, 2) and Strabo (XIII, 608) which mention the foundation of Eryx are given in the chapter on Segesta. Eryx however seems to have been of less importance than Segesta.

Mr. G. F. Hill in his *Coins of Ancient Sicily* says on p. 13: "The most primitive stratum in the population of the island was probably the race represented in historic times by the Elymians of Segesta, Eryx, Entella, and Halicyæ. We need not speculate on their nationality. Crowded into the western corner, they preserved their ancient tongue; but all that remains of it to us is contained in the inscriptions on their coins. Next in point of antiquity come the Sicans and Sicels."

Just as in New Zealand the oldest tribes were those who had been driven down to the south by more recent invaders, so it is probable these western tribes were of an older immigration, but where is the evidence of their being of another stock or race? The coins all tend to shew they also were of Pelasgian origin; their cult being that of Zeus, and their inscriptions all in Greek.

Mr. Freeman in his "Sicily" says (p. 27): "The work at Eryx is Carthaginian, but this applies to ruins now existing, and may not have been the work of the archaic period."

The earliest historical incident recorded about Eryx is the invasion of the Spartan Doricus, son of the king Anaxandrides. The story of his birth is told by Herodotus (V, 41, 42). He hastily left his native land, and went to Libya, from whence he was driven by the Carthaginians.

He then by the advice of Antichares set forth to Eryx, trusting to the legend that Heracles had left that city to be ruled by his descendant. Having consulted the Pythian oracle he set forth, and (about 510 B.C.) took part in the battle between the Crotonians and men of Sybaris. The story of his coming to Sicily, and his death, is given in the chapter on Selinus in the words of Herodotus.

ARCHAIC COINS OF ERYX.

The eagle has been explained as symbolizing victory, the capital on which it stands being regarded as the top of the column which marked the goal in the race-course. But Mr. G. F. Hill suggests "that it is equally possible that the capital is merely put by a kind of shorthand for a temple, and that the bird is here, as usual, the bird of Zeus".

We may note the worship of Zeus was also prominent in the city of Galaria, for its early litræ bear a figure of the god, and the legend **ΣΟΤΕΡ** (saviour).

The crab is said to point to the influence of Theron of Agrigentum, the father of Damarete, the wife of Gelon of Syracuse. Theron's city Agrigentum was very far from Eryx, about seventy-five miles to the south-east, and this type may be a notable witness to the extent of Theron's influence.

A crab forms the Rev. type of the bronze coins of the Bruttii (no XIII and no XV). The crab type also is found on coins of Terina, Croton and Cumæ (*Coins of Magna Graecia*, pp. 179, 215, 262, 268, 271).

Is it not possible that the crab on the coins of Eryx may have been merely a symbol of a seaport town, and adopted for similar reasons to those which caused the citizens of Terina and Cumæ to use the same type?

Adolf Holm considers that the crab denotes the influence of the city Akragas, and says it is very significant to find a Greek inscription on the money of a barbarian city.

Holm thinks the coins of Segesta were later than the earliest coins of Eryx, and that they began to be issued about 479 B.C.

These two cities seem to have been in some way connected, for we find the same puzzling letters **I I B** upon the coins of each city. The various explanations which have been made of these letters are given in the chapter on Segesta.

A head of Zeus appeared on the bronze coins, shewing that the cult of that god which was symbolized by the eagle on the earliest coins was still observed in the later times of the city.

It is noticeable that the earliest coins exhibit the symbol of Zeus, who was essentially a Hellenic deity, and therefore the Greek influence must have been considerable in the city, whatever may have been the origin of the native race which founded it.

If, however, the Elymi came from Italy and were Pelasgians, the cult of Zeus would have been known to them before the Greeks of Agrigentum began to influence their coinage.

The coin-types suggest that the temple of Aphrodite was founded later, and we should expect such a cult to have been introduced by the Carthaginians rather than by Greeks or Trojans. Unfortunately we have lost the book of Diodorus in which he recounted the story of the Carthaginian conquest, which (in book IV, c. XXIII) he promised to give, he said "but we will speak of all that in detail in a suitable time (p. 433 ed. F. Vogel of Greek text).

For those who read German the *Real Encyclopaedie der Classischen Altertums Wissenschaft* of Pauly-Wissowa will be well worth consulting (Band XI, p.606), ed. of 1907.

GALERIA or GALARIA.

The site of Galaria is said to be occupied by the village Gagliano, situated in a valley under the hill called Troina, the height of which is 3450 feet. It was famous in the middle ages as the scene of the victories of Roger de Hauteville, and his heroic wife Judith of Evroult.

Galeria was about twenty-two miles south of the North, and thirty-five from the East coast. It is said to have been founded by Morges, the Oenotrian king, who founded Morgantina, and most probably was originally one of the towns of the interior dependent on Agyrium, which was only a few miles distant on a hill to the south of Galaria.

It is strange that Diodorus Siculus does not tell us more of Galaria than he does, for he was born at Agyrium and knew the neigbourhood well.

As the city is not mentioned by Cicero, Pliny, or Ptolemy, it had probably ceased to exist in the period of the Roman dominion of the island. The only writer who mentions the early history of the place is Stephanus of Byzantium who tells us only of its foundation by the Sicel King Morges.

STEPHANOS OF BYZANTIUM.

In his περι πολεων και Δημων.

Γαλάρινα, πόλις σικλιας κτισμα μόργοῦ σικελοῦ, λεγεται και γαλαρια χωρα ὁ πολίτης, γαλαρινος, και γαλαρινη, και γαλαρινaίος (Galarina, a Sicel city founded by Morges the Sicel, the region also is called Galaria, the citizen Galarinos and Galariné, or Galarinaios).

The earliest event known to us connected with Galaria happened long after the period of the archaic coinage.

Diodorus Siculus (XVI, 67) relates that a thousand hoplites from Galeria were put to the sword by the Carthaginians in 345 B.C.

When we turn to the earliest coins of this city we may learn various facts which can only be learnt by their witness. For instance the citizens worshipped Zeus and his son Dionysus, for their images appear on the coins. The vineyards and wines of Galeria were probably famous in those days. Greek rather than Sicel influence may be inferred from the cult of Dionysus. From the hilltops round the valley in which the city was built the peak of Etna was in full view, and on the slopes of Etna we know the cult of Dionysus was established, as early as the period of these coins, among a people also belonging to the old races of the island.

THE NAME OF THE CITY.

On the coins we find the legend **CAΛA**. In some editions of Diodorus Siculus at is spelt γαλερία and in the French translation of that author by F. Hoefer it is spelt Galeria.

Perhaps the **A** on the coins may be the Dorian spelling for **E**. The Ionic dialect changed **A** into **E**. The Dorian influence was not far distant. Dr Pape in his "Wörterbuch gr. Eigennamen" suggests the name of this city was derived from a word meaning a fish, a strange idea in regard to an inland town. "Dorschenheim or Kabelgauen", Dorsch is a haddock, and Kabelgau a cod fish. Liddel and Scott give γαλεος as a kind of shark with marks like a polecat.

If we regard the **E** as = **A** a much more suitable derivation of the name may be suggested in the word γαλερος which Hesychius translates ἱλαρος. As we have the image of the hilarious god Dionysus on the coins, such a name as the cheerful city would be in harmony with the cult of the wine-god.

The word γαλερος is found meaning cheerful in Beckheri Anecdota (229) and the adverb is found in the Greek Anthology (P. XII, 50) where we read "let us drink cheerfully" "πίνομεν οὖν γαλερῶς".

The connection of the obverse type with the reverse is clear when we remember that Dionysus was regarded as the son of Zeus, a relationship often mentioned by Sophocles and Euripides.

The only other suggestion for a meaning of the name Galeria is the possibility of its being derived from a Sicilian word for a seer or prophet. Hesychius gives "Γαλεοι μάντεις οὕτοι κὰτα τῆν σικελίαν" Dionysus was the inspirer of such seers; and here again a reference to the type may be seen, but perhaps the former derivation from γαλερος is preferable.

MORGANTIA.

The little silver coins of Morgantia, bearing an aged male head on one side, and an ear of barley on the other, were issued by the Sicels, in the days when the Greek colonists had so far influenced them by their superior civilization that they began to issue silver money as well as the old bronze litræ of their rude forefathers. The name of their city is said to have been derived from that of an ancient king named Morges. There were three tribes of the Oenotrian race in Southern Italy, named it is said after three kings, Italus, Morges, and Sicel; the followers of this last became so important that their name was given to the tribes which invaded Sicily at first called Sicania, after the Iberian Sicanians, but when the Sicels prevailed the island was called after them Sicily.

The exact site of Morgantia has not been determined and the ancient authors do not agree in their accounts, but we may safely gather that it was situated on a hill overlooking the fertile plain

watered by the river Symœthus which flows into the sea about five miles south of Catania.

From a passage in Diodorus we may gather that the hill was about twenty miles east of Catania. He says (XIV, 95) that Mago the Carthaginian general "established his camp in the lands of the Agyrineans on the banks of the river Chrysas near to the road leading to Morgantia."

The same region is evidently described by Cicero (Verres, act II lib. III, 18). "The land of Herbita, of Enna, of Morgantia, of Assoria, of Imachara, of Agyrium was so deserted that we had to look not only for the allotments of land, but also for the body of the owners." Again Cicero (in XLIII) mentions Morgantia as wholly crushed and destroyed, with Assoria and the neighbouring cities.

In the Poem on the Punic wars by Silius Italicus Morgantia is mentioned with the epithet "frondosis" (XIV, 265) as not abstaining from the battle-field.

There is a passage however in Livy (XXIV, 27) which is inconsistent with all we can gather, as to the site of Morgantia, from all the other ancient authors. He says: "The Romans, with a fleet of a hundred ships, were then stationed at Murgantia waiting for the issue of the commotion raised at Syracuse by the death of the tyrants". The spelling Murgantia corresponds with the inscription **POPULUS MURGANTIVS** Orell 141. The spelling of the name of the city which issued the coins is with the letter **O** not **U**.

Strabo (VI, 256) thus reports the opinion of Antiochus as to the origin of the city Morgantia. "Antiochus asserts that anciently the whole of this district (Rhegium) was inhabited by Sicels and Morgetes, and that they afterwards passed into Sicily, when they were driven out by the Oenotrians. Some say that Morgantium thus received its name from the Morgetes."

Cluverius (Sic. Ant., lib. II, c.7) considered the site of Morgantia to have been "on the right bank of the river Giaretta, below its confluence with the Dattaino". The old name of the Dattaino is Chrysas.

THE SIKELS OR SICELS.

Thucydides (VI, 2). after relating the poetic fables of the earliest tribes inhabiting Sicily says: "The Sicanians appear to have been the first who settled in it after them..., and still even to this day they inhabit the western parts...

"The Sicels went over into Sicily from Italy (for it was there they used to live) while flying from some Opicans; crossing on rafts (as is probable and reported to have been the case) having watched for an opportunity for the passage when the wind set down the strait, or perhaps having sailed to it in some other way. Even to this day there are still Sicels in Italy, and it was in this way that the country was called Italy, after Ialus, a king of the Sicels who had that name. Having gone then to Sicily with a great host, and being victorious in battle over the Sicanians, they compelled them to remove to the southern and western parts of it, and caused the island to be called Sicily instead of Sicania, and occupied the best parts of the land, having held them, after they crossed over, nearly three hundred years before any Greeks came to Sicily; and still even to this day they retain the central and northern parts of the Island."

Diodorus (V, 6). Also speaks of the Sicanians as having been earlier in possession of Sicily than the Sicels, but he attributed their migration to the western part of the island to the succession of alarming eruptions of Mount Etna. "Several generations afterwards a colony of Sicels leaving Italy crossed the sea, and occupied the country abandoned by the Sicanians.". This seems to agree with the report of Dionysius (I, XXII). "Although the island was large there were not many inhabitants, but a large district was lying deserted and uncultivated. The Sicels therefore inhabited at first the western part and afterwards many other lands, and the name of the island was changed to Sicilia. The tribe of the Sicels left Italy according to Hellanicus Lesbius, three generations before the Trojan war in the twenty-sixth year of the priesthood of Alcyone at Argos."

SILVER COINS OF GALARIA. CIRCA 480 B.C.

Obols. Weight about 9.5 grains. Size ·45.

Obv. **ЯЕТОƷ**. Zeus Soter, draped, seated to left on throne, on which his left hand rests; in his outstretched right hand a long sceptre, its base resting on the ground, on the top an eagle with closed wings, to left: border of dots.

Rev. **CAAA**. Dionysos standing turned to left wearing long chiton, with chlamys over the left shoulder: in his right hand a kantharos: and in his left hand a bunch of grapes on a long stalk: plain border.

On p. 121 of Dr B. Head's, *Hist. num.*, these coins are attributed to before 480 B.C.

In p. 603 Adolf Holm's "Geschichte Siciliens" they are attributed to circa 461 B.C.

On p. 90 of G. F. Hill's "Coins of Ancient Sicily" they are attributed to early in the period "from Himera to the Assinarus" i. e. 480 to 413 B.C.

Philistus dates the emigration of the Sicels eighty years before the Trojan war and Thucydides, probably following Antiochus, 125 years after the same event. A good clear account of these cognate tribes Oenotrians, Chasnes, Morgetes, and Sikels is given by Grote (Pars II, chap. XXII, vol, III, p. 346). "That they seem to belong to the same ethnical kindred there seems fair reason to presume: and also that in point of language, manners, and character they were not very widely separated from the ruder branches of the Hellenic race."

The race which drove the Sikels out of Italy was that of the Opici or Oscans and Ausonians, a fierce warlike tribe once inhabiting the Apennines.

SILVER COINS OF MORGANTIA BEFORE 480 B.C?

As these small coins weigh only about 11 grains they are nearly the weight of the Obols of the Greek cities. The Sicilian litræ should weigh 13·5 grains.

In size these coins are about ·45 of an inch.

Obv. Aged male head, to right, bearded and bound with taenia: border of dots.

Rev. **ANITИ AƆЯOM**. An ear of barley.

The head on the Obverse may perhaps be that of Zeus, who we know was worshipped in the neighbouring city of Galeria.

On p. 603 of Adolf Holm's "Geschichte Siciliens" these coins are attributed to the period circa 461 B.C.

(*To be continued.*)

DI DUE MEDAGLIE.

Nella mia collezione di medaglie si trovano due che qui riproduco come quelle che riguardano il Trentino.

I

Il giorno 9 gennaio 1837 si celebrò solennemente nella cattedrale di Trento il matrimonio di Maria Teresa, figlia dell' arciduca Carlo d'Austria, che andò sposa a Ferdinando II, re delle due Sicilie, rimasto vedovo di Maria Cristina di Savoia.

In questa occasione fu coniata le seguente medaglia:

Dr. FERDINANDVS II ET MARIA THERESIA AVSTRIACA REGNI VTR·SIC·R·R. I busti accollati del re e della regina. Sotto i busti in lettere minuscole F·D'ANDREA F·

D·CICCARELLI M·P·

Rℒ. VETERI CONCORDIA NOVO SANGVINIS NEXV FIRMATA.

A sinistra V·CATENACCI INV.
Disotto D·CICCARELLI M P.

Vicino ad un piedestallo, sul quale stanno due colombi affrontati, e vi sono incisi i due stemmi d'Austria e Napoli sormontati da una corona, stà Imeneo in piedi, che tiene nella destra una palma e nella sinistra una fiaccola accesa che porge ad un amorino alato.

Oro, Argento, Rame, diametro 70 mm.

Per ricordare questo per loro lieto avvenimento si ridusse, si restaurò e si inaugurò il giorno 12 gennaio la vecchia porta di Santa Croce, che fu ribattezzata col nome di porta Maria Teresa, nome che non divenne però mai popolare, anzi oggi è affatto sconosciuto. Per conservare la memoria di tale inaugurazione fu redatto un verbale, esistente ora nella biblioteca civica di Trento, colle firme dei due coniugi e di altri alti personaggi.

II

Tra i figli illustri e benemeriti del nostro Trentino va ricordato Luigi Negrelli cavaliere di Moldelbe.

Nacque il giorno 23 gennaio 1799 a Primiero, borgata nel Trentino. Dopo avere assolto gli studi entrò a vent' anni come praticante presso la direzione provinciale delle costruzioni in Innsbruck. L'anno seguente sostenne brillantemente gli esami di stato, per cui gli furono affidate molte importanti costruzioni e progetti, come lo studio per evitare i danni delle inondazioni nella valle dell' Adige, la costruzione della strada dell' Arlberg. Nel 1823 fu incaricato di studiare la traccia ed il progetto della via da Toblach al confine d'Italia, e l'anno seguente la regolarizzazione del Reno nel principato di Liechtenstein. Per queste sue distinte prestazioni nel 1825 fu nominato aggiunto ingegnere circolare nel Vorarlberg.

Negrelli per la sua attività ed intelligenza entrò nelle buone grazie delle autorità svizzere, che nel 1832 gli offrirono la carica di ispettore delle strade e acque del cantone di San Gallo, un officio che accettò nell' autunno dello stesso anno.

La sua laboriosità ed accortezza nella nuova sede superò l'aspettativa, così che nessuno lavoro d'importanza si incominciò senza la sua cooperazione. A lui si devono le costruzioni di strade, di ponti, di tunnel, di regolarizzazioni di fiumi, di edifici scolastici ed altri fabbricati. Nel 1835 fu chiamato a Zurigo a dirigere l'ufficio edile col titolo di ingegnere superiore lasciando anche qui traccie del suo ingegno nella costruzione in marmo del grandioso ponte sulla Münster, che forma ancor oggi l'ornamento della città. L'inaugurazione del ponte seguì solennemente nell' agosto del 1838 alla presenza di quindici mila persone. Al Negrelli in quell' occasione fu presentata a titolo d'onore una medaglia d'oro, che riprodotta in rame fu poi distribuita largamente.

Porta la seguente inscrizione.

Dr. In sei linee DEM ERBAUER
DER
MÜNSTERBRÜCKE
LUDWIG NEGRELLI
DIE
STADT ZÜRICH

℞. Figura femminile seduta con corona murale sulla testa, appoggia la sinistra sullo scudo di Zurigo e tiene nella destra alzata una corona d'alloro in atto di coronare il ponte che è alla destra di essa, avanti i suoi piede in un cofano aperto si scorge il carduceo. All' esergo MDCCCXXXVIII, ai piedi della figura lungo la cornice in lettere minuscole F. ABERLI.

Oro e rame. Diametro 50 mm.

Negrelli per l'esecuzione di tante opere passava per la prima autorità del genere in tutta la Svizzera. Dal suo studio uscirono colossali lavori del doppio viadotto a Losanna, della regolarizzazione del Seyon di Neuchâtel, della costruzione del ponte sull' Aar a Stalden di Berna ed altre ancora che sarebbe lungo l'enumerare. Come presidente tecnico egli fece parte della commissione per la correzione del Lint.

Appena s'incominciò l'costruzione delle reti ferroviarie il nostro Negrelli dedicò tutto il suo talento allo sviluppo e al miglioramento delle linee ferrate. Viaggiò la Francia, l'Inghilterra e il Belgio, il frutto dei quali viaggi fu la pubblicazione di un' opuscolo (Zurigo 1838 e Vienna 1842) col quale combatteva l'opinione da altri sostenuta, che le ferrovie a vapore non fossero adatte a superare alture e lo dimostrò in fatto colla costruzione della prima ferrovia da Zurigo a Baden, che non del certo tutta sul piano.

Questa sua nuova teoria oltrepassò i confini e gli procurò nell' Austria parecchie e lusinghiere offerte d' impiego, tra le quali quella di ispettore generale della ferrovia nord imperatore Ferdinando, che egli accettò. Negrelli non perdette tempo, che anzi si mise all' opera e tracciò le linee Olmütz-Praga, Vienna-Stockerau ed altre minori che divennero tra non molto un fatto compiuto.

Allorchè nel 1842 sotto la direzione di Francesconi fu istituito la direzione per l'esercizio delle ferrovie di stato, Negrelli fu chiamato ad organizzare quel nuovo dicastero. Da questo suo nuovo ufficio

ebbero vita le ferrovie del nord della monarchia austriaca e la linea Lemberg-Brody.

Il governo del Württemberg affidò a lui l'onorifico incarico di progettare le linee ferrate di quel regno, e il sassone volle udire il suo parere prima di accingersi alla costruzione del viadotto di Goltschtal.

Nel 1848 fu fondato il ministero austriaco dei lavori pubblici. Negrelli fu chiamato a presiedere la sezione, ferrovie e telegrafi, di quel dicastero, donde ben presto dovette recarsi col titolo di commissario ministeriale al campo di Radetzky in Lombardia e nel Veneto per organizzare il servizio ferroviario disordinato in causa della guerra del 48; in poche settimane tutto fu ristabilito sotto la sua direzione. Premio di questa sua attività fu la nomina a presidente della direzione superiore di strade, acque, ferrovie e telegrafi del regno lombardo-veneto.

Enorme fu il lavoro della sua nuova carica, come la regolarizzazione dei fiumi Adige e Pò, la costruzione di strade, la diga meridionale di Malamocco, le ferrovie Vicenza—Verona—Bergamo, Verona—Bolzano, che sono opera del nostro Negrelli. Per tante così segnalate benemerenze gli fu conferito dall' imperatore Francesco Giuseppe I l'ordine della corona ferrea e la nobilità dell' impero col predicato di Moldelbe; l'Istituto Veneto di scienze lettere ed arti, l'Accademia veneta di belle arti in Venezia, le accademie di Verona, Udine, Pistoia e l'Ateneo in Bergamo lo iscrissero nell' albo dei loro soci.

Dopo sei anni di assiduo lavoro nel Lombardo-Veneto fu chiamato nel 1855 a Vienna al ministero del commercio e gli fu conferito il titolo di consigliere ministeriale e di ispettore generale delle ferrovie austriache.

Fu in questa nuova carica che maturò l'idea della congiunzione dei due oceani, il Mediterraneo e l'oceano Indiano, mediante un grandioso canale, il taglio dell' istmo di Suez.

Un canale era già esistito al tempo dei re faraoni ed ebbe il nome di canale dei quatro re. Nel 1508 Nicolò Conti, viaggiatore italiano, fece la proposta al senato veneto di restituire nel suo stato primiero il canale e Leibniz la ripetè più tardi nel 1671 a Luigi XIV, e l'inglese Toth nel 1768 al sultano Mustafa III. Il francese Vollney nei suoi viaggi in Egitto e in Siria aveva compreso l'immenso vantaggio per il commercio e le comunicazioni orientali che si sarebbe potuto trarre dall' apertura di questo canale e tendeva egli pure all' esecuzione del colossale lavoro.

Nel 1798 e 1799 Napoleone Bonaparte nella spedizione alle piramidi d'Egitto aveva lasciato l' incarico all'architetto Le Pere di elaborare a proposito un progetto. Questi trovò per disavventura un dislivello tra il Mediterraneo ed il Mar rosso di 9.908 m'un calcolo errato che fu fatale all'iniziativa di qualunque impresa.

Fu soltanto nel 1846 che si fondò a Parigi la Société d'Etudes du Canal de Suez, della quale fece parte l'inglese Stephenson, il francese Talabot e il nostro Negrelli, il quale aveva già espresso più volte la sua ferma convinzione, che non vi poteva esistere dislivello alcuno tra i due mari. Il Talabot invece aveva gia elaborato il suo progetto di canale tipo Le Pere, a dodici chiuse, che doveva essere alimentato dalle acque del Nilo, tutto contrario al parere di Negrelli. Per fare nuovi rilievi fu mandata sopraluogo una commissione a prendere accurate misurazioni, frutto delle quali si fu che il dislivello si ridusse a 18 centimetri. Il Negrelli riportò piena vittoria e fu accettato il suo progetto, cioè a canale diretto senza chiuse.

L'anno burrascoso del 1848, l'opposizione inglese e la guerra di Crimea rallentarono i progressi del grandioso progetto. Fu soltanto nel 1854 che il Lesseps, amico del vicere Said, compose una commissione internazionale di dieci ingegneri, della quale faceva pure parte il Negrelli e fu ripresentato il progetto ideato dal Negrelli, già reso noto nel giornale settimanale *Austria* (1856).

Il primo colpo di piccone per l'apertura dell' istmo fu dato dal Lesseps il giorno 25 aprile 1859. Il Negrelli non ebbe la sodisfazione di essere presente alla solenne festa del lavoro, essendo già morto a Vienna il giorno 1 ottobre 1858, sette mesi prima che si ponesse mano all' opera.

Così tutto l'onore e tutta la gloria d'un ingegno trentino che aveva ideato il canale di Suez, passò al Lesseps, che poi condusse a termine la difficile impresa.

Rovereto nel marzo 1911.

Q. Perini.

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-fifty-second article.

(*Continued from col. 12688.*)

SHEPPARD, BENJAMIN (*Brit.*). Contemporary Sculptor and Medallist, residing in London. At the Royal Academy exhibition, 1906, he had a Portrait-plaquette in silver of Miss Georgina A. Brackenbury, and in 1907, a Portrait-medal of Master Hugo Tyrrell.

SHEPPARD, OLIVER (*Brit.*). Contemporary Sculptor and Medallist, residing in London. He exhibited in 1907 at the Royal Academy a Portrait-medal in bronze of Sir Joseph Banks, K.C.B., and another in silver of Prof. E. Hallaran-Bennett, M. D.

SHERIFF (*Brit.*). A Liverpool Die-sinker of the early part of the nineteenth century. Among his productions I have seen descriptions of are: Newcastle-under-Lyme Penny Token, 1813; — Withymoor Penny Token, 1814; — Linnaeus medal (Liverpool Botanic Gardens), etc.

SHERWOOD, JOHN (*Brit.*). Bishop of Durham (1485-94); M. A. University College, Oxford, 1450; brought Greek authors from Italy; Edward IV's advocate at Rome; chancellor of Exeter, 1460; archdeacon of Richmond, 1465; prebendary of York, 1471; partisan of Richard III; went from Burgundy to Rome, where he died, 1494. Author of 'Liber de Ludo Arithmomachia' (1482).

He issued Pennies of Richard III. for Durham, with an S on King's breast, and others also of Henry VII.

SHIELLEC, TOBIAS *Vide* **SCHIELLE** or **SCHILLE** *supra*.

SHORE, GENERAL SIR JOHN (*Brit.*). 1751-1834. Governor-general of India, 1793-1798. He went to India in 1768, was created a baronet in 1792, and an Irish peer in 1798. His name occurs on the gold coin or medal *illustrated in* N.C. *vol.* IX *col.* 4395 and described fully by Mr. W. J. Webster.

This curious and interesting piece is in reality a "Nisar" or Presentation Coin struck at Moorshedabad for the retiring Governor-general Sir John Shore, Bart. (afterwards Lord Teignmouth) who vacated his high office in 1797. It is also assumed and perhaps with some reason to be a pattern piece for a suggested coinage of triple Muhrs, as its weight (576 grs.) is sufficiently close to that of three "old standard" Muhrs at 190 grs each, to justify this assumption.

However whether this coinage was intended or not, at any rate it was not carried into effect by Sir John Shore's successor in the Governor-generalship.

SHORTHOUSE, E. (*Brit.*). A well-known Collector of Coins and Tokens of the British and United States of North America series, whose name is mentioned in Montagu's *Copper Coins*, &c. as the originator of restrikes of the 10 Cent piece of Marrian and Gausby's decimal coinage.

Mr. Shorthouse has kindly given me the following information concerning the restrikes issued by him, in a letter dated 1. January 1909: "Showing a member or two of the British Association, then meeting in Birmingham, round the city, I made the acquaintance of a well-known, highly respected die-sinker, the late Mr. Joseph Moore, a portrait of whom is in our City Museum. Taken round his place he mentioned having submitted to our Government certain designs for the 1860 bronze coinage. I asked, if amongst the stacks of old dies in his warehouse, these dies could be sought for. They were eventually found, excepting one, with the head of Victoria, crowned.

Original from CORNELL UNIVERSITY

They were fairly clean, but a flaw from rust always serves to distinguish the restrikes from the originals, which were struck in 1860, and of which a few (5 or 6) are in my "reserve" coin collection. I took my solicitor, the late Mr. E. C. Newey, to see the 9 pieces struck in (1) silver, (2) bronze, (3) copper, unbronzed, and (4) white metal. We then saw the dies placed on a grinding stone and destroyed, and they were then placed with Messrs Spink. Nine specimens of each, to my knowledge, alone exist. I only have 5 or 6 in my reserve collection. A set of the white medal specimens I gave Messrs Spink at a sale at Messrs Sotheby's, also another I presented to Mr. J. Verity.

"The second of the only two cases of "discovered dies" I have ever had to do with or know anything whatever about was shortly after the above. This was the discovery of the rusted spoilt dies of the Marrian and Gausby's Decimal Coinage. The 10 Cent was the only die possible to be used. The rest were utterly ruined. Again Mr. E. C. Newey, the solicitor and I, saw nine each struck of these 10 Cents, but on a very thick blank, so that they are at once distinguished from the originals. We had nine each struck in (1) silver, (2) bronze, and (3) copper, as before".

SHROVE & CO (*Amer.*). Jewellers and Die-sinkers of San Francisco. Their name occurs on the reverse of a Portrait-medal of Dr Enno Saunder, of St. Louis (*Amer. Journ. Num.*, 1521).

SHULTS & CO (*Amer.*). Issuers of a Californian 5 Dollar piece, 1851; obv. Head; Rℒ. Eagle. This coin is not very uncommon.

S. I. *Vide* **SPAGNOLI, JACOBUS**. Mint-master and Engraver at Ferrara, 1654-1656.

S. I. *Vide* **SALOMON, JACOBSEN**. Mint-engraver at Copenhagen, 1800-1820.

S. I. F. P. (*Ital.*). Armand describes a Portrait-medal of Charles VIII. of France thus signed, with Rℒ. Horseman (after an equestrian statue of Marcus Aurelius); and he further states that a similar medal, in the Goethe collection at Weimar is signed: **OPVS. CORADINI. M.**, but has a Rℒ. belonging to a medal of Ercole I. d'Este, and representing a ring adorned with a diamond cut in a point. *Vide Armand*, I, p. 105; III, 33.

SIBELNIKOFF, IWAN (*Russ.*). Mint-master at St. Petersburg, 1796.

SIBER, GUSTAVE (*Swiss*). Contemporary Sculptor and Medallist, born at Küssnacht, near Zurich, on 22. November 1864. He is a pupil of Kissling, and studied also at Paris under Chapu. Some of his works of sculpture may be seen at the Musée Rath, at Geneva.

By him are also Portrait-medallions, one of which was exhibited at the Paris Salon in 1890.

SIBER or **SIEBER, JACOB** (*Swiss*). Chaser and Medallist, born at Morges, 16. July 1807, died at Lausanne, 7. January 1880. The family was of Prussian origin, but became naturalized Swiss in 1826.

Siber was apprenticed to his father, who was an armourer; his aptitude for drawing decided his parents to send him to Berne to be taught engraving on metal. In 1825 he went to Paris, when he was fortunate in obtaining employment with Roqueby, Engraver to King Charles X. He resided for two years in the French capital, and became an efficient craftsman, especially on the engraving of seals, stamps, reliefs for printing, etc.

Towards the end of his life he occupied himself also with sculpture.

At the Lausanne Exhibition of Arts and Industries 1839 he was awarded the silver medal, the dies for which were cut by him.

By Siber is a commemorative medal of the Conflagration at Glaris, 1861; also a Franc of Canton Vaud, issued as a Prize for rifle shooting and commemorating the Acceptance of the Constitution, 10. August 1845; — Choral Festival at Lausanne, 1842; — Vintners' Festival at Vevey, 1865; — School Prize of the College of Lausanne, undated; — Dissolution of the Sonderbund, 1847, and Adoption of the National Constitution, 1848; — 5 Francs of Chaux-de-Fonds, 1863 (Rℒ. by Ant. Bovy); issued as a Rifle shooting Prize; — Musical Festival held at Sitten, 1854; — Masonic Badge of the Lodge "Espérance et Cordialité", of Lausanne, 1822 (reissued in 1896); — Industrial Exhibition at Lausanne; — Prize medal of the Horticultural Society of Canton Vaud, etc.

Siber directed with success an evening class for modelling and sculpture at the Lausanne School of the Industrial and Commercial Society.

BIBLIOGRAPHY. — Dr C. Brun, *Schweizerisches Künstler-Lexikon.*

SIBILLE, Mme JULIETTE (*French*). Contemporary Sculptor and Medallist, born at Paris; pupil of Chapu, and E. Dubois. At the Salon, 1892, she exhibited a Portrait-medallion of Mlle E. M***, and in 1893, another of M. C C***.

SIBOT (*Germ.*). Moneyer at Donauwörth, 1333.

SIBREC, GÉRARD (*French*). Sculptor and Medallist of Lyons, *circ.* 1635-1643. None of his works are however known to exist.

SIC, SIGI (*Germ.*). Moneyer at Ratisbon 976-1004 (Grote, 321, VIII, 148. Dannenberg, I, 410-413. Sedlmaier, Pl. IV, 85, 86, 92).

SICH (*Austr.*) Engraver, by whom I have seen a Jubilee Badge of the Emperor Francis Joseph I., 1898.

SICHEL, ERNEST (*Brit.*). Contemporary Metal-chaser, residing in London, and by whom I have seen at the Royal Academy Exhibition, 1906, a silver panel or plaquette, entitled "The Shipbuilder".

SICHETTI. *Vide* **SIRLETTI, FRANCESCO**.

SICINIUS, Q. (*Rom.*). Moneyer at Rome, *circ.* B.C 49 in which year he was triumvir. One of his denarii bears his name in conjunction with that of the praetor, C. Coponius. *Vide* Babelon, *Monn. consul.*, II, p. 458.

SICK (*Germ.*). Founder of tin medals of Landshut, 1835.

SIEBERG (SEEBERG), GILLIS VON (*Germ.*). Elect. palatine Mint-master, 1598, domiciled at Frankenthal.

SIEBERT, BARTL (*Austr.*). Mint-engraver at Prague, 1626.

SIEGEL, HEINRICH. *Vide* **SIEGEL, H. C. A.**

SIEGEL, HEINRICH CHRISTIAN ANDREAS (*Germ.*). Mint-master at Sondershausen, 1763-64, and Harzgerode, 1767-96. His initials **H. C. A. S.** or also **H. S.** occur on his issues, as on Thalers, Gulden, 1764; $\frac{1}{3}$ Thalers 1763, '64; $\frac{1}{6}$ Thalers 1764; $\frac{1}{12}$ Thalers 1763, '64; $\frac{1}{24}$ Thalers 1763, '64 of Prince Christian Günther III. († 1794) of Schwarzburg-Sondershausen.

SIEGEL, JOHANN HEINRICH SIEGEL (*Germ.*). Mint-warden at Detmold, 1711, and Mint-master at Eisenach, 1716.

SIEGEL, JOHANN HEINRICH (*Germ.*). Mint-master at Harzgerode, 1744-1754. He signed **H. S.** or **I. H. S.**

SIEGERIST, JOHANNES (*Swiss*). Medallist, of Schaffhausen, born 22. September 1774; was residing at Leipzig about 1804.

SIEGLING (*Germ.*). Director of the Mint at Erfurt, 1801-1802.

SIEGMUND & CO. (*Dutch*). Engravers and Die-sinkers of Hamburg. Their name occurs on the obv. of a medal of the Hamburg Society for Prevention of Cruelty to Animals (in Boston collection).

SIEGWART (*Swiss*). Contemporary Sculptor of Lucerne, by whom are models for the "Médaille de maîtrise" of Swiss federal rifle competitions, which were not adopted.

SIEMENS, AUGUST LUDWIG (*Germ.*). Warden of the Mint at Berlin, 1741-1765. He signed: **ALS**.

SIEMSSEN, SIMON (*Germ.*). Watchmaker at Rostock, issued copper

currency: 28. October 1728, Witten to the value of 1000 Thalers; 29. April 1735, Pfennige for 300 Thalers; from 1737 to 1742 he was Master of the Mint there. *Vide* Ed. Grimm, *Münzen und Medaillen der Stadt Rostock*, 1904.

SIESS SÖHNE, JOSEF (*Austr.*). Jewellers in Vienna, who published in 1897 St. Hubert medals, and have employed Prof. Stephan Schwartz and other artists at various times to cut medal-dies for them.

SIEVERSEN, CASPAR (*Germ.*). Mint-master at Stralsund, 1636-1662. He signed: **C.S.**

SIEVERT, DANIEL (*Germ.*). Mint-master at Stettin, 1672-1681, and later at Colberg, 1684. His issues are usually signed: **D.S**

SIEVERT, DANIEL (*Germ.*). Mint-warden at Danzig, 1698-1734.

SIEVERT, HEINRICH (*Germ.*). Mint-master at Thorn, 1668-1671, and Königsberg in Prussia, 1674; he died in 1694. His name also occurs as **SYVERZ,** and **SIEBERTS**. The coins issued by him are usually signed: **H. S.**

SIEVERTS, HEINRICH *Vide* **SIEVERT.**

SIFRID (*Austr.*). Mint-master at Vienna, *circ.* 1287, 1288, 1300.

SIGEFRIDUS (*Germ.*). Moneyer at Worms, 1197. *Vide* Paul Joseph, *Münzen und Medaillen von Worms*, 1907.

SIGELO (*Germ.*). Moneyer at Worms, 1233.

SIGEL (*Germ.*). This Engraver's signature occurs on a Portrait-medal of Schiller.

SIGNARD, CLAUDE (*French*). Contemporary Sculptor and Medallist, born at Gray (Haute-Saône); pupil of C. Gautherin. At the Salon, 1890, she exhibited Portrait-medallions in bronze of M^me^ L*** and other persons.

SIGNORET-LEDIEU, M^me^ L. (*French*). Contemporary Sculptor, born at Nevers; pupil of Gautherin. She is the author of a number of Portrait-medallions: 1879. M^me^ Louise B***; — 1880. Portrait du petit Zezet; — 1891, M^me^ A. B***; — 1894. M. R***, etc. all of which are cast in bronze.

SIGNORETTI, ANTONIO (*Ital.*). Mint-master at Parma, 1559-1568. He signed: **A. S.**

SIGNORETTI, GIAN ANTONIO (*Ital.*). Mint-engraver at Reggio Emilia, *circ.* 1560, to whom have been attributed certain medals, signed **S**, but on insufficient evidence. These medals bear a strong analogy in style to the works of the medallist Ruspagiari (*q. v.*), and seem to indicate that their author was a pupil of the latter artist. Among these I may mention: Gabriele Lippi, uniface; diam.: 72 mill. (lead; 72 mill.); —Camilla Rugeri (a copy of Ruspagiari's

Camilla Rugeri.

medal; *illustrated*); — Giulia Pratoneri; 68 mill. (signed **S**); — Costanza Bocchi; diam.: 65 mill.; dated MDLX (signed **S.**); — Isabella Riario; diam.: 71 mill. (unsigned); — Unknown Female portrait; diam.: 68 mill. (signed **S**). Cf. Armand, III, 94, A. All these medals are uniface and similar in treatment.

In the *Gazette des Beaux-Arts*, 1892, t. II, p. 316 a **NICCOLO SIGNORETTI** is mentioned as Mint-engraver at Reggio, 1556-1602.

BILLIOGRAPHY. — A. Balletti, *Alfonso Ruspagiari e Gian Antonio Signoretti del secolo XVI*, Rassegna d'Arte, Marzo 1904. — I. B. Supino, *Il Medagliere Mediceo.* — Armand, *op. cit.*

SILBERSTEIN VON ARNHEIM, EDWARD HENRY (*Brit.*). Deputy-master of the Mint at Sydney, 1898-1906.

SILIPRANDI, GIUSEPPE (*Ital.*). Mint-engraver and Medallist at Parma, 1784-1787. His signature: **SILI** or **S**, and **S** occurs on coins of Ferdinando Borbone, duke of Parma (1785-1802): Doppia da tre, 1784 (*illustrated*); Doppia, 1784-86; Zecchini, 1784-85; ÆR. Scudi, ½ Scudi, 6 and 3 Lire, Lire and subsidiary currency of various dates, and also Patterns for coins.

Triple Doppia of Parma.

Scudo of 1784.

SILVA, CYPRIANO THOMAS PAES DE SOUZA E (*Portug.*). Entered on 14. April 1744 the Lisbon Mint, as pupil of the School of engraving, at the head of which was at the time a French medallist, Antoine Mengin. He gave up the art after a short time.

BIBLIOGRAPHY. — V. Aragão, *op. cit.*, I, 80.

SILVA, DOMINGOS JOSÉ DA (*Portug.*). Medallist of the end of the eighteenth century and early part of the nineteenth; he studied drawing and engraving first under his brother Simão Francisco dos Santos, and at the school of engraving of Arco do Cego (Lisbon). In 1804 he was working with Bartolozzi, the famous Florentine artist who was then domiciled in Lisbon. His speciality was line-engraving. On 6. March 1830 he was entrusted with the finishing of dies for a 7500 Reis piece, which his brother Simão Francisco dos Santos was prevented by death from completing. Thereupon he was appointed Engraver at a yearly salary of 240 Milreis, with the obligation of maintaining two assistant-engravers. Silva executed a number of dies for the coinage of D. Miguel (1828-1833), which shew a remarkable perfection in the design, and uncommon delicacy and fineness in the engraving. He resigned his office of Engraver at the Mint in 1833, and was named Professor of engraving at the Fine Arts Academy of Lisbon, in which city he died not many years later at a fairly advanced age.

study drawing and sculpture at the industrial classes ' Principe Real ' and ' Affonso Domingues '. In September 1900 he went to Paris and spent a year in that city. He then obtained a grant from his government to complete his studies at Geneva (Switzerland) and entered the classes of sculpture of the Ecole des Arts Industriels of that city, where he was rewarded with the Diploma of that Institute. Among his professors I may mention Georges Hantz and Charles Richard. From Geneva he returned to Paris, was admitted at the Ecole des Beaux Arts, in the workshop of the master, J. C. Chaplain. During this two years' stay in the French capital he won the first distinctions each year and the special recommendation of the famous Medallist. In 1906 he returned to Lisbon, and has since devoted himself to the medallic art.

Atala's funeral.
(*reduced*).

Most of the artist's productions are Portrait-medallions and Plaquettes, which not being in the market are little known. It is therefore difficult to compile a list of his works, but the medals reproduced here will give a good idea of his talent and versatility.

The portraits of M.A.F.S. de Salazar-Moscoso and his consort and that of M^lle Maria José Arroyo are fine examples of his workmanship.

M.A.F.S. de Salazar-Moscos.

To João da Silva and Simoès de Almeida Sobrinho belong the glory of having introduced into Portugal the modern art of the medal. They mark an epoch in the history of medallic art in Portugal.

Silva has been exhibiting at the Paris Salon annually since 1904, and he was granted in 1908 a Mention honorable for his plaquette, Les funérailles d'Atala.

Portrait of a Lady.

M^lle Maria José Arroyo.

His habitual signature is **JOAO DA SILVA**, or **J. DA SILVA** ; one of his portraits is however signed **SILVA**.

BIBLIOGRAPHY. — *Information kindly supplied by Senôr Dõn Arturo Lamas.*

SILVA, JOSÉ SERGIO DE CARVALHO E (*Portug.*). Contemporary Medallist and Engraver, born at Evora, 9. September 1856. He studied at the Lisbon Academy of Fine Arts from 1870 to 1873, and later worked for some time with his father, the ivory carver Francisco Ignacio das Neves e Silva. This particular branch of art not being any longer in much demand, he turned his attention to engraving steel-dies for decorations and took commissions from Joaquim Augusto da Costa. In 1886 he was admitted at the Lisbon Mint as student of medal-engraving. On the invitation of the famous French engraver Mouchon, who had recognized his ability, Silva accepted employment with him at Paris; but in 1898, the Portuguese engraver obtained a post at the Lisbon Mint.

Silva also worked for the Die-sinking establishment of Frederico Gaspar da Costa.

The artist's signature is usually **S. SILVA** or simply **SILVA**.

Among his medallic productions are : Military medal of Don Luis (one of the types); — Military medal of Don Carlos for services abroad; — Medal on the first Monument to D^r Sousa Martino ; — Championship medal of the *Faça Lisboa* (Lisbon Cup), unsigned; — Medal presented to Señor Don Grandella (unique), etc.

BIBLIOGRAPHY. — *Information kindly supplied by Señor Don Art. Lamas.*

SILVA, JOSÉ RODRIGUES DA (*Portug.*). Appointed Assistant-

Engraver at the Mint of Lisbon, 14, October 1724. On the 14. May following he was ordered to work under the direction of the French engraver Antoine Mengin, who was at the time Chief-engraver and Professor at the Lisbon Mint.

BIBLIOGRAPHY. — Aragão, *op. cit.*, I, p. 78.

SILVA, MANOEL JOSÉ DA (*Portug.*). Apprentice-engraver at the Lisbon Mint, from 23. December 1739 to 10. May 1747, at which date he changed office at the Mint.

BIBLIOGRAPHY. — Aragão, *op. cit.*, I, p. 79.

SILVA, MANOEL RODRIGUES DA (*Portug.*). Engraver at the Lisbon Mint, in the seventeenth century. D. Antonio Gaetano de Sousa in the fourth volume of his ' Historia Genealogica da Casa Real portugueza ' p. 421, says that he was the inventor of the graining on the edge of coins.

' The milling ' of the gold coins was ordered by decree of 9. August 1686 and of silver coins by that of 14. June 1688.

BIBLIOGRAPHY. — Aragão, *op. cit.*, I, p. 74.

SILVANUS. The inscription **SILVANI** occurs on a gem of the former Stosch collection, representing Mercury standing, wearing petasus, and holding purse and caduceus. Raspe, who describes this stone, calls it a good engraving and states that the inscription is perhaps the name of the Engraver.

SILVANUS, BERNARDO SER (*Ital.*). An official at the Mint of Rome, under Pope Julius II., to whom payments are recorded in the Archive documents, 1504, 1507, 1508. *Vide* Eug. Müntz, *L'Atelier monétaire de Rome*, 1884.

SILVESTRI, PIETRO (*Ital.*) Medallist of the first half of the eighteenth century, whose two best-known productions are the Portrait-medals of Cardinals Pietro Ottoboni, and Livio Odescalchi.

SIMCOX (*Brit.*). A Die-sinker of the early part of the nineteenth century, whose Counters in imitation of Spade Guineas and Half Guineas are well-known. Signed specimens of the Spade Guinea 1791 have come under my notice.

SIMIER, JEHAN (*French*). Silversmith of Nancy, who under René II., Duke of Lorraine, filled the office of Warden of the Mint at Nancy, *circ.* 1484.

SIMMONDS, ARMAND (*Belg.*). Sculptor and Medallist, of British origin, born at Verviers; pupil of Joseph Geefs. At the Paris Salon, 1894, he exhibited a Portrait-medal of M^me^ A. Simmonds, which is not without merit.

SIMMONS, ISAAC (*Brit.*). This Engraver's signature occurs on an early Victorian Temperance Badge, hall-marked, representing an Allegorical subject.

SIMOES (*sob.*), **JOSÉ SIMÕES DE ALMEIDA, SOBRINHO** (*Portug.*). Nephew of a distinguished sculptor of the same name, Sculptor

Medal of the Portuguese Society of Architects.

and Medallist, residing in Lisbon; born at Figueiro dos Vinhos, near Thomar, on 17. June 1880; entered the school of Fine Arts of Lisbon at the age of 12 years, when for eight years he was a pupil of his uncle and other teachers. He entered as apprentice-engraver

Prof. Miguel Bombarda.

the School of engraving at the Lisbon Mint in 1892. In 1904 he was sent to Paris by the Portuguese government, at the expense of Viscomte de Valmor's legacy. There he frequented the Académie Julien (Atelier Verlot) and studied sculpture and modelling.

In 1906 he returned to Lisbon to devote himself to sculpture and especially to the modelling of medals. He has, in conjunction with João da Silva, the merit of having introduced in Portugal the

Original from CORNELL UNIVERSITY

modern art of the medal. He is now officially employed at the Lisbon Mint, but undertakes also private commissions.

The artist signs **SIMÕES, SOB.** followed by the date of the productions. The medals reproduce show the merit of his talent.

Among his medallic productions the best known are : Memorial medal of Dr Sousa Martino, 1902 (signed : *Simões*); — Medal of the Society of Fine Arts of Lisbon. These two medals were executed before the artist's departure for Paris. Portrait-medal of Senor Don A. J. da Cunha, director of the Lisbon Mint, 1905; — Prof. Michle Bombarda, physician, organiser of the XV. International Congress of Physicians at Lisbon, 1906, killed during the insurrection of 1910;

Centenary of the Battle of Busaco, 1910.

(*illustrated*); — Medal of the Society of Portuguese Architects, 1907 (*illustrated*); — Portrait-medal of Teixeira Lopes, statuary, 1907 : — Prize Medal for the "Raid hippique national", 1908; — Commemoration of the Centenary of the Battle of Busaco, 1910 (*illustrated*).

BIBLIOGRAPHY. — *Information kindly supplied by Senor Don Arturo Lamas.*

SIMON (*French*). Seal-engraver at Maubeuge, 1326. He executed a tablet in lead for the tomb of King John, and is styled in official documents *Gravator sigillorum*.

SIMON DER MÜNZER (*Austr.*). Moneyer at Vienna, 1438.

SIMON mit der lahmen Hand (*Germ.*). A Goldsmith of Augsburg, in the first half of the sixteenth century. Bolzenthal suggests that he may have done medal work also.

SIMON ME FECIT (*Flem.*). Inscription on early Flemish coins. *Vide* H. Dannenberg, *Die ältesten Münzen der Grafen von Stade*, Zeitsch. für Num., 1886, p. 239.

SIMON, MEISTER (*Swiss*). Mint-master at Lucerne, 1517 (*Bull. suisse de numismatique*, IX, p. 4).

SIMON, ABRAHAM (*Brit.*). (1622?-1692?) Modeller in wax, and Medallist, born about 1622, brother of Thomas Simon, and one of the sons of Peter and Anne Simon. "He was educated" (says Mr. W. Wroth) "with a view to the church, but, being a skilful modeller in wax, he devoted himself to art. During a visit to Sweden he made portraits in wax of several eminent persons, and was given

Portrait of Abraham Simon, by Stuart.

a position at the court of Queen Christina, who employed him as her agent in procuring works of art, and presented him with a gold medal and chain. In his wax-model portrait of himself he appears wearing this decoration, and Horace Walpole said he was supposed to have been in love with the queen. He attended her on her visit to Louis XIII., and, on account of his odd appearance, was arrested as a suspicious person while trying to model the king from the gallery of the royal chapel. He subsequently worked for some time in Holland.

"He came to England in 1642 or later, and for several years was much employed in making medals and wax models of leading parliamentarians and others. He also made a large number of wax models (some now in the British Museum) for the portrait medals executed by his brother, Thomas Simon. His own medals are cast and chased, and are signed **A. S.** They are graceful and simple in treatment, but, being usually in low relief and of small module, seem occasionally deficient in vigour.

"After the Restoration, Simon modelled the portrait of Charles II. for the medal of the "Royal Oak" at the price of one hundred "broads". The Duke of York afterwards had his portrait done by him, but only proposed to pay him fifty 'broads'. Simon then took up the wax model, and in the duke's presence deliberately defaced it by squeezing it together. By this conduct he lost favour at court, and other sitters complained of his impatience when they offered any criticism of his work. In the later years of his life he seems to have received no further commissions, and he died in obscurity, and perhaps in poverty, about 1692. He was married, and had two daughters named Anne and Judith.

"Simon's portrait was painted by Sir Peter Lely and Sir Godfrey Kneller. Of Lely's portrait there is a mezzotint by Blooteling. There is, in the British Museum, a portrait in wax of Simon by himself, and from this original a chased medal was made by Stuart *circ.* 1750. Simon was a little man, 'of a primitive philosophic aspect', and always wore his hair and beard long. His eccentric dress excited derision in the street, but he was an excellent artist, and a man of the same independent character as Benedetto Pistrucci. Evelyn (*Diary*, 8. June 1653) calls him 'a virtuoso fantastical Simons (*sic*), who had the talent of embossing so to ye life'. (*Warwick Wroth, Dict. Nat. Biog.*, LII, p. 264).

Abraham Simon's principal Portrait-medals are the following : Earl of Loudoun, 1645 (*Med. Ill.*, I, $\frac{324}{157}$); — William Pope, 1645 (*Med. Ill.*, I, $\frac{324}{158}$); — Lord Inchiquin, 1646; (*Med. Ill.*, I, $\frac{324}{160}$). [Murrough O'Brien, Lord Inchiquin, commanded in Ireland for the King until 1643, when he joined the Parliament, and was afterwards President of the Province of Munster. At the end of 1646 he returned to the King's party. Lord Inchiquin's name is remembered in numismatics from the Inchiquin money, which was struck from plate, 1642, and which consists of Ⱥ Pistoles, and Ⱥ Half-Crowns, Shillings, Ninepences, Sixpences, Groats, and Threepences (*Vide* Vol. III, p. 26)]; — Albert Joachim, ambassador, 1646 (*Med. Ill.*, I, $\frac{324}{162}$); — Sir Sidenham Poyntz, 1646 (*Med. Ill.*, I, $\frac{325}{163}$); — Earl of

Dunfermline, 1646 (*Med. Ill.*, I, 328/168); — Earl of Lauderdale, 1646 (*Med. Ill.*, I, 328/169); — Martinay, 1647; ℞. IE NE VIS QV'A REGRET (*Med. Ill.*, 329/171); — Manteau van Dalem, 1647 (not in *Med. Ill.*; *illustrated*) [The Murdoch specimen, 1904, realized £. 44.10.0]; —

Earl of Loudoun, 1645.

Sir Charles Erskine, 1647 (*Med. Ill.*, 330/173); — Colonel Fleetwood, no date (*Med. Ill.*, I, 331/174); — Unknown Portrait, undated (*Med. Ill.*, I, 332/175); — John Cleypole, 1651 (*Med. Ill.*, I, 396/22); — Henry

Lord Inchiquin, 1646.

Cromwell, 1654 (*Med. Ill.*, I, 412/49); — Colonel Desborough, 1657 (only known from a later imitation); — Edward Montague, 1658 (*Med. Ill.*, I, 431/77); — Unknown Portrait, 1662 (*Med. Ill.*, I, 479/88);

Manteau van Dalem, 1647.

→ Queen Catherine, 1662 (*Med.Ill.*, I, 492/117); — Earl of Southampton, 1664; — Abraham Simon (only known from an imitation by Stuart); — Sir Edward Nicholas, † 1669 (only known from a later

Sir Sidenham Poyntz, 1646.

imitation); — Medal on the introduction of a Chimney Tax, offered to the Burgomasters of Leyden, 1666; *obv.* Alchemist seated at the fire side; ℞. ARGENTVM EX FVMO &c,, 56 mill. (*Van Loon*, II, 516).

As joint-works of Abraham (as modeller) and Thomas (as engraver and chaser) we may note the following: — Sir John Hotham, 1644 (only two specimens known) (*Med. Ill.*, I, 313/144); — John Thurloe, 1653; — Bulstrode Whitelock, 1653; — William Lenthall, 1653 (only known from a later chasing by Stuart); — Sir James Harrington, 1653; — Unknown Portrait, 1653 (*Med. Ill.*, I, 400/44); — Elizabeth Cleypole, 1658; — General Monk, 1660; — Earl of Clarendon, 1662; — Lady Lane, 1662, etc. All these

Sir John Hotham, 1644.

medals will be found mentioned again under Thomas Simon (*q. v.*).

"It is difficult" (says Miss Helen Farquhar) "to say exactly how much Thomas Simon was indebted to the eccentric and clever Abraham for the designs of some of his medals and coins; although the signature **T. S.** appears on pieces which may have been the joint work of the two brothers, this might be because of Thomas's official position; that either was capable of working alone is abundantly proved, but it is said that Abraham often made the original wax sketch, Thomas the finished portrait from it, Abraham excelling in portraiture, Thomas above all men in die-sinking, engraving, and chasing. We know that Abraham was in the habit of carrying in his pocket a small piece of wax-covered glass, and whenever a face struck his fancy, he hastily modelled a sketch." (*Portraiture of the Stuarts on the Royalist Badges*, Brit. Num. Journ., II, 285).

SIMON, DÉSIRÉ (*French*). Contemporary Sculptor and Medallist, born at Bar-le-Duc (Meuse); pupil of Claudius Marioton. He has exhibited at the Paris Salon: 1904. Bronze Plaquette of St. John the Baptist; — 1907. Æ. gilt Portrait-medal of Jean Dubois, etc.

SIMON, F. (*French*). Line-engraver and Die-sinker of the second half of the nineteenth century. He engraved the 'Bons' of the Société générale of 1, 2 and 5 Francs, issued on 18. November 1871.

(*To be continued.*)

A PRACTICAL SYSTEM OF CATALOGUING COINS & NUMISMATIC BIBLIOGRAPHY.

By A. H. COOPER-PRICHARD.

(*Continued from col. 12695.*)

10. SICILY & KINGDOM OF THE TWO SICILIES.

11. SPAIN: 11A. Catalonia. B. Valencia. C. Aragon. D. Navarre. E. Biscay (Basques provs.). F. Asturias. G. Galicia. H. Leon. J. Old Castile. C. New Castile. L. Murcia, M. Granada. N. Andalusia. NN. Cordova. P. Sevilla. Q. Estremadura. R. Minorca. S. Majorca. T. Iviza. U. Formentera.

NOTE. — Spain begins with her north-east coast on the Mediterranean because Italy, the islands which were grouped with her, and Sicily ended in the westerly direction of that sea. It is obvious, moreover, that the natural order in Spain determined a beginning with the most northerly province on that coast. From thence the direction swings from the northern border of Valencia through Aragon to Navarre and Biscay. Then, passing through Asturias and Galacia, it enters Leon, comprehends the Castiles and reaches Murcia. Descending to the southern coast, it takes in Granada Cordova, Andalusia and Sevilla and enters Estremadura, on the

Original from CORNELL UNIVERSITY

frontier of Portugal, the next country to be enumerated. The Balearic Islands are then added.

12. PORTUGAL.

13. FRANCE: 13A. Franche Comté. B. Burgundy. BB. Lyonnais. C. Dauphiné. D. Provence. E. Languedoc. F. Auvergne. FF. Bourbonnais. GG. Nivernais. G. Champagne. H. Lorraine. J. Alsace. K. Artois. L. Picardy. M. Isle de France. N. Orléannais. P. Berry. PP. Marche. QQ. Limousin. Q. Guyenne. R. Gascony. RR. Foix. S. Roussillon. SS. Saintonge. T. Angoumois. TT. Aunis. U. Poitou. V. Anjou. W. Maine. X. Brittany. Y. Normandy. Z. Anglo-Gallic Series. AA. Gaulish Series.

Note. — This series begins just north-west of Savoy (which province was classed in Italy), because Portugal is too remote for a connection, and one with Spain would necessitate the beginning of France with Gascony or Languedoc, which for historical reasons does not seem advisable. Civilization entered France from the Alps and, in the grouping of the division of Europe this is in the main a principle where it coincides with geography. From Franche Comté the direction passes southward through Burgundy and Lorraine converging to the south-east in Dauphiné and Provence; then, entering Lanquedoc, along the coast, and upwards into Auvergne, until, with a trend towards the north-east, it reaches Lorraine and Alsace (which later province may be omitted and transfered to Germany without affecting either series). Across the borders of Lorraine or Alsace it enters Artois in the north, from whence it descends through Picardy along the middle of France until it reaches Gascony, on the Spanish frontier. Here it pauses to take in the old states of Roussillon and Foix. From Gascony the route ascends the Atlantic coast, including the obsolete province of Auns on the way, and bending to the west for an instant to sweep in Brittany, until the series concludes with Normandy, both the historical and geographical link with the British Isles, the succeeding series.

14. BRITISH ISLES. 15. GREAT BRITAIN & IRELAND. 16. GREAT BRITAIN & ANCIENT BRITAIN.

17. ENGLAND. 17A. WESSEX: 17AA. Kent. AB. Sussex. AC. Surrey. AD. Hants. AE. Berks. AF. Dorset. AG. Wilts. AH. Somerset. AJ. Devon.

17B. EAST ANGLIA: 17BA. Middlessex. BB. Essex. BC. Suffolk. BD. Norfolk.

17C. MERCIA: 17CA. Hertford. CB. Bucks. CC. Bedford. CD. Cambridge. CE. Huntingdon. CF. Northampton. CG. Rutland. CH. Leicester. CJ. Lincoln. CK. Nottingham. CL. Derby. CM. Stafford. CN. Warwick. CP. Oxford. CQ. Gloucester. CR. Worcester. CS. Hereford. CT. Shrops. CU. Cheshire.

17D. NORTHUMBRIA: 17 DA: York. DB. Durham. DC. Northumberland. DD. Lancashire.

17E. CUMBRIA: 17 EA. Westmorland. EB. Cumberland. 17F. CORNWALL. 17G. Guernesey. 17H. Alderney. 17J. Jersey.

Note. Following the still convenient old Saxon divisions, we reach England with the civilization of the continent from the point where it is nearest to France, namely in the old kingdom of Wessex and in the modern county of Kent. We now follow the coast as far as Devonshire. We then take up the next historical and geographical division, that of East Anglia, from Middlesex to Norfolk. It may here be noted that the sign for London is 17 BAa. After E. Anglia, we take Mercia, the heart of England. Northumbria and Cumbria follow as a matter of course. We, then, include the outlying and ethnologically differentiated land of Cornwall and add the Channel Islands.

18. WALES: 18 AA. Deheubarth. 18 BB. Powys. 18 CC. Gwynedd.

18 A. Monmouth. B. Glamorgan. C. Brecknock. D. Carmarthen. E. Pembroke. F. Cardigan. G. Radnor. H. Montgomery. J. Merioneth. K. Flint. L. Denbigh. M. Carnarvon. N. Anglesea.

19. MAN. 20. SCOTLAND. 21. IRELAND.

Note. — This system is especially to be recommended in the classification of the Tokens of the British Isles.

22. NETHERLANDS (including Belgium). 22AA. Belgium. 22. BB. Netherlands. 22A. Prov. of Luxembourg. B. Liége. C. Namur. D. Hainaut. E. Brabant. F. Limbourg. G. Antwerp. H. Flanders. J. Dutch Limbourg. K. North Brabant. L. Zeeland. M. Holland. N. Utrecht. P. Gelderland. Q. Overyssel. R. Drenthe. S. Friesland. T. Groningen. Z. Gr. Duchy of Luxembourg.

Note. — From the British Isles, Belgium is the next country in geographical order, but its history and historical geography is so involved with that of the northern Netherlands that it has been thought advisable to class the two divisions as one whole, at the same time providing signs for separate classification, in cases where it may be desired. The classification moves from south to north and ends with Groningen, on the north-western German frontier. To this is added the Grand Duchy of Luxembourg.

23. GERMANY. 24. Oldenburg. 25. Bremen. 26. Hanover. 27. Westphalia. 28. Rhineland. 29. Palatinate. 29 A. Birkenfeld. 30. German Lorraine. 31. Germ. Alsace. 32. Swabia. 33. Franconia. 34. Baden. 35. Wurtemberg. 36. Hohenzollern. 37. Hesse. 38. Hessen-Darmstadt. 38 A. Frankfurt a./M. 39. Hessen-Nassau. 40. Waldeck. 41. Lippe. 42. Brunswick. 43. Saxony. 44. Anhalt. 45. Aschersleben. 47. Sangerhausen. 48. Sondershausen. 49. Erfurt. 50. Weimar. 51. Gotha. 52. Schwarzburg. 53. Meiningen. 54. Coberg. 55. Baveria. 56. Thuringia. 57. Kdm. Saxony. 58. Reuss. 59. Altenburg. 60. Liegnitz. 61. Breslau. 62. Oppeln. 63. Posen. 63A. Lusatia. 64. Bomberg. 65. Marienwerder. 66. Königsberg. 67. Gumbinnen. 68. Werder. 69. Danzig. 70. Koslin. 71. Stetten. 72. Pomerania. 72A. Rugen. 73. Stralsund. 74. Neu Strelitz. 75. Prussia. 76. Brandenburg. 77. Magdeburg. 78. Haviland. 79. Mecklenburg. 80. Altmark. 81. Brunswick-Luneburg. 82. Luneburg. 83. Lauenburg. 84. Hamburg. 85. Lübeck.

Note. — From Groningen, the last of the Netherlands, we cross a strip of Hanover, too small to catalogue, and enter Germany on the North Sea (upon which Groningen also is, at an inconsiderable distance) in the state of Oldenburg. From thence we skirt the frontiers of the Low Countries and France, along the course of the Rhine, until our southward route is turned by the course of the Rhine in an easterly direction. From Bavaria we pass upwards into Thuringia and, then, skirting the Austrian frontier through the Kingdom of Saxony, we continue our eastward course through Silesian Prussia to the frontiers of Poland. We now follow the eastern frontier as far as Konigsberg and Gumbinnen. From the extreme east we start in a westwardly direction along the Baltic. From Rugen and Stralsund, the highest points on the Baltic, we return inland to incorporate a number of central states as far as Brunswick. Brunswick-Luneburg leads us northward again as far as the frontiers of Holstein. It is confessed that Germany is the weak spot in this system on account of the eternal geographical changes throughout German history. The present arrangement is therefore only to be regarded as a first attempt in the required direction, which it is to be hoped others will further extend. On account of their multiplicity numbers, instead of letters, have been used in this instance.

101. SCHLESWIG-HOLSTEIN. A. Holstein. B. Schleswig.

102. DENMARK. 103. SWEDEN. 104. NORWAY.

105. SCANDINAVIA. 106. ICELAND. 107. SWITZERLAND. 107A. Geneva. B. Vaud. C. Neuchatel. D. Fribourg. E. Bern. F. Solothurn. G. Basel. H. Aargau. J. Schaffhausen. K. Thurgau. L. St. Gallen. M. Appenzell. N. Zürich. P. Zug. Q. Luzern. R. Unterwalden. S. Schwytz. T. Glarus. U. Uri. V. Valais. W. Ticino. Z. Grissons.

Note. — From the north-east of Germany we enter Schleswig-Holstein and, from thence into Scandinavia, crossing the seas to take in Iceland and then returning to take up what we left of the heart of Europe. We enter Switzerland by her south-west corner and move in a north-easterly direction until the highest point is reached in Schaffhausen. From thence we return across the country towards the south-west. From Valais we start again to the east in order to comprehend the three remaining cantons.

108. AUSTRIA. 108A. Tyrol. B. Istria (Littoralle). C. Fiume. D. Carniola. E. Carinthia. F. Styria. G. Salzburg. H. Archduchy of Austria (HA Upper Austria. HB. Lower Austria). J. Bohemia. K. Moravia. L. Silesia. M. Galicia. N. Bukowina. Z. Dalmatia.

Original from CORNELL UNIVERSITY

NOTE. — From Switzerland we enter Austria through the Tyrol, passing down the coast into Istria and Fiume and returning northward by Carniola. In this direction Bohemia is reached, when we turn away to the east, ultimately reaching Galicia. Dalmatia, on the Adriatic with its very different history is then added.

109. HUNGARY. 110. TRANSSYLVANIA. 111. MOLDAVIA. 112. ROUMANIA. 113. BULGARIA. 114. SERVIA. 115. BOSNIA. 116. HERZEGOVINA. 117. MONTENEGRO.

NOTE. — From Galicia we enter Hungary and, passing through Transsylvania and Moldavia in the east, we wend southerly through Roumania and Bulgaria and then, turn westerly through Servia into Bosnia, from whence we take a southward trend into Montenegro.

118. POLAND. 119. RUSSIA. 119A. West Russia (119AA. Poland). B. Baltic Provs. C. FINLAND. D. Great Russia. E. Little Russia. F. South Russia. G. Crimea. H. Prov. of the Don Cossacks. J. East Russia. W. CAUCASIA. Z. TRANSCAUCASIA.

NOTE. — We now return to take up the remaining countries of Europe, Poland and Russia. From Poland we enter West Russia and pass through the Baltic provinces into Finland. We then descend through Great, Little and South Russia until we reach the Crimea, after which we pass eastward across the province of the Don Cossacks into East Russia, from thence descending into Caucasia and leaving Europe by Transcaucasia.

Azores.

NOTE TO ASIA. — We enter Asia by Turkey, a country, which, in either continent, is to be regarded as Asiatic. From the Turkish possessions of Syria and Palestine, we enter Arabia and pass eastward through Persia, Afghanistan and Baluchistan into India, entering that country by way of Khelat. We then advance northward through British Baluchistan and the North-West Province into Kashmir. We now descend into the Punjab, passing eastward from thence to Nepal and Bhutan, and down into Bengal. From Bengal we return north-westward through Agra and Oudh and, then, pass directly westward through Rajputana to Sindh, from whence we descend into the Hindu Cutch and Gujarat and return east through Baroda to Central India. Finding our way to Orissa, almost on the east coast, we return through the Central Provinces to Berar and Kandy and enter the Bombay presidency, from whence we cross India through Haidarabad into the Madras presidency on the other side. We now descend the Carnatic, strike into Mysore and reach the limits of India in Travancore, opposite Ceylon, which we include.

We now return to take up the rest of the East Indies in Assam. From thence we pass into Burmah, descending into the peninsula of Pegu and into its extension in Tennasserim. From Tennasserim we pass into Siam, from thence into Annam and then cross the sea into the Malay Peninsula. Our sails are now set for Japan, from which island we pass over to Korea, now called Chosen and from thence enter the Chinese Empire, passing from Manchuria through Mongolia to China and then striking eastward through Tibet into Turkestan and from thence into the Russian Empire.

NOTE TO AFRICA. — We begin our tour of Africa with Morocco in the north-west, passing thence into Algeria and Tripoli and descend southward through Egypt until the Cape is reached, taking Madagascar with its neighbouring islands on route. From the Cape we begin our ascent of the west coast, including the Congo State on the way, until Senegal is reached, when the Cape Verde Islands are added. Tiris, on the borders of Morocco, is next taken and the Canary, Madeira and Azore Islands are included.

NOTE. — Our travels in the New World commence with Greenland. We then add Alaska and return to the Atlantic to begin our regular route. This commences with Newfoundland, from whence we pass on a tour of the maritime provinces of Canada, in which we include the coin issues of the Magdalen Islands. From New Brunswick we enter Lower Canada, passing thence into Upper Canada. We now cross James Bay to the Ungava Peninsula and return across Hudson Bay to Keewatin. From thence we proceed south into Manitoba, then west into Assiniboia, then northward into Saskatchewan. We swerve now to the westward and enter

Original from CORNELL UNIVERSITY

Alberta, then northward into Athabasca, then east into British Columbia; then northward, again, into the Yukon, and now easterly through Mackenzie until the northern islands are reached.

The United States we begin with New England, proceeding thence through the middle Atlantic states into the area of the Confederacy and Florida. We now return to pick up the thread in Kentucky, starting south-west until Louisiana is reached and then continue down the Gulf into Texas. From thence we go due north until Kansas is reached, swerving then eastward into Missouri and going in that direction as far as Indiana, then upwards into Michigan, then west until the Dakotas are reached, when our route takes a south-westerly direction ending in New Mexico. Again we start westward into Arizona, then northward into Utah, then west again, across Nevada into California. We now proceed up the Pacific coast as far as Washington, returning by Idaho and Montana and, then, south into Wyoming.

Mexico follows the United States and, then, Central America, from whence we take ship to Cuba; visit Hayti, Jamaica and Porto Rico on our way to the Lesser Antilles and Trinidad, and then return to the Bahamas and include Bermuda. From the West Indies we reach the South American coast at Cayenne and passing through the Guianas and Venezuela, we reach the Pacific in Colombia. We then pass southwards into Ecuador and Peru, swerving now to the east so as to enter Bolivia and the Brazils. From thence we descend into Paraguay and Uruguay and pass into Argentine, reaching the Pacific, again in Chili, after taking in the barbarous land of Patagonia and, finally, end with the Falkland Islands.

New South Wales. 523. Queensland. 524. South Australia. 525. North A. 526. Western Australia.

NOTE. — Oceania is begun with Sumatra at the end of the Malay Peninsula, where we left the East Indies. Sailing eastward, Java and the Flores are reached, from whence we pass northward into Celebes and, then, westward to Borneo; then, north to the Philippines; then eastward to the Ladrones; then south, again, to the Caroline Islands; and then back nearly to Celebes to take in the Moluccas. We now pass over to New Guinea and then strike out for the Bismarck Archipelago, from whence we sail south-east as far as New Zealand. We now pass over into Australia by way of Tasmania into Victoria; then northward into Queensland; then, into South Australia, including her territory to the north; and, finally, conclude the with Western Australia.

LEAVES FROM MY NOTE BOOK

In 1811 a contributor to the Royal Military Chronicle, who signs himself G.Z. complains of the limited issue of gold medals to officers and none to those below the rank of Lieut.-Colonel; he also says " Our Army I must say, is the only one, where you never " see a private soldier with the smallest badge of distinction for " personal courage — a badge speaking to the eye of his comrades, " his martial worthiness and good conduct. Let us only look back " at the example set us by the Ottoman Court. After the battle of " Alexandria, every Captain of the British Army then in Egypt " was presented with a gold medal and riband; and the superior " officers, according to their respective ranks, were honoured " with higher marks of approbation ". It will be observed that no mention is made of silver medals having been issued by the Sultan, and apparently the writer in the Chronicle had not met with any of the non-commissioned officers wearing them. One of the silver medals was in the Day sale (lot No 17) and if genuine is extremely rare, but neither Nicholas, Carlisle, Carter nor Tancred make any mention of them and it is only of late years they have turned up. Tancred states that an English die was made, which I believe was for the smallest gold medals, as I have only met with them in that size, it being the same size as the silver ones in question.

Is it possible that the dies have got into the hands of the same *gentleman or gentlemen* who have of late years been disposing of restrikes of the Bolton's Trafalgar, Seringapatam, and other rare medals?

C. W.

NUMISMATIC SOCIETIES, MUSEUMS &c

ROYAL NUMISMATIC SOCIETY.

March 16th. — Mr. H. A. Grueber. Vice-President in the Chair. Mr. Felix W. Warre was elected a Fellow of the Society.

Mr. F. A. Walters exhibited a series of groats illustrating his paper, containing a number of unpublished varieties, and the Rev. Edgar Rogers showed four tetradrachms of the Second revolt of the Jews bearing the name of Simon, restruck on tetradrachms of Antioch.

Mr. F. A. Walters read a paper on the " Stamford Find and Supplementary Notes on the Coinage of Henry VI". The hoard of about 3000 late Plantagenet groats, known as the Stamford Find, was discovered on October 22nd, 1866, by a labourer named Richard Christian, while making a drain near St. George's Church, Stamford. The coins being treasure trove were sent to the Treasury and thence to the British Museum for examination. 188 specimens were purchased by the Museum and Mr. Vaux, the Keeper of Coins made a further selection of 76 which were given by the Treasury to the Stamford Institute; the remainder, with the exception of a hundred sent to a local gentleman, Mr. Paradise, for distribution as mementoes of the find, were on sale at the Treasury till 1880, when the coins still remaining, some 2500, were purchased by a London coin-dealer. No detailed account of the find was compiled at the time and its great importance does not seem to have been realised. Mr. Walters has however been able to trace the majority of the coins and to give a practically complete account of it. The great majority of the coins, probably 90 °/₀ were common Calais groats of Henry VI. There were some groats of Edward III of London and York, two of Richard II, all much worn, and at least two of Henry IV, one of which has the Roman N in London. There were a certain number of Henry V, but the great mass of the hoard consisted of the later groats of Henry VI, and heavy groats of Edward IV, in almost mint condition. The presence of a few light groats of Edward IV, with the rose mint-mark gives a clue to the burial of the hoard, which must have taken place soon after the issue of the light coinage of Edward IV, the indenture for which is dated from Stamford on August 13, 1464. Mr. Walters proceeded to draw attention to a number of the more important coins in the hoard and to supplement his account of the silver coinage of Henry VI. (*Num. Chron.*, 1902, pp. 224-266). The find contained a number of new varieties of the " rosette-mascle " coinage and some interesting mules of the " pine-cone " coinage. Mr. Walters pointed out that the name 'pine-cone trefoil' applied to the next coinage, is erroneous, as the object called a pine-cone' is clearly a leaf and therefore proposed to call it the 'rose-leaf trefoil' coinage. Of this there were many new varieties in the Stamford hoard, including some of Calais of the latest issue. The next coinage, which ought more properly to be called the 'leaf and pellet' coinage, was represented by some previously unknown varieties. The 'cross and pellet' coinage was well represented in the hoard which also contained

Original from CORNELL UNIVERSITY

specimens of the latest issue of Henry VI with the fleur-de-lys on the king's neck, almost unknown previously. A numb.r of varieties of the heavy groats of Edward IV were also in the find. In conclusion, as a result of researches at the Record Office, Mr. Walters gave the accounts of the various mints during the reign of Henry VI, the latest available record for the Calais mint being in 1439-40.

BRITISH NUMISMATIC.

March 22. — Mr. P. W. P Carlyon-Britton, President, in the chair.

Mr. Lawrence read a paper upon a hoard of 136 groats said to have been found in Norfolk many years ago. Their period of issue comprised about 70 years, and was represented by 1 specimen of Henry V., 2 of the heavy coinage of Henry VI., 2 of his light issues, 126 of Edward IV., and 5 of Richard III. Although every English provincial mint was in evidence, a Waterford groat of Edward IV. was the only visitant. The London mint-marks, with the exception of the trefoil, were represented as a complete series. Referring to the question of the mint-mark current at the date of Henry VI.'s restoration n 1470, Mr. Lawrence, in agreement with Mr. Fox, inferred that it must have been the short-cross-pierced, and in support of this mentioned Henry's gold angel with that mark, which he urged was reproduced from the current angel of his rival.

Mr. Henry Symonds read a short paper on the mint of Aberystwyth under Charles I., based upon a contemporary manuscript in the Harleian Collection. He traced the operations from their commencement in 1638 for about ten years, during which the mint was intermittently working; and quoted the amount of money that was struck there. The coining of Welsh silver ceased in 1648, when the dies were removed to an unknown destination, apparently for safe custody on account of political troubles. Amongst many interesting items was a memorandum that from the commencement of the mint to the 10th day of July, 1641, the *open book* was the mint-mark.

Mr. Alfred Chitty contributed the first portion of his treatise on 'The Token Coinage of Australia', which comprised New South Wales and Victoria. The author described in detail the various issues of the traders, and was able to add numerous varieties to the lists previously published.

Exhibitions. — Mr. Carlyon-Britton, penny of Henry II., Hawkins 285, of the Norwich mint, originally issued by the moneyer Ricard, but restruck from the dies of the moneyer Picot of the same type, but with obverse and reverse transposed; Col. H. W. Morrieson, light groat of Henry VI. of Bristol with mint-marks, on obverse a trefoil, on reverse a cross; Mr. A. H. Baldwin, a heavy groat of Edward IV., mint-mark lis, from a die on which the king's name had been altered from that of Henry VI.; Mr. C. P. Hyman and Mr. H. W. Taffs, a series including unrecorded varieties of the Australian currency; Mr. F. Willson Yeates, the two-quart piece of R. Keeling for Gibraltar; and Mr. Henry Garside, the proof half-crown of 1823, first type.

SOCIÉTE FRANÇAISE DE NUMISMATIQUE.

Séance du 4 février.

M. Bordeaux présente à la Société de Numismatique les nouvelles monnaies turques en nickel pur, un petit bronze de Dioclétien avec la contremarque d'un sultan du XVIIIe siècle, et d'autres contremarques ottomanes récentes. Il communique enfin le texte de l'arrêt du conseil du roi appurant les comptes de fabrication des monnaies obsidionales émises à Lille en 1708 par le maréchal de Boufflers.

M. Collombier communique une maille de Philippe VI, du type figuré par Hoffmann sous le n° 54, mais avec le différent monétaire A au lieu de P.

Le commandant Babut présente la médaille frappée en souvenir du passage des Alpes en aéroplane par l'aviateur Chavez, le 23 septembre 1910. Il y est représenté franchissant le col du Simplon.

Le colonel Allotte de la Fuye fait ensuite circuler une curieuse tablette chaldéenne provenant d'une découverte récente et donnant la comptabilité d'un troupeau domanial.

M. A. Blanchet, revenant sur une communication faite dans la séance de janvier sur un méreau concernant un « voyage pour la monnaie » pour La Rochelle, lit deux lettres relatives à des transports effectués pour cette monnaie en 1739.

SOCIETY OF ANTIQUARIES.

A paper on the exploration of a Late Celtic and Romano-British cave-dwelling at Wookey Hole, Somerset, by Mr. H. E. Balch and Mr. R. D. R. Troup, was read before the meeting of the Society of Antiquaries at Burlington House, Thursday, 23rd March.

The report stated that it had been demonstrated that the entrance gallery of the great cave of Wookey Hole (through which flows the subterranean River Axe, and which is removed only by the width of the ravine from the Hyaena Den, explored by Professor Boyd Dawkins 50 years ago) was in use as a cave-dwelling for an extended period before and during the Roman occupation. The removal of an insignificant deposit of superficial material disclosed floor refuse of Roman age, which has been found to extend to an average depth of 6in., and to contain all the usual types of pottery, pins, needles, articles of bone and bronze, human remains, and coins ranging from Vespasian to Valentinian II. Some 80 coins are included in the list, and they cover practically the whole period.

Below this, and definitely separated from it by a marked change in the character of the material, is an important deposit in which is to be found no trace of Roman influence, save that one silver coin of the Marcia gens, 124-103 B.C., occurred near the top. Throughout the whole depth of the excavation relics of the domestic life of the cave inhabitants have occurred, exhibiting decorative art in pottery and in bone. Here also occurred a silver earring accompanying the left frontal bone of a girl, which, the only trace of this skeleton, lay in the ash of a fire; an ornament of bronze leaves, a bronze chain, and a bronze penannular brooch. Similar brooches in iron occurred in the upper deposits. A very large series of iron articles were found. A vessel of curious interest is represented by fragments of an urn bearing inpricked markings in definite groups, which, from their regularity and consistent repetition, appear to be an inscription in some characters akin to Ogam. Bowls of wood, together with a spade of the same material, occurred in the rubbish of a goat's stable.

Charred grain and pulse, together with burnt acorns, throw light upon the limited agriculture of the period, and these have been examined by Mr. Clement Reid, of Jermyn-street. The bird remains have been examined and reported upon by Mr. E. T. Reid, late of Jermyn-street. Remains of domestic and wild animals have been found, as also marine and land molluscs. The human remains present a problem, and it is practically certain that the persistent occurrence of these along with waste food bones indicates annibalism. The work is not yet completed.

OBITUARY

MR. ARTHUR SKINNER.

We regret to announce the death of Mr. A. B. Skinner, F.S.A., at one time Art Director of the Victoria and Albert Museum, and lately Keeper in the Department of Italian Renaissance Sculpture. Although he was only in his fiftieth year he knew more of the Museum's history, the provenance of its innumerable art objects and, we may add, the variety of the labels which had at succeeding periods been placed upon them, than any living man. He entered

the Museum as a Junior Assistant in 1879, and had as a fellow-worker Mr. Whitworth Wallis, the present Keeper of the Birmingham Corporation Art Gallery.

Mr. Skinner's zeal as Assistant Director under Sir Caspar Purdon Clarke, whom he succeeded in 1905, was indefatigable, and it would be difficult to recall the name of any other Civil Servant who remained on duty at his post so many hours a week or worked more pertinaciously. He had a highly developed sense of detail, and was ever anxious to supervise the execution of the various alterations and improvements which he initiated, so far as his authority permitted, but he was occasionally apt to lose sight of some of the wider issues that from time to time presented themselves.

It was generally anticipated that he would remain Director of the Museum until his retirement in the ordinary course, but, when it was largely reorganized and extensive building operations were undertaken some three years ago, Mr. Skinner seems to have offered no opposition to being superseded and relegated to the position of Keeper of Italian Renaissance Sculpture.

He was, like Mr. J. H. Fitz Henry, one of the most intimate friends of the late George Salting, who visited the Museum regularly one or two afternoons a week. He gave much care to the grouping and systematic classification, so far as the limited space permitted, of the various works of art which Mr. George Salting had for many years lent, and rather more than a year ago bequeathed to the Museum, and which will, we understand, shortly, be exhibited in the favourables circumstances that the new buildings have rendered possible.

L.-O. ROTY.

Le maître graveur L.-O. Roty est mort jeudi le 23 mars, à Paris, où il était né le 12 juin 1846. Depuis longtemps, déjà, un mal impitoyable l'avait terrassé, lui retirant la force et la joie de produire; il s'éteignait dans une agonie prolongée, et la mort fut pour lui une véritable délivrance.

Élève d'Augustin Dumont et de Ponscarme à l'École des Beaux-arts, grand prix de Rome en 1875, Roty n'avait pas attendu cette date pour exposer aux Salons; mais ce fut seulement à son retour d'Italie qu'il donna les médailles et les plaquettes qui devaient lui valoir une si rapide et si juste célébrité. La liste de ces chefs-d'œuvres de la médaille française serait trop longue à dresser ici, dans cette rapide esquisse biographique; au surplus, tout le monde les connaît, car beaucoup ont eu la fortune de devenir populaires: tels sont, par exemple, l'*Immortalité* (au revers de la médaille de Victor Hugo), le *Centenaire de Chevreul*, le *70e anniversaire de Pasteur*, les *Obsèques de Carnot*, la plaquette de *M. Boutmy*, les portraits des parents de l'artiste, de sa femme, les médailles du *Mariage*, de la *Maternité*, et tant d'autres.

Toutes ces productions classent Roty à côté de Chaplain, son aîné, parmi ceux qui ont le plus heureusement contribué au renouveau de l'art du médailleur à la fin du XIXe siècle; elles ont d'ailleurs leur charme propre, bien à elles et sensiblement différent de celui des œuvres de Chaplain. Certes, Roty excellait dans le portrait, mais où il triomphait sans conteste, c'est dans les compositions pittoresques dont le sujet de ses médailles lui fournissait le prétexte; il était maître en ce domaine; il y faisait preuve d'une ingéniosité d'agencement toujours nouvelle, d'une simplicité, d'une élégance et d'une clarté de rendu toujours séduisantes. A Chaplain les effigies marquées pour jamais avec une vigueur et une certitude saisissantes; à Roty, les allégories et les symboles inscrits sur les « revers » avec une plénitude et une eurythmie inoubliables.

Comme son aîné, Roty vit s'ouvrir devant lui les portes de l'Académie des beaux-arts (il y entra en 1888); comme lui, il obtint un grand prix à l'Exposition universelle de 1900; il était comme lui commandeur de la Légion d'honneur; comme lui enfin, il laisse une nombreuse lignée d'élèves, et l'influence qu'il avait exercée n'avait pas attendu la mort du maître pour se manifester.

FINDS

ANTIQUARIAN FINDS IN JERSEY.

While demolishing an old house in Jersey known as L'Ancienne-te, near Lameye, St. Brelade, workmen found an urn bearing the monogram of the Emperor Vespasian. Another urn containing some spade guineas was found.

The house, which was built in the thirteenth century, was purchased by Mr. Athelstan Riley.

TREASURE TROVE FROM THE SEA

EFFECT OF A HIGH TIDE ON THE SUFFOLK COAST.

Serious havoc was caused at Thorpe Ness, Aldeburgh, Monday, April 3rd by the high tide, great quantities of sand being washed away from the beach. On the mainland the bungalows, which formerly stood 100 yards back, are now within a few feet of high-water mark.

The seas have washed out of the sands hundreds of coins, gold, silver, and bronze, dating from early Saxon times, antique bronze rings and ornaments, and an old bronze bag clasp with a silver inscription, said to be of the period of King John.

Thorpe Ness is a low sandy point by the little fishing village of Thorpe, which stands on a bleak, unsheltered beach two miles north-east of A'deburgh. Aldeburgh has suffered severely from encroachments of the sea, and a little further up the coast is Dunwich, where a once important town has been practically swallowed up by the waves.

(*Times.*)

*
* *

The strange mixture said to constitute this Find requires, we think, some further explanation.

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

(*For further particulars see first page of this Circular.*)

CHARLES I.

Provincial Mints.

BRISTOL.

These coins have also been attributed to the Oxford Mint, and the monogram BR is said to denote that they were struck from silver procured for the King by Richard Bayly, President of St. John's. Hks., p. 326. The Numismatic Chronicle, 1910. p. 203.

35711 **1644. Mm.** (Obv.) **Plume,** (℞.) ℞· 'CAROLVS : D : G : MAG : BR : FR : ET ' HI : REX. The King on horseback to left, a plume behind. ℞. 'EXVRGAT ' DEVS ' DISSIPENTVR ' INIMICI. Declaration across the field, RELIG : PROT : | LE : AN : LI : PA : With three plumes above, and date below. *A splendid coin. R.* F. D. C. 6 10 »

⁂ Founded 11th July 1832, by Leopold I.

86417 Denmark. Gold Danish Cross enamelled white, with red border and gold edges, depending from the Royal Cipher, surmounted by a Royal Crown. In the centre of the cross is the initial "W" regally ensigned, and on the limbs are distributed the dates 1219, 1671, 1808, and F.VI. crowned. In the centre of the reverse C.5. crowned and on the limbs GUD.OG.KON. GEN. Gold crown in angles. V. F. 5 15 »

⁂ The Order of the Dannebrog had, according to tradition, a miraculous origin. The Knights of "the Sword" introduced into Livonia by Albert III, Bishop of Riga, being, in 1219, hard pressed by the heathen Esthonians, sought the aid of Waldemar II., King of Denmark, but in the ensuing battle, being on the point of yielding to the ouslaught of the combined Russians and Esthonians, suddenly a red flag, bearing a white cross, appeared in the heavens, and so revived their courage that, rallying, they finally vanquished the enemy. Waldemar, to commemorate the "miracle" is said to have accordingly instituted the Dannebrog.

86418 Germany. Cross of a Commander of the Order of the Red Eagle. In the centre of a gold white enamel cross, the red Brandenburg Eagle grasping a golden wreath and royally crowned. Rx. F.W. crowned. V. F. 4 » »

⁂ The original Order was founded in 1705, by George William, Hereditary Prince of Anspach, as "L'Ordre de la Sincérité", was on the 13th July 1734, transformed into that of the Brandenburg Red Eagle, by the Margrave George Frederick Charles.

86419 Greece. Gold Badge of a Grand Cross of the Order of the Redeemer. A white enamelled Maltese Cross, surmounted by a Royal Crown, the angles of the cross being connected by a green enamel laurel wreath, in the centre of an inscribed band, bust of King Otho the Founder. Rx. The white cross of Greece. V. F. & S. 7 10 »

⁂ Founded 1st June 1833, by King Otho, to commemorate the deliverance of Greece.

86420 Hanover. Star of a Civil Knight Commander of the Royal Hanoverian Guelphie Order. The White Horse of Hanover within the motto of the Order surrounded by an oak wreath upon a silver star of eight points. V. F. & R. 5 » »

⁂ Founded by the Prince Regent (Geo. IV) in the name of his father George III., on the 12th of August 1815, his birthday, being also the anniversary (101 years), of the accession to the English throne of the Elector, George Louis.

86421 India. Gold Badge of the Order of British India 1st class. Surmounted by an Imperial Crown, a gold star of eight clusters of rays, inscribed on a fillet, within a wreath, ORDER OF BRITISH INDIA. In the centre a lion. F. & V. R. 8 » »

⁂ Instituted, in 1837, for the purpose of rewarding meritorious services in the Native Army of India.

86422 Monaco. Gold Badge of a Commander of the Order of St Charles. A white enamelled cross with red border upon a wreath of laurels, monogram and arms in the centres. *A very handsome jewel.* E. F. & S. 6 » »

⁂ Instituted, 15th March 1858, by Prince Charles III of Monaco, and consist of five classes, it was remodelled on the 6th Jany 1863.

86423 Hawaii. Gold Badge of a Knight Commander of the Order of Kamehamaha I. A white enamelled Maltese Cross, crowned, with gold rays in the angles, in the centre, the Royal cypher. V. F. & S. 5 10 »

⁂ Instituted by Kamehamaha V, 4th April 1865.

86424 Italy. Gold Badge of a Grand Cross of the Order of St Maurice and Lazarus. Surmounted by a Royal golden crown, conjoined the white enamelled Cross *trefflée* of St Maurice, and the St Lazarus Cross (Maltese) with gold globules at the point, green enamelled, and dovetailed in the angles of the other. F. & R. 7 10 »

⁂ The Ancient and Illustrious Equestrian Military Order of St Maurice and St Lazarus is formed by the union of two distinct Orders. The former was created by Amadeus VIII., first Duke of Savoy, when wishing to retire from a Court life. All that is known of the latter is, that it was in existence at Jerusalem in A.D. 1000, and was instituted for the benefit of lepers.

86425 Portugal. Badge of a Knight Grand Cross of the Military Order of St Benedict of Aviz. A gold lily cross enamelled green, ensigned by a red enamel heart and a black cross on a white star of eight points with gold rays. A very beautiful jewel. V. F. & R. 12 » »

ADVERTISEMENTS

CORONATION OF KING GEORGE V.
& QUEEN MARY 1911.

The Obverse presents finely modelled crowned portraits of their Most Gracious Majesties KING GEORGE V. and QUEEN MARY, in their Royal robes and jewelled decorations, dividing the legend: "GEORGE V. — MARY".

The Reverse depicts King George V. crowned, enthroned, and wearing his Coronation robes, holding the Royal Sceptre in his right hand and in his left the Orb. On his left side Queen Mary is seated, crowned and robed, holding Sceptre, and with her face turned towards the King. On the right of His Majesty, Britannia, standing and holding her trident in her left hand and a branch of myrtle in her right, is turning towards their Majesties. At the feet of the King rests the British Lion, behind which is the Union Shield, the rising sun in the background. Behind Her Majesty the Queen is a view of Westminster Abbey. Below, to right and left, are Amorini, linking together festoons of the National flowers. In the exergue, in three lines: "HOMAGE OF THE BRITISH EMPIRE, 1911"; above, "GOD SAVE THE KING."

We have had the honour of submitting specimens of the medals to H.M. The King who has expressed his "approval of their design and execution".

The medals are struck in gold, silver and bronze; also in smaller sizes in white metal for school children &c.

THE

MODERN COPPER COINS

(16th to 19th centuries)

OF THE

MUHAMMADANS

BY W. H. VALENTINE.

Price 10/6 net.

This work, is designed to popularise the study of Muhammadan Copper Coins, and is the outcome of a student's endeavour to identify and arrange them. To this end the author has made faithful drawings of all the specimens of this class of coin that he has been able to find. Commencing with Turkey, the reader is taken numismatically through Egypt, Tripoli, Tunis, Algiers, and Morocco, to Nigeria (for which place the Royal Mint has recently struck a new coinage) and from thence back to East Africa and Arabia. Crossing from there to Europe, the tour continues through the Crimea, Georgia, Persia, Afghanistan, Bukhara, and terminates in Chinese Turkistan.

About a thousand coins struck during the last three centuries are illustrated (including many which have not been figured in any previous work) and the Arabic inscriptions carefully transliterated and explained, as shown on the specimen pages.

To assist in the classification of the coins, a geographical arrangement has been adopted, and six coloured maps have been added to enable the reader to locate the various mints.

The interesting field covered by this work has never before been dealt with, and it will be found that by the issue of this volume — compiled with infinite patience by the author — a real and growing need has been met.

The idea adopted by Mr. Valentine of illustrating each coin is a happy one (and indeed in the case of this Oriental series almost a necessity) because by this means the task of identifying each coin is rendered absolutely easy and pleasant, and it is believed the Work will greatly assist in promoting the study and collecting of Muhammadan Coins generally.

Orders for this work should be addrssed to the publishers.
Messrs. Spink and Son Ltd.

A NEW COMMEMORATIVE MEDAL

OFFICIALLY STRUCK BY THE
COMMISSÃO DO CENTENARIO DA GUERRA PENINSULAR
TO COMMEMORATE THE FIRST CENTENARY
OF THE PENINSULAR WAR 1808-1814.

May be obtained from SPINK & SON LTD.,
Sole agents in the United Kingdom.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 12742.*)

ACRAGAS

(Agrigentum, Girgenti).

Pindar's words concerning the early settlers of this city are beautiful and suggestive " For they after many trials of their courage secured a sacred abode by a river, and became the eye of Sicily, and a prosperous life attended them, bringing them both wealth and glory to crown their innate virtues ". (Olympian Ode II). In another Ode Pindar addresses the city as " lover of glory, most beauteous of the cities of men " (Pythian Ode XII).

Although, in regard to wealth and political importance, Acragas was second to Syracuse, the city which arose from the work of the Phoenician captives after the victory at Himera in 480 B.C. was more beautiful and grand in the architecture of its palaces and temples than Syracuse.

The name Acragas Ἀκραγας was that of the river near which the city was built, and probably the stream was so called because, unlike most of the rivers of Sicily, it was noiseless, unlike the rushing torrents which with the impetuosity of a bull tore down from the mountains to the ocean. The name Agrigentum is the Latin form of the Ethnic adjective Ἀκραγαντινος.

Next to Syracuse Agrigentum is the city most often visited by English tourists on account of the ruins of its beautiful temples. It is situated on the south-west coast, about midway between Selinus to the East, and Gela to the West, from which it was distant nearly forty miles.

The ancient city stood on a hill about two and a half miles from the sea, and between two rivers which joined into one stream before reaching the sea. The river on the east side was called the Acragas, and that on the west the Hypsas.

Thucydides gives the following account of its origin (VI, 4): " Just about a hundred and eight years after their own settlement the Geloans settled Acragas, naming the city from the river Acragas: They made Aristonous and Pystilus the leaders of their colony, and gave it the institutions of the Geloans ". If Gela was founded in 688 B.C. then Acragas would have arisen in 581 B.C.

Strabo (VI, 272) only mentions the fact that Acragas was a colony of the Geloi.

Virgil thus refers to the city: " Next lofty Acragas shows from far its stately walls, once the breeder of generous steeds " (Æn., III, 701).

The colonists were therefore Dorians, and were descended from Rhodians, and were sometimes called by that name.

There is an interesting reference to the wealth of Agrigentum in Ælian V. H. XII, 29.

" Plato the son of Ariston seeing the Agrigentines, and that they built very grandly, and also feasted, said the Agrigentines indeed build as if they should live for ever, but feast as if they were ever about to die. Timaios says they use silver oil flasks and strigils, and that they had bedsteads of solid ivory.

Diogenes Laertius VIII, 63, refers to the same saying. Diodorus, said (XIII, 81): "No land possessed more vast or beautiful vineyards; the whole land was planted also with olives and the fruit exported to Carthage. As the Agrigentines received silver for their fruits they amassed immense fortunes ". In the next two or three chapters he describes the grandeur of their temples and the abundant hospitality exercised towards visitors from other cities.

PHALARIS AND THERON

Although it is probable that no mint was established in Acragas as early as the days of the tyrant Phalaris, a brief account may be welcome of one whose name is so famous, or infamous, as the first known tyrant and ruler of the city in its early days. The coins which were used in his day would probably be those of Magna Graecia and the Colts of Corinth, the Owls of Athens, and the Tortoises of Ægina.

The interesting question arises as to whether we may see Phoenician influence in the story of the hollow brazen bull.

Suidas gives the date of the Tyranny of Phalaris as the fifty-second Olympiad that is 572 to 569 B.C. and Eusebius (*Chron.*) agrees, saying his tyranny began in 570 B.C., but in another place he gives an earlier date which is doubtless wrong. Pliny (VII, 56, *H. N.*) mentions the fact of his tyranny at Agrigentum, and says it was " after the time of Theseus". There seems to have been a doubt as to his date among the ancients. Polyaenus who relates legends of his reign wrote in the middle of the second century of our era, and shewed so little wisdom that we cannot trust his legends, especially as we do not know the sources from which they were drawn (V, 1).

Aristotle (*Rhet.* XX) tells the fable about a horse and a stag, concerning Phalaris as tyrant, which is given in the chapter on Himera.

Cicero thus refers to the death of Phalaris (*de Offic.* II, 7): " Phalaris is another instance, whose cruelty was notorious above all other tyrants; who did not, like Alexander I, perish by secret treachery, nor by the hands of a few conspirators, but was attacked by the collective body of the Agrigentines".

The bad report of his character is seen in the reference made by Pindar (Pyth. I, 96). "Croesus" character for kindness is not forgotten: but him who burnt men alive in the brazen bull, Phalaris, relentless in mind, a hateful report everywhere holds, nor do the lutes in halls admit him to their gentle converse for the themes of boys. Göller (*de situ et orig. Syracus.*, p. 272) and Bottiger (*Kunstmythologie*, Vol. I, p. 380) relate the legends.

Diodorus, in describing the taking of Agrigentum by Himilcar, thus speaks of the brazen bull (XIII, xc): —

" Hamilcar sent to Carthage the most beautiful works of arts, among them the bull of Phalaris, and the rest he sold by auction. Timaeus, who in his history asserted that this bull never existed, made a mistake as subsequent events proved. For Scipio, who about two hundred and sixty years after the fall of Agrigentum destroyed Carthage, sent back to Agrigentum the bull of Phalaris among other objects preserved in Carthage, and which is still found at Agrigentum at the time of writing this work ". Cicero adds a little information in his account of the restoration of the bull from Carthage (In Verrem IV, 33).

" Some things were restored to the Agrigentines; among which was that noble bull which that most cruel of all tyrants, Phalaris, is said to have had, into which he was accustomed to put men for punishment and to put fire underneath ".

Plutarch in his parallel passages in Greek and Roman history (*Parall.*, p. 315) adds to the picture of the tyrant a little more. " Phalaris a harsh tyrant of Agrigentum racked and whipped strangers visiting the city. "

Perillus the bronze founder made a bull (ϑάμαλιν) of bronze and brought it to the king (βασιλει) that he might burn the strangers therein alive, but he for once becoming just, threw him into it, that the Heifer should give forth a bellowing sound. In another place Plutarch refers to Phalaris as a bitter medicine sent by God to the city (de his qui sero a num. pun., p. 553).

Cicero (*de Offic.*, III, vi) again refers to Phalaris as the typical bad man. " What! If a worthy man could despoil Phalaris, a cruel and monstrous tyrant, of his garments that he might not himself perish with cold, should he not do it? » Cicero decided that he should do so, as a tyrant is like a diseased limb, which ought to be cut off!

According to Timaios the Agrigentines cast into the sea the brazen bull of Phalaris. Now that which is shown in the city is not that one made for Phalaris as is commonly thought by many, but it is a representation of the River Gelas, and they say it was cast by Perilaus, who was the first to be burnt therein. There is here an evident confusion in the mind of the Scholiast for the images of the river-gods were not hollow sacrificial altars like the Phoenician bulls.

It is pleasant to know that there was another story of this Tyrant's life which painted him in a less lurid light. This brighter picture is given by Lucian, and in two epistles undoubtedly spurious, but believed in by Stobæus, and by Sir William Temple (Works, vol. III, p. 478).

Photius doubted their authenticity, but Suidas (s. v. Φάλαρις) believed in their genuineness. Tzetzes also quotes them trustingly.

Bentley proved their spuriousness, but their existence shows there was a tradition of a more favourable kind than that known to Plutarch and Cicero.

Nothing seems to have been recorded of the history of the city during the sixty-five years which followed the death of Phalaris. Perhaps we may attribute the earliest coins with the flat fabric to that period. Those of a smaller size, but thicker fabric, may be those of the reign of Theron, who became tyrant in the year 488 B.C., and died 472 B.C. Theron is known as the father of Demarete, the wife of Gelon. Theron's power was much strengthened by his daughter's marriage, and by his share in the spoils of the victory at Himera. Many Carthaginian slaves toiled on the grand public buildings erected by Theron.

When Gelon died his widow married Polyzelus, the brother of Hieron, who succeeded Gelon at Syracuse. When Polyzelus quarreled with his brother Theron espoused the cause of his son-in-law, and gave his own sister to Hieron when he succeeded in making peace between the brothers. Theron had married a daughter of Polyzelus, hence the two cities were bound by the closest ties.

Himera had been ruled with unbearable misrule by Thrasydemus, the son of Theron, and when the citizens of that city appealed to Hieron of Syracuse for relief, he sent their message on to Theron, who punished the leaders of the conspiracy against his son with severity. Both Pindar and Diodorus Siculus praise the character of Theron. Pindar calls him "a just and godfearing host, the stay of Agrigentum, the flower of his highborn sires. "No city for the last hundred years has given birth to a man who is a greater benefactor in his disposition to his friends, and more liberal in hand than Thero" — "As sand escapes from being counted, so who shall say how many joys that man has caused to others". (Olym II.) Diodorus Sic. (frag. de virtet Vit.) says he was "by birth, by his wealth, and his benevolence to his people the first of all the Sicilians".

The imposing monument erected to the memory of Theron by his fellow citizens was destroyed by the soldiers of Himilcar when the city was besieged in 406 B.C.

(*To be continued.*)

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-fifty-third article.

(*Continued from col. 12758.*)

SIMON, JEAN HENRI (*French*). Gem-engraver and Medallist, born at Brussels, 28. October 1752, where he died, 12. March 1834. According to M. Babelon, he was a great-grandson of Thomas Simon. He was taught engraving by his father, Jacob Simon, who also did very good work. In 1767 we find the youthful artist already in the service of Prince Charles of Lorraine. Eight years later he visited Paris, where on the recommendation of his patron, Prince de Ligne, he obtained an appointment of gem-engraver to the Duke of Chartres, who later, as Duke of Orleans, continued to favour him, and granted him a yearly allowance of 1000 Francs.

Baron Breteuil having sold his cabinet of gems to the Czarina Catherine II. of Russia, it was found that a two strata cameo, representing a Tiger reclining, was missing. Several engravers were consulted as to replacing this gem, but none would undertake to do the work in a less period than three months. Simon successfully completed it within three days, and so much enhanced his reputation thereby that Louis XVI. granted him the title of Engraver to the King, with apartments in the Louvre gallery.

In order to escape the troubles of the French Revolution he enlisted in the army under Dumouriez and did service as captain in the light infantry. He was wounded several times, and returned to Paris, later on crossing over to Spain, where he refused an offer of Ferdinand VII. to open a school of engraving with a yearly salary of 30.000 reals. On his return to France, he was appointed Professor of gem-engraving to the Institute for Deaf and Dumb. Napoleon favoured him with his patronage, and the Empress Josephine made him "Graveur du conseil du sceau des titres". In 1813, he was decorated with the Legion of Honour for an act of bravery.

In the early part of 1816 he went back to Brussels, and was appointed Engraver of gems and medals to the Royal College of the Low-Countries, and on 4. August 1817 Engraver to the King. The Academy of Fine Arts of Antwerp elected him a member in the following December.

On the outbreak of the 1830 Revolution at Brussels he took the command of a company of Civic guards.

Two years later, after a long and painful illness, borne with stoic resignation, be ended his career at the age of 82. He was buried with military honours, and the Chief Rabbi pronounced his funeral oration.

J. H. Simon's most important work is his Series of medals of illustrious men of the Low-Countries, "Galerie métallique des hommes qui ont illustré les Pays-Bas", on which he spent six years of arduous labour. This series consists of 100 medals.

It cannot be said that Simon acquired a great reputation as an artist, but he was certainly a clever gem-engraver, and is praised as such.

At the Salon of 1799, Chevalier Jean Henri Simon, who was then residing at the Palais-Egalité, n° 88, exhibited the following gems: Head of Demosthenes, in relief on agate-onyx; — Female head, in relief on agate-onyx; — Marine Love, in relief on sardonyx; — Intaglio in cornelian representing Apollo drawn in chariot by two horses; — Heads of Aspasia and Pericles, in relief on chalcedony.

In 1800, the artist sent for exhibition at the Salon a Portrait of the First Consul, engraved in cornelian, and several other works, in 1801, 1810 and 1812. M. Babelon adds that Simon is no doubt the engraver of a fine Portrait-gem of Joseph II., signed **S.**

The Hague Museum preserves a Bust of Homer, in cornelian, and Portrait-cameos of King William I. of the Netherlands, and his consort; also Portrait-medals of William I. and Queen on their Visit to Brussels, 1817; — Portrait-medals of the Crown Prince of the Netherlands and consort on their Visit to Brussels after their Marriage, 1816; — Portrait-medals of William I.; his Queen; Crown Prince William; Crown Princess Anna Paulowna; Princess Louise Auguste Wilhelmina; — Princess Marianne of the Netherlands; Prince Frederick of the Netherlands; — Foundation of the Masonic Lodge "Grand Orient" with Prince Frederick as Grand Master, 1818 (2 types); — Opening of a new harbour at Middelburg, 1817 (2 types); — Presentation medal to King William I., by the County of Hainault, 1817; — The town of Jodoigne thanks the King for his help during the Conflagration, 1820 (2 var.); — Decoration for faithful service in the Army, 1825 (3 var.); — Prize Medals for the Universities of Leyden, Utrecht, and Groningen; — Memorial medal of Lieut. Admiral Johan Arnold Zoutman, 1793; — Vankinsbergen, 1819; — Louis Englebert Duke of Arenberg, 1820; — Medals of the Universities of Liège, and Louvain, 1822; — J. H. van Swinden, 1823; — Marriage of Prince Frederick of the Netherlands, 1825; — Modeste Grétry, 1827; — Badge of the Brussels Civic Guard, 1830, etc.

The usual signature of the artist is: **SIMON F.**; — **SIMON G. P. DU ROI**; — **S.**; — **F.**; **SIMON.**

Simon's "Galerie métallique" consists of 100 medals, which all measure 47 mill. in diameter; they are: Guillaume de Croy; — Auger Busbeck; — Jean de Barneveld; — Philippe de Comines; — Hubert Goltzius; — Emmanuel de Meteren; — Gabriel Mudée; — Michel Coxie; — Nicolas Clenard; — Pierre Nannius; — François Sonnius; — Jean Stadius; — Christophe de Longueil; — Didier Erasme; — Corneille Scryver; — Jean Gorop-Becanus; — Adrien Junius; — Juste Lipse; — Albert Pighius; — Hugo Grotius; — Daniel Heinsius; — Eryce Puteanus; — Balthazar Moretus; — Gerard Mercator; — Abraham Ortelius; — Theodore Rombouts; — Jean Second; — Quentin Metsys; — Lucas de

SIMON, JEAN MARIE AMABLE HENRI (*French*). Son of the last, Jean Henri S., and also a Gem-engraver, was born at Paris on 28. January 1788, and resided a very long time at Brussels. He was a chevalier of the Legion of Honour. Under the Restoration and Louis Philippe's reign, he was entrusted with numerous official orders. He thus engraved in cornelian the portraits of Charles X., Duke of Angoulême, Duke of Berry, Louis Philippe, and numerous Princes and Princesses of the French royal family. But, remarks M. Babelon, " he did not add to the artistic reputation of his ancestors, and although his work is careful and consciencious, it is difficult to meet with works of art so devoid of charm and life ".

This artist made the following exhibits at the Paris Salon: 1819. Louis XVIII., cornelian; — Alexander I. of Russia, cornelian; — Portrait of a Lady, cornelian; — Bust of Aesculapius, cornelian; — Cupid, cornelian; — Arms of the Duke of Treviso, marshal of France, cornelian; — 1822. Bust of Louis XVIII., wax; — Duke and Duchess of Berry, and Duke of Bordeaux, gem; — Duke of Berry, engraved stone; — Duchess of Orleans, cornelian; — Prince Poniatowski, engraved stone; — Alexander I. of Russia, cornelian; — M^me^ B***, cornelian; — 1824. A Frame containing cameos and intaglios, amongst which the Portraits of Louis XVIII., and Marquis & Marquise C. T.***; — 1827. A Frame of gems, amongst which the Portraits of Louis XVIII., Talma, and a Head after the antique; — 1831. Portrait-gems of Charles X., the Queen, and Crown Prince; — 1833 Portraits of the Royal family; — 1841. Bust of M^me^ de B***; — 1847. Twenty-seven Cameos and Intaglios, &c.; — Head of Christ; — Portrait-gems of the French Royal family, engraved between 1830 and 1840. (*Vide* Chavignerie et Auvray, *op. cit.*, II, 508).

There is a Portrait of this artist by L. Th. Simon, which was exhibited at the Salon, 1848.

SIMON, JOSSE (*French*). Mint-master at Angers from 26. November 1331 to 1. December 1333. He officiated in conjunction with Poillevillain.

SIMON, H. (*French*). This Engraver's signature occurs on the reverse of a medal commemorating the Epidemics of typhus at Maasluis, 1865.

SIMON, HIRSCH (*Germ.*). A Jew who under Frederick III. contracted for the working of the Mint of Breslau, 1779.

SIMON, MAYER (*French*). Better known as **SIMON DE PARIS**, a brother of Jean Henri Simon, son of Jacobs., and great grandson of the famous British artist, Thomas S., was born at Brussels in 1746 and died at Paris on 17. March 1821. He was a pupil of his father, and of Jacques Guay, under whom he worked for some time. On the death of the latter, he appears to have bought the house in the Marais, rue Portefoin, n° 6, where the Master had lived and carried on his profession for so many years. That same house was left by Simon in his will to one of his pupils, Henri Beck, who in his turn bequeathed it to J. F. Leturcq, the author of a ' Life of Jacques Guay ', to which I have had occasion to refer (Vol. II, p. 326).

Mayer Simon is the author of several Portrait-gems of Louis XVI., Bonaparte as First Consul, and other celebrities; by him are also a cameo, signed **SIMON F.** depicting Jupiter and Antiope, and an intaglio cut in amethyst representing a Nymph playing with a term of Priapus. Babelon further mentions figures of Lions, and a Cat, engraved by this artist, whose productions are unfortunately lacking in inspiration and originality, and too often hard and lifeless.

SIMON, NICOLAS (*French*). Mint-master at Neuville, 1674-1675. *Vide* Natalis Rondot, *La Monnaie de Vimy ou de Neuville*, Rev. num., 1890, p. 444.

SIMON, RITTER *Vide* Chevalier **JEAN HENRI SIMON** *supra*.

SIMON, THOMAS (*Brit.*). Medallist, Coin- and Seal-engraver, born *circ.* 1623; appointed joint-graver to the Royal Mint in 1645; Chief-engraver from 1649 to 1660; died of the plague in 1665. His fame as an Engraver of coin and medal dies stands unrivalled in the British series. It must be noted, however, that Thomas Simon usually worked from his brother Abraham's models.

I borrow the following details from Mr. W. Wroth's admirable notice of this artist, in Sidney Lee's *Dictionary of National Biography*, LII, pp. 265-267.

" Thomas Simon, medallist and seal-engraver, born about 1623, was one of the sons of Peter (or Pierre) Simon by his wife Anne, daughter of Gilles Germain of Guernsey. He was a younger brother of Abraham Simon (*q. v.*), the medallist. Peter Simon is described as a native of London, but he probably belonged to a Guernsey family named Simon. His marriage took place at the Wallson church in Threadneedle Street, London, on 12. September 1611.

Medallic Portrait of Thomas Simon, by Stuart.

Vertue records the tradition that Thomas Simon was born in Yorkshire, and that he there chanced to attract the notice of Nicholas Briot, the mint engraver. All that seems certain is that Simon was introduced (about 1635?) into the service of the London mint by Sir Edward Harley, and that he there received instruction from Briot. In 1639 he made the " Scottish Rebellion " medal, and Hawkins (*Silver Coins*) supposes that some of the Tower mint ' crowns' of Charles I. were his work. From about 1645 his productions as a medallist and seal-engraver become

Original from CORNELL UNIVERSITY

numerous. In official documents his name sometimes occurs as Simons and Simmonds.

"In 1645 Simon was appointed, with Edward Wade, joint chief graver of the stamps for coins, with authorization to engrave all the royal arms and seals. The salary was 30 *l.* shared with his colleague, together with the usual lodgings and perquisites. In 1648 he was authorized to engrave the great seal of the Commonwealth, and in 1649 was appointed sole chief graver to the mint and seals.

"In September 1650 he was sent to Edinburgh to take the portrait of the lord-general for the 'Dunbar' medal. Cromwell, in the same year, recommended him for promotion at the mint, for

Battle of Dunbar, 1650.

'indeed the man is ingenious and worthy of encouragement'. In 1651 Simon made the great seal of England. On 20. March 1654 he was given a salary of 13 *l.* 6 *s.* 8 *d.* per annum for the sole making of all medals for his highness and for the public service; in addition to this he had 30 *l.* per annum as the salary attached to his post of sole chief graver of the mint and seals. On 16. March 1654 he was ordered to engrave the great seal, privy seal, and seal manual; and in 1655-6 he also made many seals for the public service, including the great seals for Scotland and for Ireland, and seals for the English, Scottish, and Irish councils, and for the English law courts and the Admiralty.

"Simon engraved the dies for Cromwell's projected coinages of 1656 and 1658, probably the finest in the English series. Simon's bust for the so-called 'fifty-shilling piece' (struck from the die of the Broad) is now in the Royal Mint, together with other punches and dies

'Fifty-Shilling' piece, 1656.

made by him. The frosting observable on these coins appears to have been introduced by Simon. The actual striking of the specimens was undertaken by Blondeau. On 14. January 1657-8 Simon laid before the council his account for making medals, badges, silver boxes for treaties, presses for seals, &c., amounting to 1,728 *l.* 5 *s.* 8 *d.*, of which 700 *l.* had been paid in 1655. On 3. August 1658 he again petitioned the council to discharge the debt. 'I beg you' (he says) 'to consider that I and my servants have wrought five years without recompense, and that the interest I have to pay for gold and silver eats up my profit". Simon was employed to model the face of the effigy of Oliver, carried in the Protector's funeral procession on 23. November 1658.

"At the Restoration, Thomas Rawlins, the Royalist medallist, was reinstated as chief engraver, but Simon successfully petitioned for employment, and was actively occupied in making dies for the 'hammered' English coinage of 1660. On 31. May 1661 he obtained the grant of the office of one of the gravers of the king's arms, shields, and stamps; and on 2. June 1661 was made by patent one of the king's chief gravers of the mint and seals, with the salary of 50 *l.* "At this time he prepared the following seals: the great seal and privy seal, the great seal for Ireland, the great seal for Jamaica, and seals for the order of the Garter, the lord high admiral, the council of Wales, and the Royal Society.

"In January 1662 Simon and John Roettiers (*q. v.*) were ordered to engrave dies for the new 'milled' coinage, but, 'by reason of a contest in art between them', they could not be brought to an agreement. They were therefore each directed (7. February 1662) to engrave a trial-piece for a silver 'crown', to be submitted to the king. Charles decided in favour of Roettiers, and Simon's employment at the mint then practically ceased. In 1663 Simon produced as a sample of his abilities his famous pattern for a crown piece known as the 'Petition Crown', from the following petition

Simon's Petition Crown, 1663.

engraved in minute letters on its edge: THOMAS SIMON MOST. HVMBLY. PRAYS. YOVR. MAJESTY TO. COMPARE. THIS. HIS. TRYALL. PIECE. WITH. THE. DVTCH (*i. e.* John Roettiers's crown) AND. IF. MORE. TRVLY. DRAWN & EMBOSSED. MORE. GRACE: FVLLY. ORDER'D. AND. MORE. ACCVRATELY. ENGRAVEN. TO. RELEIVE HIM (cf. *Numismatic Chronicle*, 1854, xvi. 135, where fifteen specimens of the petition crown are mentioned). In April and September 1664, Simon was employed in engraving seals for the king's service. He died in June 1665 of the plague, leaving directions in his will that he was to be buried in the church of St. Clement Danes, London, in which parish he had long resided.

"Simon married Elizabeth, daughter and sole heiress of Cardin Fautrart of Guernsey, and had by her several children. The will of Thomas Simon, citizen and goldsmith of London, was proved in the Consistory Court of Canterbury on 23. August 1665. He left his son Samuel his farm in Shorne, near Gravesend, Kent and also his paintings, drawings, and medals. To his nephew William, son of his brother Nathaniel, deceased, he left his punches and graving tools. Simon's widow petitioned the king about 1669 for the sum of 2, 164 *l.*, claimed by her as arrears of payment due to her husband.

"A portrait of Simon occurs on an oval medal, cast and chased by Stuart in the eighteenth century, from an unknown original probably executed by Abraham Simon *circ.* 1660. A seventeenth-century miniature, formerly in the possession of Sir A. W. Franks, has been identified as probably a portrait of T. Simon.

"In the preparation of many of his portrait medals Simon had the advantage of working from the admirable wax models of his brother Abraham, but his own work on coins and seals proves that he was an accomplished designer, endowed with a keen sense of what was appropriate for the circular 'flan' of the coin and the seal. His technical skill is triumphantly evinced by his petition crown, and, taken altogether, he must be pronounced the finest medallist who ever worked in England. His usual signature is **T.S.**"

The following is a list of Simon's principal medallic works. Many of his medals are not struck, but cast and chased.

MEDALS. Scottish Rebellion, 1639 (4 var.; *Med. Ill.*, I, 282, 91-

Memorial of the Earl of Essex 1646.

94); — Sir John Hotham, 1644 (*Med. Ill.*, I, $\frac{313}{144}$); — Sir Thomas Fairfax, general, 1645 (3 var.; *Med. Ill.*, I, 317, 150-152); —

Dominion of the Sea, 1665.

Other medals have been attributed to Thomas Simon, but as they are unsigned, or only known from later imitations by Stuart, I shall not mention them here.

Seals. This list is taken from Vertue's Catalogue : The Great Seal of the first year of the Commonwealth, 1648; — Seal for the Court of Common Bench at Westminster, 1648; — Seal for the Common Pleas for the County Palatine of Lancaster, 1648; — Seal of the Duchy of Lancaster, 1648; — The Parliament Seals; — Great Seal of the Commonwealth, 1651; — Great Seal of the Lord Protector; — Great Seal of Richard Cromwell; — The Parliament Seals, 1659; — Scotch and Irish Seals; — Council Seal; — Cinque Ports Seal; — The Great Seal of Charles II., 1660; — Seal for the Office of the Lord Privy Seal, 1661; — Royal Society Seal; — Seal of Henry Cromwell; — Seal of Oliver Cromwell; — Seal of Charles II. and Catherine, 1662; — The Great Seal of Charles II.; — The Great Seal for the Order of the Garter; — Great Seal of Jamaica; — Great Seal for the Lord High Admiral James Duke of York; — Cromwell's Privy Seal, and Seal manual; — Great Seal of England, Privy Seal, and Seal manual *temp.* Charles II.; *Vertue*, Pl. XXXIX, XL, etc.

Coins. *Charles I.* Hawkins supposes that some of the Tower mint crowns were his work; those of his type 5 (Pl. XXXIX, 477),

Crown of Charles I., Mm. Sun.

bearing the mint-mark *Sun*, with horse large, tall, head erect, elegant and spirited, the mane extending in front of the chest (*Ruding*, XVIII, 7). Probably struck in 1645. "The spirit, the

Unite, or Twenty-Shilling piece, 1650.

neatness, and minuteness of some of the details of this and of some of the other pieces, except the first type, induces us to believe that they are the earlier productions of Thos. Simon." (*Hks.*, p. 310).

Commonwealth. Hammered money. *AV.* Twenty Shillings, 1649-1657, and 1660; — Ten Shillings, 1649-1654, and 1660; — Five-Shillings, 1649-1654, 1657, 1658, and 1660; — *AR.* Crown, 1649, 1651-1654, and 1656; — Half-Crown, 1649, 1651-1656, 1658, 1659(?) and 1660; — Shilling, 1649, 1651-1658, and 1660; Sixpence, 1649, 1651-1660; — Half-Groat, Penny and Halfpenny, undated.

Oliver Cromwell. I[st] Issue (1656). *AV.* Fifty-shilling piece

Half-Broad, by Simon.

(*illustrated*); — Broad, or Twenty Shillings; — Half-Broad, or Ten Shillings; — *AR.* Half-Crown. — 2[nd] Issue. *AR.* Crown, 1658 (*illustrated*); — Half-Crown, 1656-1658; — Shilling, 1658; Sixpence, 1658 [1].

Both coinages of 1656 and 1658, were struck by Blondeau's machinery.

"Most of the crowns have a flaw across the bust, the obverse die having cracked after a few specimens were struck. The Crown was also struck in gold, but only two examples are known. There are two imitations of this piece, one made by Tanner, the other in Holland and commonly called "the Dutch crown". They vary from Simon's crown in the modelling of the bust and in the shape of the letters" (*Grueber*, p. 126).

Crown, by Simon.

Broads and Half-Broads struck in copper and pewter are known of Simon's type.

Charles II. Hammered money. *AV.* Broad (two issues, 1660-1661 without and mark of value XX behind bust); — Half-Broad (also two issues); — Crown (also two issues); — *AR.* I[st] Issue (1660). Half-Crown; — Shilling; — Sixpence; — Half-Groat; — Penny; — II[nd] Issue, 1661; Same denominations, with marks of value and no

Half-Crown, by Simon.

inner circle; — III[rd] Issue, 1661-1662; Same denominations; and also Groat and Threepence, with marks of value and inner circle. The first issue of Maundy money, which is of Simon's third type,

1. These coins are master pieces of the coiner's art, and the neatness of the design, the sharpness of the impression, and the beautiful gloss upon their surface, exhibit the patience and skill which was lavished upon their production". (T. H. B. Graham, *Cromwell's Silver Coinage*, Num. Chron., 1908).

dates from 1661-2. These coins '(says Grueber)' are of much neater work than the previous ones of the same denominations and are the last specimens of the hammered money.

Milled Money. Pattern Coins. *AV.* Broads; several types; 1. Rℒ. MAGNALIA DEI 1660 a cross, composed of II. ℭ and crown four times, repeated, etc.; 2. Rℒ. FLORENT. CONCORDIA. REGNA. 1662. Square shield of arms; — *AR.* Broads; several types: 1. Rℒ. MAGNALIA. DEI. 1660, with edge inscribed: * REVERSVS. SINE. CLADE. VICTOR SIMON FECIT (*Rud.*, pl. XXIV, 1); — 2. Similar, with edge grained; 3. Two reverses combined, MAGNA. OPERA. DOMINI. 1660, and PROBASTI. ME. DNE. etc.; edge inscribed (*Rud.*, XXXIV, 3); 4. Obv. Large bust crowned; Rℒ. MAGNA. OPERA. DOMINI. 1660 (*Rud.*, pl. XXXIV, 4); 5. As last, but bust of King laureated *Rud.*, pl. XXXIV, 2); 6. Rℒ. FLORENT. CONCORDIA. REGNA. 1662 (*Rud.*, pl. XIV, 8); *AR.* Angel, AMOR POPVLI, etc. *Rud.*, pl. XIII, 2).

Pattern-Broad by T. Simon, 1660.

The two most famous Pattern coins by Thomas Simon are his "Petition Crown" and the "Reddite Crown". The former I have already described above. Referring to this piece, Mr. Webster writes in his Catalogue of the Mint Collection (p. 77): "The famous contest in art between two such engravers as Simon and Roettiers, produced the finest pattern piece in the English series, but unfortunately it failed in obtaining any favour at the hands of a monarch who never possessed the artistic taste for which his father was so celebrated. Evelyn, in speaking of the contest remarks: "For the honour of our countrymen, I cannot here omit that ingenious trial of skill which a commendable emulation has produced in a medal performed with extraordinary accuracy by one who having been deservedly employed in the Mint at the Tower, was not willing to be supplanted by foreigners."

The Reddite is of the same type and bears the same legends as the Petition crown, and is from the same dies, but the edge is inscribed REDDITE. QVÆ. CÆSARIS. CÆSARI, &c.

The "Reddite" Crown, by Simon.

A most interesting paper was contributed by Mr. W. J. Hocking, Curator of the Mint Museum, to the *Num. Chron.*, 1909, pp. 56-119, on *Simon's Dies in the Royal Mint Museum, with some Notes on the early history of coinage by machinery*. This paper describes twenty-six Cromwell dies, matrices and punches, nineteen of which were purchased by Mr., afterwards Sir, Isaac Newton, from the artist's successor, whilst seven dies were manufactured in the Mint at a later date (about the fourth decade of the eighteenth century) and attributed to Tanner. Beside these a set of dies for Half-broad, Shilling, and Sixpence were acquired by the Mint in 1900, which are not by Simon, and show unskilful work, emanating probably from the same source as the so-called "Dutch" crown, perhaps all done in Flanders.

"Thomas Simon was also, according to the universal rule of his times, a gem-engraver; this *à priori* conclusion is confirmed by Giulianelli who quotes from Stosch's collections pastes taken from his gem-portraits of Cromwell and Clarendon. In the Devonshire Cabinet is a cameo head of the Protector, in all probability his work; in fact his head on the coins are treated precisely in the style of cameo in flat relief, to which unusual mode of treatment much of their effect is due" (King, *Antique Gems and Rings*, 1872).

Commonwealth Seal, by T. Simon.

The two brothers Simon produced medals singly or together; in the case of a joint work, it seems that Abraham made the model, while Thomas, a more skilful engraver, did the after-chasing. The Simons appear to have first made their models in wax, and then to have cast the medals from models in sand.

Thomas Simon signed: *Simon*; — *T. S.*; — **T. S.**; — **THO: SIMON F.**

SIMONOFF, Prof. (*Russ.*). Contemporary Sculptor and Medallist, residing at St. Petersburg. On the occasion of Tolstoy's 80th Anniversary, 9. September 1908, he modelled a Portrait-plaquette of the great novelist and philosopher, a reproduction of which was published by the *Berliner Münzblätter*, 1908, p. 166.

SIMONNET, MONNET (*French*). Master Engraver at Grenoble, and Die-cutter at the Mint there from 1580 to 1620. He resigned in favour of his son.

Mazerolle gives his name as *Simons* (*Vide* Médailleurs français, I, 616).

SIMONNET, PIERRE (*French*). Son of the last, born in 1591; Mint-engraver at Grenoble 1620-1629.

SIMONS, ADRIEN (*French*). Contemporary Sculptor, born at Cappelen (Belgium), but naturalised a Frenchman. He is the author of some good medallic works: Plaquettes in silver, Sunrise and Sunset; — Portrait-medallion in bronze, Mlle Lydie.

The late Mr. H. Montagu was of opinion that this was possibly Flemish (*pattern*?) work, and therefore an imitation. The letters of the inscription certainly have a less Gothic appearance than those on the usual angels of this reign.

Half-Angels.

(*To be continued.*)

THE VICTORIA CROSS

In most civilised nations there exists some means of specially rewarding the individual gallantry and daring services of those who fight for their country, apart from the general medal granted to everyone engaged in a particular action or campaign. On the termination of the Crimean war the want of a recognised dignity to mark such services was much felt in the United Kingdom, especially as our French companions in arms were rewarded in cases of distinguished service by the Cross of the Legion of Honour. To attain an end so desirable a new naval and military decoration was created, to be known as the " Victoria Cross ", consisting of a Maltese cross of bronze (formed from the cannon captured at Sebastopol) with the Royal crest in the centre, and underneath, a scroll, bearing the inscription " For Valour ". On the clasp are two branches of laurel, and from it the cross hangs, supported by the initial "V". It was ordained, with a view to placing every man on a perfectly equal footing as to eligibility for the decoration, that neither rank nor long service, nor wounds, nor anything save the merit of conspicuous bravery should entitle to the honour. The cross is ordered to be suspended from the left breast by a blue ribbon for the navy and red for the army. The names of those receiving it are published in " The London Gazette " newspaper and entered in a register kept by the Secretary of State for War. Should anyone, after having received the cross, again distinguish himself in a manner such as would entitle him to the decoration had he not already received it, such further act is recorded by a bar attached to the suspending ribbon, another bar being added for each additional act of bravery. This distinction carries with it the special pension of £ 10 a year, and each bar added entitles its possessor to an extra £ 5 a year. Should the wearer be at any future time convicted or reasonably suspected of treason, cowardice, felony, or any infamous crime, the honour is forfeited, his name is erased from the register mentioned, and his pension ceases. The first distribution of Victoria Crosses took place under the auspices of Queen Victoria, in Hyde Park, London on the 26th June, 1857, the recipients, sixty-two in number, having won them in the Crimean War.

When a large number of men are engaged in a daring enterprise, the Cross is awarded by votes of their comrades to one officer, one non-commissioned officer, two privates, seamen or marines.

The first Victoria Cross was won by Midshipman Lucas, of H.M.S. " Hecla, " on June 21st, 1854. During the bombardment of a Russian fot a live shell fell on board the " Hecla. " Lucas picked it up and threw it overboard. It burst just before touching the water.

It is illegal for a pawnbroker to accept the Victoria Cross as a pledge under any circumstances.

The Rev. James William Adams is the only clergyman who has won the Victoria Cross. He gained it in the Afghan War of 1878–1880.

The Victoria Cross measures one inch and two-fifths square. The actual weight of the metal in 434 grains, just three-and-a-half grains less than an ounce avoirdupois. Its intrinsic value is a penny-farthing.

Queen Victoria ordered the alteration of the inscription on the original design of the Victoria Cross from " For the Brave " to " For Valour. "

I believe that the Victoria Cross was originally suggested by Sir William Howard Russell, and it marked a moral epoch for the Army and Navy. It did not make soldiers and sailors more gallant than before, but it exerted upon them all the power of symbolism, and fixed their minds more upon the true meaning of bravery.

UTILE DULCI.

SPECIAL ANNOUNCEMENT.

THE 1911 SHAKSPERE MEDAL.

This is an important contribution to the medallic portraiture of Shakspere.

It is struck to give perpetuity to a fine contemporary portrait, traditionally ascribed to Shakspere. It belonged for many generations to an old Lancashire family, and on this becoming extinct a few years ago, it passed into the collection of Mr W. Sharp Ogden, who has caused this medal to be prepared.

The obverse is an accurate rendering of the delightfully characteristic portrait. The reverse also has Shakspere's head in profile, laureated by the Muse of poesy; this head is from the monument bust in Stratford-on-Avon Church.

It is a charming example of Mr Frank Bowcher's work.

Messrs Spink & Son supply the medal as follows:

Silver proof 12/6 in box
Bronze — 5/6 —
Leather cases 1/—extra.

CORRESPONDENCE

South Shields.

Dear Sirs,

As you have a note on the coins washed up at Aldeburgh; the following might prove to be of interest to you, if you are not already aware of it.

From time to time on the Herd Sands at the month of the Tyne especially after high winds — are found various *denarii*, chiefly of the Antonine Emperors — Groats and Half-groats of David II and Robert II and James I — Pennies of Robert I. Alexander III and later Kings, Sixpences of Mary and Elizabeth and of the Stuart Kings, also shillings. I have had also pennies of the Edwards [one of the Dublin Mint of Edward I.], and about a fortnight ago. I had a shilling of Charles I and a *halfpenny* of Edward II or of one of the Edwards, as I cannot find any mention of it in my copy of shawkins, you may probably find it of some interest.

Obv. EDVVA·R·ANGL·DNS HYB CIVITAS CANTOR.

The denarii found are all in good condition, except for the blackening caused by sea waves, one might say mint condition. The later ones of Elizabeth, James I and Charles I are very much worn. If a list of these found and in my father's or my possession now would be of any interest to you I showed be pleased to prepare one.

Your very truly
Ernest BLAIR.

LEAVES FROM MY NOTE BOOK

MEDAL TO COMMEMORATE THE UNION OF SOUTH AFRICA.

Obv. Head of King to left, GEORGIVS V. BRITT. OMN: REX ET IND: IMP.

Rℒ. Mercury forging on an anvil a link which joins together a chain formed of five tablets inscribed, Cape of Good Hope, Natal, Transvaal, Orange River; between each tablet connected by links is a lion's head, crowned.

Suspender. Ornamental clip and oval ring. Riband-Orange, with wide dark blue borders. Edge plain.

The following is an extract from the Warrant granting the medal.

Whereas we are desirous of commemorating the Union of Our Colonies Cape of Good Hope, Natal, Transvaal, Orange River Colony, into one legislative Union under the name of the Union of South Africa and of recognizing by some mark of Our Royal favour those of our faithful subjects and others who have rendered special services in connection with the establishment of the said Union and the opening of the first parliament thereof. Special Medal.

The Medal shall be worn on the left breast. The said medal shall *only* be awarded to those of our faithful subjects and others who have rendered special services in connection with the establishment of Our said Union of South Africa or in connection with the opening of the First Parliament thereof, and such award shall be made only on recommendation to Us by Our Principal Secretary of State having the Department of the Colonies.

A Register of the names of those upon who we may be pleased to confer the said medal shall be kept in the office of Our aforesaid Principal Secretary of State.

Six Months from the date thereof the aforesaid Register shall be closed and no award of the said Medal shall thereafter be made unless in exceptional circumstances to be by us approved.

Given at Our Court of St James
3rd day October 1910
by his Majesty's command
(*signed*) Crewe C. W.

INEDITED.

Mr. Hugh Goodacre has kindly supplied us with the following particulars of a seventeenth century token he has met with, which was found in the Churchyard at Lutterwooth, Leicestershire, and appears to be quite unpublished. Obv. GEORGE TILLEY MERCER = The Royal arms. Rℒ. LVTTERWORTH 1667 = HIS HALF PENNY G.T.

AN EXTREMELY RARE PATTERN HALFCROWN OF QUEEN VICTORIA.

O. — Legend : — VICTORIA DEI GRATIA BRITANNIAR : REG : F : D : Head and neck of the Queen in profile, looking to the left. The truncation of the neck is plain. Her Majesty is represented wearing a diadem richly jewelled and heightened with alternate crosses pattée and united roses, thistles, and shamrocks. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The hair is bound by an unornamented fillet which is tied into a bow at the back of the head, the hanging ends being crimped. The whole within an ornamented rim.

R. — A representation of Saint George attacking the Dragon. The saintly knight is mounted on horseback, his left hand holding the bridle rein. He is shown wearing a crested helmet with a tail of hair floating behind. A chlamys flowing freely at the back of Saint George is fastened in front by a fibula. On the right shoulder a balteus for suspending the gladius. The feet and lower portions of the legs are protected by armour. The horse apparently half advances, half shrinks, from the fabulous animal at its feet. Saint George has broken his lance by wounding the winged monster, and a portion of it remains in its body, the other part is shown lying upon the ground with the letters W. W. P. beneath it. The dragon is represented preparing itself for a deadly spring, and Saint George is about to slay it with the gladius he holds in his right hand. The date, 1875, and the letters B. P. below. The whole within an ornamented rim.

E. — Plain.

Henry Garside.

SOME COINS OF THE BRITISH EMPIRE.

The following abbreviations are used in describing the coins : —
O — Obverse.
R — Reverse.
E — Edge.

BRITISH HONDURAS.
QUEEN VICTORIA.
SILVER FIVE CENTS.

TYPE I.

FIVE CENTS, 1894.

O. — Legend : — VICTORIA QUEEN. Head and neck of the Queen, in profile, looking to the left. The truncation of the neck is plain. Her Majesty is representing wearing a diadem richly jewelled and heightened with alternate crosses pattee and united roses, thistles, and shamrocks. The diadem is partly hidden by the wavy hair which is parted on the forehead, carried over the ear and collected into a knot behind the head. The hair is bound by an unornamented fillet which is tied into a bow at the back of the head, the hanging ends being crimped. The whole within an ornamented rim.

R. — Inscription : — 5 CENTS in two lines, within a beaded circle, encircled by two plain concentric circles divided by three love-knots into three equal compartments, the two upper ones containing the legend : — BRITISH HONDURAS, and the lower one the date, 1894, between two beads. The whole within an ornamented rim.

E. — Milled with straight lines at right angles to the face of the coin.

Henry Garside.

FINDS

OLD ROMAN COIN FOUND NEAR PORTADOWN.

Towards the end of March a farmer near Moira, while digging on his land, turned up a bronze coin about the size of a two-shilling piece. He cleaned it, and found, to his astonishment, that it was a Roman coin, nearly two thousand years old. It bears on one side a clear impress of the head of the Roman Emperor, Vespasian, who lived A.D. 9 to A.D. 79, and the letters of the name are plainly marked round the coin. Another extremely interesting find of silver coins of the reign of Elizabeth, James I., and Charles I. has been made near Glenavy by a small boy, who found them in a rabbit burrow.

(*Daily Graphic*).

INQUEST ON TREASURE TROVE.

More silver and bronze coins were unearthed at Thorpeness in sea erosion yesterday morning. Two earthenware urns were found almost intact, and other ancient relics are being discovered. An inquiry regarding the treasure trove was held by the county coroner, at the Moot Hall, Aldeburgh, on Thursday, April 13th.

(*Irish Times*).

OBITUARY

M. Eugène Napoléon Varin, who died towards the middle of April in his 81st year, belonged to a family of medallists which goes back to the time of Louis XIII. Two of his brothers were medallists, and Eugène studied under one of these, Amédée, and also at the Ecole des Beaux-Arts. The list of his own works and those he executed in collaboration with his brother is very long. He was born at Epernay in 1891, and, owing to failing sight, had for some years ceased to exhibit at the Salon.

(*Athenæum.*)

NUMISMATIC SOCIETIES, MUSEUMS &c.

ROYAL NUMISMATIC SOCIETY.

April 20th. Dr. Arthur J. Evans, Vice-President in the Chair. Mr. Leonard P. Johnston was elected a Fellow of the Society and Messrs. Coleman P. Hyman, W. Longman, H. Oppenheimer, and Professor H. Brown were proposed.

Mr. W. J. Hocking exhibited specimens of recent Imperial and Colonial coins and a composite medal illustrating the effect of blows from the dies in striking; he also explained the process by which the design is transferred from the sculptor's wax model to the actual dies. Mr. Garside showed a specimen of the very rare proof crown of 1879. Mr. F. A. Walters, F.S.A , brought a fine specimen of the second brass coin of the Empress Domitia struck at Alexandria, of which only one other specimen in much poorer condition appears to be known. Dr. Arthur Evans exhibited a series of ancient British coins illustrating the gradual degradation of the type.

Mr. G. F. Hill read a paper on a hoard of Roman and British coins found in South Hampshire near the Dorset border. The hoard, which was contained in an earthenware pot, contained 677 pieces in all, including 13 Republican denarii dating from the period

Original from CORNELL UNIVERSITY

172-151 B.C. to Octavian; two denarii of Tiberius and Vitellius; 21 asses from Claudius to Hadrian; imitations made in Gaul or Britain of Denarii and Asses (including two of Julius Caesar and Vitellius); 83 silver and 206 copper British coins of the usual South West type; 9 silver British of another known type; 1 silver and 1 copper coin of a type hitherto known to occur only in the Channel Islands; two blanks for striking coins and — the special feature of the hoard — over 300 cast copper coins showing the final degradation of the native British type, the head on the obverse being represented by a Y shaped object accompanied by pellets, the horse on the reverse by an arrangement of pellets. Some 40 varieties of this type were distinguishable in the hoard. Previous finds have shown that the struck copper coins from which the cast ones were derived were in circulation to about the end of the first century after Christ. The Roman coins found in this hoard shows that the native British coinage in its final stage of degradation went on to about the middle of the second century. Certain cast coins of tin were previously known, but their attribution to Britain was not quite certain; there could be no doubt however of the British origin of these cast coins. When the moneyer lost the art of engraving dies he evidently took to casting coins in flat moulds. There was some reason to believe that they were afterwards hammered out to give them the appearance of struck coins. The question might be asked whether these coins were specimens of a regular currency or whether they were the produce of a single person's experiment and never in general circulation. Their lack of wear as constrasted with the struck coins might incline one to the latter view, but on the whole there were no serious reasons for doubting that they were current coins. The paper gave rise to an interesting discussion in which Mr. Grueber, Mr. Roth, Mr. Monckton, Mr. Stephenson and Mr. Walters took part.

BRITISH NUMISMATIC.

April 26. — Mr. Carlyon-Britton, President, in the chair. — H.E. the Marquis Guglielmo Imperiali, Italian Ambassador, was elected an Honorary Member; and Messrs. H. Gibson, Raymond C. Carlyon-Britton, and Coleman P. Hyman, Members.

The President read a further section of his 'Numismatic History of the Reigns of William I. and II.,' in which he treated the counties of Huntingdon, Kent, and Leicester. Coinage at the county town of Huntingdon had begun in, or shortly before, the reign of Eadwig, and although Domesday states that the moneyers then "were not," the mint is represented by every type, save two, of the reigns under discussion. Mr. Carlyon-Britton explained that the statement in Domesday merely referred to the fact that the moneyers no longer accounted directly to the Crown, but probably through the local authority. At Canterbury the same conditions then prevailed, except that of the seven moneyers of the city, two had been assigned to the Archbishop and one to the Abbot of St. Augustine's and every type of the two kings was in evidence to-day. Dover at this period was not a prolific mint, and its known coins were of only nine types of the thirteen issued by William I. and II. Similarly of Hythe only four of the types were preserved to us. Under the laws of Athelstan Rochester had been granted three moneyers, namely, two for the King and one for the bishop; but nevertheless under the two Williams seven types only were known. Romney and Sandwich were each represented by nine types. The origin of the mint at Leicester had hitherto been credited to Edgar, but Mr. Carlyon-Britton was able to prove its existence in Alfred's time by the evidence of a contemporary round halfpenny reading LIGIRA CIVI*tas*. Domesday records that the moneyers paid 20*l.* yearly, and seven of the eight types of William I. and the first two of the five types of William II. had descended to us from this mint. As in his previous contributions, Mr. Carlyon-Britton brought entirely new evidence to bear upon his subject by the production of many inedited coins, and the correction of the readings of others which have wrong attributions in the textbooks. The topographical historian will find much that is both important and new in this 'Numismatic History'

In addition to the large series of silver pennies and cut halfpennies exhibited by the President in illustration of his treatise, Col. Morrieson showed examples of most of the mints under discussion. Amongst other exhibitions were a groat of Edward III. weighing 69½ grains, on which the annulets in the reverse legend were omitted and the N's formed of plain upright strokes; a groat of Edward IV. of 45½ grains, mint-mark cinquefoil, on which the usual fleurs over the crown are absent; a forgery of the shilling of Philip and Mary dated 1557, and a groat of Elizabeth, mint-mark lis, reading on the obverse z instead of the usual ET, by Mr. J. B. S. MacIlwaine; an early light groat of Edward IV., weighing 48 grains and reading DI GRACIA, by Mr. F. A. Walters; and the Victorian proof crown of 1879, by Mr. Henry Garside.

VEREIN FÜR MÜNZKUNDE NÜRNBERG

Die Sitzung vom 6. März 1911 des Vereins für Münzkunde Nürnberg gestaltete sich zu einer sehr stark (auch von auswärts) besuchten Festsitzung. Der Vorsitzende des Vereins C. F. Gebert wies darauf hin, dass durch die bevorstehende 90. Geburtstagsfeier Seiner Königlichen Hoheit Prinz-Regent Luitpold von Bayern für unser Land ein Festtag anbreche, über welchen allgemein Freude herrsche. Wenn der Verein auch zum 70. und zum 80. Geburtstage unseres geliebten Prinz-Regenten grössere öffentliche Ausstellungen von Prinz-Regenten-Denkmünzen veranstaltet habe und diesmal nur im engeren Kreise eine derartige Ausstellung mache, so seien unsere Gefühle der Liebe für unseren hohen Herrn gewiss nicht kleiner geworden. Wir danken ihm für alles was er für unser engeres und weiteres Vaterland getan hat und rufen aus voller Brust: Gott erhalte unseren Prinz-Regenten auch teilweise mit Bezugnahme auf das Werk "Wittelsbach", bei einer Reihe aber auch seine wohlbegründeten anderen Einteilungen, resp. Zuweisungen nicht verschweigend. Allgemeiner Beifall belohnte den unermüdlichen Forscher. Nun wurden von den Herren Köhler und Gebert Denkmünzen auf den 67, 69, 70, 80, 81, 84 und 90. Geburtstag des Prinz-Regenten ausgestellt, auch das offizielle Jubiläums-Geld fehlte nicht. Auch Herr Langkammerer hatte eine schöne Auswahl seiner Prinz-Regenten-Medaillen mitgebracht. Weiter legten noch die Herren Stahl, Schätzler und A. Müller interessante Stücke vor.

In der Sitzung vom 3. April gab der Vorsitzende, wie immer, zuerst den Einlauf bekannt und setzte die numismatischen Zeitschriften in Umlauf. Herr Schatzmeister Lohrer sprach dann (wie alljährlich in der April-Sitzung) über "Bismarck-Medaillen". Diesmal zeigte er zunächst die 1870 in Frankreich während des Krieges geprägten Stücke mit Bismarck vor, weiter kamen anlässlich des 40 jährigen Jubiläums des deutschen Reichstages jene Stücke daran, welche sich auf den Reichstag bezogen und endlich zeigte eine dritte Lade die Neuerwerbungen seit April 1910, darunter sehr seltene Stücke. Unter lautem Beifall sagte der Vorsitzende, dass es im Verein auch fernerhin so gehalten werden solle: "Im April spricht Herr Lohrer über Bismarck-Medaillen", denn man sieht und hört immer was neues. Herr C. F. Gebert erinnerte dann daran, dass vor 10 Jahren die von ihm im Auftrag des Vereins verfasste Arbeit: "Die Marken und Zeichen Nürnbergs" erschienen ist. Er gab nun einen Nachtrag zu dem seinerzeitigen Werk, in welchem alles was sich seit jener Zeit an Nachträgen und Aenderungen gefunden (grösstenteils durch archivalische Forschungen) zur Mitteilung gelangte. Am interessantesten war wohl die Aufklärung, dass die von Imhof als "Stahlschützen-Zeichen" auf-geführten Stücke keine solchen, sondern Tuchzeichen sind, wie Herr Dr. Buchenau bereits vermutete, und welche Vermutung jetzt durch den Vortragenden urkundlich nachgewiesen wurde. Herr J. Frankenbacher sprach dann über "Schützenmedaillen, bei welchen kein Schiessen stattgefunden hat". Es war eine heitere Viertelstunde, als der Herr Redner "Schützen". Medaillen von Maskenfesten etc. vorlegte, aber besondere Heiterkeit erregte doch eine sich ganz ernsthaft gebende Medaille auf das IX. Deutsche Bundesschiessen in—Chemnitz!! wo noch nie ein solches stattfand. Weiter legten die Herren König, Perge und Stahl noch verschiedene Münzen und Medaillen vor. — Vom Vorsitzenden war vorher auch der Tod der

CATALOGUE

OF

COINS and MEDALS for SALE

Special attention is directed to the fact that every coin or medal catalogued in the following lists is guaranteed to be absolutely genuine (except when expressly stated in the description to be otherwise) and if not approved of can be returned, when the full amount paid will be refunded.

Collectors will also kindly note that every care is taken when compiling the catalogues not to overrate the condition of the pieces but to faithfully represent them according to their merits.

All orders should be sent to Spink & Son Ltd., 17 and 18, Piccadilly, London, W.

VARIA

THE SALTING BEQUEST.

Amongst objects of the Salting Collection exhibited at the Victoria and Albert Museum are some well-chosen examples of the medallist's art as seen in the work of Pisanello, Matteo de' Pasti, Sperandio, Gentile Bellini, and others. The last-named is represented by a portrait medal of Mohammed II., the Sultan who employed him as his court painter at Constantinople in 1479. Some of these were exhibited at Burlington House in 1888. The medal by an unknown hand representing 'Leonardo Loredano' is interesting in regard to the portrait of that Doge of Venice in the National Gallery. That which is here seen to bear the features of Isotta da Rimini will naturally be compared with the alleged bust of the same lady in the Campo Santo at Pisa and the 'Portrait of a Lady' in the National Gallery (No. 585) which was formerly identified with her.

Le 9 avril 1911, la ville d'Avignon célébrera le centenaire du Musée Calvet. C'est en effet la date anniversaire d'un décret impérial qui a autorisé la fondation de cet établissement. Esprit Calvet, médecin, archéologue, naturaliste, avait réuni pendant sa vie une assez belle bibliothèque d'amateur, un riche cabinet de médailles et d'antiques, ainsi que quelques tableaux. Il laissa le tout à sa ville natale pour former une bibliothèque publique dont l'administration fut constituée dès 1811. Mais c'est à partir de 1826 que la ville d'Avignon, en réunissant sous une direction unique les collections de Calvet et le musée-bibliothèque municipal, a donné son organisation actuelle au Musée Calvet qu'elle installa quelques années plus tard dans le charmant hôtel de Villeneuve-Martignan. A l'occasion de ce centenaire, une exposition d'art provençal, avec section rétrospective, aura lieu au Palais des Papes.

Au Puy. — M. Achille Montelhet, inspecteur de la Compagnie Paris-Lyon-Méditerranée, à Arvant, vient d'offrir à la ville du Puy, pour être placée au musée Crozatier, son importante collection de numismatique.

Cette collection comprend 12.000 pièces romaines depuis le Ve siècle avant J.-C., jusqu'au Ve siècle après J.-C. ; 2.000 pièces gauloises et françaises depuis Charlemagne ; 2.500 pièces de nations étrangères ; 3.000 médailles, jetons, méreaux, poids monétaires depuis le XIIIe siècle et enfin 500 pièces diverses, grecques, égyptiennes, etc.

M. Montelhet a mis deux conditions à cette libéralité : l'obligation d'exposer *toutes* les pièces de la collection, et sa nomination comme conservateur de la galerie de numismatique, dont il se propose d'établir le catalogue critique.

Le Comité français des expositions à l'étranger vient de charger M. Ovide Yencesse d'exécuter la plaquette commémorative de l'exposition de Bruxelles de 1910.

*
* *

Die Silber-Hochzeit des württembergischen Königspaares (8. April) hat in erster Reihe die Prägung von offiziellen Geld- und Denkmünzen zur Folge gehabt. Es sind Drei-Mark-Stücke und Medaillen geprägt worden. Die Modelle fertigte Professor Habich von der K. Kunstschule in Stuttgart, die technische Ausführung, Verkleinerung der Stempel und Fertigstellung der Prägestempel waren der bestbekannten Firma Wilh. Mayer und Franz Wilhelm in Stuttgart übertragen, die Ausprägung der silbernen Medaillen und Münzen erfolgte in der Kgl. Württemb. Münze.

ADVERTISEMENTS

CORONATION OF KING GEORGE V.
& QUEEN MARY 1911.

The Obverse presents finely modelled crowned portraits of their Most Gracious Majesties KING GEORGE V. and QUEEN MARY, in their Royal robes and jewelled decorations, dividing the legend: " GEORGE V. — MARY ".

The Reverse depicts King George V. crowned, enthroned, and wearing his Coronation robes, holding the Royal Sceptre in his right hand and in his left the Orb. On his left side Queen Mary is seated, crowned and robed, holding Sceptre, and with her face turned towards the King. On the right of His Majesty, Britannia, standing and holding her trident in her left hand and a branch of myrtle in her right, is turning towards their Majesties. At the feet of the King rests the British Lion, behind which is the Union Shield, the rising sun in the background. Behind Her Majesty the Queen is a view of Westminster Abbey. Below, to right and left, are Amorini, linking together festoons of the National flowers. In the exergue, in three lines: " HOMAGE OF THE BRITISH EMPIRE, 1911 "; above, " GOD SAVE THE KING. "

We have had the honour of submitting specimens of the medals to H.M. The King who has expressed his " approval of their design and execution ".

The medals are struck in gold, silver and bronze; also in smaller sizes in white metal for school children &c.

PRICES.

Size	No.		
$1\frac{1}{8}''$	1.	Best White Metal (equal in appearance to silver, will not tarnish), fitted with ring and safety-pin.	2/- dozen

THE

MODERN COPPER COINS

(16th to 19th centuries)

OF THE

MUHAMMADANS

BY W. H. VALENTINE.

Price 10/6 net.

This work, is designed to popularise the study of Muhammadan Copper Coins, and is the outcome of a student's endeavour to identify and arrange them. To this end the author has made faithful drawings of all the specimens of this class of coin that he has been able to find. Commencing with Turkey, the reader is taken numismatically through Egypt, Tripoli, Tunis, Algiers, and Morocco, to Nigeria (for which place the Royal Mint has recently struck a new coinage) and from thence back to East Africa and Arabia. Crossing from there to Europe, the tour continues through the Crimea, Georgia, Persia, Afghanistan, Bukhara, and terminates in Chinese Turkistan.

About a thousand coins struck during the last three centuries are illustrated (including many which have not been figured in any previous work) and the Arabic inscriptions carefully transliterated and explained, as shown on the specimen pages.

To assist in the classification of the coins, a geographical arrangement has been adopted, and six coloured maps have been added to enable the reader to locate the various mints.

The interesting field covered by this work has never before been dealt with, and it will be found that by the issue of this volume — compiled with infinite patience by the author — a real and growing need has been met.

The idea adopted by Mr. Valentine of illustrating each coin is a happy one (and indeed in the case of this Oriental series almost a necessity) because by this means the task of identifying each coin is rendered absolutely easy and pleasant, and it is believed the Work will greatly assist in promoting the study and collecting of Muhammadan Coins generally.

Orders for this work should be addrsseed to the publishers.

MONTHLY

NUMISMATIC CIRCULAR

THE *Monthly Numismatic Circular* will be forwarded post free on receipt of half-a-crown (= 3 francs = 2 ½ marks = 60 U. S. A. cents, in P. O. O. or stamps) for one year's subscription.

Should any applicant not receive it regularly by post, please notify the omission to us, when it shall be at once rectified. All communications respecting the Numismatic Circular (either referring to its literary portion or to its catalogue of coins, &c. for sale) should be made to our West-End house, 17 and 18 Piccadilly, London, W., where all letters and orders will receive immediate attention.

Cheques crossed National Provincial Bank of England, Piccadilly Branch.

Any coins or medals can be had on approval if the applicant is known to us, or, if not, on receipt of references. Postage on coins, as a rule, is paid out.

Orders for coins from the annexed list will be executed in rotation, but preference will be given to clients who are willing to purchase outright, providing the coins answer to the description.

Coins not approved of can be returned.

LA *Circulaire mensuelle de Numismatique* sera adressée franco à toutes les personnes qui voudront bien en faire la demande en nous faisant parvenir 3 francs 20 centimes par mandat postal pour un abonnement annuel.

Nous prions nos correspondants d'adresser toutes lettres et communications relatives à la partie littéraire du journal ou au catalogue des monnaies et médailles, à notre établissement, 17 et 18, Piccadilly, Londres, W.; nous y répondrons immédiatement.

Les ordres seront exécutés à tour de rôle en donnant la préférence aux commandes effectives.

Toutes les pièces seront envoyées *à condition*, si le client le désire, mais le port de retour est à sa charge.

Les personnes qui ne nous seraient pas connues sont priées de nous fournir des références.

DAS *Numismatische Circular* wird portofrei, nach Empfang von 2 ½ Mark (3 Kronen ö. W.) als Jahresbetrag, geschickt.

Sollte jedoch ein Abonnent dasselbe nicht regelmässig erhalten, so bitten wir, uns gefälligst Anzeige davon zu machen, um weitere Unregelmässigkeiten zu verhüten.

Alle Mittheilungen, welche dieses "Numismatische Circular" betreffen (gleichviel ob dieselben sich auf den literarischen Teil oder auf das Verzeichnis der Münzen, &c. zum Verkauf beziehen), sollten an unser West End Etablissement, 17 und 18 Piccadilly, London, W., gerichtet werden, wo Briefe und Aufträge sofortige Erledigung finden.

Jede Münze oder Medaille wird zur Ansicht gesandt. Bestellungen werden nach Reihenfolge des Einganges effectuirt und Nichtconvenirendes zurückgenommen.

Rückporto zu Lasten der Herren Besteller.

Uns unbekannte Herren Sammler werden um Aufgabe genügender Referenzen ersucht.

GREEK COINS.

THE ANCIENT COINS OF SICILY.

(*Continued from col. 12811.*)

THE TYPES.

The crab found in the river from which the town took its name was chosen as the παράσημα or badge of the town.

Dr Calman of the S. Kensington Nat. Hist. Museum after examining a specimen of the didrachms of Acragas expressed his opinion that the crab thus represented was that called Telphusa fluviatilis by Dr H. G. Bronn. The more modern name is Potamon Edulis, so called by Latreille, 1818.

The carapace or shell of the specimens seen in the S. Kensington Museum seem at first sight rather more round than those on the coins, but in some lights the depression of the shell at the sides near the back, or hinder part, which is often marked on the coins, is clearly visible on the actual specimens of the crabs.

In volume XXXVIII of "the Transactions of the Royal Society of Edinburgh" p. 179 Dr. D. W. Thompson published an article on the Astronomical significance of Types on the Coins of ancient Greece.

He refers to an article by Jean Svoronos in the Bulletin de Correspondance hellénique. Jan.-Juillet 1894 "Sur la signification des types monétaires des anciens ".

In Dr. Thompson's article the dolphins on the coins of Syracuse, the lion on the exergue of the Demareteia, the eagle, and the crab on the coins of Agrigentum, are all regarded as having reference to the well-known astronomical symbols :

" The crab corresponds to the eagle on the other side. The whole symbolism probably therefore has reference to the tropic of Cancer, and to the midsummer rising of the sun in that sign in the classical epoch, as in the older days it was at the same season of the year associated with Leo. " Pliny *H. N.* II, 6 attributes the invention of the signs of the Zodiac to Cleostratus of Tenedos circa 500 B.C. The more clear account however is that of Eudoxus of Cnidus, who died in 352 B.C., and we only know of their work through Aratus circa 260 B.C.

The expression zodiac is Greek. ζώδιον is the diminutive of ζῶον. Hence ὁ ζωδιακὸς κύκλος is the Zodiac, they also used ἡ ζωδιακὴ ἔδος.

There is an interesting work on the astronomy of the ancients by Sir George Cornewall Lewis in which he says Aristotle is the first extant writer who mentions the Zodiac.

Delambre in his work *Hist. d'astron. anc.*, vol. I, p. 29 says Œnopides was the first to discover the Zodiac and Antolycus also mentioned it. The Zodiac was the result of the discovery of the oblique path of the sun in its annual progress, and the division into twelve parts arose from the lunations which nearly coincided with the solar year.

Œnopidus is said by Diodorus (1.98) to have learnt astronomy from the Egyptians.

Thales is also said to have travelled in Egypt by Diog. Laertius (I, 27). Thales was born in the 35. Olym. circa 580 and lived to be an old man. Greek mythology has but little connection with the heavenly bodies and the stories which have any such reference are of comparatively late date. Astronomical ideas were sometimes added to myths which in their origin had no such reference. Astrological prediction was introduced after the time of Alexander the Great.

The earliest appearance of the well-known signs of the Zodiac is found on Babylonian boundary stones and the earliest of these is said to date from about 1400 B.C. The Greeks of Miletus and Asia Minor derived their knowledge direct from Babylon at first in the manner of Astrology, and it was the Greeks who taught the more scientific study of Astronomy to the Babylonians.

The Egyptians learnt astronomy from the Babylonians, and Diodorus Siculus is probably wrong in taking it for granted that because certain men had travelled in Egypt therefore they had learned the signs of the Zodiac from that country.

In the *Bulletin de correspondance hellénique*, 1894, p. 101, is an article by Jean N. Svoronos sur la signification des types monétaires des anciens. The one coin which bears the signs of the Zodiac represented on p. 104 is a coin of Perinthus, but the date of that coin is about 222, 235 A.D. A large bronze coin of Alexander Severus cannot be brought forward as showing an astronomical reference in other types of coins issued 600 years earlier.

From the date at which the signs of the Zodiac were made known by these poets it seems very improbable that the crab or the eagle on the coins of Agrigentum had any connection with astronomical theories. The well-known custom of the ancients of regarding common living creatures as emblems of the nature-power manifested in the locality in which they are found is a much more likely reason for the choice of these creatures as types and parasema. The owls frequenting the hills of Athens, the tortoises abounding on the shores of Ægina, the swans of the lake at Camarina, the leaves of the celery plant at Selinus, are parallel examples with the crab at Agrigentum. There is no need to seek astronomical reasons for the choice of such types. Moreover no passages in ancient literature support such an idea.

The only passages which give us any thoughts of the ancients concerning the symbolism of the crab are connected with its use as a protection from the influence of the evil eye. Jahn in 1855 published a note on "Aberglauben des bösen Blickes" in the "Berichte de Sächsischen Gesellschaft der Wissenschaften", p. 99.

But no reference to this superstition, in connection with the use of a crab as a coin-type, has been or is likely to be found.

THE EAGLE.

The eagle is so well-known as a symbol of Zeus that the idea of connecting it with a constellation seems very unlikely. K. Sittl contributed an article "Der Adler als Attribut des Zeus" to Fleckeisen's " Jahrbücher für Classiche Philologie " in 1885, which is well worth attention.

The eagle on the coins of Croton and Elis appeared about 480 B.C. but a flying eagle had appeared a hundred years earlier on the coins of Siphnos.

The eagle which is represented on the coins of Agrigentum was probably the lesser spotted eagle (Pomarina). It was a frequenter of rivers and lakes, and preyed on ducks and frogs.

A description of this eagle may be seen on the history of the Birds of Europe (vol. V by Henry E. Dressen).

The dusky colour of this bird agrees with the description of the eagle in Iliad. XXIV, 315. " And straightway (Zeus) sent forth an eagle, direst omen of winged birds, the dusky hunter called of men the black Eagle. " (περκνόν). An interesting account of the eagles known to the Greeks may be seen in the Edition of the Birds of Aristophanes by B. B. Rogers. (Int., p. xxiii).

Confer the " Glossary of Greek Birds" by Darcy W. Thompson.

ARCHAIC PERIOD.

The coins of this period are all of silver and may be divided into two classes, those with a very flat fabric in size ·95, and those of a smaller size ·3 but of the same weight, and of thicker fabric.

As the Euboic Attic didrachm weighed 135 grains and the weights of some of the specimens in the British Museum of coins of Agrigentum vary from 136 (one weighs 138) to about 129 grains, they are therefore didrachms.

The smaller thicker coins bear the crab in a circular depression. Sometimes the depression is so sunk in the centre of the flan as to leave a raised rim around similar to that on the coins of Syracuse. As a rule the eagle on the Obverse is turned to the left, but seven out of thirty-seven specimens in the British Museums are turned to the right.

The flat coins are probably the most ancient. The little projecting fragments of the junctions in the casting of the flan are generally visible.

COINS WITHOUT SYMBOLS.

I. Obv. AKRAC ΖΟΤΙΑ. An eagle with wings closed standing to left. No border.

Rev. A crab. No border, flat fabric [1].
Size .95.

II. Obv. AKRA. Similar eagle.
Rev. Similar crab.
Size ·8 or ·85.

III. Obv. AK / RA. Similar eagle.
Rev. Similar crab.
One specimen has the legend AK / AЯ.
Another has the legend AKRA / ΣAↃ.
Another has the legend retrograde AЯKA / AΣ.

COINS WITH SYMBOLS OR LETTERS.

IV. Weight: 136.3 size ·8.
Obv. AKRACA / ΣOTИ. Similar eagle.
Rev. Similar crab; beneath A + Ǝ.

V. Obv. AKRA. Similar eagle.
Rev. Similar crab; beneath, a barley corn.
VI. Obv. AK / RA. Similar eagle.
Rev. Similar crab; beneath, a young male head to right.

VII. Obv. No inscription visible. Similar eagle.
Rev. Similar crab; beneath, Corinthian helmet, without crest, to left.
VIII. Obv. AK / R A. Similar eagle, standing on rock to right: plain border.
Rev. Similar crab; beneath A.
IX. Obv. AK / RA. Similar type.
Rev. CAΣ. Crab; beneath, a young male head to right, diademed.

(*To be continued.*)

1. *This and the following types may be had from 15/. upwards.*

BIOGRAPHICAL NOTICES OF MEDALLISTS

Coin, Gem, and Seal Engravers, Ancient and Modern, with References to their Works.

B.C. 500 — A.D. 1900.

(*Including the names of several hitherto unpublished artists.*)

One-hundred-and-fifty-fourth article.

(*Continued from col. 12822.*)

SIMONS, AMORY C. (*Amer.*). Contemporary Sculptor, born at Charleston (U.S.A.) in 1865; pupil of the Academy of Fine Arts at Philadelphia. He is at the present time (1908) residing in Paris. By him is a pleasing Plaquette entitled "Surprise". In Paris he studied under Puech, and J. Dampt.

SIMONS, HENRY (*Amer.*). Contemporary Sculptor and Medallist, born in the United states; studied in Paris under Chapu, Gautherin, and other Masters.
He is the author of some Portrait-medallions, and exhibited at the Paris Salon, 1908, four Portrait-plaquettes in bronze.

SIMSON, W. (*Brit.*). Mint-master at Bombay (1849-1853); G. J. Blane and Captain J. H. Burke acted under him as officiating officers.

SIMSON *Vide* **SPICER-SIMSON** *infra.*

SINIBALDI, LODOVICO (*Ital.*). Pontifical Mint-master at Ancona, 1512.

SINAYEFF-BERNSTEIN, LEOPOLD (*Russ.*). Contemporary Sculptor, born in Russia; pupil of Dalou. At the Paris Salon, 1907, he exhibited a Portrait-medal of Eugène Manuel.

SINGER, GEORG HEINRICH (*Germ.*). Mint-warden at Breslau, 1746-1750; Mint-master 1750-1764; Mint-director, 1764-1770. In 1770 he was transferred to Berlin on his appointment to the office of General-director of the Mint (Ober-Münzdirecktor) in the place of Von Studnitz. He died on 22. June 1779. His initials occur on two medals of 1757, by Ulitsch.

SINGLETON (*Brit.*). Counterfeiter of ancient and modern coins and medals, *circ.* 1825-1840. The sketch reproduced below gives a humorous portrait of this sorry individual, who is described in the Sale Catalogue of a Clergyman, &c., Sotheby's July 1839, p. 14, as "the now well-known dealer, whose sanctified appearance, and deceptive demeanour, have but too well enabled him to succeed in disposing of his forgeries as genuine, and by so doing injure the science of numismatics and defraud the unwary".
Singleton's forgeries are mostly casts, some from originals, others made up from ideal coins, which he hawked through the country, and took care to sell mixed up with genuine specimens, to collectors. His fabrications comprise imitations of the coins of Athens, Caulonia, Syracuse, Metapontum, &c., Denarii of Julius Caesar, Nero, Galba, Titus, and others, including rarities; Anglo-Saxon Pennies of Eadwald, Regnald, Vigmund, Eanbald, &c.; Halfpence of John, Edwards IV., etc.; Pennies of William I., Henry II., John, etc.; Half groats of the Edward and Henries; Groats of Henry VIII., Elizabeth, Charles I., and others; shillings of Henry VII., Philip and Mary, Charles I.,&c.; Halfcrowns of Elizabeth, Charles I. (two Siege pieces); Crowns of Edward VI., Charles I., various, one of Oxford with the City under the horse also Half Crown of same type; Scottish Pennies and Groats, various; a crown of Mary and Henry; a medal, purporting to be of gold, of David II. (imitation of the English Noble); Unicorn, and Half Unicorn of James III.; Medal of the Saviour, etc.
In the Dean of St. Patrick's auction sale catalogue, 1842, a number of other forgeries by Singleton are enumerated under lots 440-442, Imitation British gold coins (3); Æ coins of Offa, Eustace, Stephen, Richard I.; Richard II. Groat; Henry VII.

Shilling; Cromwell's Shilling; Charles I. Ten and Five-shilling pieces, and Half Crown, Oxford.

Doctor Edwards, Alias Singleton,
Alias James – from a sketch made
during his Kentish Tour in 1840

Falsi denarii spectatur exemplar:
pluribusque veris denariis emitur!
Pliny Hist. Nat.

Forgeries by Singleton still turn up now and then. They may not all be his work, but his name is associated with them as the seller. He traded under the aliases of Dr Edwards, Mr. James, &c.

SINISTRI, GIUSEPPE (*Ital.*). A famous Forger of ancient coins, who was residing at Rome during the second half of the eighteenth century. Caroni, *Ragguaglio del viaggio compendioso di un dilettante antiquario condotto in Barberia* (Milan, 1805, t. II, p. 183) mentions that this counterfeiter executed amongst others three imitations of a fragment of Aes rude, of rectangular form, with corners rounded, bearing on one side a sword scabbard with the inscription N ROMANOM, and on the other a sword, the pommel of which represents a ram's head, and with the guard bent in the form of an ∾ (*Vide* Babelon, *Monnaies consulaires*, I, pp. 8-9).

SIRIES, LOUIS (*French*). Gem-engraver of the eighteenth century, whose productions are dated between 1733 and 1760. He was a Frenchman, Goldsmith to Louis XV., but settled at Florence in 1740 where he held the appointment of Director of the Grand Ducal Gallery. Born about 1686, he died some time after 1766.

According to Giulianelli, he learnt, self-taught, the art of gem-engraving, in the space of seven years. Gori speaks in high praise of of the artist, and St. Laurent wrote a special volume to eulogise his work.

The best known gems by Siries described by Raspe are : Saturn and the Zodiac, lapis lazuli; — The twelve great divinities grouped in a circle around a nude figure of Venus, lapis lazuli; — Ganymede and the eagle (signed : **L. S.**); — Bust of Pallas, with the aegis, helmet ornamented with figure of Victory (signed : **L. S.**); — Another, the helmet adorned with a dragon (**L. S.**); — Others (*Raspe*, T. G., n° 1685-7); — The assembly of the gods to decide the contest between Pallas and Neptune, about naming the city of Athens, and about the olive-tree and the horse, lapis lazuli (signed : **LOVIS SIRIES. FLORENCE. 1750**); — Another, smaller (signed : **L. S.**); — Triton, sardonyx (**L. S.**); — Fall of Phaeton, cameo (signed : **LOVIS. SIRIES**); — Segment of Zodiac separating an assembly of the gods from a man tilling the ground, sardonyx (**L. S.**); — Bacchus drunk, raising his slight drapery and carrying the thyrsus upon his left shoulder, cornelian (signed : **L. SIRIES.** Raspe, describing this gem, says : " Siries, who scorned the rules of antiquity, seems to have been desirous of outdoing the incomparable original, having thrown the centre of gravity upon the two knees, and placed the legs much more parallel then they are in the original.); — Bacchus crowned by Victory in car drawn by a goat and panther, preceded and followed by Fauns; on the bezel, a Bacchanalian procession, cornelian (signed : **L. S.**); — A rural festival, cornelian (*Raspe*, n° 4374); — Triumphal Entry of Osiris into Egypt, lapis lazuli (signed : **LOVIS SIRIES. 1734**); — Bacchanalian Procession with Silenus in the middle, chalcedony (signed : **LOVIS. SIRIES. 1752**); — Nessus carrying off Dejaneira, cameo (**L. S.**); — Hercules (**L. S.**); — Head of young Hercules (**L. S.**); — Hercules rooting up the thorns with a hatchet (2 varieties; both signed : **L. S.**); — Hercules in frenzy destroying himself by fire on Mount Oeta, lapis lazuli (signed : **LOVIS. SIRIES. 1754**); — Another, smaller (**L. S.**); — Cupid in a car drawn by a panther and goat led by another Cupid (**L. S.**); — Battle scene, lapis lazuli (several varieties, signed : **L. S.**); — A general carrying the Roman standard, and battle scene in the distance, lapis lazuli (**L. S.**); — A pyramid on each side of which is seen a Victory in her car, with a crown and another Victory higher up; on the ground a bacchanalian procession, and in the clouds a goddess presenting a child to one of the gods; in the exergue, two Genii sitting, and signature : **L. S.** (a very painstaking work, but in bad taste); — A group of twelve female figures sacrificing in a leafless forest (**L. S.**); — A Lady, with a rod, stirring the fire of an altar in a magnificent gallery (signed : **LOVIS SIRIES. 1753**); — Eight persons sacrificing a bull (**L. S.**); — Sacrifice to Bacchus, cornelian (**L. S.**); — Amphion, playing on the lyre, builds the walls of Thebes, cameo (**L. S.**); — Jason carrying off the Golden Fleece (**L. S.**); — Meleager and Atalanta, cornelian (**L. S.**); — Achilles, seated (**L. S.**); — Diomedes, lapis lazuli (signed : **LOVIS SIRIES A FLORENCE 1755**); — Another, cornelian (**L. S.**); — Triumphal entry of Alexander into Babylon (signed : **LOVIS SIRIES. 1754**); — Bust of Alexander the Great; — Head of Ptolemy X. Auletes, in the character of a young Hercules crowned with laurel (signed : **L. S.**); — Diogenes in conversation with Alexander, cornelian (**L. S.**); — Head of Galba (**L. S.**); — Unknown laureated head (**L. S.**); — A female figure, half nude, declaiming (**L. S.**); — A warrior near a tree in a landscape (**L. S.**); — An ensign-bearer, battle scene in background (**L. S.**); — King and Queen clasping hands, being acclaimed by a crowd (**L. S.**); — A meeting of four kings; in the background a palace and spectators (**L. S.**); — Flora receiving the homage of Cupid and the nymphs; — A triumphal scene (signed : **LOVIS SIRIES. 1734**); — Triumph of the sun; the bezel decorated with a number of small bas-reliefs (signed : **LOVIS SIRIES. 1734**); — Landscape, and a chase (**L. S.**); — Bacchanal (**L. S.**); — Two oxen slain under the influence of some divinity in the clouds (**L. S.**); — A banquet in a garden (**LOUIS SIRIES. 1733**); — Triumphal entry of Alexander into Babylon (**LOVIS SIRIES. 1752**); — General embarking near a pillar on the shore (**LOVIS. SIRIES. 1755**); — Battle scene on a bridge (**L. S.**); — Engagement of infantry (**L. S.**); — Bacchanalian scene (**L. S.**); — Allocution (**L. S. 1752**); — Engagement of cavalry (**L. S.**); — Battle scene; — Pallas, and other goddesses, conversing in a forest (**L. S.**); — Allocution (**L. S.**); — A crowd assembled round an altar (**L. S.**); — A banquet (**L. S.**); — A rural festival, or a vintage (**L. S.**); — A rural festival, or harvest (**L. S.**); — Architecture (**L. S.**); — Departure of Regulus (**L. S.**); — Historical subject (**L. S.**); — An embarkation (**L. S.**); — A brilliant stone, the bezel decorated with a number of figures (**L. S.**); — A bull passing in a forest, with a man and a woman (**L. S.**); — A large vase, ornamented with a banqueting scene (**LOVIS SIRIES. 1756**); — Others, varieties of similar type (**L. S**); — Judith holding the head of Holophernes (**L. S.**); — A saint with a sceptre (signed : **L. S.**).

Louis Siries was one of the most admired and renowned engravers of his day. His microscopic jewels were indeed remark-

Original from CORNELL UNIVERSITY

able performances; among them, a Gallic cock, so tiny, that it was hardly discernible to the naked eye, but yet perfect in every part when viewed with the lense; also a pair of scissors of gold a fifth of an inch long, which cut paper, and were so small, that one of the limbs of such a scissor was once lost under the nail of the person who was finishing it; he executed a number of little knick-knacks exceedingly small and fine; he carved some bas-reliefs in coloured steel, comparable, as Mariette says, to the finest miniatures; and in short, engraved very small figures on fine stones, which could not be seen distinctly without the help of a magnifier, and which nevertheless, according to Mariette, are executed with great precision. "His talent lay in achieving supposed impossibilities, and the perpetual aiming after originality; dreading nothing so much as the being thought an imitator of the ancients." In accordance with these principles, his works usually consist of numerous microscopic figures, which Natter unceremoniously styles *mere scratches*, although Raspe allows them to display considerable spirit when examined with the magnifier; though they fall infinitely short both in arrangement and finish, of the similar productions of P. M. da Pescia, whose forte also lay in this department. Raspe therefore justly puts down in the category of "difficiles nugae" and the "labor ineptiarum" these highly vaunted nonpareils of the too original Gaul.

"Many of his works have found their way to England; some were in the Marlborough Collection, and all that I have seen fully justify Natter's sentence upon them. For the most part they are on thin disks of golden sard let into deep moulded frames of white agate, a combination designed to pass for a single stone, and which indeed, has completely imposed upon Gori, who talks with wonder of this frame work and the levelness of the field within as matters involving incredible difficulties in their execution, as certainly would be the case if attempted in a solid stone. But his heads are weak and devoid of expression, so are his figures, and his landscapes are in good sooth mere scratches." All are signed either with L. S. or the name in full.

The chief productions of L. Siries enumerated by Gori are his trial-piece, in 1747, on lapis-lazuli in a border of the same — subject, the Crucifixion, in intaglio on both sides; in the same material, but in relief, "The wonders of Nature, the Arts, and Sciences;" cameo, the bust of Louis XV. encircled by the zodiac, on an onyx of three layers, and presented by him to the king; heads of Francis and Maria Theresa facing each other, in cameo; Sol in his car, in the centre of the zodiac; Hercules and Antaeus, the largest piece he attempted; the Fall of Phaeton; Diomede, master of the Palladium; Hercules fully armed advancing to the combat; Pentheus cutting down the vines; Æsculapius leaning on his staff; Mercury carrying the infant Bacchus to the nymphs; Aurora and Cephalus; the young Hercules; two heads; the mourning Achilles, seated. For Baron Stosch he engraved "the Discovery of Ancient Monuments" on a yellow sard; on a very minute gem the Sacrifice of a bull at an altar, with seven figures of attendants; Diogenes in his tub, conversing with Alexander (King, *Antique Gems*, p. 436).

The Austrian Imperial Family.

As early as 1757, a catalogue was published of Louis Siries' gems entitled: "*Catalogue des pierres gravées par Louis Siriès, orfèvre du roi de France, présentement directeur des ouvrages en pierres dures de la galerie de S. M. Impériale à Florence,*" Florence, 1757, 4to. This catalogue comprises 168 numbers.

The Empress Maria Theresia purchased all these cameos and many others for the Imperial collection. The largest of them, executed in commission for the Vienna Court, in 1756, when the artist was about 70 years of age, portrays Francis I. and his Queen surrounded by the whole Imperial family (14 portraits); it is signed: **LVD. SIRIES SCALP.FOR.** He was paid 2681 florins for this work.

Siries was also employed as Die-engraver for the Mints of Florence and Pisa under Francesco III., and Pietro Leopoldo. In a letter dated in June 1766, addressed to a M. Verschot at Brussels (and now in the possession of the Belgian medallist, M. Franz

Francescone of P. Leopolds, 1771.

Vermeylen), the letter mentions that he was at the time engaged on the engraving of the dies for the 10-Paoli piece, and also for that of a Portrait-medal of Grand Duke Pietro Leopoldo of Tuscany, who had given his approval of the sealing-wax impression.

Portrait-medal of Duke Pietro Leopoldo.

Domanig, *Porträtmedaillen des Erzhauses Oesterreich*, illustrates two medals by L. Siries; the one reproduced above, undated, and signed: **L. SIRIES**; the other, dated 1766, probably the one mentioned in the letter referred to, has on ℞. REPARATIO FELICIVM TEMPORVM.

It appears quite certain that Louis Siries, whose early gems are dated 1733 and 1734, and whose age is given as about 70 by M. de France, Director of the Vienne Cabinet (Babelon, p. 290) in 1756, was still in office as Engraver to the Florentine Mint in 1766. But the engraver of the same name, or whose initials at least are the same, is a distinct person, possibly a son of Louis Siries. To the latter belong the dies of the later coinage of Pietro Leopoldo II., Ferdinand III., and Ludovico III., from some time after 1767 to 1803, and the medal, dated 1811, of the Crusca Academy at Florence, with bust of Napoleon I. on obv. (*Trésor Num.*, 52, 12).

Nagler, Schlickeysen-Pallmann, and other writers are undoubtedly in error as to the period of activity of Louis Siries, when they mention 1747-1795 or 1803.

Original from CORNELL UNIVERSITY

SIRLETTI, FLAVIO (*Ital.*). Gem-engraver of the first four decades of the eighteenth century, a native of Ferrara, but who died at Rome in 15. August 1737.

"He surpassed", says King "all modern artists, in the fineness of his touch, and approached the nearest of all to the antique style of the Greeks. This perfection he attained (according to his contemporary, Giulianelli) by reviving the use of that ancient instrument the *diamond-point*, fixed in the end of an iron tool. Gori states that it was Baron Stosch who suggested to him this idea, as the only possible means of engraving that emerald, a magnificent stone, upon which Clement XI., in 1715, desired to have his pontifical coat of arms cut for his private signet. As he flourished at the time when the zeal of the dilettanti was first directed by Andreini towards the supposed signatures of ancient artists upon gems, he inserted many upon old or retouched stones, and thus enormously enhanced their selling value. Köhler confidently asserts that Andreini's and Stosch's collections were indebted to Sirletti for their finest *inscribed* stones, and so was the famous cabinet of the Jew Medina at Livorno, purchased by Lord Bessborough, as a careful examination has convinced myself. The greater part of those intagli, of wonderful execution, are signed in lettering of incomparable fineness, which we now see are mainly due to his talent. He was in every respect far superior to Natter, who followed in his traces under the tuition of the same arch connoisseur. Sirletti excelled in portraits: his best was that of Carlo Maratta, done for Agostino Massaccio, a pupil of that painter. He reproduced on gems several of the finest statues and busts in the Roman galleries, amongst the last, that so celebrated one of *Caracalla*. His intagli copies of the Hercules Farnese, the Apollo, the Giustiniani Mercury on the Ram, and the Laocoon, are excellent for their drawing and their finish. The last group of amethyst, signed **ΦΣ**, was bought by the Duke of *Beaufort*, not Lord *Bessborough*, as Mariette has it. Vettori possessed the last work done by him, a Laughing Faun, crowned with ivy. His signatures on his *acknowledged* works are **Φ·Σ** and sometimes **ΦΛΑΒΙΟΥ** (*Antique Gems and Rings*, pp. 432-433).

The following gems by Flavio Sirletti are described by Raspe, *Tassie Gems*:

Mercury sitting across a ram, cornelian; — Head of Bacchus cornelian (signed: **Τ·Φ·Σ**. *i. e.* Του φλαβιου Σιρλητου); — Head of Caligula, cornelian (signed: **ΦΛΑΒΙΟΥ**); — Head of Faustina Junior, cornelian; — Portrait of Carlo Maratta, painter, cornelian.

By the same artist may be also the following, which are only signed *Sirletti*: Head of Serapis Ammon, onyx; — Head of Pallas, onyx; — Venus seated on a rock fishing for Cupid (signed: **ΣΙΡΛΗΤ·**); — Head of Juba, onyx; — Head of Plato, onyx; — Head of Augustus, cornelian; — Head of Tiberius, onyx; — Bust of Julia Titi, onyx; Unknown head, cornelian, etc.

He also executed numerous Portrait-camei and intagli.

Flavio Sirletti's two sons, Francesco and Raimondo were also gem-engravers.

Bibliography. — King, *op. cit.* — Babelon, *op. cit.* — Mariette, *op. cit.* — Raspe, *op. cit.*

SIRLETTI, FRANCESCO (*Ital.*). Gem-engraver of the second quarter of the eighteenth century, a son of Flavio S., whose profession he followed at Rome, produced a number of fine works, which are recognizable by his signature **ΦΡΑΓΚ ΣΙΡΛΗΤΟΣ**. Among these are: Venus near a lighted altar and Cupid with a long torch at her feet, cornelian; — Venus reproaching the penitent Cupid, cornelian (signed: **FRAN.SIRLETTI**); — Head of Medusa, after Solon, chalcedony (signed: **ΦΡΑΓΚ·CΙΡΛΗΤΟC·ΕΠΟΙΕΙ**); — Laocoon and his two sons, agate (signed: **Φ. Σ.**); — Head of Socrates, onyx; — Head of Antinoüs, emerald; — Portrait of Frederick III. of Prussia, cornelian; — Portrait of Raimondo Sirletti, a Roman artist, and brother of the Engraver.

SIRLETTI, RAIMONDO (*Ital.*). Brother of the last, and also a Gem-engraver, whose productions are less known than those of his father and brother.

SIVERT, D. (*Germ.*). Warden of the Mint at Danzig, 1698-1734. He signed coins: **D. S.**

SIX (*Dutch*). This signature occurs on a commemorative medal of the famous German poet, Fr. von Schiller.

SIZORSKI, R. (*Pol.*). This signature occurs on a Portrait-medal of Dr A. G. F. von Valdheim, of Moscow, 1840 (in Boston Museum).

S. K. *Vide* **SAMUEL KOLLER**. Goldsmith at Brieg; his initials occur on coins and medals of 1675, and undated.

S. K. *Vide* **SAMUEL KIRCHNER**. Mint-master at Schweidnitz, 1622.

S. K. *Vide* **SIEGMUND KLEMMER**. Mint-warden in Vienna, 1765-1776; was also responsible for the Mint at Kremnitz in 1779.

S. K. D. K. *Vide* **SAMUEL KÖLESERI DE KEELESEER** (*Austr.*). Founder of a Die-sinking establishment in Transylvania.

S. K. D. P. These letters occurs on Austro-Hungarian coins of 1775 (?)

SKETCHLEY, I. (*Brit.*). A Birmingham Die-sinker of the latter end of the eighteenth century. His signature occurs in various forms on Prince of Wales Masonic Halfpenny Tokens, 1794 (*Marvin*, p. 42, 48, nos LXII-LXVII). The name is spelt: **SCETCHLEY, SKETCHLEY, SCHICHLEY**, etc. On one specimen the signature: **MASONIC I. SCHRICHLEY FECIT.**

SKIDMORE (*Brit.*). Counter-manufacturer, and Issuer of Tokens, residing at 123 High Holborn, London, in the nineties of the eighteenth century. His series of Penny- and Halfpenny-Tokens are fully described in Atkins, *Tradesmen's Tokens of the Eighteenth century*, pp. 77-78, 112-122, nos 75-94, 361-510; a number are catalogued under the designation of "Skidmore's Churches and Gates" from the Churches, Gates, and other buildings represented on them. The were engraved by James, B. Jacobs, T. Wyon, and other die-sinkers. Some were issued for Spence, a dealer in coins and medals.

Skidmore also manufactured Halfpenny Tokens of Aylesbury, Evesham, Horsham, Birmingham (*Atkins*, nos 166-170), Salisbury, Kidderminster, Bedale, Rye, and other places. One of his tokens depicts on Rℒ. the Surgeons' Hall, London, and another the Small-pox Hospital, London (*A. J. N.* 922, 1046).

Skidmore had a furnishing repository in Holborn, but his manufactory and iron foundry were situated in Clerkenwell.

Bibliography. — Atkins, *op. cit.* — Pye, *op. cit.* — W. J. Davis, *op. cit.* — Conder, *op. cit.*

SKIR, ANTONI (*Bohem.*). Mint-assayer at Prague, 1767. His initials occur on coins.

SKOPAS. *Vide* **SCOPAS** *supra.*

SKOVGAARD, JOACHIM (*Dan.*). Contemporary Sculptor and Medallist of Copenhagen, and the author of Prize medals of Horticulture, cattle-breeding, Agricultural Shows, &c. One of his medals, with a fine bull charging on Rℒ., imitated from Thurian coins, is reproduced in *The Studio*, XXII, 221.

Bibliography. — R. Marx, *Les Médailleurs modernes en France et à l'Étranger*, Pl. XXXII, 15, 16.

SKRETA SOTNOWSKY V. ZAWORIC, PAUL (*Bohem*). Engraver-general for Bohemia, in conjunction with others, 1619-1620.

SKYLAX *Vide* **SCYLAX** *supra.*

SKYMNOS. *Vide* **SCYMNOS** *supra.*

SKYLAKOS. This inscription occurs on an ancient gem.

S. L. *Vide.* **SAMUEL LAMBELET**. Mint-engraver and Medallist at Clausthal, 1699-1715, and Brunswick, 1715-1726.

SLAUGHTER, MARY (*Brit.*). Modeller of Portrait-medallions in wax, contemporary with James Tassie, latter end of the eighteenth century (*Vide* J. M. Gray, *James and William Tassie*, p. 36, note).

SLECAS *Vide* **CAECAS** *supra.* Misreading on a Gem in the Stosch collection representing a youthful warrior holding a sword (King, *Ant. Gems.*, p. 225).

SLIJPER, HESSEL (*Dutch.*). Mint-master at Hoorn (Westfriesland), 1781-1794.

SLINGSBY, HENRY (*Brit.*). Master of the Mint in London, under Charles II., from the 22nd to 30th year of his reign. Ruding, II, 7, mentions under date 1662, 18. April, that "agreements were made by Sir Ralph Freeman, knt. master and worker of the mint, and Henry Slingby esq. his deputy, with Peter Blondeau (*q. v.*) about coining His Majesty's monies by the mill and press."

SLUGOCKI, ANTONI (*Pol.*). Contemporary Sculptor and Medallist, born at Cracow; pupil of Paul Aubé. At the Paris Salon 1907, he has exhibited two Portrait-medallions: Georges Levet; — Karol W***.

SLUISKENS, PAULUS (*Dutch*). Mint-master at Harderwijk (Guelders), 1652-1687; privy-mark on all his silver-issues, a dog sitting.

SLUYSKEN, PIETER (*Dutch*). Mint-master at Deventer, 1682-1708; privy-mark, a dog sitting to right (1682-1692) or to left (1692-1708).

SLUYSKEN, WILLEM (*Dutch*). Mint-master at Deventer, 1664 (or 1662) to 1670; privy-mark, a dog sitting.

Sm. Signature on the obv. of a medal of the Société académique de chirurgie (note by Dr R. H. Storer).

SMART, C. (*Brit.*). Gem-engraver of the first half of the eighteenth century. He was a pupil of Christian Reisen, and is said to have been working in Paris in 1722. Mariette observes of Smart that he worked with astonishing celerity, so that in a single day he would finish several portraits, and those by no means in a careless style. His best work then known was a head of Monima, after the antique. Raspe describes a head of Alexander the Great by him signed: **C. SMART**, which he calls a poor performance.

BIBLIOGRAPHY. — Bolzenthal, *op. cit.* — King, *op. cit.*, 1872, p. 445. — Mariette, *op. cit.* — Babelon, *op. cit.*

SMELTZING, AREND (*Dutch*). Mint-engraver at Leyden, 1662-1710. He also engraved medals, and was the father of Jan and Martin Smeltzing. He died on 4. October 1710. A medal commemorating the Piece of Breda, 1667, bears his initials **A. S.** (*Med. Ill.*, I, $\frac{282}{251}$).

A. Smeltzing succeeded Reinier Trap as Engraver.

(*To be continued.*)

PORTUGUESE CEYLON COINS.

In the Asiatic possessions of the Portuguese some of the pieces of the currency of Portugal were allowed to circulate as well as certain coins of the neighbouring native rulers, and in large transactions great use was made of the Spanish and Spanish-American Duro of eight rials, a coin which found general acceptance among the maritime nations of Asia. In some of their possessions the Portuguese opened Mints and issued special coins for local currency. The date of the opening of most of these Mints is known. But although the Portuguese had established themselves in Colombo and other places in Ceylon early in the 16th Century, and in 1597, Philip I of Portugal (and II of Spain) had succeeded to the entire sovereignty of the Island under the will of Dharmapala Bahu the lawful king of the whole Island ("The Portuguese in India", Vol. II. Fo. 99, London 1894 by F. C. Danvers) and although it is known that special Portuguese coins were struck there, yet the date of the opening of a Portuguese mint in Ceylon is quite uncertain.

In a letter, dated December 9. 1634, written by the Viceroy, the Conde de Linhares, to Philip III of Portugal (Aragão-Document 84) it is distinctly stated that special coins for Ceylon had been struck both by D. Jeronymo de Azevedo and by Constantino de Sá. Now D. Jeronymo de Azevedo was Governor of the Island till 1612, when he went to Goa as Viceroy, and Constantino de Sá was Governor or Captain-general from 1618 till his death in 1630. So there is no doubt that special Portuguese coins were issued for Ceylon as early as the first quarter of the 17th century. But it is not known whether any were issued during the 16th Century.

Unfortunately no description of the coins issued by D. Jeronymo de Azevedo or Constantino de Sá has yet come to light. But Dr. da Cunha, in his Contributions to the Study of Indo-Portuguese Numismatics, Folio 7, says that the issues were made without any regard to the standard or system prevailing in the Mint of their capital settlement of Goa.

The following much worn silver Tanga: —

Obv. Crowned Arms of Portugal within a bead circle.

Rev. ✠ (Tanga) within a bead circle.

Size 16 mm. Weight: 3 grammes.

is probably a specimen of the issues of either D. Jeronymo de Azevedo or C. de Sá.

Dr. Teixera de Aragão illustrates a similar piece on Folio 221 of his great work, "Moedas Cunhadas em Nome dos Reis, Regentes e Governadores de Portugal, Vol. III, Lisbon 1880", which shews the letter S (*Seilão*) on the obverse, left of the shield.

Aragão attributes it to Malacca. But the piece which he illustrates is worn and badly struck and shews only a very small portion of the crown over the coat of arms. Unfortunately too the piece illustrated in this article is also worn so that the Mint letters (if any) on each side of the shield are not visible. But the shield and the Crown over are distinct, and the treatment, especially of the Crown and also of the Monogram on the reverse, is wholly different to that on any known Malacca piece. Besides, the familiar D M (de Malaca) on the reverse is lacking and Aragão's specimen has S and (?) at the side of the arms on obverse instead of M A or A M found on the Malacca pieces. The Monogram on the reverse too is quite a novelty in the Indo-Portuguese series, and was never used on any piece intended for circulation in Goa.

Documents, still in existence, prove that D. Jeronymo de Azevedo, during his Viceroyalty, took personal interest in the coinage of the Portuguese for India, and that interest may have led him, while Governor of Ceylon, to issue the above Tanga of a new type for Ceylon. The piece was found in Ceylon and is either a Ceylon or a Malacca piece.

In 1640 a silver Tanga, of a new type, was issued by the Colombo Mint, viz: —

Obv. Crowned Arms of Portugal separating the Letters C Lo (Colombo) within a circle of beads enclosed by two line circles.

Rev. Gridiron of St. Lawrence separating the figures of date, 16 40, also within a circle of beads enclosed by two line circles.

Size: 17 mm. Weight: 2.39 grammes.

The letters C Lo, as an abbreviation for Colombo, are found in contemporary Indo-Portuguese correspondence. The letters could also stand for *Ceilão* — but it is more likely that they stand for Colombo, — the Mint of issue. The Portuguese were masters of Colombo, Galle, Trincomalie and Jaffnapatam but, in spite of the will of Dharmapala Bahu, they never had effective occupation of the interior of the Island. The Gridiron of St. Lawrence, the Crest

of Malacca, conquered on the feast day of that Saint, is said to have been displayed on the above Tanga to show that it had been

Original from CORNELL UNIVERSITY

struck according to the monetary laws of Malacca, which laws are now unknown and only remembered through references to them in the official documents of the Goa Mint.

The British Museum possesses a specimen, of rough workmanship, weighing 2.30 grammes, of the same general type as this Tanga but without date or Mint-mark : —
which may be a specimen of the issue of Constantino de Sá.

In 1642 and 1643 the Goa Mint issued for Ceylon, in each year, a silver Double Tanga : —

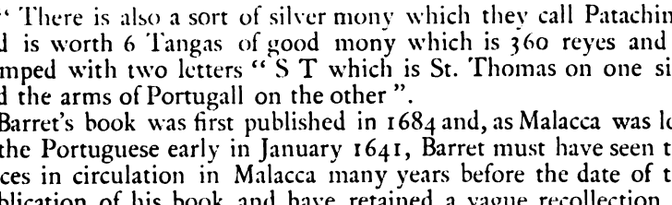
Obv. Crowned arms of Portugal separating the letters G A (Goa) within a circle of beads enclosed by two line circles.

Rev. The Monogram ⅄ separating the letters D S with date under — the whole within a circle of beads enclosed by two line circles.

Size 20 mm. Weight : 4.40.
and a silver Tanga, similar in design, but 16 mm. in diameter and weighing 2.20 grammes.

The letters D S, on the reverse, stand for *De Seilão* ; — the name of the Island, at the time, being indifferently written Ceilão, Seilão or Zeilão. The design on the reverse of these pieces is similar to that of the Malacca silver coins issued from 1632 to 1636 but with D S (*de Seilão*) instead of D M (*de Malaca*) on either side of the Monogram ⅄. This Monogram stands for Tanga — Tanga de Malaca — Tanga de Seilão — but only in the generic sense of money and not as the denominational value of any specific piece, for it appears on Malacca coins of three different values.

The largest of these Malacca pieces (a Patacão novo), weighing 12.40 grammes, is evidently the Malacca coin referred to, under the name of Patachine, by William Barret, a traveller and writer in the 17th century, in his book of travels, reproduced in Hakluyt's Collection of the Early Travels &c. Lond. 1810, Vol. II, p. 411. The extract, given in Da Cunha's Contributions &c. on pages 66 and 67, reads: — Of Malacca he (Barret) writes : —



" There is also a sort of silver mony which they call Patachines and is worth 6 Tangas of good mony which is 360 reyes and is stamped with two letters " S T which is St. Thomas on one side and the arms of Portugall on the other ".

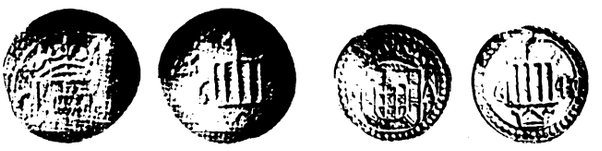
Barret's book was first published in 1684 and, as Malacca was lost to the Portuguese early in January 1641, Barret must have seen the pieces in circulation in Malacca many years before the date of the publication of his book and have retained a vague recollection of the type of the reverse and thought that it was S T instead of ⅄.

There are not any Malacca coins with the reverse consisting of S T.

The D S pieces were quite unknown to Dr. da Cunha when writing his Contributions, but a note therein, at the foot of pages 59 and 60, quoted from Churchill's Collection of Voyages, London 1732, Vol. I, Fo. 272, mentions that Navarette, writing about the middle of the 17th Century, says that there circulated at Colombo a particular coin for the country like that they had at Malacca — a reference evidently to these D S pieces.

The late Mr. de Campos published an excellent article on these Ceylon Tangas in O Archeologo Portugues, Vol. XI. August 1906, Lisbon.

In 1645 the Goa Mint issued a silver Double Tanga and Tanga, for Ceylon, with the Gridiron of St. Lawrence on the reverse as on the C Lº Tanga of 1640 but with the Mint mark G A instead of C Lº, on the obverse, to show that they had been struck at Goa.

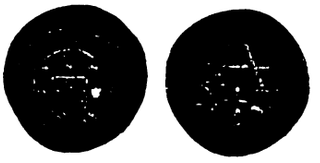


The Double Tanga weighs 4.40 grammes and the single Tanga 2.20.

The Double Tanga is in the British Museum and it is the only known specimen.

In the number of O Archeologo Portugues, above referred to, Mr. de Campos gives an illustration of a single Tanga of this type, dated 1640, belonging to the writer of the present article. The piece in question is, however, a single Tanga of 1645. The 5 of the period was made like S. The lower part of the S is worn off and the upper part, joined to the line circle, looks like O. The pieces of the type were only issued in 1645.

In 1649 a double Tanga of the D S type, weighing 4.40 grammes



was again issued from the Mint of Goa for Ceylon. A single Tanga of this date has not yet been discovered.

Da Cunha, on page 43 of his Contributions, says :

" Ribeiro, in his History of Ceylon, informs us that the Portu-
" guese introduced into the Island the use of pagodas, pardaos and
" larins besides striking there their own Tangas with the Royal
" Coat of Arms on one side and the image of a friar on the other. "

Coins of this type were struck at the Goa Mint, for circulation in Goa, in the reign of D. Filippe III, as well as in the reign of D. João IV — the standing figure of the Saint between the letters S F, in the former case, being the figure of S. Filippe the name Saint of the King; and between the letters S I, in the latter case, representing S. João the name Saint of the King D. João IV. But a Mint regulation of February 8th 1650 stopped the issue of pieces of this type for circulation in Goa, and substituted, for the figure of the Saint, the Cross of the Order of Christ with the date in the angles of the Cross.

But the Double Tanga with the standing figure of the Saint on the reverse was struck in 1650, 1651 1652 and 1653 and with the coat of arms on the obverse between the letters G A — the Mint mark of Goa.

Not being allowed to circulate in Goa they were issued for Ceylon but, in spite of what Ribeiro says, it is very doubtful whether they were struck in Ceylon. The Mint mark of Goa would

Original from CORNELL UNIVERSITY

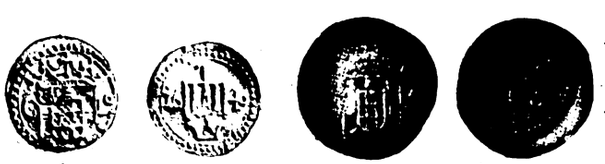
seem to shew that they were struck at the Goa Mint. They are evidently the pieces referred to by Ribeiro, and whether struck at Colombo or Goa are Ceylon Coins. They also weigh 4.20 grammes.

The Saint-type pieces, of earlier date than 1650, circulated in Ceylon and are found with the Dutch-Ceylon Countermark, but they were struck in Goa for Goa, and it is only the pieces dated 1650-53 that can be classed as Portuguese Ceylon Coins.

These pieces, as well as the other double Tangas already described, have generally been called Half Xerafims but the weight proves them to be Double Tangas. The Xerafim of the period was equal to 5 Tangas — each Tanga being of the value of 60 Reis and weighing 2.20 grammes. A Xerafim, of the Saint-type, of D. João IV, in the writer's collection, weighs 10.95 grammes. — Aragão gives the weight of a similar piece as 8.80 grammes — but he had never seen the piece, so could not have weighed it, and so must have guessed at the weight and put it at twice that of the Double Tanga which he thought to be a Half Xerafim. The denomination Double Tanga or Duas Tangas was first introduced in the reign of D. Filippe II of Portugal and is mentioned in Document 56 of Jany : 8th 1614, as given in the work of Aragão. The true half-Xerafim was not issued till 1650 and it then weighed 5.2 or

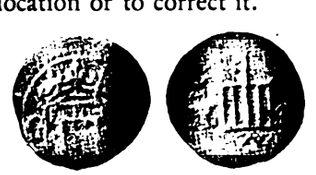
5 3 grammes. It is of the new type with the Cross of the Order of Christ on the obverse instead of the standing figure of a Saint and was struck at the Goa Mint for circulation in Goa.

In 1658 the Dutch captured Jaffna, the last stronghold of the Portuguese in Ceylon, and became masters of the Island. They found most of the above pieces in circulation, so they countermarked them with the cypher VOC of the Dutch East India Company and



allowed them to continue to circulate. These countermarked pieces are doubly Ceylon Coins, being both Portuguese and Dutch Ceylon pieces.

Official documents relating to the two first centuries of Indo-Portuguese Numismatics are scanty and rarely give the type of the coins to which they refer; references to coins, in contemporary chronicles, are frequently contradictory and specimens of the issues are not only sparse and rare but are generally so worn or so imperfectly struck that a part of the design is too often missing. In fact the reconstruction of Indo-Portuguese numismatics of the 16th and 17th Centuries is like putting together an elaborate jig-saw puzzle of which very many of the pieces and the guide-plan have been either mislaid or lost. Pieces have to be allocated, and this can only be done by guess-work, and in the hope that other pieces may turn up to justify the allocation or to correct it.



It may not be out of place here, to mention, for the assistance of those interested in Indo-Portuguese numismatics, that the most useful work on the subject is the late Mr. de Campos' "Numismatica Indo-Portuguesa", published in the *Boletim da Sociedade de Geographia de Lisboa* in 1901 and still obtainable. Unfortunately, however, it is not illustrated.

Henry T. Grogan.

THE COINAGE OF THE REIGN OF HENRY VII.

BY GEORGE B. PETRIE.

Member of the British Numismatic Society.

DESCRIPTION OF THE COINS.

SILVER.

(*Continued from col. 12832.*)

NUMISMATIC SOCIETIES, MUSEUMS &c.

ROYAL NUMISMATIC SOCIETY.

May 18. — Sir Henry H. Howorth K.C.I.E., President in the Chair.

Rev. Prof. H. Browne and Messrs W. Longman, Coleman P. Hyman, and H. Oppenheimer were elected Fellows of the Society while Messrs. R. A. Coates and A. H. Cooper-Prichard were proposed for election. Messrs. Frank E. Burton and Felix W. Warre were admitted.

Mr. W. E. Marsh exhibited a penny of Henry VI. struck at Calais of the transitional type from the "annulet" to the "rosette-mascle" coinages; this denomination of this type was hitherto unknown. Mr. Bernard Roth F.S.A. showed an ancient British quarter stater of the type *Evans* E. 5., found at Bognor, and Gaulish half and third staters of the Unelli, the half stater being the specimen found at Reculver in 1905, described in the *Proceedings of the Royal Numismatic Society* for March 16th of that year and recently acquired by Mr. Roth. Mr. F. A. Walters F.S.A. showed a bronze medallion of Tiberius, struck at Clypaea in North Africa by P. Cornelius Dolabella in 23 A.D. Mr. Henry Garside showed a set of the 1911 maundy money and a pattern half crown of 1875 of the type of the crown. Mr. Grueber exhibited on behalf of Mrs. Cripps of Cirencester, a series of very rare or unpublished bronze coins of Carausius, found at Cirencester, with the reverse types, "Adventus Aug" (Emperor on horseback), "Provid. Augusta" (Providentia seated), "Leg XX Ulpia" (boar), "Invictus Aug." (Sol rushing to l.). There was also shown the Brinton medal of Numismatic and Antiquarian Society of Philadelphia, presented to the Society.

Mr. G. C. Brooke read a paper entitled "Notes on the Reign of William I." in which he gave the results of his comparison of the dies of a large series of coins. A coin of William I, recently attributed to the mint of Berkeley and supposed to be unique, was found to be struck from the same dies as a coin in the British Museum which showed Exeter to be the correct attribution. A comparison of the obverse dies of the coins of this reign had produced results which might be arranged in three classes:, the first showed one obverse die used in conjunction with two or more reverse dies of the same moneyer at the same mint, by comparison of such coins doubtful attributions could be verified and corrected, halfpennies, for example, on which the mint was missing had been thus assigned to their mints. A coin reading 'Spraeclinc on Ci' having the obverse struck from the same die as a Winchester coin of this

moneyer should probably be assigned to Winchester instead of Chichester, the first three letters (Win.) of the mint having been omitted by an engraver's error; a similar ellipse might be seen on a coin reading "Godesbrand on C" (for Sc) having the same obverse as a coin of the same moneyer reading 'on Sch' which showed the mint to be Shaftesbury.

The second class showed several instances of an obverse die used at the same mint by two or more moneyers; this enabled one to locate doubtful moneyers, e. g. Cnihtwine, who had been attributed to St. Edmundsbury, was shown to have used the same die as moneyers of Shaftesbury at which mint he doubtless worked; a Godesbrand was working at both Shaftesbury and Shrewsbury, one using the abbreviations Scf., Sc., C. (for Shaftesbury) with obverse dies used on Shaftesbury coins of other moneyers, and the other Sri, Si (for Shrewsbury) in conjunction with an obverse die used by Shrewsbury moneyers. The third class showed an obverse die to have been sent from one mint to another in the following cases (the earlier mint to use the die in each case was ascertained by the growth of rust and the appearance of scratches or other flaws on the die, by the time its latest coins were struck): — Barnstaple to Exeter, Canterbury to Hythe, Guildford to Chichester, Marlborough to Salisbury, Salisbury to Marlborough (this obverse die was used in conjunction with a reverse which had previously been used with the preceding obverse), Salisbury to Wilton, Wilton to Salisbury, Cricklade to Wilton, Shrewsbury to St. David's, London to Southwark, all these being of the "Paxs" type, also one of the "Pavilion" type from London to Exeter. Another die of the "Paxs" type used at London and Ipswich, one of the "Bonnet" type used at London and Thetford and another of the same type used at Thetford and an uncertain mint (reading "Maint") gave no proof of the mint which was first to use them. The cases where London was one of the mints involved might be explained as instances of the practice mentioned in Domesday of sending dies from London to the provincial mints after a change in the type, a die already used being sent possibly to save the time of engraving a new one. The other cases seemed to show that it was possible for the moneyer to borrow or purchase a die from a moneyer of a neighbouring mint, as in each case the two mints which a die served were in very close proximity except Shrewsbury and St. David's —and Shrewsbury was the nearest or most accessible mint to St. David's as the roads then lay. This would seem to militate against the old theory of all dies being sent from London, a theory based on passages in Domesday which said no more than that this was done when there was a change on the money and supported by the similarity of work seen in coins of all mints, a fact which might be merely due to the careful, almost mechanical, copying of the original dies. Reproductions of mistakes showed dies to be copied carefully and, in some cases, ignorantly, and coarse-cut dies, commonly called 'local work', could be explained as the productions of inexperienced workmen. Traces of alterations of dies were interesting and three such dies seemed to point to an extensive system or forgery by one London moneyer who struck coins of each of the first three types of the reign with dies on which he had partly obliterated his name and made that of the mint resemble another mint (Exeter and Canterbury) probably in the hope of avoiding detection while he issued coins of low weight; his name was not known on coins later than this third type, which perhaps shows that his forgery was discovered.

Mr. A. H. Baldwin said that in his "long-cross" coins of Henry III three out of four moneyers at Northampton used the same obverse die. Mr. L. A. Lawrence suggested that dies might have been made in London, and a puncheon used for making obverse dies, in which case coins struck from two obverse dies which were made from the same puncheon would have the appearance of being struck from the same die. Mr. Brooke in reply, said that in the cases to which he had referred traces of rust and other flaws showed the coins to be struck by one die and not by two dies made from one puncheon.

BRITISH NUMISMATIC.

May. 24. — Mr. Carlyon-Britton, President, in the chair. — The Leicestershire Architectural and Archæological Society and Messrs. Frank B. Burton, Cumberland Clark, A. L. Cocke, and Eugene G. Courteau were elected to membership. Mr. Henry Symonds read a paper entitled 'The Coinage of Mary Tudor; illustrated from the Public Records', which, as its title suggested, was the outcome of personal research of the rolls and manuscripts of the period preserved at the Public Record Office and elsewhere. The author's studies had brought to light many documents new to our knowledge of the reign, and others which had been but partially abstracted; for example, an indenture upon which the proclamation of August 20, 1553 was based, had been omitted from the Close Rolls, and so had hitherto remained unpublished, yet it formed the basis of Mary's English coinage. From the new light thus brought to bear upon his subject, Mr. Symonds was able to clear away many uncertain problems concerning the issue, quality, and quantity of her money; and in particular, to raise the suggestion that neither the angel, angelet, nor groat of Philip and Mary was issued prior to the commission of 1557. The monograph similarly treated the coinage for Ireland during the period, and the documentary evidence pointed to the inference that the money was actually coined in London for export to Dublin. In illustration of his paper Mr. Symonds showed Irish shillings of 1553 weighing 84 $\frac{1}{5}$ grains and of 1555 136 $\frac{3}{10}$ grains and the groat of 1557, 47 grains.

At the instance of Major Freer there was an exhibition of war medals and orders of which he read descriptive notes. Mr. S. M. Spink showed the remarkable and unique series of orders and medals awarded to Wellington's colleague Sir George Murray, including his Peninsular gold cross with six clasps, the field officer's gold medal for Corunna, Talavera; and eight other orders. Major Freer exhibited Lord Canning's bullion star of the Bath, and series of orders and medals awarded to Sir Henry Harvey, and Sir John Paul Hopkins, of which the Peninsular medal with seven bars was one, and to Admiral Sir Edward Collier.
